Instructions To Purchasers

WHEN ordering Beans, Corn or Peas to be forwarded by mail, be sure to add 6c per pound for POSTAGE in first and second zones. For third zone add 7c per pound, for all other zones add extra

Packets and half pounds of Beans, Corn and Peas are sent postpaid at prices quoted, and all other varieties of Vegetable and all Flower Seeds will be forwarded free by mail at Catalogue Prices unless otherwise noted. Grass Seeds; Clover Seeds; Miscellaneous Seeds; Plants; Tools and Supplies are not sent free by mail—see Parcel Post

postage in proportion. See Parcel Post Rates.

Order Early. It will greatly facilitate shipments if orders are sent early. We aim to send off all orders the day received.

Send the Money with the Order. Postal Note, Postoffice Order, Registered Letter, Express Money Order, or Draft on Cincinnati or New York. United States Postage Stamps will be received for small amounts; be exceedingly careful about the least moisture getting on them when remitting, as they sometimes reach us so stuck together as to be almost worthless.

We do not send C. O. D. Everything being plainly priced, the return charges on money is an unnecessary expense.

Should you change your address, we will esteem it a favor if you will notify us, so we can forward our Catalogue with regularity; if you receive two Catalogues of the same kind, please hand one to some friend who has a garden.

Should an error occur, we desire to be promptly informed, and will take pleasure in naking satisfactory corrections.

Write your Name and Address distinctly and in full; please use the Order Sheet and Envelope inserted in this Catalogue.

PARCEL POST RATES

All parcels of seeds, bulbs and plants, up to and including 8 oz. at the rate of 1c for each 2 oz. regardless of distance; over 8 oz., at the Zone Rate. All merchandise other than seeds, bulbs and plants up to and including 4 oz. in weight can be sent at the rate of 1c an ounce regardless of distance. Over 4 oz. at the Zone Rate.

NOTE:—When estimating postage on goods not included in our free delivery, bear in mind that while the packing on one pound may only weigh the fraction of a pound, it must be considered as a full pound when adding postage. On larger quantities add postage in proportion.

tities add postage in proportion.

Limit of weight for delivery within local, first, second and third zones is 70 pounds; to all other

zones, 50 pounds.

When larger quantities are wanted we can pack in two or more parcels if necessary, provided money is remitted to cover postage.

Poisons cannot be sent by mail. Liquids and goods packed in glass should be sent by Express.

The J. M. McCullough's Sons Co., give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Trade Marks Registered, McCullough's Seeds, XXXX, Buckeye, Suburban Lawn Grass, Central Park Lawn Grass

WITH this issue of our Annual Catalog and Amateurs' Guide, we enter upon the 82nd year since the founding of our business by the late Mr. J. M. McCullough.

We believe that a perusal of this catalog will convince you that in keeping abreast of the times we have introduced several distinctive features and in a conservative manner have confined ourselves strictly to well established facts in connection with every article described, carefully eliminating all extravagant phrases that might tend to mislead.

Our President, Mr. H. B. McCullough, devotes his entire time and energies to the general management of our business, ably assisted by a competent force of expert department managers whose experiences and knowledge of the business have been developed and matured during the past forty years, thus presenting to the purchasing public a combination embracing every safeguard, such as is rarely encountered in a business of any character.

OUR policy adopted many years ago of carefully eliminating all undesirable varieties of GARDEN SEEDS has been an important factor in maintaining our high standard of quality for over three quarters of a century.

When ordering BEANS, CORN OR PEAS to be forwarded by mail be sure to add 6c per pound for POSTAGE in first and second zones. third zone add 7c per pound; for all other zones add extra postage in proportion. See postal rates, second page of cover. Packets and half pounds of BEANS, CORN and PEAS and all other VEGETABLE SEEDS offered in PACKETS, OUNCES, QUARTER POUNDS and POUNDS are sent postpaid at prices quoted, except where otherwise noted.

ARTICHOKE

THE Globe Artichoke is cultivated for its flowerheads, which are cooked like Asparagus. Plants set in any good soil with slight covering in winter, will remain in bearing several years. Seeds may be sown indoors and plants potted same as the Tomato, and set out in May, or can be sown in hills outside, and thinned out to one plant in each hill. Large Green Globe ...

ASPARAGUS SEED

One ounce will produce about 400 plants.

A NY good loamy, not too weedy, garden land is good for growing the plants. Sow in rows 12 to 15 inches apart, as early in Spring as the ground is in fit condition and give good cultivation; also thin the plants to stand 2 or 3 inches apart. Deep, warm, rich, loamy soil, deeply and thoroughly stirred, is required for permanent bed. Use manure and fertilizers freely. Make furrows 4 or 5 feet apart and 6 to 8 inches deep. Set the one or two-year-old seedlings 2 feet apart in the bottom of furrows and cover lightly at first. Gradually fill in with soil and old compost. In early Spring fork or plow the bed shallow and carefully, or pulverize the surface by harrowing. Give clean cultivation until fall; then cover with manure or compost. Second season after planting, hill up the rows, especially for blanched "grass," and cut sparingly for use. After that the bed will give full crops. Palmetto. An early, prolific and very desirable variety.

Pkt., 5c; oz., 10c; 1/4 lb., 30c.

Columbian Mammoth White. Large, white stalks. Pkt., 5c; oz., 10c; ¼ lb., 30c.

Conover's Colossal. Large and productive....Pkt., 5c; oz., 10c; 1/4 lb., 30c.

Argenteuil. This variety is largely grown in France for the Paris market. The stalks grow to a mammoth size. Pkt., 5c; oz., 10c; 1/4 lb., 30c. Barr's Mammoth. A fine large-stemmed green variety..... .Pkt., 5c; oz., 10c; 1/4 lb., 30c.

ASPARAGUS ROOTS (See Plants and Roots, end of the Vegetable Seeds.) "UNITED STATES FOOD ADMINISTRATION LICENSE NUMBER G-18737."

BEANS Dwarf or Bush

One pound will plant 50 feet of drill-60 to 120 pounds per acre.

WHILE the Bean is a very tender plant and, therefore, should not be planted until there is no more danger of frost, still it often pays to take some risks. Plant in a warm, loamy soil at the beginning of warm weather in Spring and at intervals for succession until August. Rows may be made 2 feet apart and the beans planted 2 inches deep and a few inches apart in the rows, or 3 to 4 beans in hills 6 to 8 inches apart.

Cultivate and hoe frequently, always, however, when the vines are perfectly dry; working them when wet with rain or dew will cause them to rust and injure the crop. In hoeing, draw the soil up towards the rows or plants. For String Deans gather the pods clean as soon as fit for use. The plants will remain all the longer in bearing.

All varieties of Beans, pkt., 5c. All packets and half pounds of Beans are sent postpaid; for larger quantities by mail, see "Postage" page 1.

Green-Podded Varieties

McCullough's Norwood Stringless Green Pod.

This variety is superior to any other green-podded bean grown. It is positively stringless, and ripens a week

earlier than the Valentine. The pods which are produced in abundance on the vines, are long, straight, round, deeply saddle-backed, brittle, tender and of real good flavor. Has a much larger pod than the Valentine.

Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$3.75.

McCullough's Improved Round Pod Red Valentine.

Our stock of this is extra choice. This variety is usually ready to pick in thirty-four

days after planting. The pods are very thick and fleshy, of finest quality and unequaled in uniformity of ripening, which latter fact, combined with its earliness, makes it one of the most profitable sorts for the gardener.

Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$3.75.

Black Valentine. This variety is very productive. Pods are extremely long, round and straight, and are quite attractive in appearance. The quality is also good, pods being decidedly tender. Suitable for both early and late planting, being extremely hardy. It will withstand early and late frosts.

Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$3.75.

BEANS

Dwarf or Bush

Green Podded Varieties—Continued

All varieties of Beans, pkt., 5c. All packets and half pounds of Beans are sent postpaid, for larger quantities by mail, see "Postage," page 1.

Bountiful. An improved Long Yellow Six Weeks. Being earlier, hardier and producing better and larger pods and more of them. Pods grow to large size, are broad and fleshy; absolutely stringless, tender, of finest flavor and good appearance. Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$3.75.

Burpee's Stringless Green Pod. This variety is stringless and remains tender and crisp. The pods are pale green, long and straight, perfectly round and meaty, maturing with the earliest of the green pod varieties.

Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$3.75.

Full Measure. Highly recommended as one of the most popular varieties for the Market Gardener. Very early and prolific. The pods are long, straight and handsome; meaty, stringless and of good quality; thick, flat or almost semi-round. Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$3.75.

Improved Refugee, or Thousand to One. Medium or late variety: grown for pickling. Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$3.75.

Tennessee Green Pod. A very recent introduction, very meaty flat pods of large size and good flavor. Dwarf vine with heavy foliage. It is very hardy and an excellent cropper on poor soil or hillside. Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$4.00.

DWARF SHELL BEANS

Horticultural Dwarf. Excellent quality as a shell bean either green or dry. Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$4.00.

White Kidney, or Royal Dwarf. A superior kind for baking, and is also excellent when shelled green. Pkt.,5c; ½ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.15; 15 lbs.,\$3.25.

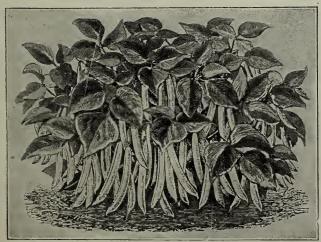

Red Kidney. Similar to White Kidney except in color. Pkt.,5c; ½ lb.,15c; 1 lb.,20c; 5 lbs.,90c; 15 lbs.,\$2.50

White Marrowfat. Grown for sale as a dry bean for winter use; excellent shelled, either green or dry. Pkt.,5c; ½ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.15; 15 lbs.,\$3.25.

cican or Prolific Tree. Grows 18 inches high, branching like a tree, bearing its pods so high that they do not touch the ground.

Pkt.,5c; ½ lb.,15c; 1 lb.,20c; 5 lbs.,90c; 15 lbs.,\$2.50. Mexican or Prolific Tree.

Navy. The old standard sort for winter use. Pkt.,5c; ½ lb.,15c; 1 lb.,20c; 5 lbs.,90c; 15 lbs.,\$2.50.

Golden Wax

Burpee's Stringless Green Pod

BEAN Dwarf or Bush

Wax or Yellow-Podded Varieties

All varieties of Beans, pkt., 5c. All packets and half pounds of Beans are sent postpaid, for larger quantities by mail see "Postage" page 1.

Burpee's Kidney Wax. Plant is robust in growth and produces large crops of long, stringless, fleshy and brittle pods, which are somewhat flattened in form, lemon-yellow in color and of superior quality. Foliage and pods are remarkably free from rust.

Pkt., 5c; ½lb., 20c; 1lb., 35c; 5 lbs., \$1.65.

Round Pod Kidney Wax. The plant grows tall, strong and sturdy, with long, round, handsome, stringless pods of large size, very solid and full of meat, crisp, brittle and free from rust. The earliest and best Wax Bean for either the market or home garden. We recommend it very highly.

Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.65.

den Wax, Improved. One of the best strains of Golden Wax. Prolific, of best quality; pods long, straight, thick and vines very erect. Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$4.00.

is' White Kidney Wax. Very productive, white-seeded, rustless string or snap variety; long, flat pods, which are very tender while long,

young. Pkt., **5c**; ½ lb., **20c**; 1 lb., **30c**; 5 lbs., **\$1.40**; 15 lbs., **\$4.00**.

Wardwell's Kidney Wax. Almost entirely free from rust and spots. The pods are long and showy, very tender, stringless and of excellent quality.

Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.65.

Curries Rustproof Wax. This variety has proven to be practically rust-proof, in addition to which it is unusually prollife, bearing large crops of long, flat, light yellow pods.

Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$4.00.

Black Wax Improved. Very early and prolific; pods round, meaty, brittle and stringless; deep golden yellow and excellent flavor. Bush is of dwarf growth.
Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$4.00.

Black Wax Pencil Pod. Plants grow about fifteen inches high and are extremely productive. Magnificent straight pods six to seven inches long, light golden yellow in color, beautifully rounded, meaty and deeply saddle-backed; flesh brittle, solid and entirely stringless, of fine mild flavor. Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$4.00.

Valentine Wax.

Prices subject to change without notice.

BEANS—Continued

Dwarf or Bush Lima

THE Dwarf Lima class can not be recommended too highly. The Beans can be grown and gathered much more easily than the Pole Limas as the plants require no support. They can also be grown closer together than those of any Pole variety. Dwarf Limas are fully equal in quality to Pole Limas and as a rule are earlier maturing.

Limas require a longer season for maturing than other garden Beans. Do not plant till the ground is dry, weather warm and danger of frost is over. If possible, select rich, light soil. Plant in drills two to three feet apart, dropping the Beans three to four inches apart and covering one and one-half to two inches deep. If planted in hills, make the hills two to three feet apart one way and two to two and one-half feet the other and plant four to six beans in a hill. Hoe often, but only when the leaves are dry.

All varieties of Beans, pkt., 5c.

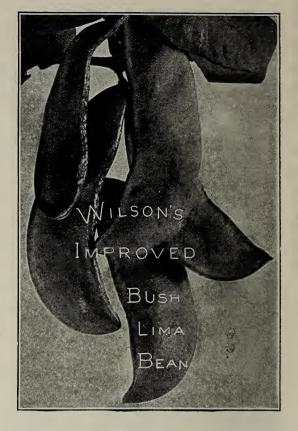

All packets and half pounds of Beans are sent postpaid; for larger quantities by mail see "Postage" page 1.

Wilson's Improved Bush Lima. We consider this variety the best Bush Lima Bean in cultivation. Of strong, upright growth, producing large pods which frequently contain five or more thick, luscious beans. Matures one to two weeks earlier than Burpee's Bush Lima and is more productive, as it continues bearing until frost.

Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.60; 15 lbs., \$4.50.

Fordhook Bush Lima. This is one of the best Bush Lima Beans in cultivation. It has a distinct upright vigorous growth; the pods, which are borne in clusters well above the ground, frequently contain as many as 5 thick, luscious beans. It matures very early and continues in bearing till frost. This is so far ahead of the old strain of Burpee's Bush Lima, that it should be used instead; the bean is thicker, sweeter and earlier, being also more prolific.

Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.60; 15 lbs., \$4.50.

Burpee's Improved Bush Lima. Pods and beans are both larger and thicker than Burpee's Bush Lima, and fully eight days earlier. Plant is a vigorous grower with heavy foliage. Even when of full size the enormous beans are of the most luscious flavor.

Pkt.,5c; ½ lb.,20c; 1 lb.,35c; 5 lbs., \$1.60; 15 lbs., \$4.50.

Burpoc's Bush Lima. This is the true bush form of the old large Lima Pole Bean. It grows vigorously to a height of 18 to 20 inches, forming a circular bush 2 or 2½ feet in diameter, requiring no poles or stakes, yielding from 50 to 100 fine pods, similar to those grown on the large white Lima Bean. Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs., \$1.40; 15 lbs., \$4.00.

Henderson's Bush Lima. For convenience and practical use in the home garden, it is a really good thing. It grows without the aid of poles, in compact bush form, about 18 inches high.

Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs., \$1.40; 15 lbs., \$3.75.

BEANS-Continued

Pole or Running Varieties

All varieties of Beans, pkt., 5c.

All packets and half pounds of Beans are sent postpaid; for larger quantities by mail, see "Postage" page 1.

THE Pole or Running varieties are tender and should be sown two weeks later than Bush Beans. They succeed best in sandy loam, which should be liberally enriched with manure. Form hills 3 to 4 feet apart; plant 6 to 10 beans in a hill, 2 inches deep, leaving space in center for the pole. When well started, they should be thinned to from 4 to 6 plants in a hill. One quart will make 100 to 200 hills, according to size of the beans.

Kentucky Wonder, or Old Homestead (Green Pod). An old favorite, with long, fleshy, deeply saddle-backed pods. Very prolific, producing an abundance of fine, stringless, crisp beans until late in the season. One of the best green pole beans, producing pods in clusters, ready for use about 85 days from time of planting...Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$3.75.

White Kentucky Wonder or Burger's Stringless. This desirable variety is earlier and consequently covers a longer season of productiveness than the Brown Seeded Kentucky Wonder. Pods are borne in clusters and average six to eight inches in length, entirely stringless, uniformly straight, of a dark green color and of mild, sweet flavor. The dry beans are pure white.

Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$3.75.

Cut Short, or Corn Hill. One of the best varieties of Corn Beans in use. Can be used as a snap or shell bean. Considered the best Corn Bean for this section...Pkt..5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$3.75.

Horticultural.
(Wren's Egg, or Speckled Cranberry). This old favorite is an excellent Corn Bean, productive and tender productive and tender.
Pkt., 5c; ½ lb.,
20c; 1 lb., 30c;
5 lbs.,\$1.40;15 lbs.,
\$3.75.

Lazy Wife. An excellent, late, green podded pole bean. Pods of medium dark green color, thick, very fleshy and entirely stringless. The pods remain green and tender until nearly

ite Sickle. Somewhat like the Kentucky Wonder, but has a nice white bean when dry and makes an excellent shell bean for winter. Very popular in the South. Pkt.,5c; ½ lb.,20c; 1 lb.,30c; 5 lbs.,\$1.40; 15 lbs.,\$3.75. White Sickle.

Scarlet Runner. An ornamental climber. Bright scarlet flowers; pods are edible when picked young.

Pkt., 5c; ½ lb., 25c; 1 lb., 40c.

Tennessee Wonder, or Egg Harbor. Large green pods, curved, double barreled, tinged with purple and wrinkled, depressed between each of the eight or nine seeds. Considered one of the largest of all cultivated beans. Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40.

Ohio Wax Pole. Large podded variety, usually 7 inches or more in length, and are so fleshy that they are frequently greater in width than breadth. They are solidly meaty, entirely stringless, and when cooked, deliciously rich and buttery. It commences to bear when scarcely higher than the bush variety, and keeps on producing until killed by frost. It is a rampant grower, one plant filling a pole with a mass of vines densely loaded with luscious beans, almost a solid mass of pods from bottom to top. The finest Wax Pole Bean.

Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.60.

Golden Cluster Wax. The pods are from 6 to 8 inches long, stringless, very tender and of delicate flavor. Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.60.

Prices subject to change without notice.

BEANS-Continued POLE LIMA

All varieties of Beans, pkt., 5c.

All packets and half pounds of Beans are sent postpaid; for larger quantities by mail, see "Postage" page 1.

F all the Pole Beans, Limas are considered to have the greatest economic value. The culture is the same as for other Pole Beans except that being more tender. the seed is usually planted one to two weeks later. Plant in hills about three

feet apart, and one to two inches deep, using five or six seeds to each hill, and set a pole firmly in the center. Manure liberally in the hill with well-decomposed fertilizer. Thin the plants, leaving three in each hill. Many cultivators consider it best. in planting Limas and other flat beans, to place the eye down, claiming in this way

that they will germinate more quickly. Lima Beans for early use may be grown in frames and transplanted.

McCullough's Extra Large Lima

A choice selection of the Large Lima. It produces pods and beans of large size and in great abundance.

This variety is without doubt the best for private ens. The quality is much better than any other gardens.

variety, the beans cooking rich and mealy.

Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$4.00. The earliest variety of Pole Lima; produces pods in Early Leviathan Lima.

clusters. A good variety where the season is short.

Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$4.00.

King of the Garden Lima. A vigorous grower, bearing profusely. The beans are large and of rich flavor. Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$4.00.

Seibert's Early Lima. The earliest of all the large Limas. Vine is hardy and vigorous; large Limas. Vine is hardy and vigorous; continues in bearing longer than any other; fine quality.

Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.40; 15 lbs., \$4.00.

BROCCOLI

Sow in beds middle of spring, transplant and cultivate the same as Cabbage.

Early Large WhitePkt., 10c; oz., 50c. Early Purple Cape........Pkt., 10c; oz., 50c.

BRUSSELS SPROUTS

Sow seed for plants in frames or open ground. Set plants in early spring, and for succession up to July, making rows 3 feet apart and having the plants stand 1 1/2 to 2 feet apart in the row. Cultivate same as Cabbages. Dwarf Improved.....

BEE

Swiss Chard or Spinach Beet. This variety of Beet does not make a large root, and is grown only for its leaves, which make splendid "greens." Can be cut close to the ground and new shoots will spring up and make a fast growth. The broad, white stalks or midribs are cooked and served like Asparagus.

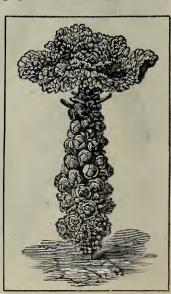

Seed planted in spring will quickly produce plants from which cuttings can be made all summer.

Pkt., 5c: Pkt., 5c; oz., 15c; 16.,\$1.75. Giant Lucullus. This is a decided improvement over the common variety.

The plants grow from 2 to 21/2 feet tall and when fully developed, produce about a dozen creamy white, curled leaves, which are carried on broad thick stalks about 12 inches long. The leafy portion of the plant should be cooked like Spinach and the stalks like Asparagus.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$2.00.

Brussels Sprouts

BEETS

THE soil which is best suited is that which is rather light and thoroughly enriched with ma-nure. For an early supply sow in spring as soon as the ground becomes fit to work, in drills twelve to sixteen inches apart and one Or seed may be sown inch deep. Or seed may be sown under glass four weeks sooner, and the young seedlings transplanted to open ground, to give an extra early

For main crop, sow the first week in May, and for winter use sow in June.

When the plants have attained three or four leaves, thin out so they may stand five or six inches apart. Keep free from weeds by hand-weeding or hoeing.

In October roots may be taken up and stored in the cellar or in pits outside like potatoes, care being taken that they are not bruised or injured in the process

One ounce will sow 50 feet of drill-5 to 6 pounds for an acre.

McCullough's Beet, both for market and the home garden. The roots growing three or four inches in diameter, deep through, smooth and entirely free from small rootlets. Flesh deep blood-red, tender, and of rich flavor. The roots can be used early in the season when only partially grown, being ready for use almost as quickly as the Extra Early sorts and of better quality. It retains its choice quality and freedom from woodiness until the beets have reached their full size. Foliage is small, of a rich bronze color.

Pkt., 5c; oz., 15c; ¼1b., 50c; per lb., \$1.50.

Arlington. A dark-leaved, early blood variety, closely following Eclipse in maturing, but of darker color and superior quality. An excellent Beet for market gardeners. Pkt., 5c; oz., 15c; ½ lb., 50c; per lb., \$1.50.

sano: (The Table Sugar Beet.) A very early flat variety, tender, juicy; flesh white and rose-colored, very sweet. Bassano:

Pkt., 5c; oz., 10c; 1/4 lb., 35c; per lb., \$1.25.

Columbia. One of the finest main-crop Beets. Flesh deep blood-red and of rich flavor. The roots can be used when only partially grown.

Pkt., 5c; oz., 15c; ½ lb., 50c; per lb., \$1.50.

Crimson Globe. A fiandsome early or main-crop variety, of medium size, almost globe shaped and entirely free from rootlets. Foliage rich bronzy purple. The flesh is blood-red, slightly zoned.

Pkt., 5c; oz., 15c; ¼ lb., 50c; per lb., \$1.50.

Crosby's Improved Egyptian. An improved strain of the Egyptian Beet, especially recommended as an extra early sort. It is much thicker than the original strain. Pkt., 5c; oz., 10c; ¼ lb., 35c; per lb., \$1.25.

roit. Color of skin dark blood-red; flesh bright-red, zoned with a lighter shade, very crisp, tender and sweet. Pkt., 5c; oz., 15c; ¼ lb., 50c; per lb., \$1.50. Detroit.

Early Blood. Flesh dark red, a standard round variety with small top.
Pkt., 5c; oz., 10c; 1/4 lb., 35c; per lb., \$1.25.

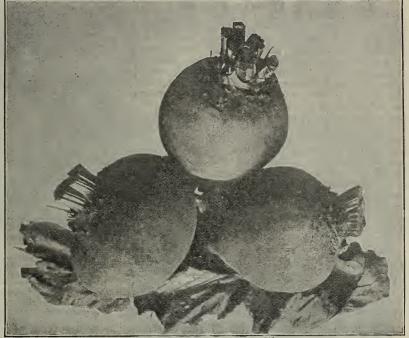

Eclipse. One of the best early sorts, with a small tap root and small collar. Flesh dark red, zoned with a lighter shade, sweet, crisp and tender.

Pkt., 5c; oz., 10c; ½ lb., 35c; per lb., \$1.25.

Edmand's Early. Uniform small top, bronzy red; exceedingly tender and sweet; skin blood-red; flesh dark red. Pkt., 5c; oz., 10c; ¼ lb., 35c; per lb., \$1.25.

Egyptian Extra Early. One of the earliest, of good quality and medium size; a fine forcer; small top.

Pkt., 5c; oz., 10c; ¼ lb., 35c; per lb., \$1.25.

McCullough's "Norwood"

ball. This is a new and distinct extra early Turnip-rooted variety of the finest table quality. The flesh is solid, crisp, sweet, and of a brilliant fiery red color. It is perfectly globular in form with smooth skin, a tiny tap root, and very slender leaf stalks.

Pkt., 5c; oz., 15c; ½ lb., 50c; per lb., \$1.50. Fireball.

Half Long Blood. One of the best for winter use. Roots are only half as long as the Long Blood, but weigh as much on account of their thickness.

Pkt., 5c; oz., 10c; ½ lb., 35c; per lb., \$1.25.

Long Dark Blood.

g Dark Blood. A good late variety for fall and winter use; sweet and tender.

Pkt., 5c; oz., 10c; 1/4 lb., 35c; per lb., \$1.25.

Swiss Chard or Spinach Beet, See page 6.

BEETS—Cattle and Sugar

SUGAR BEETS FOR STOCK

Sugar Beets are not as heavy yielders as the Mangels, but are of superior quality, containing a large amount of sugar. They are excellent for feeding cows, improving wondefully the quantity and quality of the milk. Five to six pounds of seed required per acre.

Vilmorin's Improved. A medium sized white Sugar Beet brought by the most careful selection to the highest perfection, both in shape and color of roots. Greatly esteemed by sugar manufacturers.

Pkt., 5c, oz., 10c; ½ lb., 25c; per lb., 85c.

Lane's Imperial. One of the best for field culture; early, large and productive.
Pkt., 5c; oz., 10c; ½ lb., 25c; per lb., 85c.

Giant Half-Sugar Green Top. Longish ovoid; red skin; white flesh; crisp and fine. Pkt., 5c; oz., 10c; ½ lb., 25c; per lb., 85c.

MANGEL-WURZELS

Fattening, breeding and milk cattle do equally well on them. About one-fourth of the daily rations should be of roots. Sow in rows 2½ feet apart as soon as the ground can be thoroughly worked. Cover seed about 1½ inches, making ground firm over the seed. When 4 inches high, thin to 8 inches apart. Six pounds sow one acre.

Mammoth Long Red. Roots of large size and excellent quality.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; per lb., 60c.

Yellow Globe. Of large size and globular form; very productive.

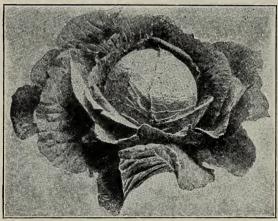

Pkt., 5c; oz., 10c; ½ lb., 25c; per lb., 60c.

Golden Tankard. Bright yellow, large, handsome, heavy cropper, splendid quality.

Pkt., 5c; oz., 10c; ¼ lb., 25c; per lb., 60c.

CABBAGE

FOR plants of the earliest sorts, sow seed in January or February under glass, and prick out in flats or frames about 2 inches apart each way. Transplant to open ground as soon in spring as the land can be properly prepared. A rich, warm, fibrous loam is best. Have the plants in the rows 20 to 24 inches apart, and rows at least 2 feet apart. Give thorough cultivation and irrigate in dry weather if practicable. Protect from the ravages of cutworm, maggot and green worm. A little nitrate of soda applied around the plant is of great benefit. For late Cabbage plants, sow seed in drills in open ground during April and May, and transplant in June and July, giving the plants more room than allowed for earliest Cabbages. Dusting with tobacco dust, insect powder, etc., or splashing with hot soapsuds, especially Fish Oil Soap solution, are good and safe remedies for some of the insect pests attacking plants of the Cabbage. Sow one ounce for 2,000 to 2,500 plants: five ounces for one acre.

McCullough's Early Market

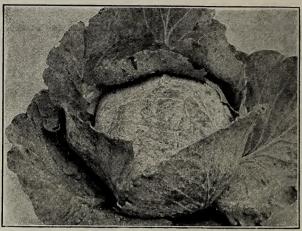

A new, early, round head Cabbage. Will produce double the crop of any other early variety; always extremely solid and fine

ribbed. Once known, it will hold its own with the market gardeners and home growers alike. It is exceedingly tender, fine grained, and as a cropper no earlier Cabbage will approach it. Planted side by side with Early Jersey Wakefield, under the same conditions, the Early Market produced heads of marketable size five to six days earlier and in size fully double that of the Early Jersey Wakefield; was more solid and better flavored and kept in fine condition much longer. It is very dwarf and compact, allowing of close planting. Heads fine, ball-shaped, and with few outside leaves. Size ideal for marketing. (Supply limited.)

Pkt., 10c; oz., 50c; ¼ lb., \$1.75.

Early Jersey Wakefield. This Cabbage, though introduced years ago, still holds its undisputed lead as one of the best extra early varieties in cultivation, and is largely grown as a First Early Cabbage. It is the good, old reliable; always depended upon for its uniformity in earliness and crop. Among its merits may also be mentioned its large size of head for so early a variety and the small outside foliage, allowing it to be closely planted. The heads are pyramidal in shape, having a blunted or rounded peak. We believe our selected stock has no equal.

Pkt., 5c; oz., 40c; 1/4 lb., \$1.50.

McCullough's Early Louisville Drumhead

McCullough's Early Louisville Drumhead

Originated by us many years ago, and is still the peer of all other varieties for early market purposes. It is highly esteemed by the

NOTE:—McCullough's "Louisville Drumhead' Cabbage is so well known and so much sought after that many firms are offering cheap stocks. We have tested many of these and find some entirely untrue and others of inferior strains. Be sure to get our highly selected, genuine type direct from us.

Early Jersey Wakefield

CABBAGE—Continued

Copenhagen Market. It is the earliest large, round headed sort. The ripening is early and uniform, maturing at one time and almost with Early Jersey Wakefield. Considering its early season, the heads are remarkably large. One of its chief features is compactness; its leaves, which are light green, are round, dish-shape and fold tightly together in remarkably compact and solid form; it is so solid that many more plants can be grown on an age than is rossible more plants can be grown on an acre than is possible with most sorts. It has few outer leaves, which permits close planting, and it grows close to the ground on a short stem.......Pkt., 10c; oz., 50c; ¼ lb., \$1.75.

Charleston, or Large Wakefield. For some years past customers have requested us to procure for them, if possible, a Cabbage which had all the characteristics of the Early Jersey Wakefield, but of greater size. The Charleston Wakefield is a larger type, which is now so fixed in its character that we can offer it with confidence to those desiring a Cabbage of this kind. This selection will average about 50 per cent larger in size than the old type of Wakefield, and is only a few

Early Winningstadt. Heads are conical in shape, but more pointed than the Jersey Wakefield and not so early. The leaves are a rich, dark, slightly glossy green and tightly folded, the heads being the hardest of any early Cabbage...Pkt., 5c; oz., 35c; ¼ lb., \$1.25.

ly Summer. A second early with large, solid, flattish heads, coming in a few days later than the Wakefield; a sure header. The plant has a peculiar bluish tinge.

Pkt., 5c; oz., 35c; ½ lb., \$1.25. Early Summer.

All Head, Early. The largest heading of the second early sorts. The deep, flat heads are remarkably solid and uniform in color, form and size.

Pkt., 5c; oz., 35c; ½ lb., \$1.25.

Glory of Enkhuizen. Has become a remarkably popular ry of Enkhulzen. Has become a remarkably popular early, and is regarded as amongst the most important introductions in the cabbage line for some years. It introductions in the caboage line for some years. It is a splendid sort for the private garden and market gardener who grows for high-class trade. It has received popular favor on account of exceptional merit, in several important points. The heads are globeshaped, medium size and handsome dark-green color. just right for market; it is sure heading and is a splendid keeper and early. The quality is excellent, the leaves being fine ribbed. Pkt., 5c; oz., 40c; ¼ lb., \$1.50.

Glory of Enkhuizen

y Dwarf Flat Dutch. This variety has for years been popular among growers, both for home use and Early Dwarf Flat Dutch. market. Heads are borne on short stems and are very large, solid and nearly flat on top. One of the best second earlies as it stands a long time without bursting.

Pkt., 5c; oz., 35c; ¼ lb., \$1.25.

cession. A good second early, round-head sort. Heads are solid, keep well and are of splendid quality; the color is a beautiful light green.

Pkt., 5c; oz., 35c; ½ lb., \$1.25. Succession.

All-Seasons. (Vandergaw). An early Drumhead Cabbage, yielding large, hard, solid and slightly flattened heads. As good for autumn or winter as for early Summer. Pkt., 5c: oz., 35c: 1/4 lb., \$1.25.

Surehead. This is a good strain of late Flat Dutch. having great reliability for heading. The heads grow large and are of good texture. It is also a good keeping variety.......Pkt., 5c; oz., 35c; ¼ lb., \$1.25.

McCullough's Premium Late Flat Dutch

McCullough's Premium Late Flat Dutch

A variety for winter market; has no superior. Heads large, round, solid, broad and flat on top.

They open white and crisp, are tender and well-flavored. The best variety for keeping. Out stock has been carefully selected for several years. No better strain on the market. Pkt., 5c; oz., 35c; 1/4 lb., \$1.25.

Large Late Drumbead. A favorite winter variety. The heads grow to very large size and heavy weight. They are solid, of good quality and texture, and have few loose leaves......Pkt., 5c; oz., 35c; ¼ lb., \$1.25.

Autumn King. A fine strain of late Cabbage. It produces regular, even heads of enormous size, with few outer leaves......Pkt., 5c; oz., 35c; 1/4 lb., \$1.25.

Danish Ballhead. (Danish Grown). Heads of good marketable size, averaging about 8 pounds, nearly round, solid and superior quality. The strong growth of this variety enables it to withstand dry weather well. As a keeper it excels all others, the heads taken out in the spring being in every way in as good condition as when stored...Pkt., 5c; oz., 40c; 1/4 lb., \$1.50.

Danish "Roundhead." It is slightly larger and produces more weight to the acre than Ballhead. The foliage is rather lighter in color; the handsome hard heads are beautifully white when trimmed. The heads are produced about ten days earlier, and while perfectly globular or round in form are not quite so deep through; that is, not so elongated or balloon-shaped as the Ballhead. It is shorter stemmed than the Short-Stemmed Ballhead, which is sometimes sold as Danish Roundhead. The magnificent hard heads are splendid keepers and bring the highest prices on market in winter. Pkt., 5c; oz., 40c; 1/4 lb., \$1.50.

RED CABBAGE

Early Red. Extremely early and valuable for pickling. Pkt., 5c; oz., 40c; 1/4 lb., \$1.50.

Late Giant Red. A large heading, late variety, fine for pickling......Pkt., 5c; oz., 40c; 1/4 lb., \$1.50.

Mammoth Rock Red. The largest and most solid of the red varieties; a sure heading sort and tender.

Pkt., 5c; oz., 40c; 1/4 lb., \$1.50.

CABBAGE—Continued

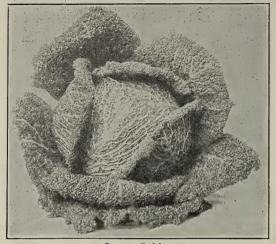

SAVOY CADBAGE

THEY are particularly adapted to private use, where quality rather than quantity is desired. Grown in fall and allowed to be touched by frost, it is one of the most delicious of all vegetables.

Early Dwarf Ulm Savoy. One of the mess.

Heads solid and with few outer leaves.

Pkt., 5c; oz., 40c; ½ lb., \$1.50.

Savoy Cabbage

American Drumhead Savoy. Heads large and very finely curled; short stalk and compact grower; an excellent keeper.....Pkt., 5c; oz., 40c; ¼ lb., \$1.50.

PE-TSAI, CHINESE OR CELERY CABBAGE

THE Seed
we offer is
the true
variety which
has been
growninChina
for many years. This new

vegetable is a species of Cabbage with a fine delicate flavor and resembles a stalk of Celery more than a head of Cabbage. is as tender as Head Lettuce and is rapidly coming into general use for salads or cold slaw. Can also be eaten raw aten may be The or may be cooked. The many uses to which it can be put as a "high toned vegetable" is bound to make it popular with

It popular with the public as well as the market gardener. This delicious vegetable may be grown in any soil that will grow good Cabbage, but to attain perfection should be grown in cool, moist and very rich soil.

Seed should be sown about the first of August in rows 24 to 36 inches apart, thinning to 15 inches apart in the rows.

CAULIFLOWER

FOR early use, sow in hotbeds in January and February. When plants are large enough, transplant three inches apart in boxes or other hotbeds until time to plant out. If hardened off they are seldom injured by planting out as early as the ground can be worked, 2½ feet apart each way. When practicable, seed may be sown in rich soil from the middle of September to middle of October, and transplanted in frames; protect during severe weather and give light and air on mild days. The early varieties should be brought to maturity before summer heat sets in. The late sorts mature in the autumn and are cultivated same as winter Cabbages.

One ounce of seed will produce about 3,000 plants.

plants.

The manifest of the survey of the survey had can be planted on an acre. For pickling it is the standard variety. The compact hab't, the plants may be set out 20 to 22 inches each way, so that from 12,000 to 14,000 can be planted on an acre. For pickling it is the standard variety. The compact hab't can be planted on an acre. For pickling it is the standard variety. The compact and solid texture of the snow-white heads, combined with delicious flavor, surpass all others.

Pkt., 25c; ½ oz., \$1.25.

Early Snowball. (True.) An ex-

Early Snowball. (True.) An extremely early dwarf variety, producing magnificent white heads, of fine quality. Well adapted to hot-bed culture. Pkt., 20c; ¼ oz., 90c; oz., \$3.00.

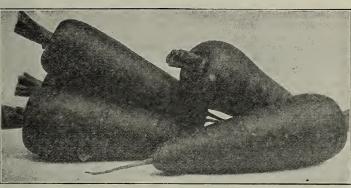

Danish Giant. A large heavy sort, maturing soon after Dwarf Erfurt. It is without exception the best and surest heading of all for summer use. Pkt., 20c; ½ oz., 90c. Early Paris. Heads large, white compact and solid; tender and delicious.

Pkt., 10c; 1/4 oz., 30c; oz., \$1.00. ormand's. A large, late, short-stemmed variety, with well-formed Lenormand's. white heads. Pkt., 10c; ½ oz., 30c; oz., \$1.00.

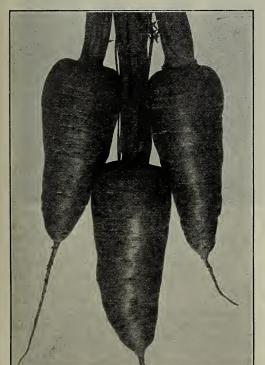

CARROTS

A light sandy loam, well-tilled and manured the previous year, best suits he Carrot. For early crop sow as early as the ground can be worked, in drills 10 inches apart, and thin, 5 inches in the rows. The Early Market, owing to its extreme earliness, is used for hotbed culture. The late sorts, long and half-long varieties (main crop), sow from middle of May until first of July in drills 12 to 14 inches apart. Thin out to 6 and 7 inches in row. Keep the hoe at work. Carrot seed is slow to germinate. One ounce will sow 100 feet of drill-3 to 4 pounds for an acre.

Early Market, Stump-rooted. A very choice strain, tender, fine-grained flesh. enormous producer, handsome, uniform

stumped roots. Considered by many to be the best table Carrot, because of its quality and shape; free from core and of a deep golden yellow color. Can be sown thick, and consequently well adapted for frame culture. A most excellent

McCullough's Intermediate

An early red summer variety; fine grained Early Scarlet Horn. and good flavor...........Pkt., 5c; oz., 15c; ¼ lb., 50c.

It is about 6 inches long, thick through and decidedly stump-rooted. In size it is between the Oxheart and Danvers. The flesh is a deep orange red, fine-grained and of a splendid flavor. It is very early and always produces smooth shapely roots. Its fine appearance finds for it a ready market; its splendid table qualities keep it in demand. Our strain of seed is unsurpassed......Pkt., 5c; oz., 15c; 1/4 lb., 50c.

Danvers. A cylindrical-shaped Carrot of good size and stumprooted, rich, dark orange color, grows to a large size, smooth and the flesh very close in texture with little core.

Pkt., 5c; oz., 15c; 1/4 lb., 50c.

Improved Rubicon. It grows about same length as the Danvers, but thicker and a rich dark orange color. It is an enormous cropper and a splendid variety for the market gardener.

Pkt., 5c; oz., 15c; 1/4 lb., 50c.

Oxheart or Guerande. Intermediate length; is fully 3 to 5 inches in diameter; quality extra good. Some sorts require digging, but the Oxheart can be easily pulled. It is especially

adapted to shallow soils, where the longer sorts would not thrive as well.

Pkt., 5c; oz., 15c; 1/4 lb., 50c.

Nantes Half-Long Scarlet. stump-rooted variety, having little or no core. Flesh red and of fine flavor.

Pkt., 5c; oz., 15c; 1/4 lb., 50c.

McCullough's Intermediate

A large. handsome main - crop variety. It

is the connecting link between half-long and long Carrots, with a

yielding capacity in deep soils equal to any of the longs. The root, 10 or 12 inches in_length, is very broad at the neck, 2 to 3 inches through, and tapers evenly to the small tap-root. It grows smoothly and uniformly and combines with its other merits rich reddish-orange flesh, tender, sweet and entirely free from woody coarseness even at

Improved Long Orange. A standard late variety; deep orange color. It is of excellent table quality and is highly nutritious for stock.....Pkt., 5c; oz., 10c; ¼ lb., 35c.

Improved Giant Short White. The heaviest cropping Carrot grown. white, solid, crisp and sweet; the roots are short and heavy at the shoulder, which allows them to be harvested easily. Grown for stock...Pkt., 5c; oz., 10c; ¼ lb., 35c.

The lower part of the root is white; that growing and exposed above ground, green. It is exclusively grown for stock..Pkt., 5c; oz., 10c; ¼ lb., 35c.

Danvers

CELERY

O grow early Celery, sow the seed late in March in a hotbed or box; and for later crops, as soon as the weather becomes warm, sow in the open ground, cover lightly, or better still, roll or press it in. Shade the young plants for a week or ten days, and do not let the soil dry out. The tops may be shorn off once or twice before planting, so as to insure "stocky" plants, which will suffer less on being transplanted. from four to six inches high, transplant into broad, shallow trenches, or on the level ground, setting the dwarf sorts into rows three feet apart, and the tall varieties four feet apart and six inches apart in the rows. The soil should be light. highly manured, partially shaded and moist, or near water, as the plants must be freely watered in dry weather, but it should not be put directly on them. Earthing up checks growth and should not begin until quite well grown, then earth up gradually. keeping the leaf stalks close together, so that the soil may not fall into the center of the plant, but never earth up in wet weather, nor when dew is on them. That intended for winter and spring use needs little banking; when stored for winter it will naturally blanch beautifully white.

One Ounce Will Produce About 2,500 Plants.

McCullough's Paris Golden Yellow Extra selected stock, unsurpassed. We have been furnishing our customers this strain of Paris Golden Yellow Celery

for a number of years and it is pronounced by one and all the finest strain they have ever seen. The color is a rich golden yellow, stalks are very solid and tender, flavor is delicious, has large heart, grows medium height, and is without doubt the best early Celery on the market. The demand for our strain of this variety is increasing every year and we advise our customers to order early, as supply is limited. We are confident you can not obtain anywhere a strain of Paris Golden Yellow Celery superior to our own particular selected stock.

Pkt., 10c; oz., \$1.00.

Golden Self-Blanching. An early, desirable sort, requiring but little labor to blanch. The heart is a rich, golden yellow, with light, yellowish-green outer leaves.

Pkt., 5c; oz., 35c; ¼ lb., \$1.25.

White Plume. Is unsurpassed for fall and early winter use, requiring very little earthing up to blanch it.

Pkt., 5c; oz., 30c; 1/4 lb., \$1.00.

Easy Blanching. Stalks thick, brittle and excellent flavor. Adapted to early use as well as storing for winter. Thuse who have not been successful with other sorts, should give this a trial......Pkt., 5c.; oz., 40c; ¼ lb., \$1.50. Giant Pascal. A superior keeping sort. The stalks are very large, thick, solid, Crisp, and of rich nutty flavor. It blanches very easily and quickly, and retains its freshness a long time.......Pkt., 5c; oz., 25c; ¼ lb., 75c.

Celeria

Colden-Hearted Dwarf. A popular variety. Handsome color, medium size, fine flavor.....Pkt., 5c; oz., 25c; ½ lb., 75c.

Cnow White. A pure white, self-blanching variety. Vigorous growth, ease of blanching, size, richness of flavor, crispness and purity, makes it an ideal Celery.

Pkt., 5c; oz., 30c; 1/4 lb., \$1.00.

Triumph. The best late Celery. A strong and vigorous grower, with very large but crisp, brittle, tender and fine flavored stalks......Pkt., 5c; oz., 25c; ¼ lb., 75c.

Celeriac, Turnip Rooted Celery

Sow early in spring. Transplant in May into rich, mellow soil in rows eighteen inches apart and six inches in the row. Grown mostly for its bulbous root.

Large Erfurt. When sliced, with vinegar and oil, makes a delicious salad......Pkt., 5c; oz., 25c; ¼ lb., 75c.

COLLARDS

A species of Cabbage, forming a mass of leaves on a tall stem, very popular in the Southern States as boiling-greens during the winter months, and also furnishes green forage for poultry and stock during winter. Cultivation same as Cabbage.

Pkt., 5c; oz., 15c; 1/4 lb., 40c.

CORN, Sweet or Sugar

THE Sweet or Sugar varieties, being liable to rot in cold or wet ground, should not be planted before May or until the ground has become warm, and for a succession continue planting every two weeks until the middle of July, in rich, well manured ground, in hills 3 feet apart each way, covering about half an inch, and then thin out to 3 plants to a hill, or plant in rows 4 feet apart, and to stand 8 inches apart in the rows.

One pound will plant 200 hills—10 to 12 pounds per acrs. All varieties of Corn, pkt. 10c. All packets and half pounds of Sugar Corn are sent postpaid; for larger quantities by mail see "Postage" page 1.

The illustration represents a matured ear of our Cincinnati Market or Club Zig-Zag Evergreen Corn. can readily infer now juicy this Corn is when the kernels are filled with milk.

McCullough's Cincinnati Market which originated or Club Zig-22g Evergreen. In this market and was introduced by us, has become the best seller on the Cincinnati market. A late Zig-22g Evergreen Corn, the ear ordinarily being twice the size in diameter of any other sort, while in sweetness and flavor it cannot be excelled. Pkt.,5c; ½ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.00; 15 lbs.,\$2.75.

This new variety

mo. The best extra early variety. It can be planted early, as the young plants will withstand slight frosts. The stalks are strong and vigorous, growing about 5 feet in height, bearing one or two fine ears to a stalk. The ears are large for so early a variety. The grains are of medium size, well filled to each end of the ear. and of a fine sweet flavor.

Pkt.,5c; ½ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.10; 15 lbs.,\$3.00.

Early Sheffield. Very early variety. The stalks are strong and vigorous, bearing one or two fine ears to a stalk. The ears are large and entirely free from smut. The grains are of medium size, 10 or 12 rowed, well filled to each end of the ear; juicy, and of a fine

Pkt.,5c; ¼ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.15; 15 lbs.,\$3.00. Kendal's Early Giant. Very early, fit for use 60 days from planting. Ears large, 8 to 10 inches in length, twelve rows to a cob. Kernels pure white, sweet and tender.

Pkt.,5c; ¼ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.15; 15 lbs.,\$3.00.

Golden Bantam. It is not only the sweetest, but also one of the hardiest. The ears are from 6 to 7 inches long, eight rowed, filled with broad, sweet, golden yellow kernels of a delightful flavor. It may be planted with perfect safety ten days earlier than other Sweet Corn. One of the best sorts for successive plantings. Pkt.,5c; 1/4 lb.,15c; 1 lo.,25c; 5 los.,\$1.15; 15 los.,\$3.00.

Mammoth White Cory. An extra early sweet corn. Ears, twelve-rowed; twice the size of the old Cory. white-cobbed and covered with large white grains of

extra quality.
Pkt.,5c; ¼ lb.,15c; 1 lb.,25c; 5 lb.,\$1.15; 15 lbs.,\$3.00.
Early Minnesota. Very early, ears of fair size and good

guality.

Pkt., 5c; ¼ 1b., 15c; 1 1b., 25c; 5 1bs., \$1.15; 15 1bs., \$3.00.

Crosby's Early. A great favorite; productive and of excellent quality.

Pkt., 5c; ¼ 1b., 15c; 1 1b., 25c; 5 1bs., \$1.15; 15 1bs., \$3.00.

Early Mammoth. A second early variety. The ears are of large size, kernels large and very sweet.

Pkt., 5c; ¼ 1b., 15c; 1 1b., 25c; 5 1bs., \$1.15; 15 1bs., \$3.00.

Bantam Evergreen. A cross between Golden Bantam and Stowell's Evergreen. An excellent sort of fine quality.

Ears 8 inches long, 12 rowed, grain rather broad and deep, of a rich golden-yellow color.

Pkt., 5c; ¼ 1b., 15c; 1 1b., 25c; 5 1bs., \$1.15; 15 1bs., \$3.00.

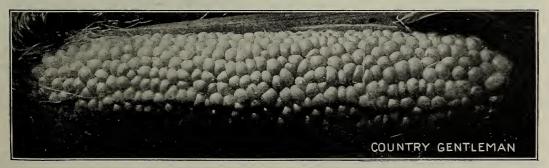

Early Evergreen. An early strain of Evergreen of great value. This variety resembles the Stowell's Evergreen. but is ready for use much earlier, and remains in good condition equally as long. The ears grow to a good size, usually about 7 inches long, and contain from 16 to 18 rows of deep, sweet grains.

Pkt., 5c; ¼ 1b., 15c; 1 1b., 25c; 5 1bs., \$1.00; 15 1bs., \$2.75.

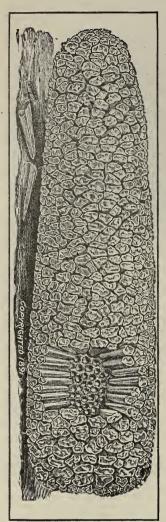

Long Island Beauty. A most prolific variety, quality extra good. One of the most desirable sorts for late planting. A great favorite with Long Island market growers.

Pkt., 5c; ½ 1b., 15c; 1 1b., 25c; 5 1bs., \$1.15; 15 1bs., \$3.00.

planting. A great favorite with Long Island marked growers.
Pkt.,5c; ½ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.15; 15 lbs.,\$3.00.
Country Gentleman. One of the richest flavored of all the late varieties. As a table Corn this variety stands unrivaled, and without doubt is the most luscious of all varieties of Sweet Corn. The plump, pearly-white kernels are of great depth. We have selected this sort for many years and it comes as true to type as any we have ever seen. Ears average 9 inches long by 2 inches in diameter.
Pkt.,5c; ½ lb.,15c; 1 lb.,25c; 5 lbs.,\$1.15; 15 lbs.,\$3.00.

CORN, Sweet or Sugar—Continued

Zigzag Evergreen

Stowell's Evergreen. Standard variety, both for home use and market, and is the general favorite. The ears are of a large size, grains deep; exceptionally tender and sugary and has the advantage of remaining longer in the green state than any other.

Pkt., 5c; ½ lb., 15c; 1 lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.53.

Narrow Grain Evergreen. Similar in all respects to Stowell's Evergreen, but has very narrow grains. Pkt., 5c; ½ lb., 15c; 1 lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.50.

White Evergreen. A valuable main crop variety, vigorous growth. The ears very large and uniformly well filled to the tip with long, slender grains of the purest whiteness and most delicious sweet flavor. Pkt., 5c; ½ lb., 15c; 1 lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.50.

Zig-Zag Evergreen. This is one of the sweetest and best late Sweet Corns. The ears are as large as those of the Evergreen, but the kernels are placed irregularly or zigzag upon the cob, which is always an indication of great sweetness. Pkt., 5c; ½ lb., 15c; 1 lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.50.

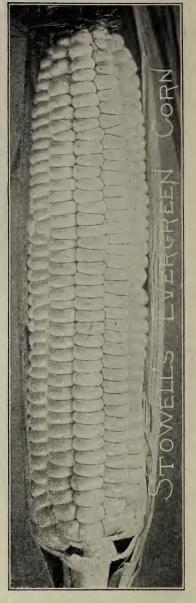

Mammoth Sugar A late variety, producing ears of very large size and fine flavor.
Pkt., 5c; ½ lb., 15c; 1 lb., 25c; 5 lbs., \$1.00; 15 lbs., \$2.50.

Black Mexican. Black-grained variety; sweet, tender; must be picked young to avoid a black appearance when cooked.
Pkt., 5c; ½ lb., 15c; 1 lb., 25c; 5 lbs., \$1.15; 15 lbs., \$3.00.

GARDEN CORN

Adams' Extra Early. The hardiest and earliest variety for table use, but not a Sugar Corn; can be planted earlier than any other corn. Pkt., 5c; ½ lb., 10c; 1 lb., 15c; 5 lbs., 70c; 15 lbs., \$1.85.

Adams' Early. While not a Sugar Corn, is a tender white Corn for the table; can be planted earlier and will be ready in sixty days.
Pkt., 5c; ½ lb., 10c; 1 lb., 15c; 5 lbs., 70c; 15 lbs., \$1.85.

CORN SALAD, or Fetticus

USED as a salad winter and spring. Sow in spring, in drills one foot apart; will mature in six to eight weeks. For winter and early spring use sow in drills in August and September. Cover with straw on the approach of winter, the same as Spinach.

One ounce will sow 20 square feet—6 pounds for an acre.

Large Seeded. The most satisfactory to grow;

Pkt., 5c; oz., 15c; 1/4 lb., 40c.

CHIVES

UCUMBERS

FOR very early Cucumbers, sow April 1st, in a hotbed upon pieces of sod (grass side down), so that they can be readily transplanted to the open ground, in rich soil, when danger of frost is over, or protect by handglasses. For early use, plant, if the weather has become settled and warm, in hills 4 to 6 feet apart each way; thin out to four of the strongest plants to each hill, after all danger from insects is over. They succeed best in a warm, moist, rich, loamy soil. Continue planting at intervals for a succession. The Cucumbers should be gathered when large enough for use, whether required or not: if left to ripen, it destroys their productiveness. For pickles, plant from June until the middle of July. The yellow-striped cucumber or squash beetle is the most serious insect enemy of this crop.

Bordeaux Arsenate of Lead Mixture is by far the best remedy yet discovered.

Bordeaux Arsenate of Lead Mixture is by far the best remedy yet discovered.

Dilute it with water, 3 ounces to the gallon, and spray it on the vines when in danger of the beetle or blight.

Use one ounce of seed to 50 hills, 2 to 3 pounds per acre.

McCullough's Special cumber for both forcing and outdoor grows 11 to 15 inches long, slim, slightly pointed, a dark glossy green color, which they keep until ripe. In quality it is very tender, brittle and of fine flavor. A vigorous grower, withstanding blight better than other long sorts.

Pkt., 5c; uz., 15c; ¼lb., 40c; per lb., \$1.50.

Ohio White Spine. This is the best strain of extra early White Spine for the market gardener's out-door growing. It is hardy and an excellent shipper. It is extensively grown in the South for shipping North, early in the season. Fruit grows 7 to 10 inches long, of a deep green color, and full at both ends.

Pkt., 5c; oz., 15; ½ lb., 40c; per lb., \$1.25.

Early Cluster. A much esteemed early variety; growing in clusters; is extremely productive.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.03.

Improved White Spine. The favorite market variety, and extensively grown South for shipping North early in the season. The fruit grows from 7

and extensively grow in the scason. The fruit grows from 7 to 10 inches long, is quite smooth, of a deep green color and full at both ends. Pkt., 5c; oz., 10c; ½ lb., 35c; lb., \$1.00.

Early Frame. A good variety for pickling and table. Medium size. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., \$1.00.

Green Prolific. One of the best pickling varieties; dark green, tender, and crisp;

tender, and crisp; very productive. Good for table use. Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.03. Evergreen. One of the best varieties for slicing, as it is crisp and of good quality; and as it produces fruit of medium size, it is good for pickling purposes.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.

Jersey Pickle. As a pickling variety is unsurpassed. Its characteristics are its uniform growth and its immense productiveness. . . Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., \$1.00.

Long Green Improved. A standard late sort, fruits 12 to 14 inches long, slender, more or less warted, tapering towards the stem end; color dark green, flesh white and firm. Excellent for table and makes a hard, brittle pickle. Extra selected stock.

Pkt., 5c; oz., 20c; ¼ lb., 50c; per lb., \$2.00.

Davis Perfect. Splendidly adapted for growing either under glass or in the garden. In color, a dark, glossy green; shape, slim and symmetrical, with an average length of 10 to 12 inches. They are as early as the earliest strain of White Spine.

Pkt., 5c; oz., 15c; ½ lb., 40c; per lb., \$1.25.

Early Fortune. The finest type of White Spine. Early and very productive; fruit grows 9 inches long, slightly tapering, flesh white, firm and crisp with very few seeds; color dark green. Quality is excellent, either for the table, or pickling.

Pkt., 5c; oz., 15c; ½ lb., 40c; per lb., \$1.25.

Long Green. A standard late sort, crisp and tender, very prolific, excellent for the table and makes a hard, brittle pickle.

pittle pickle. Pkt.,5c; oz.,15c; ¼lb.,40c; per lb., \$1.25.

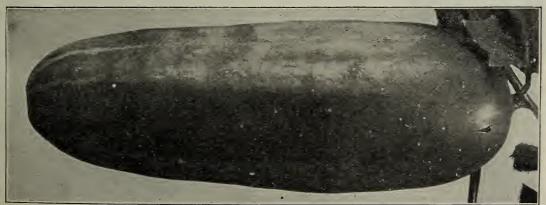

Nichol's Medium Green.
One of the best for pickling, and excellent for forcing or slicing. Always
straight and smooth. In
length it is between White
Spine and Long Green.

Pkt.5c;oz.,10c; ¼lb.,30c; per lb., \$1.00.

It is suitable for growing either in

Japanese Climbing. It is suitable for growing either in frames or in the open ground. It is very early and exceedingly productive. The fruit is excellent either for the table or pickling... Pkt., 5c; oz., 15c; ½ lb., 50c. Gherkin. A very small prickly variety, used exclusively for pickling, for which purpose they should be gathered while young and tender Pkt.,5c; oz.,15c; ½ lb.,50c.

ENGLISH FORCING CUCUMBER

Ohio White Spine

Long Green Improved

CHICORY

Large Rooted or Coffee. Grown for the large, thick roots, which are dried, roasted and ground as a substitute for Coffee. Soil should be light, rich and deeply worked. Cultivation the same as Carrots.

Pkt., 5c: oz., 25c.

Witloof Chicory, or French Endive. Seed should be sown in the open ground not later than June in drills twelve to eighteen inches apart, thinning plants so they will stand about three inches apart. The plant forms long, parsnip-shaped roots, which should be lifted in the fall, and after cutting off the leaves store in soil in a cool place until wanted for forcing. To force, plant closely in trenches deep enough to permit covering the roots with soil 8 inches deep. If quicker growth is desired mulch with manure 2 feet deep. Requires four to five weeks to force. The blanched head is the edible portion and should be cut with a portion of the neck attached to it. The principal use of Witloof is as a winter salad, and it is most delicious served with French dressing and eaten like Cos Lettuce.

Pkt., 5c; oz., 30c.

CRESS, Water and Garden

S OW thickly in shallow drills early in the spring, and at intervals throughout the season for a succession, as it soon runs to seed. Water Cress requires a stream of running water, ditch, or pond, in which it will grow without care, except at first keeping weeds from interfering with it.

Extra Curled or Peppergrass. Fine flavor, and the best sort for dry soils....Pkt., 5c; oz., 10c; 1/4 lb., 30c.

Erfurt Water Cress. A most desirable and appetizing salad, thriving best in shallow water, on the edges of streams......Pkt., 10c; oz., 35c.

EGG PLANT

SEED is of slow germination and requires a moderate amount of heat. Should be started in hotbeds and not checked after starting to grow. When 2 or 3 inches high they should be potted in 3-inch pots and not set out in the open until nights are warm. Plant about 3 feet apart and keep well watered.

One ounce of seed will produce about 1,000 plants.

Black Deauty. This new variety is an excellent market sort. It is about the same size and shape as the New York Improved, except a little fuller at the top; is a few days earlier and a heavier yielder. Its color is a rich purplish black, which it retains even after becoming ripe......Pkt., 10c; oz., 50c; 1/4 lb., \$1.75.

New York Improved. A leading market variety. Pkt., 10c; oz., 50c; 1/4 lb., \$1.75.

ENDIVE

NE of the best and most wholesome salads for fall and winter use. Sow in shallow drills in April for early use, or for late use in June or July. When 2 or 3 inches high, transplant into good ground, or thin out to one foot apart. When nearly full grown they must be blanched. This is done by gathering the leaves together, and tying with yarn or bass, to exclude the light and air from the inner leaves, which must be done when quite dry, or they will rot. One ounce of seed to 150 feet of row.

Broad-Leaved Batavian. Leaves broad, light green, nearly plain, used in stews and soups.

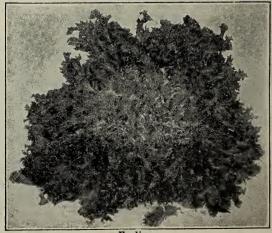

Pkt., 5c; oz., 15c; 1/4 lb., 50c. Green Curled. Very hardy, crisp and tender.

Pkt., 5c; oz., 15c; 1/4 lb., 50c. Moss Curled. It is excellent for winter use.

Pkt., 5c; oz., 15c; 1/4 lb., 50c.

White Curled. Coarser than Green Curled, but the mid-rib is yellow and the leaves frequently almost

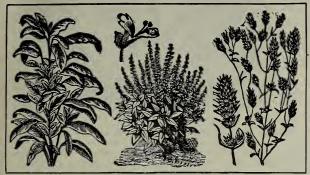

French Endive. (Witloof Chicory.) See Chicory.

Endive

GARLIC

A BULBOUS rooted plant of the Onion family; very desirable for flavoring both cooked vegetables, soups, etc., as well as salads. Garlic does not have seed and is planted from small bulbs only. Plant same as Onions in rows 8 to 12 inches apart; set bulbs 4 inches apart in the row, covering 2 inches deep. When the leaves turn yellow, take up the bulbs, lay in the shade and store in a dry loft as you would onions..... Bulbs, 1/4 lb., 15c; per lb., 40c.

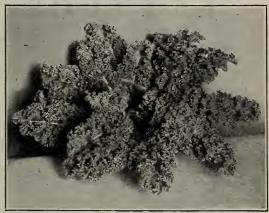

Sweet Basil

Thyme

HERB SEEDS

Sow early in April or May in a sheltered, well-prepared spot in the open ground, either broadcast or in shallow drills about 7 inches apart. Thin out the plants thus raised, and keep clear from weeds.

Anise. Biennial	Pkt.,	5c;	oz., 20c

Sweet Marjoram	Pkt., 10	0c;	oz., 50c
Thyme. Annual, 1 foot	.Pkt., 1	0c;	oz., 50c

Kale or Borecole

KALE OR BORECOLE

THE Kales are more hardy than Cabbage, make excellent greens for winter and spring use and are improved by frost. Sow from May to June, and cultivate the same as Cabbage. For early spring use, sow in September, and protect during the winter.

One ounce to 300 ft. of row-4 pounds to an acre.

McCullough's Market Gardener's Special

beautiful curled A crimped variety of strong vigorous habit, perfectly perfectly hardy, bright green color and very attractive in appearance.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

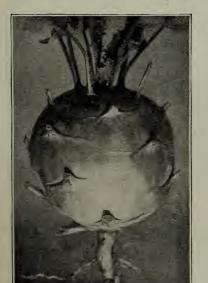

Norwood Dwarf Curled. A beautiful curled and crimped sort, of strong, vigorous habit, attractive appearance and a bright green color. It is superior to all other sorts, and is, undoubtedly, the best for private gardens. It rarely exceeds 12 inches in height, but spreads out under good cultivation to 2 feet in diameter.

Pkt., 5c; oz., 20c; 1/4 lb., 60c; per 15., \$2.00.

Dwarf Curled Siberian. Leaves yellowish-green, finely Sow in September for the early winter and curled. spring use.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; per lb., 75c.

Tall Scotch. Leaves green, beautifully curled and wrinkled -grows about 2 feet in height; hardy, being improved by frost. . Pkt., 5c; oz., 29c; 1/4 lb., 60c; per lb., \$2.00.

Kohl-rabi

KOHL-RABI (Turnip Rooted Cabbage)

FOR an early crop, start in a hotbed and treat the same as early cabbage. May also be sown as soon as the ground can be worked in spring. For winter use, sow the middle of June.

The edible part is the bulb, which grows on a stalk a few inches above the ground.

One ounce of seed for 1,500 plants.

Early White Vienna. The flesh is white and tender....Pkt., 5c; oz., 30c; ¼ lb., 75c.

Early Purple Vienna. Differs from the above in color.....Pkt., 5c; oz., 25c; ⅓ lb., 70c.

LEEK

Sow early in April, in drills one foot apart, one inch deep. When the plants are six to eight inches high, transplant in a deep, rich soil in rows twelve inches apart and six inches in the rows, as deep as possible, so that the neck may be covered and blanched. Draw the earth to them as they grow. The seed may also be sown in September, and the young plants transplanted in the spring.

Large American Flag. This is by far the best variety. It grows to a good size and is wonderfully uniform. Pkt., 5c; oz., 20c; ½ lb., 75c.

London Flag. An old and popular sort; one of the hardiest; best for winter use. Pkt., 5c; oz., 20c; ½ lb., 75c.

Large Musselburgh. Of enormous size; leaves large and broad; very mild; pleasant flavor. Pkt., 5c; oz., 20c; ½ lb., 75c.

LETTUCE

Sow the seed in hotbeds or flats during February or early March, prick the young seedlings out in flats or cold frame 4 inches apart each way, and in spring, transplant the well-hardened plants in rows a foot apart, allowing 8 to 12 inches space between the plants in the row. For succession, sow seed thinly in open ground, and thin the plants to 5 or more inches apart. Sow for succession every few weeks until fall.

One ounce will produce about 3,000 plants.

Head Varieties

The finest home garden and market variety. Its beautiful yellowishgreen color, crimped, curled and well favor, place it at the head of the list for the market gardener or family use. It withstands the heat of summer and retains its sweetness for a long time....Pkt., 5c; oz., 15c; ¼ lb., 50c.

All Seasons. A large, medium late sort; heart well bleached; leaves broad, smooth and thick; color light grayish-green, never spotted or brownish; quality excellent.

Pkt., 5c; oz., 15c; ¼ lb., 50c.

Teaharg. A large, late crisp. Cabharg-heading variety: heads

Iceberg. A large, late, crisp Cabbage-heading variety; heads firm and hard, leaves broad and light green in color, with faint brown tracing on the borders. Quality good. Pkt., 5c; oz., 15c; ½ lb., 50c.

Heads solid with broad leaves; the best for outdoor or for forcing. Color light green. We have made a specialty of this variety and have a stock that can Big Boston.

Big Bostofi

Wavahead

not be surpassed.....Pkt., 5c; oz., 15c; 1/4 lb., 50c.

May King. An early, fine variety for spring and fall use in the open garden, also for growing in cold frames during the winter months. The heads are 6 to 7 in the open garden, also for the state of the during the winter months. The heads are 6 to 7 inches in diameter, with light green outer leaves. The inner leaves are blanched to a golden yellow. Pkt., 5c; oz., 15c; ½ lb., 50c.

It is not only earlier than May King, and other fine early varieties, but the tightly folded heads are generally larger in size. The outer leaves are a light green, with the inner head finely blanched to a rich buttery yellow.

Pkt., 5c; oz., 10c; 1/4 lb., 50c.

son. Heads green with white heart. Large size, crisp, tender.....Pkt., 5c; oz., 10c; ¼ lb., 40c. Hanson.

Tennis Ball, White Seeded. Extensively grown for forcing under glass; good size, firm heads. Pkt., 5c; oz., 10c; ½ lb., 40c.

low-Seeded Butter. A distinct sort, making a compact yellow head, of excellent flavor, with-Yellow-Seeded Butter. stands heat well and remains crisp and tender. Pkt., 5c; oz., 10c; ¼ lb., 40c.

Curled Varieties

nd Rapids. This is probably the best of the loose-leaved varieties. It never forms a head, but produces an abundant crop of pale green leaves, slightly but closely crumpled, which, even when old, retain their characteristic tenderness and brittle character. We strongly urge those who cannot succeed in getting lettuce to head to grow Grand Rapids.

Pkt., 5c; oz., 15c; ½ lb., 5oc.

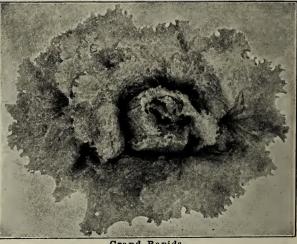

ite Star. A crisp, loose-heading variety, leaves broad, crumpled and twisted. Color very light green. Pkt., 5c; oz., 15c; ½ lb., 50c. White Star.

ck Seeded Simpson. One of the most popular sorts. It forms large, loose leaves of ideal color; the leaves are large, thin, very tender and of very good quality. It is one of the best sorts for use under glass as well as for early outdoor planting. Black Seeded Simpson. Pkt., 5c; oz., 10c; 1/4 lb., 40c.

y Curled Simpson. Does not head, but forms a close, compact mass of leaves; very early, excellent for forcing......Pkt., 5c; oz., 10c; ½ lb., 40c. Early Curled Simpson.

Early Curled Silesian. Early, loose heads, curled, tender and fine flavor.....Pkt., 5¢; oz., 10¢; ¼ lb., 40¢.

Prize Head. Produces large, loose heads, finely crimped and fringed leaves, outer portions shaded brown; crisp, sweet and tender...Pkt., 5c; oz., 10c; ½ lb., 40c.

Grand Rapids

Very distinct, excellent for summer use and for the SouthPkt., 5c; oz., 15c; ¼ lb., 50c. Oak Leaved.

Romaine, Cos, or Celery Lettuce

These are distinct from the ordinary Lettuce, and much liked on account of their crisp, tender quality and delicate flavor. They produce long, narrow leaves, which are blanched by drawing in the outer leaves and tying.

Paris White Cos. One of the best varieties for blanching; very tender...........Pkt., 5c; oz., 15c; ¼ lb., 50c. Trianan Self-Folding. A self-blanching Cos Lettuce, very crisp and tender, and of excellent flavor.
Pkt., 5c; oz., 15c; ½ lb., 50c.

MUSKMELONS

IN selecting a patch for melons be careful to have it at a safe distance from your Squashes, Cucumbers, Pumpkins, etc., or they will certainly mix. In preparing the hills fork in plenty of manure, and about the middle of May, when the ground is warm, plant in each hill eight or ten seeds, and cover half an inch deep. After the danger from bugs is over, pull all but three or four of the strongest plants. As soon as the vines have run sufficiently and plants. As soon as the vines have run sufficiently and spread their branches—stop them by pinching the top off the first running bud. This will strengthen the plants and promote their perfecting fruit early. The ground should be kept free from weeds and frequently cultivated.

One ounce will plant about 50 hills; 2 to 3 pounds in hills per acre.

Honey Dew. All the claims of the introducer of this delicious Melon have been fully realized. Average size is about six to eight inches in diameter and they weigh five to six pounds. Skin smooth with little netting and of creamy yellow color when ripe. Flesh is green, thick, melting, fine grained and can be eaten almost to the rind. Not easily bruised and stands shipping long distances. Easily pulled when ripe and will keep for several weeks. Matures about ten days later than the Rocky Ford.....Pkt., 10c; oz., 30c; ½ lb., \$1.00.

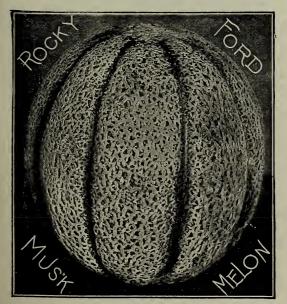

cky Ford. A variety extensively grown in Colorado. The reasons for the widespread popularity of these melons are their superb table and wonderful shipping qualities, which enable them to be carried great distances, and yet arrive in first-class condition for market. The fruit is of medium size, oval shaped, heavily netted and very solid. The flesh is green, thick and juicy. It is early and wonderfully productive.

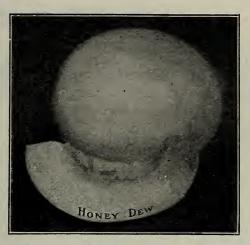

Pkt., 5c; oz., 15c; ¼ lb., 40c.

Delicious Gold Lined. It is the result of several years careful selection by a progressive grower. The shape of this Melon is ideal, being slightly oval and it is heavily netted over the entire surface. The flesh is as thick at the bloom end as elsewhere, and the flesh of the entire Melon is noticeably thick, fine grained and sweet. The color is green with a gold margin next to the seed cavity. It is attractive, both as to outward appearance and when cut.

Pkt., 5c; oz., 20c; 1/4 lb., 60c.

form any existing kind. There are just as many leaves on the plant as on other kinds, but these grow so compactly that the plant can be grown on one-half the space usually required. Notwithstanding its departure from existing types it is by no means a freak. The fruit is fully equal in quality to the old and justly esteemed Jenny Lind, which is probably the best flavored of all green-fleshed sorts. They are produced in abundance, in fact we advise that each plant be allowed to ripen only about one-half of the fruit, as it is apt to bear too many...Pkt.,5c; oz.,20c; ½ lb.,60c.

kensack. Melons grow to large size and attractive appearance. Flesh green, very sweet and sugary. Outer skin is heavily netted. Hackensack.

Pkt., 5c; oz., 15c; 1/4 lb., 40c.

1 Rose. Cross between the old Netted Gem and Miller's Cream and combines the good qualities of both. The flesh is salmon colored, very deep and of fine melting character, with thin, tough rind and small seed cavity. The flavor is excellent, sweet and rich. Pkt., 5c; oz., 15c; 1/4 lb., 40c.

Tip-Top. A yellow-fleshed melon of handsome appearance and excellent quality. A medium sized Muskmelon, nearly round in shape, with shallow netting on skin. The flesh is deep yellow and has a rich flavor.

Pkt., 5c; oz., 15c; 1/4 lb., 40c.

Osage, or Miller's Cream. A favorite salmon-fleshed variety. Large oval, slightly ribbed and netted; skin is very dark green. Flesh is very thick and sweet flavored, most delicious to the rind. A great favorite for both market purposes and the home garden.

Pkt., 5c; oz., 15c; 1/4 lb., 40c.

Burrell Gem. A superior, new, orange-fleshed, shipping melon. Of splendid flavor, sweet and aromatic; oblong in shape, smoothly rounded ends, closely netted and slightly ribbed, dark green skin. Rind thin, but very tough; flesh exceptionally deep, rich salmon-orange color. Fruits average 6 inches long by 4 inches deep. Very fine for marketing.

Pkt., 5c; oz., 15c; ½ lb., 40c.

Emerald Gem. Ripens early; medium size; nearly round; flesh a delicate salmon color, very thick, fine grained, and very few melons can compare with it in superb flavor. The rind is thin, dark green, ribbed, slightly netted.....Pkt., 5c; oz., 15c; ½ lb., 40c.

ny Lind. The earliest variety; netted, of small round size; excellent flavor. The vines do not grow as large as some the other varieties, but are quite productive, and it is a favorite early variety.

Pkt., 5c; oz., 15c; 1/4 lb., 40c.

Improved Green Nutmeg. A large melon, nearly round, deeply ribbed, flesh thick, light green, delicious flavor. Pkt., 5c; oz., 15c; 1/4 lb., 40c.

ne. Medium size, oval, slightly pointed at end, ribbed, covered when ripe with coarse netting. Flesh thick, green, very fine flavored and sweet.

Pkt., 5c; oz., 15c; 1/4 lb., 40c.

tana. A long, smooth skinned variety, growing something in the shape of long squash. Fruit about 12 inches long, salmon flesh, which is very sweet, luscious and tender. Rather late maturing. Has a delicious odor......Pkt., 5c; oz., 15c; ¼ lb., 40c.

WATERMELONS

One ounce for 30 hills-4 to 5 pounds for an acre.

WHILE a sandy loam is preferable for Watermelons they can be grown on a loamy soil having a clay subsoil, provided it is deeply plowed. When ground is warm, plant 6 to 8 seeds in hills 6 to 10 feet apart each way and cover about 1 inch deep. When well up, thin out to 2 vines in each hill. Do not plant on land where Watermelons were grown before, as the vines exhaust elements in the soil which makes succeeding crops defective.

Watermelons are slightly less subject to "bug" depredations and disease attacks than Muskmelons. At the same time they are more easily hurt by strong spray mixtures, and caution in the use of such mixtures is advisable.

Excel. Will produce more large, marketable melons under the same conditions than any of the other sorts of the long variety and its carrying and keeping qualities are unsurpassed. Fruit oblong in shape, dark green color with tracings of light green. Flesh deep red, crisp and tender. Weight, 35 to 60 pounds.

Pkt.,5c; oz.,10c; 1/4 lb.,30c; per lb.,\$1.00.

Tom Watson. An extra long melon of attractive appearance, uniform in shape and quality. The luscious crimson flesh is "as sweet as honey" and of superb flavor. The average melon will weigh 30 to 40 pounds and measure about 28 inches long and about 12 inches in diameter. It is very prolific.

Pkt.,5c; oz.,10c; $\frac{1}{4}$ lb.,30c; per lb.,\$1.00.

Kleckley's Sweet. While the skin is perhaps too thin to admit of the melons being shipped very great distances to market,

it is most desirable to plant for home use or local markets. The melons themselves are very large, oblong in form, with dark green skin, thin rind, which is very brittle. Flesh is bright scarlet, with solid heart, deliciously crisp.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.

Cole's Early. A very early variety. Large heart, flesh of fine texture and good flavor. Rind thin. Fine for the home garden.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Jumbo or Shakers Blue. Melons grow very large and are a round oval in form, from 16 to 18 inches long by 12 to 15 inches in diameter. The skin is dark green, striped with narrow bands of a lighter green, and when ready for shipping the melons are seemingly of a solid dark-green color. Flesh is red, the heart large with no core, and the flavor superb.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Fordhook Early. The fruits are of good size, rather short and blocky in form, with large diameter. Skin dark green, occasionally with faint stripes of lighter green. Rind quite thin, but skin tough, making an excellent shipping variety. Flesh bright red, crisp, sweet, and of splendid quality.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.

Kolb Gem. Probably the most extensively grown for long distance shipping of any Watermelon ever originated. The flesh is bright red and of good flavor. Melons large, of very thick, oval, blocky form; skin handsomely marked in stripes of light and dark green.

Pkt., 5c; oz., 10c; ½ lb., 25c; per lb., 75c.

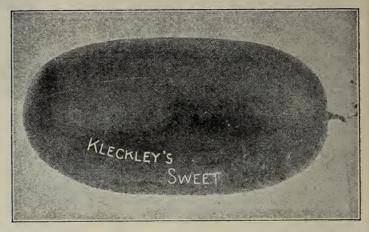

Dixie. A cross between the Kolb Gem and old-fashioned Mountain Sweet, surpassing the former in earliness, productiveness and shipping qualities.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Gray Monarch. Large size; the skin is a mottled gray; shape long; flesh bright crimson and of sweet, delicious flavor...Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Kentucky Wonder. Shape oblong, attaining a good size; skin dark green and beautifully marked. Flesh a beautiful rich scarlet color, crisp, rich, sugary, always firm and solid.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Halbert Honey. A very sweet, long, dark green variety. Fruits average 18 to 20 inches long, have a thin rind and deep red meat of delightfully delicious flavor; seeds white. One of the finest for the home garden. Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.

Duke Jones. The color of the skin is solid green, flesh bright red, sweet, juicy and melting.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Florida Favorite. Oblong in shape, growing to large size; rind dark, with light green stripes; flesh light crimson, crisp and deliciously sweet.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Sweetheart. Flesh bright red, solid, and tender. Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Cuban Queen. Flesh bright red, tender and melting, luscious, crisp, very sugary.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Dark Icing, or Ice Rind. A very solid sort with a thin rind, and possesses most delicious flavor.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Blue Gem, or Iceberg. Grows large. Flesh a beautiful shade of pink, darker than Kolb's Gem, heart large and flesh extends close to the outer skin, sweet and delicious...Pkt.,5c; oz.,10c; ½ lb.,30c; per lb.,\$1.00.

Long Light Icing. The skin a mottled gray color, shape long, flesh bright crimson and sweet.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Peerless, or Ice Cream. Of medium size; skin light mottled green; flesh scarlet.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Pride of Georgia. Dark green color, almost oval. Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Rattlesnake, or Gypsy. Fruit large, oblong, striped; flesh red.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1 00.

Colorado Preserving Citron. Flesh white and firm. Pkt., 5c; oz., 10c; ¼ lb., 30c.

MUSHROOM SPAWN

MUSHROOMS can be successfully and profitably grown during the months and spring frames under greenhouse benches, in the open fields, or in cellars or outhouses. To cultivate mushrooms successfully does not always require extensive experience. Some care is necessary, however, in the selection of materials, and in forming the beds; but the matter of securing and maintaining the proper temperature in the room and in the beds needs close attention, for success depends very much upon this point. Mushrooms may be grown in a great variety of situationsa dark room, cellar, stable or elsewhere. Any place in which an even temperature of about 50 to 60 degrees can be kept is suitable. For material for the bed, use fresh horse manure, free from straw or chips, and good loamy soil. Some growers use the manure mixed with loam, after first having well fermented it by alternately piling it and mixing for a few weeks, but it is undoubtedly better not to allow

the manure to heat much before forming a bed. one-fourth to one-third loam, the rest manure. Mix very thoroughly and upon a dry, firm bottom make the bed of this mixture, about four feet wide and of any desired length. Build it up evenly, press it down firmly, and leave it about a foot high. It will shortly begin to heat. Use a thermometer to thrust into the bed and note the temperature. When the heat has partially subsided, leaving a temperature of 80 degrees put in the spawn. Pieces from the size of walnuts to that of eggs are placed in the bed about a foot apart, deep enough to cover them well, and the manure pressed down. Let it remain thus ten or twelve days, then cover with two inches of fresh loam, and make this moderately firm. The bed is finished by covering all with four or five inches of straw or other litter. Watering is not necessary, unless the surface of the bed gets very dry; in this event moisten freely with water at a temperature of about 90 degrees. In gathering the crop, do not cut, but twist them off carefully, filling up the holes carefully with loam to keep insects from the roots. In six or eight weeks from spawning the beds, mushrooms should appear.

One pound of Spawn is sufficient for a bed 2 x 6 feet. We supply many of the largest commercial growers in the United States and have on hand at all times in the season fresh Spawn of the best manufacture.

In the United States and have on hand at all times in the season fresh Spawn of the best manufacture.

English Milltrack Mushroom Spawn. Our celebrated English Milltrack brand (made by the best maker in England specially for our trade) has gained an enviable reputation among critical growers for its uniform good quality, and can be thoroughly relied upon to produce a good crop of the best Mushrooms. Commercially, it is more planted than any other Spawn. It comes in pressed bricks weighing about 20 ounces. They are broken into pleces the size of a walnut and put sidewise in the beds 10 to 12 inches apart each way. Prices, by express—customer to pay charges. Per brick, 25c; per lb., 20c; 10 lbs., \$1.25; 100 lbs., \$12.00. By mail, 30c per brick, postpaid.

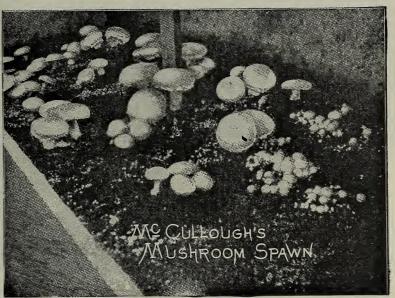

American Made Pure Culture Mushroom Spawn. A very superior article, made in this country from carefully selected spawn, which it is claimed is much more vigorous than the imported article, and will produce Mushrooms of a very superior quality and flavor. The popularity of Pure Culture Spawn is increasing rapidly and many of the large growers are now using it. They claim it is a surer crop. Amateurs have much the best results with this kind. By express—customer to pay charges—per brick, 30c; 5 bricks, \$1.25; 100 bricks, \$20.00. By mail, 35c per brick; 5 bricks, \$1.50, postpaid.

Mushroom Culture. (Wm. Falconer.) The most practical work on the subject: \$1.00.

Mushroom Culture. (Wm. Falconer.) The most practical work on the subject; \$1.00.

Treatise on Mushroom Culture. 10c, or given with an order of 10 lbs. of Mushroom Spawn.

Special prices will be given to those who use Mushroom Spawn in quantity.

MARTYNIA—For Pickles (Gemschorn, Ger.)

The young and tender seed pods make a very fancy pickle. These pods are of curious shapes and bear abundantly. They should be gathered when less than half grown. Sow in the open ground in May, in hills 3 feet apart each

Martynia Proboscidea......Pkt., 5c; oz., 30c.

MUSTARD (Senf, Ger.)

One ounce will sow 100 feet of drill

A small, pungent salad used like Cress. The seed is also used for flavoring pickles, pepper sauce, etc. For salads sow thickly in shallow drills, 6 inches apart, or in frames or boxes during the winter, where frost can be partially excluded. Successive sowings can be made every week or two. To grow seed, sow in April, in rows 1 foot apart, and thin out to 3 inches apart when 2 inches high.

white English. Best for salads.
Pkt., 5c; oz., 10c; ¼ lb., 25c.

Chinese, or Giant Southern Curled. The large leaves, which often measure 14 inches, are ready for use in about six weeks after sowing. Leaves are eaten boiled, like Spinach.......Pkt., 5c; oz., 10c; ½ lb., 25c.

OKRA, OR GUMBO (Ocker, Ger.)

This vegetable is extensively grown for its green pods, which are used in soups, stews, etc., to which they impart a rich flavor, and are considered nutritious. Sow the seed thickly in rich ground, about the middle of May, or when the ground has become warm, in drills 3 feet apart, 1 inch deep; thin to 12 inches apart in drills. Culture otherwise much like Corn.

Perkins Mammoth. An exceedingly handsome variety of Okra, which is a great improvement upon other varieties heretofore grown. The pods grow 4 to 5 inches in length and are very tender, long, slim and of a beautiful deep green color. The habit of growth of plant is dwarf, and it is very productive.

Pkt., 5c; oz., 10c; ¼ lb., 25c.

White Velvet. Distinct in appearance; the large pods are perfectly round, smooth, an attractive velvety white, of superior flavor and tenderness. Plants dwarf, of compact, branching growth; very prolific.

Pkt., 5c; oz., 10c; ¼ lb., 25c.

Dwarf Green. The best of the dwarf sorts. It makes a stocky growth of plant and is very productive. The pods are long, slender and of a light green color.

Pkt., 5c; oz., 10c; ½ lb., 25c. It makes a active. The

g Green. Taller than the preceding, bearing long, ridged pods. Highly esteemed in the South. Pkt., 5c; oz., 10c; ½ lb., 25c Long

ONION SEED

FOR sets, drill the seed thickly as early as possible in the spring. As soon as the tops dry off in the summer, remove to a dry, airy place. May also be grown to full size the first season by sowing thinly in drills one foot apart and one-quarter inch deep, in March or early April, thinning to three or four inches apart.

By sowing in frames in February or March and transplanting in April, onions of immense size can be obtained. For this purpose the Southport Globe varieties (white and yellow) and Prizetaker are usually preferred. Onions delight in a strong, rich, deep loamy soil, and succeed well if grown successive years on the same ground. same ground.

One ounce for 150 feet of drill. 5 to 6 pounds for one acre. Onion seed for sets, 30 to 40 pounds per acre.

Yellow Globe Danvers. The best onion for general use. A standard sort and one of the most desirable; an excellent keeper and very productive. Our strain of this variety is the true globe shape, and not of the flat type. Onion growers throughout the country prefer this type of onion to all others, and it is with this in view that the bulbs from which our seed is grown are especially and carefully selected as to shape. It is the best paying onion that is grown for general crop, and has been the leading variety for years. Pkt., 5c; oz., 20c; ¼ lb., 70c.

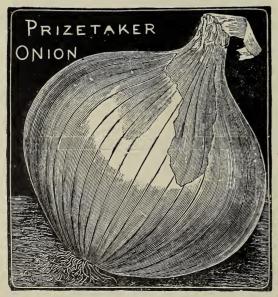

tetaker. The large size and handsome appearance of this Onion makes it equally desirable for the home garden or for market. It is strictly "fancy", and will be found on fruit stands during the fall, where it is sold as Spanish Onion. The true Prizetaker is globeshape, has pale-yellow skin and white flesh, which is very mild and of delicate flavor. No sets are required, as the large Onions are grown the first year from seed sown during early spring.

Pkt. 5c; oz.. 25c: ½ lb. 75c. Pkt., 5c; oz., 25c; 1/4 lb., 75c.

Yellow Danvers. Bulb of good size and flat, the standard yellow onion for market or home use, being both early and an enormous yielder as well as good keeper.

Pkt., 5c; oz., 15c; 1/4 lb., 50c.

Yellow Dutch, or Strasburg. A good keeper and well flavored; bright straw colored skin and somewhat

flattened shape. The Onions grow to a good size and are very mild. This variety is largely grown for sets on account of its excellent keeping qualities.

Pkt., 5c; oz., 15c; ½ lb., 50c.

Large Red Wethersfield. Grows to full size the first season from seed. The Onions are large, flat in shape, with skin of a purplish-red color and flesh of a purplishwhite color, rather strong-flavored; an excellent keeper.
Pkt., 5c; oz., 20c; ¼ lb., 60c.

Southport Red Globe. Beautiful globe-shape; of medium size, a good keeper and of superior quality. This variety is very popular in some sections.

Pkt., 5c; oz., 30c; ¼ lb., \$1.00.

White Portugal, or Silver Skin. This variety is one of the leading white sorts. The bulbs are flat in shape an i mature early. Largely used for growing sets. Pkt., 5c; oz., 25c; ¼ lb., 75c.

Southport White Globe. Pure white color, mild flavor. A good keeper and very productive. It is best to dry these Onions in a shady place, where they will get plenty of air........Pkt., 5c; oz., 25c; ½ lb., 75c.

Mammoth Silver King. A large, flat variety. Specimens have been grown to weigh as high as 4 pounds. Skin pure white and flesh tender. Pkt.,5c; oz., 35c; ½ lb., \$1.25.

White Queen. A rapid-growing variety of mild flavor, pure white, and splendid for pickling.

Pkt., 5c; oz., 35c; ¼ lb., \$1.25.

White Barletta. An extra early small white Onion; similar to White Queen......Pkt., 5c; oz., 40c; ½ lb., \$1.50.

Early White Bunch. Used largely for pulling when young, as a bunch Onion. If left to mature, grows to good size; very showy. Pearly white skin. Flesh of good quality and good keeper........Pkt., 5c; oz., 35c; ¼ lb., \$1.25.

Early White Welsh Onion. The best kind for green omons, forms no bulb. Plants can be propagated from seed or divisions, a great saving in cost over top sets.

Pkt., 5c; oz., 35c; ½ lb., \$1.25.

ONION SETS

IN private gardens the cultivation of the family supply of Onions from sets has much to recommend it. The amount of labor involved is less, the danger of loss from maggots and other insects is considerably reduced, the crop is surer to grow, and is ready for use weeks in advance of that grown from seed. On a small scale where the cost of sets is not a serious item we urge customers to use them. In fact, the ideal way is to use both sets and seed—the sets for use in the spring and summer, and seed to grow bulbs for winter keeping.

Onion Sets should be planted out as early in the spring as the ground is dry enough to work; plant them in rows 12 inches apart, with sets 2 inches apart in the row. We handle sets of the standard varieties.

Prices subject to market changes.

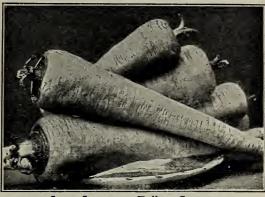

Lowest market price will be given upon aplication.

PARSNIP

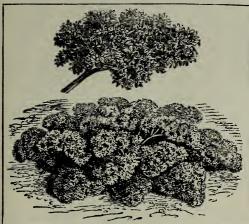

Sow seed early in spring, in deep, rich soil in drills. Scatter the seeds thinly and cover evenly with the rake. After the appearance of the plant the soil must be stirred frequently until the leaves cover the ground. The seed is slow to germinate, and is frequently a long time in coming up; will vegetate sooner by steeping 6 to 12 hours in a liquid manure, will up thin out to 5 or 6 inches apart in the rows. Unlike Carrots, they are improved by frost, and it is usual to take up in fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required.

One ounce for 200 feet of drill. 5 to 6 pounds for an acre.

Large Sugar, or Hollow Crown. The best variety; roots long very smooth, white, tender, sugary and of excellent flavor. This strain was made by careful selection of roots growing to an ideal shape and having the distinct hollow crown. Pkt., 5c; oz., 10c; ½ lb., 30c. Student, or Guernsey. A good half-long variety, smooth, sweet and of delicate flavor...Pkt.,5c; oz.,10c; ½ lb.,30c.

Long Sugar, or Follow Crown

Norwood

PARSLEY

SOW thickly early in April, in rows one foot apart and one-half inch deep; thin out the plants to stand six inches apart in the rows. The seed is of slow germination, taking from three to four weeks to make its appearance, and often failing to come up in dry weather. To assist its coming up quicker, soak the seed a few hours in warm water or sprout in damp earth, and sow when it swells or bursts. For winter use protect in frame or light cellar.

One ounce to 150 feet of drill.

Norwood. Fine curled leaves of rich dark green, compact growth, finest quality......Pkt., 5c; oz., 15c; ¾ lb., 40c.

Extra Double Curled. Beautifully crimped and curled. Pkt., 5c; oz., 10c; ½ lb., 35c.

Moss Curled. Fine for garnishing...Pkt.,5c; oz.,10c; 1/4 lb.,35c.

in. A hardy variety having dark green leaves which are not curled. It is a little stronger in taste and much esteemed for flavoring soups and stews, as well as for drying.

Pkt., 5c; oz., 10c; 1/4 lb, 30c.

Hamburg Turnip Rooted. The fleshy root resembles a parsnip and is used for flavoring soup and stews, etc.

Pkt., 5c; oz., 10c; 1/4 lb., 35c.

PEPPER

Celestial. Fruit conical in shape, one to two inches long; green from the blossom, turning alternately to lemon, golden and scarlet.

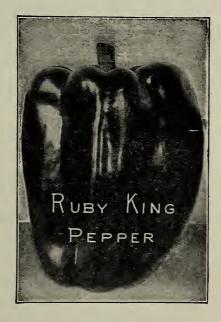

Pkt., 10c; oz., 40c; ¼ lb., \$1.50.

Ruby King. Large size, ruby red pods; flesh exceedingly thick, sweet and mild.......Pkt., 10c; oz., 40c; ¼ lb., \$1.50.

Sweet Mountain. Similar in shape to the Bell, but grows larger; rind thick, tender and fleshy.........Pkt., 10c; oz., 40c; ¼ lb., \$1.50.

Large Bell, or Bull Nose. Large and early, rind very thick; color glossy red; flavor mill and pleasant...Pkt., 10c; oz., 40c; ¼ lb., \$1.50.

Pimento. The fruits are of good size, medium length and attractive color. The flesh is thick and solid, mild and of fine flavor. Desirable for salads and stuffed peppers. The plants are vigorous and upright, about two to two and one-half feet high, with short, broad, dark green leaves. The fruits are deep green when young, becoming deep red as they mature.......Pkt., 10c; oz., 40c; ½ lb., \$1.50.

PEANUTS

Shell the nuts and plant in April or May in drills 2 to 2 ½ feet apart, dropping 2 seeds 12 to 15 inches apart in the drills. If to be sent by mail, see "Postage," page 1.

The earliest variety grown; pods are small, but remarkably solid and well filled...Pkt.,5c; 1/2 lb.,15c; lb.,25c. Spanish. Mammoth Virginia. The most profitable variety to grow as a market crop, though not so early as Spanish; more easily cultivated; very erect stems and upright foliage with large pods and kernels....Pkt., 5c; ½ lb., 15c; per lb., 25c.

GARDEN PEAS

One pound will plant about 50 feet of drill—90 to 120 pounds per acre.

PEAS succeed best in light, dry, loamy soil. Early and Dwarf sorts require richer soil than the late varieties. If manure is used, let it be old and well rotted, or there will be a rank growth of vines with few pods. Sow the early, smooth, round sorts as early in Spring as the ground can be worked. Seeds of wrinkled varieties are more liable to rot if the ground is cold, and must be planted later. From the first sowing, sow every two weeks until June for a succession. After that there is danger of mildew. Discontinue then until August, when a planting of extra early or early sorts will often produce a good crop. Sow the seed in single drills, three feet apart for dwarf sorts and four for tall sorts, or in double drills six or eight inches apart, one inch apart in the drill, and not less than four inches deep, since deep planting prevents mildew and prolongs the season. Cultivate well, and draw the earth twice to the vines during growth. Stake the tall varieties when they begin to vine. Pick the pods as soon as fit, and allow none to ripen on the vines, as they will then cease bearing. All kinds of Peas do best when supported with brush or wire.

All varieties of Peas, pkt., 10c. All packets and half pounds of Peas are sent postpaid; for larger quantities by mail, see "Postage" page 1.

Early Varieties

McCullough's
''Maud S''

The earliest and most prolific Pea known. The pod is of a dark green color, of a full, round shape, and of strong texture which especially fits

it for shipping long distances. For a late fall crop it has few equals, and is the market gardener's favorite for all seasons. The far northern point at which our Peas are grown renders them almost proof against cold, and the best for early spring or late fall crop. Thousands of market gardeners have pronounced this Pea unequaled in earliness, yield and regularity of growth. Make first planting as early in the spring as the ground will permit and cover well.

Pkt.,10c; ½ lb.,20c; 1 lb.,35c; 5 lbs.,\$1.50; 15 lbs.,\$3.75.

This new Pea is of the extra early type, and from our trials and observation it promises to prove the earliest Pea in the market. It grows about

two feet high, stem strong, very vigorous and bears well-filled, round pods about three and a half inches long. It is a white seeded variety. All growers of Peas should give it a trial.

Pkt.,10c; ½ lb.,25c; 1 lb.,40c; 5 lbs.,\$1.75; 15 lbs.,\$4.50.

Market Surprise. This new variety is another addition to the extra early type of Peas, but pods are larger and contain 6 to 8 large peas of excellent quality. The seed resembles the "Maud S" in color, while it is not quite as smooth nor yet is it a wrinkled Pea. We urge all growers to give this variety a trial and as the supply is limited we can only offer in small quantities this season.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

Little Marvel. As early as American Wonder and Nott's Excelsior, the pods are larger and the vines produce a heavier crop. For quality and productiveness it is away ahead of everything in the way of extra early wrinkled peas. It is dwarf, growing about 15 inches high, and the plants are very productive, bearing many twin pods, which are dark green in color.

Pkt.,10c; ½ lb.,30c; 1 lb.,50c; 5 lbs.,\$2.25; 15 lbs.,\$6.00.

Nott's Excelsior. A dwarf wrinkled Pea of the highest excellence. The pods average three inches in length and are well filled with peas of large size and unusually sweet flavor; height one and one-fourth feet.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

Laxtonian. The pods of Laxtonian are very large, and are produced on a low-growing, sturdy vine, without support of any kind. The flavor is just as rich and good as any of the later varieties. It is ready for use about a week later than the very early sorts, and is incomparably good in quality. Pods and plant are rich, dark green in color.

Pkt.,10c; ½ lb.,30c; 1 lb.,50c; 5 lbs.,\$2.25; 15 lbs.,\$6.00.

Thomas Laxton. A cross between Gradus and one of the extra early sorts. It ripens within a day or two of the earliest round varieties, and is extremely productive. The pods are very large and contain 7 or 8 large-sized wrinkled peas of the finest flavor. It is darker colored than the Gradus and hardier in constitution; height, three feet.

Pkt.,10c; ½ lb.,25c; 1 lb.,40c; 5 lbs.,\$1.75; 15 lbs.,\$4.50.

Alaska. A wonderful early, smooth, blue Pea; vines slender; pods very dark green, about three inches long, well filled with small, smooth, blue-green peas. The earliness, uniformity in ripening and deep color render it a desirable market and canning pea; height, 2 feet. Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50.

Extra Early Premium Gem. An improved Little Gem Dwarf, green wrinkled, very prolific, fine flavored, large pods, excellent either for market or home use; height, one and one-half feet.

Pkt.,10c; ½ lb.,25c; 1 lb.,40c; 5 lbs.,\$1.75; 15 lbs.,\$4.50.

American Wonder. This variety stands unrivaled in point of flavor and quality. It is dwarf and robust in habit, growing from 10 to 15 inches in height, according to the soil.

Fkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

GARDEN PEAS—Continued

All varieties of Peas, pkt., 10c. All packets and half pounds of Peas are sent postpaid, for larger quantities by mail, see "Postage", page 11.

Early Varieties—Continued

Gradus or Prosperity. This remarkable Pea is not only large and of the best quality, but is within two or three days as early as the small, round, extra early sorts. Gradus is a wrinkled Pea, growing about 30 inches high; the pods are of a bright green color, measuring 4 inches or more in length, as large as Telephone, well filled with luscious peas, 8 to 10 or more in a pod. The peas are of the highest table quality and retain in a remarkable manner their color and attractive appearance after cooking. Make the earliest sowing in the warmest spot in the garden.

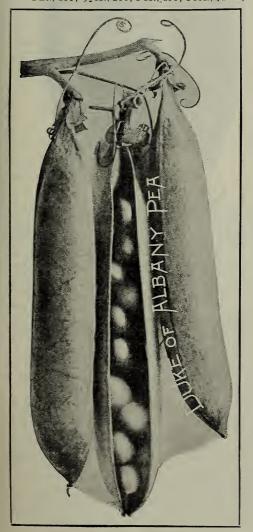

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

Second Early and Main Crop

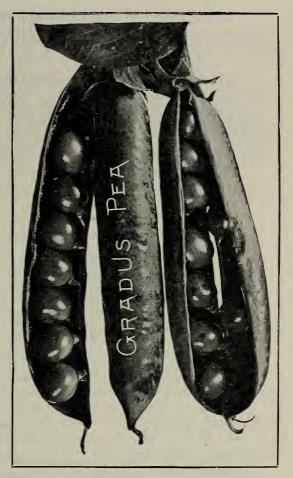

Boston Unrivalled. An improved Telephone. Vines grow nearly five feet high and are covered with fine large pods. The pods are about 5 inches in length by three-quarters of an inch broad, each containing seven or eight large peas of finest flavor.

Plt 10c: 1/lb 25c: 1/lb 40c: 5/lbc \$1.75: 15/lbs \$4.50. Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

tercup. The pods of this variety are long, rounded or curved at the end and well filled with large peas, which are sweet, tender and of excellent flavor. Vines make a rapid growth to about two feet in height and produce a large crop of pods, ready for use in about 65 days from time of planting. Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50

about one week after the earliest kinds. A feature of this variety is its remakable tendency to branch out at the roots, and for this reason the seed should be planted thinly; height, 1½ feet. Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.50; 15 lbs; \$4.00.

Advancer. This Pea is used very extensively by market gardeners on account of its productiveness, the fine appearance of its pods and its exceedingly fine flavor. It is a wrinkled variety, grows about two feet in height, but needs no brushing as it stands up very strong itself. Has broad, long pods, which are abundantly produced and well filled to the end.

Pkt., 10c; ½ lb., 20c; 1 lb., 40c; 5 lbs., \$1.50; 15 lbs., \$4.00.

Admiral Dewey. The largest podded Pea yet introduced. Height, 3½ feet; pods a rich, dark-green color, frequently 6 inches long, beautifully shaped. Peas large, tender and of fine flavor. Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50

Duke of Albany. A large pea of Telephone type, growing about four feet high, producing heavy crops of pods which are of a deep green color, this characteristic making it very popular in some sections as a market garden variety. Its fine appearance and good quality have given it a place amongst the late varieties. Pkt., 10c; ½lb., 25c; 1 lb., 40c; 5 lb., \$1.75; 15 lbs., \$4.50.

ephone. The favorite late variety; extra large pods. This Pea has proven to be a most valuable introduction. Vine large, coarse leaves, height about 4 feet. The pods are very large and filled with immense peas, which are largest of any. Tender, sweet and of splendid quality and flavor. A valuable feature of this variety is that it continues in bearing for an extremely long time. The stock we offer has been selected with every care, and will give satisfaction to the most exacting grower.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs.. \$1.75; 15 lbs., \$4.50.

Improved Stratagem. A favorite with market gardeners and for the kitchen garden. Strong vines, immense pods, large peas, heavy cropper. The vines are strong, vigorous and covered with immense pods, many of which measure 5 ½ inches in length and containing as high as 10 large, richly flavored, wrinkled peas. Vines very strong and needing but slight support. Height, 2 to 2½ feet.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.76; 15 lbs., \$4.50.

GARDEN PEAS—Continued

All varieties of Peas, Pkt., 10c. All packets and half pounds of Peas are sent postpaid; for larger quantities by mail, see "Postage" page 1.

Main Crop Varieties—Continued

erman. A new Pea like the Telephone, only better. The vine is extra vigorous, and the pods of Alderman are dark green and always well tilled with fine large peas. For a pea which should be staked there is none quite so good as Alderman. It is one of the finest of the large-podded summer varieties. The haulm grows five feet in height and is of a rich, dark green coloring, as are also the large pods. Pods frequently measure nearly six inches in length and contain from ten to twelve very large peas of superior flavor.

Pkt. 10c: 14 lb. 25c: 11b. 40c: 5 lbs. \$1.75; 15 lbs. \$4.75;

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

Everbearing. A prolific and continuous-bearing Pea, giving it special value for both summer and autumn use; pods 3 to 4 inches long, containing 6 to 8 large, wrinkled peas, of rich flavor, sweet and tender. Three feet.

Pkt., 10c; ½ lb., 25c; 1 lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00.

proved Champion of England. One of the best known of the older varieties; a tall-growing, green, wrinkled marrow; quality unsurpassed; pods medium; peas large. Five feet. Pkt., 10c; ½ lb., 25c; 1 lb., 35c; 5 lbs., \$1.50; 15 lbs., \$4.00.

Telegraph. A second early variety, very robust in habit, bearing immense pods. The peas when cooked, are of a deep green color. A great bearer and of fine flavor. Three and one-half feet. Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

Long Island Mammoth. A strong grower, producing mammoth pods containing 10 to 12 large peas. When cooked they are a deep, dark green color and fine flavor. Three and one-half feet. Pkt., 10c; ½ lb., 25c; 1 lb., 45c; 5 lbs., \$1.75; 15 lbs., \$4.50.

Black-Eyed Marrowfat. This and the White Marrowfat are extensively grown as field peas, as they are hardy, productive, and bear well-filled pods. Four feet.

Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50.

Large White Marrowfat. A favorite variety; large, well-filled pods.

Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.25; 15 lbs., \$3.50.

Dwarf Sugar. Edible pods. Can be used in a green state like string beans. Height, five feet. Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50.

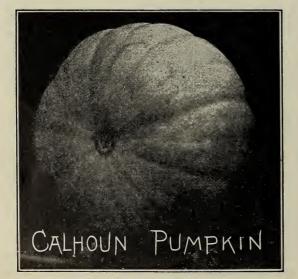

ting Sugar. This variety grows to the height of five feet, bears a profusion of large, broad, handsome, light green pods which are generally found in pairs, and are so brittle that they snap without any strings. Sweet and tender; cooked like wax beans. Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.50. Melting Sugar.

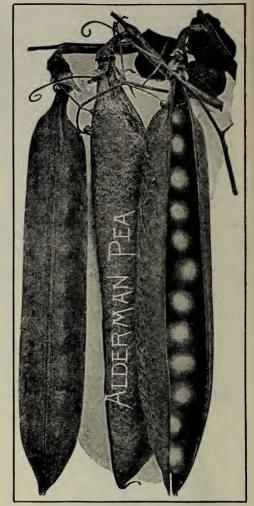

Prices subject to market changes.

PUMPKIN

THEY are generally planted in cornfields, but they can not grow as large or fine as if the vines were not shaded. A good plan would be to plant a few seeds in the potato patch, as they are less apt to be injured by the crop of potatoes than the corn.

One ounce for 15 hills.

houn. The outside is a creamy brown; the inside flesh is a deep salmon yellow; thick and fine grained, and the seed cavity very small. It cooks very yellow and makes pies of high, rich color.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.

Small Sugar. Fruits of small size, averaging about ten inches in diameter, of excellent keeping qualities, flattened or slightly ribbed. Skin deep orange-yellow, flesh very sweet. This should be more generally grown, as it is really one of the best for pies.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.

Cashaw Crook-Neck Striped. Grows to a medium size; flesh light yellow, and is the best variety for table use. Pkt., 5c; oz., 15c; ½ lb., 40c; per lb., \$1.50.

den Cashaw. Beautiful golden-orange color; an improvement on the old Cashaw.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.50. Golden

Tennessee Sweet Potato. Medium size, pear-shaped, a little ribbed, color creamy white, sometimes lightly striped with green.
Pkt., 5c; oz., 15c; 1/4 lb., 40c; per lb., \$1.25.

Japanese Pie. Is very productive, ripens early, of medium size, good keeper, and weighs 15 to 20 pounds each. The fiesh is a rich salmon color.

Pkt., 5c; oz., 15c; ½ lb., 40c; per lb., \$1.25.

Large Cheese. An excellent keeper, color bright orange. Pkt., 5c; oz., 10c; ¼ lb., 25c; per lb., 75c.

Mammoth Tours. A productive French variety, which grows to an immense size. Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.

Kentucky Field. Good for cooking purposes and for feeding stock..Pkt.,5c; oz.,10c; ½ lb.,20c; per lb.,50c.

Connecticut Field. A large, yellow variety. Pkt., 5c; oz., 10c; ½ lb., 25c; per lb., 70c.

RADISH

Sow early and often. In good, warm, tibrous loam; especially if quite sandy, summer Radishes will make a crop in 4 to 6 weeks from sowing. The soil should be well prepared, and fertilizers may be used freely. Have the rows a foot apart, and sow just seed enough so that they will not require thinning. Any little spot that becomes available during summer may be utilized for planting Radishes. The short or turnip-rooted sorts are quickest and easiest to grow, and good for forcing also. On greenhouse bench or in frames the rows need not be more than 4 inches apart. Sow winter Radishes in July and August. They grow best in the cooler Autumn weather. Take them up before severe freezing and store in sand in the cellar or in a pit, where they will keep tender and crisp all winter.

One ounce to 100 feet of drill—8 to 10 pounds for an acre.

Special prices given to market gardeners.

McCullough's Cincinnati Market We were the introducers of this remarkable radish, which has proven one of the best long Radishes ever offered. It is largely grown by the Cincinnati market

gardeners. The tops are so small that the radishes may stand touching each other in the rows. They grow perfectly straight and smooth and from six to seven inches in length. Their attractive, glossy, scarlet skin is very thin and the flesh crisp and brittle, and of delightful pungent flavor. It is the finest Long Red Radish for forcing and outsells any other that is put in competition with it on the market. Being long standing, it is also an extra fine sort for the home garden, entirely exempt from any tendency to become pithy or hollow.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Crimson Giant Forcing. This variety is suitable both for forcing or early planting out of doors. A remarkable feature of this Radish is that it will grow double the size of other round red forcing Radishes and still remain solid. The ordinary forcing Radish, after growing to the size of 2 inches in circumference becomes pithy, while the Crimson Giant will grow to 6 inches in circumference, and still remain solid and juicy, free from all signs of becoming soft.

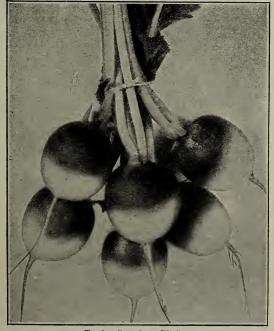

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Cincinnati Market

Non Plus Ultra. The smallest topped and earliest forcing Radish. Roots small, round; deep rich scarlet; very crisp and tender, white flesh.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Early Scarlet Globe

Rosy Gem. We have a very clean and beautiful strain of this popular sort. It is extremely early, maturing in 25 days, and is largely used for growing both under glass and outdoors. It is round, bright scarlet and has a handsome white tip.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Earliest White Globe Forcing. The earliest white oliveshaped Radish in existence, beautiful transparent ivorywhite, very small root, small top; flesh white, tender
and crisp. It is particularly adapted to forcing in
greenhouse or hot-bed, also does well in open ground.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.

Sparkler-Coopers. Λ comparatively new, early variety.
Globular in shape, rosy carmine with white tip. Solid and crisp with short tops. Suitable either for open or for forcing.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Early Scarlet Globe. One of the earliest and best sorts for forcing; flavor mild; crisp and juicy; also good for garden culture.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.
Early Scarlet Turnip. A small top variety, of quick
growth, mild and crisp. It is a standard sort for
early planting in the open ground.

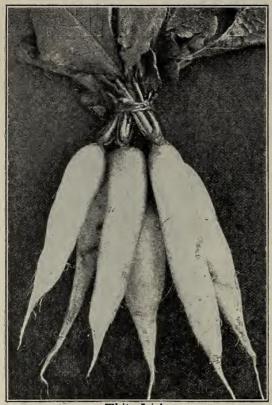

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.
Scarlet Turnip, White Tipped. Bright scarlet color, gradually fading off to pure white at the base, tender and mild in flavor, early.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Early White Turnip. An early, crisp, turnip-shaped
Radish of pure white color.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.
French Breakfast. A variety of quick growth, mild and tender, and one of the best for forcing. Oval form, scarlet, tipped with white.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

White Icicle

RADISH—Continued

McCullough's Norwood Long White Fine long white Radish, with beautiful shape; skin and flesh pure white.

Pkt., 5c; oz., 10c; ½ lb., 30c; per lb.. \$1.00.

Long Scarlet, Short Top. Long, of a deep scarlet color; flesh white, crisp and of good flavor.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

White Icicle. The finest long, white Radish; the young Radishes are ready for use in 25 days, and continue to grow, fully retaining their crisp tenderness and mild flavor until quite large. These Radishes are transparent white, have small tops, allowing close planting, and are very crisp and brittle. A feature greatly in its favor is that it remains in good condition while growing for a long time, thus allowing a continuous pulling from the same planting.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Giant White Stuttgart. Quick growing and therefore early, of the largest size, and both flesh and skin are pure white.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

White Summer Turnip. A very desirable Summer Radish. Grows a round, smooth root, crisp and firm. A favorite family radish...Pkt.,5c; oz., 10c; ¼ lb., 30c; per lb.,\$1.00.

White Strasburg. Oblong, tapering shape, skin and flesh pure white, firm and brittle, fine for winter use.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Chartier. Half-long, of quick growth; color deep pink above and gradually blending into a pure waxy white to root.

Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Radish—Winter Varieties

THESE grow to large size, have firm, hard flesh, and can be kept in good condition for use all winter by packing the roots in moist sand or soil in a cold cellar before the ground freezes in the fall. To have them crisp and free from woodiness the seed should not be planted until late in the summer, as if planted too early the roots would be apt to become hard and woody before it is time to put them away in the fall. A good rule to follow would be to sow the seed at the same time as you would plant seed for winter turnips, and where only a small supply is needed the seed could be sown in the same patch with the turnips.

Black Spanish, Oval Shape. A black valuable winter sort.....Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

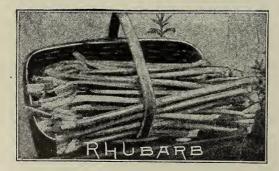

Black Spanish Long. Differs from the above only in shape....Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Celestial. An all-season white Radish. Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.

Chinese Scarlet. Half-long, fine winter sort, keeps well. Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

Mammoth White Winter. A giant white-fleshed fall Radish...Pkt., 5c; oz., 10c; ¼ lb., 30c; per lb., \$1.00.

RHUBARB

GOOD plants are easily grown in any good garden soil. Sow seed thinly in shallow drills a foot apart, thin to 4 or 5 inches. Keep soil loose and free from weeds. The plants are liable to vary considerably. Pick out the strongest and best. In fall or spring following, transplant to the permanent bed, 4 feet apart each way, in deep, warm and very rich soil. The more manure the better

stalks. For winter forcing take up two-year roots in fall, leave out to freeze, then bed close together on cellar bottom or under greenhouse bench in the dark.

One ounce will produce 600 plants.

Linnaeus. Best sort for general purposes; early, large and tender.......Pkt., 5c; oz., 20c; ½ lb., 60c.

Victoria. Very large; later than Linnaeus. Pkt., 5c; oz., 20c; ¼ lb., 60c.

Rhubarb Roots

We specialize on Rhubarb Roots, grown from seed, as our experience has demonstrated them to be far superior to divided clumps.

We supply two varieties Linnaeus and Victoria described above. Unless otherwise specified, will send the Linnaeus variety on all orders.

Single Eye. Each, 5c; doz., 50: (by mail, per doz., 75c.)Small Clumps. Each, 10c; doz., \$1.00; (by express or freight only).

Large Clumps. Each, 25c; doz., \$2.50; (by express or freight only).

SALSIFY OR VEGETABLE OYSTER

COMMONLY called Vegetable Oyster. The cultivation is precisely the same as directed for Parsnips, and it will keep over winter, in the ground where grown, in the same way as Parsnips, but should be taken up before it starts growing.

One Ounce Will Sow 50 Feet of Drill

Long White French. Roots of medium size, white and smooth.

Pkt., 5c; oz., 20c; 1/4 lb., 60c.

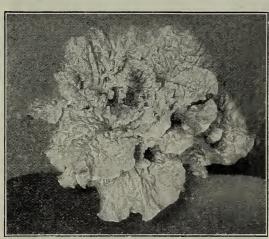

SPINACH

FOR spring and summer use, sow either broadcast or in drills as early as the ground can be worked. The fall sowing is the main one with our market gardeners, which is done from August to October and by careful attention they have it in marketable condition throughout the entire winter and spring.

If the land is dry the seed should always

be rolled or trampled in, for if the soil is loose the hot air shrivels the seed, so that it will not germinate.

One ounce for 100 feet of drill 10 to 12 pounds for an acre.

McCullough's Norwood Savoy

McCullough's
Norwood Savoy.

This variety is one of the most important for market gardeners, also one of the best for the kitchen garden. A quick-growing, round-seeded variety, producing in abundance, thick, dark green, slightly crumpled leaves; in large demand for either spring or fall sowing.

Pkt., 5c; oz., 10c; 1/4 lb., 25c; per lb., 60c.

Bloomsdale Savoy. The hardiest large Savoy leaved, curled and crimpled, with thick, fleshy leaves; good for family and market purposes.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; per lb., 50c.

Longest Season. A distinct hardy variety, with large, thick, fleshy, dark green leaves, which are produced in great abundance in any season. It is slower in running to seed than any other variety now in use.

Pkt., 5c; oz., 10c; ¼ lb., 20c; per lb., 59c.

Victoria. A variety with heavy, broad, dark green leaves.

Two or three weeks later than other sorts in going to seed. Valuable for spring sowing.

Pkt., 5c; oz., 10c; 1/4 lb., 20c; per lb., 50c.

Prickl7 Seeded, or Fall. The hardiest variety, having smaller leaves; is not so productive as the above.

Pkt., 5c; oz., 10c; 1/4 lb., 25c.

New Zealand. Yields an abundance of the tenderest Spinach during the hottest months of the year, or in dry arid localities where the ordinary Spinach runs to seed. The seed is sown where the plants are to stand, in May, or earlier in a hotbed and transplanted, and the plants will continue to yield a supply of good leaves of excellent quality during the entire summer, requiring scarcely any attention......Pkt., 5c; oz., 15c; ¼ lb., 50c

SOUASH

IT IS useless to sow until the weather has become settled and warm. Light soils are best suited for its growth. Prepare hills for the seeds by incorporating 2 or 3 shovelfuls of well-rotted manure with the soil for each hill. Plant the bush varieties, from 3 to 4 feet each way, and the running sorts from 6 to 8 feet. Eight or ten seeds should be sown in each hill, thinning out after they have attained their rough leaves, leaving 3 or 4 of the strongest plants, after which cultivate same as Cucumbers.

Fall and Winter Varieties

Hubbard. Standard Winter Squash; grown more extensively than any other late variety; color dark green; shell extremely hard; flesh dry, fine grained and sweet; excellent keeper.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25. Warted Hubbard. This strain without doubt, grows the finest Hubbard in existence. The wartiness indicates a very hard shell, which is one of the features in a long-keeping Squash; it also denotes extra choice quality—the harder and more warty the shell of a Hubbard Squash is the more delicate and sweet the flesh will be found to be.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25. Marblehead. Resembling the Hubbard, but of a lighter color, and is remarkable for its sweetness, dryness and delicious flavor, as well as its keeping qualities.

Pkt., 5c; oz., 15c; 1/4 lb., 40c; per lb., \$1.25.

To repel the Squash vine borer put a handful of tobacco dust close around the plants.

For Yellow-striped beetle and blight, spray early and often with Bordeaux Arsenate of Lead Mixture.

One ounce of the Bush Varieties for 40 Hills, or of the Large-Seeded Kinds, 15 Hills. Two or Three Pounds of the Bush, and 3 to 4 Pounds of the Large-Seeded for an Acre.

Summer Varieties

Mammoth White Bush. The best early variety for market or shipping. It grows to a large size; scalloped like a patty-pan.

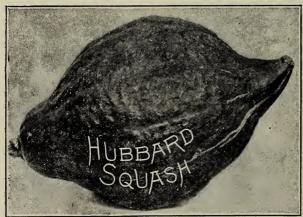

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.
Early Yellow Bush. An early, flat, scallop-shaped variety; color yellow; flesh pale yellow and well flavored.
Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.

Cummer Crook-Neck. Covered with warty excrescences; color bright yellow; shell very hard when ripe.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25. Vogetable Marrow. Skin a greenish-yellow, flesh white, grows 9 to 18 inches long.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.

Mammoth/Chili. Rich orange-yellow; flesh thick and of good quality for making pies; grows to an enormous size; a valuable sort for feeding stock. Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.

Boston Marrow. A popular winter variety; quality

unexcelled. Pkt., **5c**; oz., **10c**; ½ lb., **30c**; per lb., **\$1.00**.

Essex Hybrid. Very prolific, fine grained, orange-red flesh.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Delicious. Resembles the old Hubbard, having a dark olive-green hard shell, weight from 5 to 10 lbs. For table use it can not be excelled, the flesh being remarkably thick, fine-grained, sweet and of rich flavor.

Pkt., 5c; oz., 15c; ¼ lb., 45c; per lb., \$1.50.

Fordhook. A winter Squash of great merit. Of handsome bright yellow color outside and straw-yellow within. The flesh is dry and sweet.

Pkt., 5c; oz., 15c; ¼ lb., 40c; per lb., \$1.25.

31

TOMAT

SOW in a hotbed, green-house or window in a sitting room, where night temperature is not less than sixty degrees, about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high they should be set out in boxes three inches deep, four or five inches apart, in same temperature, or removed into small pots, allowing a single plant to a pot.

They are sometimes transplanted a second time into larger pots, by which process the plants are rendered more sturdy and branching. About the middle of May, the plants may be set in the open ground. planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovelful of rotted manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting and shelter from the sun a few days until the plants are established. For late use, sow in a sheltered border in May, and set out the plants in July; the green fruit can be picked off before frost, and ripened under glass. By training the tomato vines on trellises or tying to stakes, they will increase in productiveness, the fruit will ripen better, and be of finer

John Baer

One ounce of Seed Will Produce about 2,000 Plants; 1/4 Pound to the Acre

ne. Very early and productive; fruit medium sized, and of a dark, rich red, slightly tinged with purple; very solid and smooth..Pkt., 5c; oz., 30c; ½ lb., 85c.

flavor. The earliest smooth tomato, of good size and flavor. Tomatoes are deep scarlet and grow closely together in clusters of five to eight, all of medium size, averaging 2½ inches in diameter; they are smooth and solid, quite thick through and free from rough ribs or cracks. The flesh is deep red, with solid center and small seed cells, slightly acid flavor.

Pkt., 5c; oz., 30c; ¼ lb., 85c. Earliana.

Detroit. Both the Amateur and the Market Gardener will be interested in this new variety. As a second early purple tomato the Detroit is equal if not superior to any other second early purple tomato the introduced. This variety matures medium early in season and bears uniformly large, handsome, smooth, globe-shaped fruit of excellent quality through the long season, yielding in the aggregate more marketable tomatoes than any other variety we know. In consequence of its firmness, is also a desirable variety for shipping.

Pkt., 5c; oz., 30c; ½ lb., 85c.

Fruit of good size, bright red color, smooth, iform. A second early and very productive. Pkt., 5c; oz., 40c; ½ lb., \$1.00. Bonny Best. Fruit solid and uniform.

McCullough's Norwood

quality.

June Pink. This variety closely resembles the Earliana ches in diameter; they are smooth and a through and free from rough ribs or esh is deep red, with soid center and slightly acil flavor.

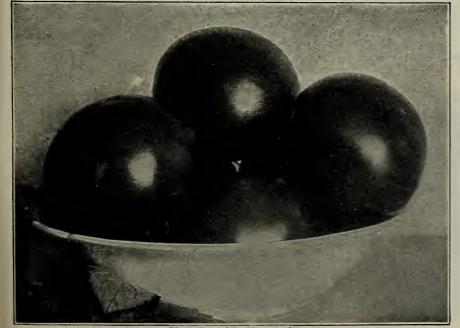

Pkt., 5c; oz., 30c; ¼ lb., 85c.

The plants are strong and vigorous, bearing an abundance of large, smooth fruit of a beautiful purplish crimson color, which is produced in clusters of four to six; is large, of perfect shape, and retains its size until late in the season.

The flesh is remarkably thick, firm and solid and of the finest quality, with few seeds.

Pkt., 5c; oz., 40c; ¼ lb., \$1.00.

Pkt., 5c; oz., 40c; ¼ lb., \$1.00.

McCullough's Norwood

Trucker's Favorite. One of the finest large-fruited purple sort. The plants are of strong growth and productive. The tomaproductive. The tomatoes are of large size, deep through, very smooth and regular, free from cracks, solid, meaty with small seed cells and fine flavor. Pkt., 5c; oz., 30c; 1/4 lb., 85c.

Dwarf Champion. Of dwarf, stiff, distinct, upright growth, scarcely needing support; early and prolific; smooth, medium-sized fruit of pinkish purple color. Pkt., 5c; oz., 30c; 1/4 lb., 85c.

Dwarf Stone. Foliage heavy and a rich dark green. The fruit is produced in clusters of 3 averaging 4 inches diameter, and 21/2 inches in depth, bright scarlet color, smooth and regular.

Pkt., 5c; oz., 30c; 1/4 lb., 85c.

Tomatoes-Continued to next page.

TOMATO—Continued

Dwarf-Giant New. This is much the largest read of all dwarf Tomatoes. They are produced in the color is a rich purple. crimson, and the depth of color is maintained throughout the entire season.

Pkt., 5c; oz., 40c; 1/4 lb., \$1.25.

A valuable variety, especially and shipping. It is very Cincinnati Purple. adapted for canning and shipping. large; color a dark purplish red. Pkt., 5c; oz., 30c; 1/4 lb., 85c.

Rich, glossy crimson, with a slight purple The fruit grows in clusters of four to five, Beauty. is of large size, very smooth, and retains its character until late in the season.

orite. A large, handsome and uniform-shaped tomato; solid, smooth and bright scarlet; ripens Favorite. early......Pkt., 5c; oz., 30c; 1/4 lb., 85c.

fection. Fruit almost round, smooth, tough skin of brilliant scarlet; ripens thoroughly; solid and of rich flavor.....Pkt., 5c; oz., 30c; ¼ lb., 85c.

be. A beautiful globe-shaped variety. Large size. smooth, firm fleshed, few seeds. Ripens evenly; color, a beautiful glossy rose, tinged purple.

Pkt., 5c; oz., 40c; ¼ lb., \$1.25.

smooth; ripening evenly to the stem without a crack; exceedingly solid and firm-fleshed; of finest quality.

Pkt., 5c; oz., 25c; ½ lb., 75c. The Stone.

A standard main crop, bright red variety, producing enormous crops of finest scarlet fruit. Pkt., 5c; oz., 25c; ¼ lb., 75c.

The large tomatoes are borne in im-of four to eight. Color rich, glossy Buckeye State. mense clusters of four to eight. crimson, with a slight purple tinge.

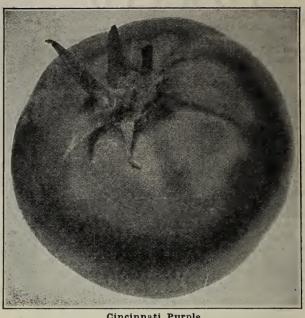

Pkt., 5c; oz., 30c; ¼ lb., \$1.00

One of the largest fruited tomatoes. fruit is of a purplish pink color, very solid and ripens early; nearly seedless, with firm, meaty, rich red flesh; unequaled and delicious either sliced, cooked or canned; a healthy, luxuriant grower and continuous yielder from early in the season until frost.

Pkt., 5c; oz., 40c; 1/4 lb., \$1.35.

net Forcing. Superior red variety for forcing under glass. Rich scarlet-red; fruit is solid, round, smooth; strong grower; exceedingly heavy cropper; medium sized fruits; flavor excellent. Comet Forcing.

Pkt., 5c; oz., 40c; 1/4 lb., \$1.35.

Cincinnati Purple

Golden Queen. Large, smooth fruit, of a beautiful golden color; quality excellent; attractive for slicing, and mixing with sliced red sorts. Pkt., 5c; oz., 30c; 1/4 lb., \$1.00.

Small-Fruited Tomatoes

THE following small-fruited varieties are used for making preserves, and are also quite ornamental while growing in the garden:

A small preserving tomato, of pear shape, and bright red color.....Pkt., 5c; oz., 30c.

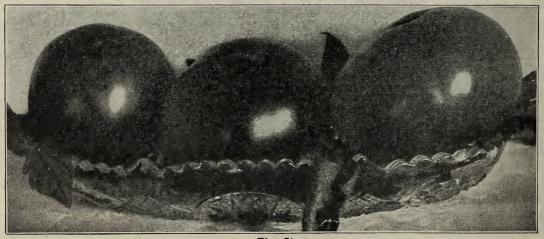

Red Cherry. Small, round fruit, resembling cherries; used for preserves......Pkt., 5c; oz., 30c.

Yellow Plum.

Strawberry, Winter Cherry or Husk. Low, spreading plants, bearing yellow fruit 1/2-inch in diameter, surrounded by a husk; for preserving.

Pkt., 5c; oz., 30c.

Special Prices given to Market Gardeners and Truckers TOMATO PLANTS are a specialty of ours. See Vegetable Plants

The Stone

TURNIP

THE soil for Turnips should be rich and mellow. For an early crop, sow early in the spring, in drills about a foot apart or broadcast and thin out. For a general crop, sow from the first of July to the last of August, in drills 18 to 20 inches apart, and thin out the plants to 8 or 10 inches. destroy the fly, which is very destructive to the Turnip crop, use "Hammond's Slug Shot." Sow an abundance of seed and thin out. Should the crop be destroyed, harrow the ground immediately and sow again.

One ounce will sow 150 feet of drill; 1 to 11/2 pounds to the acre.

Purple-Top White Globe. variety of decided merit. Of globular shape, very handsome and of superior quality, either for the table or stock. It is a heavy producer, early, of rapid growth and an excellent keeper. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00.

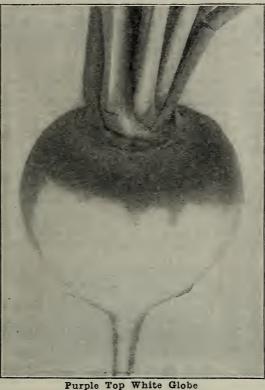

Early White Flat Dutch. An early white-fleshed variety, of quick growth, mild flavor and excellent quality. Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Large White Globe, Strap-Leaf. Flesh white, firm and crisp; a very desirable early variety. Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Snowball. Extra early. A variety of sterling merit, perfectly round, early, pure white, very solid, sweet short top...Pkt.,5c; oz.,10c; ½ lb.,30c; per lb.,\$1.00.

Extra Early Purple Top Milan. This variety is at least two weeks earlier than any other. It is of a handsome appearance, somewhat flattened, white with purple top; flesh snow-white, fine grained and delicate flavor. Pkt., 5c; oz., 15c; 1/4 lb., 50c; per lb., \$1.50.

Amber Globe. A beautifully formed variety, quite productive, solid flesh and attractive color; it keeps well and is desirable for either table use or for stock feeding. Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Golden Ball, or Orange Jelly. A rapid grower, of excellent flavor, globe-shaped, bright yellow color, good keeper and a superior table variety or for

stock. Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00. White Egg. An egg-shaped variety for spring or fall sow-

ing; flesh white, firm, fine grained, mild and sweet. Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Long White, or Cow Horn. Grows quickly, partly above ground, very productive; flesh white, fine grained, sweet, excellent quality for family and market gardener's use. Pkt., 5c; oz., 10c; ½ lb., 30c; per lb., \$1.00.

Seven Top. Cultivated extensively in the South for the tops, which are used for greens. It is very hardy and will grow all winter. not produce a good root. Pkt., 5c; oz., 10; ¼ lb., 30c; per lb., \$1.00.

Purple Top Yellow Aberdeen.
A large, globe-shaped Turnip,
with yellow fiesh of fine quality, a good keeper, popular for table or stock. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., \$1.00.

Swede or Rutabaga Turnip

FOR Rutabagas, sow seed in seed-bed in Spring and transplant to good, warm soil, in rows at least 2 feet apart and 8 or 10 inches apart in the rows, or sow in open ground during June and early July. Take up the roots just before winter, top and store in cool cellar or pit outdoors.

American Purple Top. Very hardy and productive; flesh yellow, solid, sweet, good for stock or table use. Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Skirving's Purple Top. An important variety of large size and strong growth, a heavy cropper and one of the best for field culture. Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Budlong's Improved. White, very sweet, much milder

flavor than any of the other sorts, globe-shaped, skin a cream yellow.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

Long Island Improved Purple Top. A uniform large rooted, quick growing, yellow fleshed sort.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; per lb., \$1.00.

TOBACCO

THE seed should be sown as early as possible after danger of frost is over. A good plan is to burn a quantity of brush and rubbish in the Spring on the ground intended for the seed-bed, then dig and thoroughly pulverize the earth and mix the ashes, after which the seed may be sown and covered very lightly.

Connecticut Seed Leaf. A long leaf, fine in texture. Pkt., 10c; oz., 40c.

Conqueror. It ripens early, and is easily cured to the brightest color.....Pkt., 10c; oz., 40c.

Havana. A medium leaf, fine texture. Commands a high price.....Pkt., 10c; oz., 40c.

White Burley. Extra stock, grown largely for the manufacture of fine-cut......Pkt.. 10c: oz.. 40c.

Stand-Up Burley. The leaves instead of drooping have a more erect position on the plant, turning upward rather than down-hence the name "Stand-up." fast becoming the most popular type of Burley and largely grown by planters in all Burley sections.

Pkt., 10c; oz., 40c.

Zimmer's Spanish. One of the most popular and extensively grown......Pkt., 10c; oz., 40c.

VEGETABLE PLANTS AND ROOTS

We are large growers of Vegetable Plants. Have them fresh every day in season. Special prices given on large quantities.

POSTAGE:—Prices do not include prepayment by mail or express. If wanted by mail, add for postage, **5c** per dozen; **25c** per 100 on Cabbage, Cauliflower, Celery and Sweet Potato Plants; **10c** per dozen on Egg Plants, Pepper and Tomato Plants. Cannot assume any responsibility for Vegetable Plants sent via Parcel Post.

ASPARAGUS ROOTS

DEEP, warm, rich, loamy soil, deeply and thoroughly stirred, is required for permanent bed. Use manure and fertilizers freely Make furrows 2 or 4 feet apart and 8 to 10 inches deep. Set the two-year-old roots 18 to 24 inches apart in the bottom of furrows and cover lightly at first. Gradually fill in with soil and old compost. In early spring, fork or plow the bed shallow and carefully, or pulverize the surface by harrowing. Give clean cultivation until fall; then cover with manure or compost. Second season after planting hill up the rows, especially for blanched "grass", and cut sparingly for use. After that the bed will give full crops. In the fall, as soon as the tops are ripe and yellow, they should be cut and burned. Two-year-old roots will insure the best and earliest results.

EGG PLANTS

(Ready about May 15th.)

Black Beauty. Per doz., 50c.

HORSERADISH SETS

(Ready April 1st.)

Per doz., 15c; per 100 75c. (By mail—per doz., 25c; per 100 \$1.00—postpaid

PEPPER PLANTS

(Ready about May 15th.)

Large Bell, or Bull Nose. Per doz., 30c.

Ruby King.......... Per doz., 30c.

Long Red Cayenne...... Per doz., 30c.

Strong two-year-old Roots of the following varieties—Argenteuil, Barr's Mammoth, Columbian Mammoth White, Conover's Colossal, Palmetto.

All the above varieties, per doz., 25c; per 100, \$1.50. If wanted by mail, add 5c per doz., 15c per 100 for postage.

CELERY PLANTS

(Ready June and July.)

McCullough's Paris Golden Yellow, Golden Self-Blanching, Golden-Hearted Dwarf, Giant Pascal, Triumph.

All the above, per 100, 60c.

CABBAGE PLANTS

(Ready about April 1st.)

Per 100, 60c.

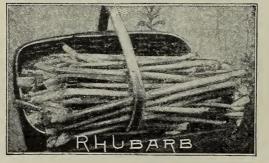

CAULIFLOWER PLANTS

(Ready April 1st.)
Earliest Dwarf Erfurt.
Per doz., 25c; per 100, \$1.75.
Early Snowball.
Per doz., 25c; per 100, \$1.75.

CHIVES

(Ready April 1st.)

Good Clumps.
10c each; per doz., \$1.00.

SWEET POTATO PLANTS

(Ready about June 1st.)

TOMATO PLANTS

(Ready about May 1st.)

Transplanted plants offer many advantages over seedlings; they produce fruit much earlier and are more easily shipped.

TRANSPLANTED TOMATO PLANTS

Earliana, June Pink, Detroit, Beauty, McCullough's Norwood, Trucker's Favorite, The Stone, Ponderosa, Cincinnati Purple, Dwarf Champion, Golden Queen.

All the above—Per doz., 25c; per 100, \$1.75.

RHUBARB ROOTS

(Ready April 1st.)

We specialize on Rhubarb Roots grown from seed. They are far superior to divided clumps.

Small Roots (by express or freight only). Each, 10c; per doz., \$1.00.

Each, 10c; per doz., \$1.00. Large Roots (by express or freight only).

Each, 25c; per doz., \$2.50. Potatoes. (See Field Seed, etc.)

McCullough's Selected Flower Seeds

Every year we carefully revise our list of flower seeds, add a number of new sorts and discard all inferior varieties. Our collection will be found to contain everything really desirable. Our stock of seeds is of the highest possible quality.

YOU will notice that all of our descriptions of flowers are classified as "annual." "hardy annual." "tender annual."

"perennial," "biennial," etc. These descriptions, when properly understood, will tell much about planting.

ANNUALS attain full growth from seed, bloom and die in one season. Sow HARDY ANNUALS outside in March or April, or earlier indoors for transplanting outside. Hardy Annuals may be sown in the fall for earlier spring blooming.

HALF HARDY and TENDER ANNUALS should be sown in the house or hot-bed and not be sown or transplanted outside until the weather is settled and warm.

BIENNIALS are plants that bloom the second year from seed, and then die. Many of these will bloom the first year if sown early. Sow under same conditions as perennials.

PERENNIALS are plants that bloom the second year from seed, and the plant lives and blooms for many years. If sown in early spring, many perennials will bloom the first year from seed. Tender and half-hardy perennials are best sown in spring after frost is over. Hardy perennials may be sown in the late summer and early fall (July to October) for next year's flowers.

TENDER or GREENHOUSE means the plant will not stand the least frost. All such must be planted late in spring, or in a greenhouse.

HARD SHELLED SEEDS like Canna, Brazilian and Japanese Morning Glory, Moon Vine, etc., should be soaked in warm water 36 hours before planting.

warm water 36 hours before planting.

HOW TO SOW FLOWER SEED: A common mistake in sowing flower, as well as other seeds, is covering too deeply The exception to this is the Sweet Pea, which is seldom planted deep enough. As a general rule, cover small seeds only to the depth of the thickness of the seeds; or, with medium-sized seeds, like Balsams, Zinnias, etc., half an inch or so is none too much. Such fine seeds as Petunias, Portulacas, etc., need only to be pressed into the soil with a piece of board. Always press the earth after sowing all flower seeds, else there is danger of their drying up before the roots can get firm hold of the soil. Seeds of the hardier Annuals may be sown where they are to grow; but, as a rule, it is preferable to transplant, as the plants are generally stronger and stand the drought better. During very dry weather, and when the seedlings are first set out, they should be watered frequently. Provide some support for all such plants as require it.

The weeds should be kept down and the ground loosened often, so that the plants will receive the full benefit of the rains and dews, which they will not if the ground is allowed to become hard and baked.

ABUTILON (Flowering Maple)

ELEGANT flowering plants of strong growth and easy cultivation, producing various colored, drooping bell-shaped flowers. Sown indoors any time before April, they will produce plants that will flower outdoors the first season and indoors all Winter. Half-hardy Perennial.

1—Fine Mixed. Of choice varieties and colors...10c pkt.

ACONITUM (Monk's Hood, or Wolfsbane)

3—Napellus. Grows in any good garden soil, producing long spikes of curiously-shaped blue and white flowers, adapted for planting among shrubbery or in shady corners of the garden; 3 to 5 feet. Hardy Perennial.

ACROCLINIUM

4—Double Mixed. An "Everlasting," growing about 15 inches high, bearing white or rosy-pink flowers, which, when cut in the bud state, can be dried and used in winter bouquets. Half-hardy Annual.
½ oz., 15c; 5c pkt.

ADLUMIA

(Mountain Fringe, Allegheny Vine, or Climbing Fumitory)

Cirrhosa. A graceful climber, but, as it resows itself year after year, it might be considered perennial. The feathery foliage closely resembles that of the Maidenhair Fern. The flowers are tube-shaped, flesh-colored, and completely cover the plant. For covering trellises, stumps of trees, etc., it is very desirable. Flowers the first year from seed. Hardy Biennial. 5c pkt.

AGERATUM (Floss Flower)

ONE of the very best bedding plants, being literally a sheet of bloom from early summer till frost. Unlike many bedding plants, their flowers are not liable to be spoiled by rain, nor do the colors fade out. The blue varieties are without doubt the most satisfactory bedding plants of this color for our trying climate. Easily raised from seed, which is usually started in a hotbed or window and transferred to the open ground in May. Can also be sown outdoors in May. Half-hardy Annual.

7—Little Blue Star. Of dwarf and even growth; the tiny bushes, not over 4 to 5 inches high, are densely covered with bright blue flowers; a fine variety for edging...3 pkts., 25c; 10c pkt.

8-Little Dorrit. Azure blue, 9 inches. ¼ oz., 40c; 5c pkt.

9-Album. White, profuse bloomer, 18 inches. 5c pkt.

AGROSTEMMA

(Rose of Heaven, Mullein Pink)

N attractive, free-flowering plant of easy culture, producing flowers on long slender stems like a single pink. Blooms the first season. Fine for cutting; 1 to 2 feet. Hardy Perennial.

10-Mixed Varieties......5c pkt.

AFRICAN GOLDEN DAISY. (See Dimorphotheca Aurantiaca.) ALLEGHENY VINE. (See Adlumia.)

All 5c Packets of Flower Seeds are 6 Packets for 25c. All 10c Packets are 3 Packets for 25c.

ALYSSUM (Mad-Wort)

- PRETTY little plants for beds, vases, baskets, edgings or rockwork, blooming profusely all Summer; useful also for Winter-flowering. Hardy Annual.
- 11—Little Gem, or Carpet of Snow. We know of no other flower which is so particularly well adapted for borders, ribbons, etc. The plants commence to bloom when quite small, and will flower all Summer until late in the Fall. This habit, with its fragrance, makes it indispensable. Keep the seed pods sheared off the plants and they will bloom until killed by frost. Sow the seeds wherever the plants are to remain. If too thick, thin out. To prevent sowing too thickly, mix the seed with sand before sowing. (See cut.)

 1/4 Oz., 15c; Oz., 50c; 5c pkt.
- 12—Lilac Queen. Is of dwarf, compact habit and the deep, lavender-like flowers are borne in profusion. 10c pkt.
- -Sweet Alyssum. Of trailing habit; flowers white. The popular old-fashioned sort, the best for broad edges and vases. It begins to bloom early in the season, and blooms until frost. It is a neat, thrifty, healthy grower and should be cultivated by everyone who wants an all around good plant. 1/4 oz., 10c; oz., 25c; 5c pkt.

AMARANTHUS

BRILLIANT foliaged plants, easily raised from seed, either by starting them early indoors or sown outdoors in May. Grow from 2 to 4 feet high; are useful in borders of tall plants or for the center of large beds. They thrive best in a hot, sunny location, not too rich soil, and given sufficient room to develop their full beauty. Hardn

- -Tricolor Splendens-Joseph's Coat. 2½ feet. The inner foliage is of blackest bronze, tipped with green, while the outer foliage is bright scarlet and gold. The colors are especially brilliant if grown in poor soil. 5c pkt.

ANTIRRHINUM (Snapdragon)

ATIVITATION (Shapdragon)

A NTIRRHINUMS or Snapdragons are one of the best cut flowers which can readily be grown from seed. They succeed best in a rather light soil, in a sunny position. For early flowering, sow in fall, protecting the plants with a covering of leaves through the winter. Sown in spring, they bloom by midsummer, and if the flowers are cut freely the flowering is continuous till fall. If intended for winter flowering in the house, cut them well back in September. The Snapdragon, like most perennials and biennials which bloom the first year, is treated like an annual and sown every year. Half-hardy Perennial. (See cut.)

AMPELOPSIS

16—Veitchi. (Boston or Japanese Ivy). A Hardy Perennial climber from Japan. The best and most popular climber for covering brick or stone walls.

1/4 oz., 15c; oz., 50c; 10c pkt.

ARABIS (Rock Cress)

17—Alpina. Early Spring flowering plant, especially adapted for edging and rockery; plants form a dense carpet completely covered with pure white blossoms in May; 6 inches. Hardy Perennial.

ARCTOTIS

(African Daisy)

ASPARAGUS

- -Plumosus Nanus. (Asparagus Fern.) This graceful climbing Asparagus has fine foliage, and will last for weeks after being cut. It is an excellent house plant. Greenhouse Perennial...10c pkt.

TALL, GIANT FLOWERING

Flowers nearly double the size of the older sorts

- 21—Queen Victoria. Very beautiful, bearing immense flowers, white shaded cream, with lemon-colored lip. The best white....10c pkt.
- 22—Silver Pink. Delicate rosy pink, seemingly covered with a silver sheen.....10c pkt.
- 23—Brilliant. Scarlet, gold and white.....10c pkt.
- 24-Fire King. Scarlet with orange. 10c pkt.
- 25—Venus. Light rose, white throat.
 10c pkt.
- 26-Golden King. Golden yellow ..10c pkt. flowers...
- 27—Special Collection. One packet each of the above 6 varieties..50c.
- Tall Giant Mixed. A splendid mixture, containing all the colors; magnificent large individual flow--Tall Giant Mixed. ers. 1/4 oz.,30c; oz.,\$1.00; 5c pkt.

SEMI-DWARF GIANT FLOWERING

Are particularly good for bedding, as they require no staking. The flowers are most wonderful, in many new shades and tints.

- Queen of the North. Grows 1 foot in height, densely covered with large white flowers. Also valuable for pot culture. 10c pkt.
- 30-Daphne. Soft blush pink

10c pkt.

- yellow,10c pkt. 32—Firebrand. Rich deep red. 10c pkt.

33-Ruby. Brilliant red ... 10c pkt.

-Half-Dwarf Mixed. Large variety of colors; best for bedding.

½ oz., 20c; 5c pkt.

AQUILEGIA, OR COLUMBINE

CHARMING hardy plants, bearing in countless numbers through May and June exquisite clear blue, white, rose, yellow, purple and striped blossoms. For planting in permanent borders or edges of shrubbery this old-fashioned favorite is one of the best. They thrive well with ordinary garden culture, but do best in partially shaded nooks. Few hardy plants are so easily grown from seed. Will bloom first season if sown very early. Hardy Biennial. Biennial.

35—Coerulea. (Rocky Mountain Columbine.) Sepals deep blue, petals white; extra fine, 2 feet.

3 pkts., 25c; 10c pkt.

36—Coerulea Hybrida, "Rose Queen." A beautiful variety, producing in great profusion very graceful, large-flowered, long-spurred flowers, shading from light pink to dark rose with white center and yellow anthers. 3 pkts., 25c; 10c pkt. " Rose

37-McCullough's Long-Spurred Hybrids

A beau-t i f u l strain,

1/4 oz., 20c; 5c pkt.

ing shades and combinations of blue, ing snades and combinations of blue, white, yellow, orange, scarlet and bright rose pink in large flowers with long spurs; the finest to be had.

3 pkts., 25c; 10c pkt.

38—Double, all colors, mixed.

402., 20c; 5c pkt.

39—Single, all colors, mixed.

ASTERS

A STERS are one of the most important summer and autumn flowers, and receive special care at our hands. Our list comprises only such sorts as can be planted with perfect confidence that nothing better is procurable, no matter at what price or from what source.

The early sorts begin blooming in July, followed by the midseason kinds, which flower during August; then the late-flowering varieties, which are at their best through September.

It is quite easy, therefore, with a little care in the selection of the varieties, to have Asters in flower from the first days in July until hard frost.

Asters will thrive in any good soil, prepared in the same way as you would for a crop of vegetables, but it is well to remember that any extra care taken in the preparation of the soil is repaid by finer plants, larger blooms, with longer stems and more profuse flowering. They should have an open, sunny position and prefer a good, heavy, loamy soil, enriched with a liberal quantity of thoroughly rotted manure, and the addition of wood ashes or air-slaked lime, and we do not advise growing them on the same ground two years in succession. Sow either in the open ground in May, or in March or April in cold frame, spent hotbed or pots or boxes in the house, covering the seed with about one-fourth inch of good soil. When the plants are strong enough transplant about 18 inches apart in deeply dug well-prepared beds. Half-hardy Annual.

This is the finest mixture of Asters in existence, and the most critical lover of this flower will be astonished at the wide range of colors and varieties given in this strain. . ½ oz., 40c; ½ oz., 75c; 10c pkt.

Giant Branching Asters
This superb strain is of American origin and is especially adapted to our climatic conditions.
The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers, which under ordinary cultivation, average 4 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September.

more colors than mentioned above. ½ oz., 25c; ¼ oz., 40c; 10c pkt.

Improved Giant Comet Asters

The finest type of the Giant Comet, or Ostrich Feather Asters. Much larger than the Giant Comet, the petals longer, more curled and twisted, and produced in greater abundance. Borne

produced in greater abandance. Doine
on long stems.

King Asters

The habit is similar to the popular Giant Branching, vigorous in growth, long stiff stems. In form the flower is entirely distinct from any other variety; petals somewhat resemble the quilled varieties, but are much larger and broader, those in the center being curled and incurved, completely covering the crown. In shape and size the bloom is round, full and very large.

BALSAM, Apple or Pear

VERY curious climbing vine, with ornamental foliage, fruit golden yellow, warted, and when ripe opens, showing the seed and its brilliant carmine interior; ten feet. Tender Annual.

98—Balsam Pear. (Momordica Charantia.) fruit; the fruit is long and used medicinally

99—Balsam Apple. (Momordica Balsamina.) Round apple-shaped fruit......Oz., 40c; 5c pkt.

BEGONIAS

Everblooming Bedding Varieties

THE following are varieties of Begonia Semperflorens, doing equally well in full sunlight, or in positions partially or wholly in shade. They grow about one foot high and form dense bushes, which, from May until frost are completely hidden with flowers. As pot plants for winter flowering they are superb. Easily raised from seed, which should be started indoors or in a hotbed. Tender Perennials.

101-Vernon. Bright orange carmine flowers, deep red foliage....

TUBEROUS-ROOTED BEGONIAS. (See Bulbs.)

BELLIS (English Daisy)

A FAVORITE perennial plant, which will stand the winter figure the protection of a few leaves or litter; in bloom from early Spring until well on in the Summer. The seed we offer is saved from the finest double varieties; easily raised from seed; usually sown in August, but can be sown in Spring, and for best results should be sown each year; 4 inches. Half-hardy Perennial.

105—Snowball. A beautiful white variety with long stems, and very double flowers; fine for cutting.....10c pkt.

Giant Double. Beautifully and densely imbricated flowers, 1½ inches in diameter. Finest mixed. 10c pkt.

BRACHYCOME (Swan River Daisy)

FREE-FLOWERING, dwarf-growing plants covered during the greater part of the summer with a profusion of pretty, Cineraria-like flowers. Suitable for edgings and small beds or pot culture. Half-hardy Annual. 107-Mixed. Light blue and white............5c pkt.

BROWALLIA (Amethyst)

BRYONOPSIS

Laciniosa. A beautiful annual climber of the gourd species, with ivy-like pale green foliage and showy fruit, first green, striped white, turning when ripe to scarlet, striped white. *Half-hardy Annual...* 5c pkt.

Begonia Gracilis Luminosa

All 5c Packets of Flower Seeds are 6 Packets for 25c. All 10c Packets are 3 Packets for 25c.

CALCEOLARIA

CALENDULA (Pot Marigold)

SHOWY free-flowering hardy annuals, growing in any good garden soil, producing a fine effect in beds or mixed borders, continuing in bloom from early summer until killed by frost; valuable also for pot culture, one foot. Hardy Annual. (See cut.)

-Orange King. The outer petals are slightly imbricated, while those of the center are curved like those of the paeony. Color rich, dark orange......½ oz., 15c; 5c pkt.

113-Lemon King. A grand variety, with double, extra large yellow flowers......½ oz., 15c; 5c pkt. 114—Fine Double Mixed. Contains the choicest sorts. ½ oz., 10c; oz., 15c; 5c pkt.

(See also Marigold)

CALLIOPSIS

SHOWY and beautiful free-flowering annuals, of the easiest culture, doing well in any sunny position, blooming all Summer and excellent for cutting and massing. It is best to sow them where they are to bloom, thinning out to stand 8 inches to 12 inches apart. By keeping the old flowers cut off the flowering season can be lengthened until late autumn. Hardy Annual. (See cut.) (See cut.)

-Golden Wave. Bright, golden-yellow flowers, with small, dark centers, blooming profusely. ½ oz., 20c; 5c pkt.

116—Finest Mixed.
½ oz., 20c; 5c pkt.

COREOPSIS

CAMPANULA

(Canterbury Bells)

THIS old-fashioned flower is a favorite with all. Stately and showy, and of the easiest culture. The seeds should be sown about April, in finely prepared, rich soil. Hardy Bien-

124-White.. 10c pkt.

-Double Mixed. All the double-flowering Medium varieties. . . ¼ oz., 40c; 5c pkt.

CANARY-BIRD VINE

(Tropaeolum Canariense)

127—A beautiful rapid annual climber, the charming little canary-colored blossoms bearing a fancied resemblance to a bird with its wings expanded. Half-hardy Annual. Oz., 25c; 5c pkt.

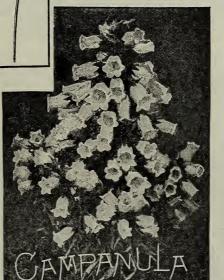

CANDYTUFT

UNIVERSALLY known and cultivated, and considered indispensable for cutting; one foot. Hardy Annual.

128—Giant Hyacinth Flowered. The finest of all the white varieties, being a complete mass of pure white flowers, in a pyramid of bloom.

½ oz., 25c; oz., 40c; 5c pkt.

Little Prince. Very large heads of pure white flowers; fine for borders and pots; 6 inches...........5c pkt. 130—Rose Cardinal. Bright carmine rose.....5c pkt. 131—White Rocket. Pure white. CANNA (Indian Shot)

SOAK the seeds in warm water until they show evidence of swelling; then sow in sandy loam, and place in a hotbed; when up to the second leaf, pot off singly. Halfhardy Perennial.

134—Mixed. Crozy's finest sorts.

finest sorts. Oz., 20c; 5c pkt.

CARDINAL CLIMBER

(Ipomoea Quamoclit Hybrida)

Hybrida)
35—The most brilliant, beautiful and distinct annual climber introduced for many years. Rapid grower with branching habit; flowers all summer; cardinal-red clusters, 15 to 25 feet. Tender Annual.....loc pkt.

Cardinal Climber Plants. Each 20 by mail, each 25c. 20c;

All 5c Packets of Flower Seeds are 6 Packets for 25c. All 10c Packets are 3 Packets for 25c.

CARNATION

ARNATIONS are general favorites for their delicious A fragrance and richness of colors. They are indispensable, both for greenhouse culture in Winter and for the garden Summer. The Marguerite type is best for Summer flowering.

Marguerite Carnation

138—These are deservedly the most popular Carnations with the amateur, as they begin flowering in a few weeks from time of sowing, producing on long, strong stems an abundance of large, double, beautifully fringed, highly scented flowers. Half-hardy Perennial.

Mixed. All colors.

1/4 oz., 50c; 5c pkt.

CELOSIA, or Cockscomb

RACEFUL plants, growing best in rather light soil, not too rich, producing beautiful comb-shaped flowers; grown in pots, they are fine for the greenhouse or conservatory. Half-hardy Annual.

139—Glasgow Prize. Enormous rich, deep crimson combs.
10c pkt.
140—Dwarf Mixed. Large solid heads of bloom....5c pkt.

Celosia Plumosa (Feathered Cockscomb)

Make fine plants for large beds or groups, and the plumes or flowers can be cut and dried for winter bouquets.

141—Thompsoni Magnifica Crimson. Of pyramidal growth, attaining a height of 3 feet and producing graceful, feathery plumes of the most brilliant crimson. . . 10c pkt.

142—Thompsoni Magnifica Yellow. . . . 10c pkt.

143—Plumosa, Mixed. 5c pkt.

CHILDSI. (See Chinese Woolflower.)

CENTAUREAS

UNDER this name is included such popular annuals as the Cornflowers, Sweet Sultans, etc. They are perfectly hardy, will grow almost anywhere, and are in demand as cut flowers.

Cornflowers (Centaurea Cyanus)

These are also known as Bachelor's Button, Blue Bottle, Ragged Sailor, Bluet. Attractive flowers of easiest culture. Sow early in Spring in the beds where they are to bloom. Hardy Annual. (See cut.)

144—Dwarf Blue. Single blue. 1501, 07, 2501, 50 pkt.

 144—Dwarf Blue.
 Sliger olde.

 ½ oz., 15c; oz., 25c; 5c pkt.

 145—Single Mixed.
 Blue, white, rose, etc.

 ½ oz., 15c; oz., 25c; 5c pkt.

 146—Double Blue.
 Flowers semi-double.

 147—Double Pink.
 5c pkt.

 148—Double Mixed.
 ½ oz., 15c; oz., 25c; 5c pkt.

Royal Sweet Sultans (Centaurea Imperialis)

40c 155—Finest Mixed Colors...... ¼ oz., 20c; 5c pkt.

White-Leaved Centaureas (Dusty Millers)

Fine for bedding, vases, hanging-baskets and pots; also extensively used for borders. Sow the seed early indoors and transplant in May. Tender Perennial.

156—Candidissima. Silvery white; leaves broadly cut.

10c pkt.

157—Gymnocarpa. Fine-cut silvery foliage; the kind used most for borders; 1 foot....... ½ oz., 20c; 10c pkt.

CENTROSEMA (The Butterfly Pea)

CHINESE WOOLFLOWER

(Celosia Childsi)

CHRYSANTHEMUMS Hardy Annual Varieties

The hardy Annual Varieties
and quite distinct from the hardy perennial varieties.

160—Bridal Robe. (Double.) The plants grow about 12 inches high, and are covered the entire summer with their beautiful snow-white double flowers.

161—The Sultan. (Single.) Crimson maroon.

162—Evening Star. (Single.) Flowers 3 inches across; of pure golden-yellow.

163—Northern Star. Large, white flowers, with black center.

164—Annual Double Mixed. Yellow, white, etc.

165—Annual Single Mixed. (Painted Daisies.).

5c pkt.

SHASTA DAISY

(Chrysanthemum Leucanthemum)

—Alaska. A splendid hardy perennial variety, with flowers rarely less than 4 inches across, of the purest glistening white, with broad, overlapping petals, and borne on long, strong stems; a beautiful cut flower, remaining in good condition a week or more. (See cut.)...10c pkt.

CINERARIA

CLEOME (Giant Spider Flower)

COLEUS

169—Large Leaved Varieties. Our strain of hybrid varieties produces the finest colored, most attractive and novel foliage plants for house or garden culture. A most interesting subject to grow from seed. Sow indoors in March or April and transplant to open ground in May. Tender Perennial.

2 pkts., 25c; 15c pkt.

Columbine (See Aquilegia)

COSMOS

BEAUTIFUL autumn-blooming plants. They produce thousands of beautiful flowers in pure white, pink and crimson shades, furnishing an abundance of cut blooms for autumn decoration when other flowers are scarce. Should be sown in Spring in the open ground, when danger of frost is past, or the seed may be started under cover and afterwards transplanted. Plant not less than 18 inches apart in rows or in masses in beds. When the plants are about a foot high the tops should be pinched out to induce a bushy growth. They prefer a rather light, not too rich soil, but do well almost anywhere. Half-hardy Annual. (See cut.)

Double Cosmos

One of the best novelties of recent years. These varieties produce full, round, double flowers on sturdy, bushy plants, blooming in late summer and

Double Crested

These, which are commonly called double, are not fully double, but are double crested, having double centers and a row of petals around the base of the flower, which makes them very effective. They come into flower about the same time as the late flowering mammoth. 172—Double Pink Beauty...3 pkts., 25c; 10c pkt. 172½—Double White Queen.3 pkts., 25c; 10c pkt. 173—Double Mixed Hybrids. 3 pkts., 25c; 10c pkt.

Extra Early Mammoth Flowering

Seeds sown in the open ground produced plants that were covered with bloom two months before the late-flowering kinds.

173 ½—Crimson. Rich. . . . ½ oz., 25c; 5c pkt.
174—Pink. A pretty shade. . . ½ oz., 25c; 5c pkt.
175—Pure White. ½ oz., 25c; 5c pkt.
176—Mixed, Early Cosmos. . . ½ oz., 20c; 5c pkt.

Mammoth Perfection

A magnificent selection, bearing flowers of mammoth size and perfect form.

CYPRESS VINE (Ipomoea Quamoclit)

DELICATE, fern-like foliage, and masses of beautiful, small star-shaped flowers. Sow in May, first soaking the seeds in warm water for a few hours. 15 feet. Half-hardy Annual.

 181—Scarlet
 Oz. 40c; 5c pkt.

 182—White
 Oz. 40c; 5c pkt.

 183—Mixed
 White and Scarlet
 Oz. 40c; 5c pkt.

QUAMOCLIT HYBRIDA

(See Cardinal Climber.)

CONVOLVULUS

(See Morning Glory.)

COBAEA SCANDENS

(Cathedral Bells)

Cobaea Scandens Plants. Each 25c; per doz., \$2.50; (by mail, each, 30c.)

CORN (Ornamental)

185—Zea Japonica Quadricolor Perfecta. This grass forms an object of great beauty in mixed beds and borders or isolated in groups on lawns, in sub-tropical gardens, etc.; it thrives in rich, light, warm soils. The leaves are striped in yellow, green, rose and dark red; four feet. Tender Annual. ½ oz.. 15c; 5c pkt.

CYCLAMEN

-Giant-Flowered. (Persicum Giganteum.) A popular pot-plant for Winter and Spring-flowering. Seedlings bloom in eight to ten months. Greenhouse Perennial. Best strains, mixed...

DAHLIA

DAHLIAS are easily grown from seed and bloom the first season. The earlier they are started the better, which can be done nicely in a box in a sunny window or the greenhouse. Protect the roots during winter in a dry cellar in sand. Half-hardy Perennial.

Double Flowering

187—Cactus Varieties. Most popular at the present time; distinct and elegant; petals pointed....... 10c pkt.

188—Double Large-Flowering. This mixture is composed of the finest large flowering double varieties...10c pkt.

Single Flowering

- 4

DELPHINIUM (Hardy Perennial Larkspur)

NE of the most exquisite blue-tinted flowers that we have. Very effective planted in beds, masses or borders. Plant 1½ to 2 feet apart each way. Perennial varieties should be sown in the Fall or very early in the Spring, transplanting to the open ground. Hardy Perennial.

191—New Giant-Flowering Hybrids. These magnifecent Hybrids, the grandest of Delphiniums in existence, produce beautiful spikes of immense flowers, single, semi-double and double. Flower spikes are from 2 to 3 feet in length. Colors are beautiful, ranging from pure white through all shades of lavender and blue. (See cut.)............10c pkt.

193—Elatum. (Giant Bee Larkspur.) Clear, blue flowers, 3 feet...5c pkt.
194—Formosum. Elegant spikes of the richest dark-blue flowers, with a white center; especially fine for cutting; 4 feet..............5c pkt.

ANNUAL DELPHINIUMS. (See Larkspur.)

DIMORPHOTHECA

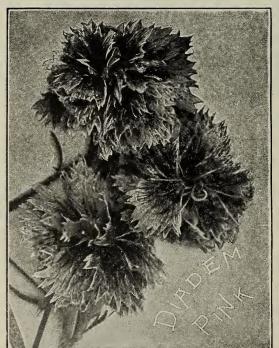

(African Golden Daisy) Half-hardy Annual.

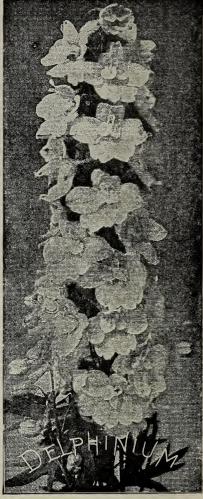

DIANTHUS, or Pinks

THIS elegant family contains many of the most valuable and popular flowers in cultivation. All the sorts classed as annuals may be sown directly in the garden as soon as danger from frost is past, and will in a short time become a mass of bloom, and so remain all Summer. Elegant as cut flowers for bouquets, as the stems are good. Grow about one foot high, and are of easiest culture. Half-hardy Annual.

Double Annual Pinks

5c pkt

-Royal Pink. (Dianthus Heddewigi Nobilis.) The flowers are very large and the petals are frilled and fringed. The colors are of a deep yet very bright blood-red, then shade to carmine and pink and even white......5c pkt. 202-Royal Pink.

203-Snowball. Large double white, splendid for cutting or

Single Annual Pinks

-Salmon Queen. The well-formed, nicely-fringed flowers are a brilliant salmon color, changing into a crimson rose.

206-

Hardy Garden Pinks

This splendid class of Pinks should be in all gardens. Thave the delightful clove fragrance. Half-hardy Perennial.

The delightful clove fragrance.

Double Large-Flowering Grass, or Spice Pinks. (Plumarius Semperflorens, fl. pl.) One foot high. The flowers, which are beautifully fringed, are much larger and more double than the old varieties, while the colors are far richer. They emit a delightful, sweet-scented, spicy odor. Perfectly hardy, requiring only the ordinary culture of Pinks.

DIANTHUS BARBATUS. (See Sweet William.)

DIGITALIS (Foxglove)

DOLICHOS (Hyacinth Bean)

209—A rapid-growing, annual climber, flowering freely in erect racemes, followed by ornamental seedpods; for covering arbors, trellises, etc. Tender Annuals. Finest mixed, purple and white. Oz., 15c; 5c pkt.

ESCHSCHOLTZIA

(California Poppy, Gold Cups)

A SHOWY, free-flowering plant of low-spreading growth, with finely divided foliage, blooming throughout the season. Seed should be sown thinly in shallow drills early in Spring. Hardy Annual. (See

210—Californica. Bright yellow, with orange center. Oz., 25c; 5c pkt.

BUSH ESCHSCHOLTZIA. (See Hunnemannia.)

EUPHORBIA

STRONG-GROWING annuals, suitable for beds of tall-growing plants or mixed borders; the flowers are inconspicuous; but the foliage is exceedingly ornamental.

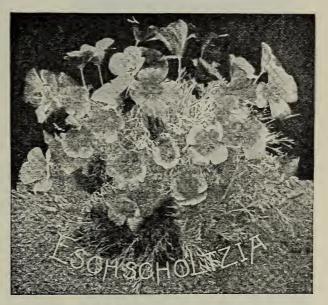

Hardy Annual.

FLAX, Scarlet. (See Lynethrum and Matricaria.)
FLAX, Scarlet. (See Linum.)
FORGET-ME-NOT. (See Myosotis.)
FOUR-O'CLOCKS. (See Marvel of Peru.)
FOXGLOVE. (See Digitalis.)

GOMPHRENA (Globe Amaranth)

217—A desirable everlasting, valuable for its handsome globular heads of flowers. Half-hardy Annual. Mixed. 5c pkt.

GAILLARDIA (Blanket Flower) ANNUAL VARIETIES

Splendid, showy annuals; in bloom from early Summer till November; excellent for beds, borders or for cutting. Half-hardy Annual. 218—Picta Lorenziana. Double-flowering mixed. 5c pkt. 219—Picta Mixed. Single sorts; fine colors.....5c pkt.

HARDY PERENNIAL VARIETY

Thrives in almost any position or soil and requires little or no protection. If sown early, begins flowering in July, continuing a mass of bloom until frost, fine for cutting. Hardy Perennial. (See Cut.)

220—Grandiflora. A compact variety, forming bushy plants 12 to 15 inches high, and bearing its long-stemmed flowers well above the foliage............5c pkt.

. GERANIUM (Pelargonium)

THE heads of gorgeous flowers, of many shades of color, borne continuously, render this one of the most popular plants grown, either for pot culture in Winter or for bedding out in Summer. Tender Perennial.

221—Zonale, Mixed. A superb strain of the largest and finest varieties. 10c pkt.

222—Apple-scented. This fragrant, favorite variety can only be grown from seed to form fine plants. . . 10c pkt.

GODETIA

223—The plants bloom profusely and bear showy flowers of satiny texture in many rich and varied colors. They do best in a rather poor soil. 1 foot. Hardy Annual. Finest Mixed. Oz., 30c; 5c pkt.

GOURDS (Ornamental)

BEING of rapid growth, they are fine to cover old fences, trellises, stumps, etc. Do not plant the seed till all danger of frost is over, and select rich, mellow ground. Tender Annual climbers, 10 to 20 feet.

Club-shaped.......5c pkt.

228—Japanese Nest Egg. White; facsimile of an egg; not injured by heat
or acid

233-Mixed Varieties. Oz., 25c; 5c pkt.

GRASSES (Ornamental)

FOR large beds or groups on lawns nothing gives a finer effect. And they are now largely used in prominent positions in many of the finest public parks, etc. When carefully dried, they are useful in making up winter bouquets. Cut when in full bloom, and before the flowers get too old; tie in small bunches and hang up in a dry, dark place, with the heads down-

234—Bromus Brizaeformis. A graceful variety, with drooping panicles. Hardy Perennial, flowering the first season;

235—Coix Lachryma. (Job's Tears.) Broad, corn-like leaves, and hard, shining, pearly seeds, resembling tears; 2 feet; Hardy Annual. Oz., 10c; 5c pkt.

236—Erianthus Ravennae. A Hardy Perennial noble grass, with exquisite white plumes; flowers the first season if sown very early; 10 feet. 5c pkt.

237—Eulalia Japonica. One of the most beautiful of the tall-growing grasses. Hardy Perennial; 5 feet...5c pkt.
 238—Gynerium Argenteum. (Pampas Grass.) The finest ornamental grass in cultivation. Half-hardy Perennial; 10

240-Finest Mixed. Used for making Winter bouquets.

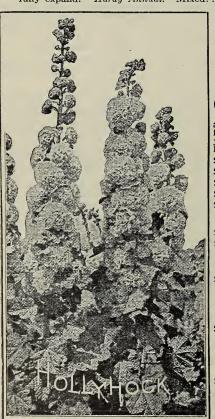

GYPSOPHILA (Baby's Breath)

PRETTY free-flowering plants, succeeding in any garden soil. Their misty white panicles of bloom are largely used for mixing with other cut flowers.

241—Elegans Grandiflora Alba. This is an improved large flowering, pure white form of the annual Baby's Breath. Half-hardy Annual....Oz., 25c; 5c pkt.
242—Paniculata. White flowers, fine for bouquets; blooms first year if sown early. Hardy Perennial; 2 feet.

HELICHRYSUM (Straw Flower)

243—Monstrosum. Everlasting flowers, large and full. Colors, white, yellow and red. Cut before the flowers fully expand. Hardy Annual. Mixed......5c pkt.

HELIOTROPE (Cherry Pie)

AHALF-HARDY Perennial, flowering during the whole season; its delightful perfume makes it a most desirable bouquet flower; a splendid bedding plant, or can be trained as a greenhouse climber. Seed started indoors in the Spring will make fine plants for Summer blooming.

244—Choicest Mixed; from new varieties.....5c pkt.

HIBISCUS (Marshmallow)

SHOWY ornamental perennial plants, for mixed beds or shrubbery borders; blooms first year if sown early.

245—Mallow Marvels. Immense flowers from 8 to 10 inches in diameter, in following colors; fiery crimson, blood red, shell pink and white. Their great beauty surpasses all other perennials in profusion of bloom and brilliancy of color. They come up year after year and are absolutely hardy. Hardy Perennial. (See cut.)

HOLLYHOCK

NE of the most majestic of hardy plants, and a clump or line in any garden gives an effect not attainable with any other plant. For planting among shrubbery or forming a background for other flowers it is without an equal. Seed sown any time before mid-summer will produce fine plants for flowering next year. To get results this season it is necessary to get year-old plants. These we offer with other hardy plants under their proper heads. Hardy Perennial.

246—Chater's Double Pink

247—Chater's Double Scarlet

248—Chater's Double White

249—Chater's Double Wellow

250—Chater's Prize, Double Mixed. This strain stands unrivaled in richness and delicacy of coloring, with magnificent spikes of very double flowers. (See cut.)

251—Choice Double Mixed

251-Choice Double Mixed.....

HONESTY (Moonwort, Satin Flower)

254—Greatly admired for its silvery seed pouches, which are used for house ornaments; two feet. Hardy Biennial...............5c pkt.

HUNNEMANNIA

(Giant Yellow Tulip Poppy, or Bush Eschscholtzia)

(Giant Yellow Tulip Poppy, or Bush Eschscholtzia)

255—Fumariaefolia. This is by far the best of the poppy family for cutting, remaining in good condition for several days. Seed sown early in May will, by the middle of July, produce plants covered with their large buttercup-yellow, poppy-like blossoms, and never out of flower until hard frost. The plants grow about 2 feet high, are quite bushy, with beautiful feathery glaucous foliage. Half-hardy Annual. 5c pkt.

HUMULUS (Japanese Hop)

IBERIS (Hardy Candytuft)

ICE PLANT

259—Mesembryanthemum Crystallinum. Handsome and curious plants for hanging baskets, rock-work, vases and edgings. The leaves and stems are covered with crystalline globules, giving it the appearance of being covered with ice. Succeeds best in a sandy soil and warm situation. Tender Annual. 5c pkt.

IPOMEA. (See Cypress Vine, Moonflower and Morning-Glory)
JOB'S TEARS. (See Ornamental Grasses)

"JACK AND THE BEAN STALK". (See Kudzu Vine Seed.)

IMPATIENS (Sultan's or Zanzibar Balsam)

KENILWORTH IVY

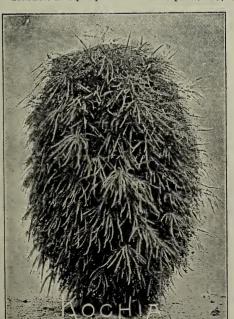

262—Linaria Cymbalaria. A trailing plant suitable for vases, etc. Little lavender and purple flowers and an exquisite foliage. *Hardy Perennial.......***10c pkt.**

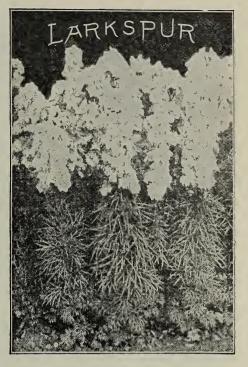

KOCHIA

(Summer Cypress, Belvedere or Burning Bush)

FORMS regular pyramids about 3 feet high, having a cypress-like appearance. The leaves are light green until September, when they change to carmine and blood red. Sow indoors in April and plant out in May, or sow in open ground about May 1. Hardy Annual. (See cut.) 263-Kochia Tricophylla.....

-Rochia Childsii. This new variety produces plants that grow three to four feet high, dense, strong and symmetrical. The foliage is green all summer, but at touch of frost it changes to dark claret-red and does not die until Christmas or later. A splendid plant to divide the vegetables from the flower garden or for forming a hedge for the summer for any purpose. Also desirable as a pot plant. 3 pkts., 25c; 10c pkt.

KUDZU VINE

265—Pueraria Thunbergiana. It will grow 8 to 10 feet the first year from seed, and after becoming established will produce vines 50 feet high in a season, sometimes growing 12 inches in a single day. Produces a tuberous root which is perfectly hardy. Unequaled for porches, arbors, trellises, etc. Hardy Perennial......10c pkt.

LANTANA

266—Verbena-like heads of orange, white, rose and other colored flowers; constantly in bloom; 2 to 3 feet. Halfhardy Perennial. Mixed colors.......5c pkt.

LAVENDER (Lavandula Vera)

267—Well known, sweet-scented Hardy Perennial; should be extensively grown in the mixed border; 2 feet. 5c pkt.

ANNUAL LARKSPURS

THIS is one of the best known of garden flowers. Seeds sown in the open ground before the close of April will produce flowering plants by the beginning of July, and give a continuous succession of flowers from then until frost. Hardy Annual.

268—Double Stock-Flowered. The finest variety with splendid spikes of beautiful double flowers; 2½ to 3 feet. Finest mixed. ½ oz., 15c; oz., 50c; 5c pkt.

Dwarf Rocket. The flowers are large, double and of various beautiful colors, shadings and markings; long spikes of bloom. Oz., 30c; 5c pkt.

(For Hardy Perennial Larkspurs see Delphinium) (LADY SLIPPER. See Balsam.)

LATHYRUS (Everlasting, or Hardy Sweet Pea)

Showy, free-flowering climbers for covering old stumps, fences, etc.; continually in bloom; fine for cutting. Hardy Perennial.

270-Latifolius "White Pearl." The finest white variety. 10c pkt. 271-Pink Beauty. Rosy pink......10c pkt.

LINUM (Flax)

LOVE-IN-THE-MIST. (See Nigella.)

LOBELIA

THE following choice varieties of this popular and beautiful flowering plant will be found most desirable for pot culture, edgings, hanging baskets, etc., blooming profusely from June to November. Half-hardy Annual. Cardinalis is one of the finest native Hardy Perennials.

274-Crystal Palace Compacta. Rich blue; finest for bed-

275—Speciosa. Dark blue; trailing; fine for vases....5c pkt. 276—Cardinalis Hybrida. Splendid hybrids, mixed; highly recommended. Hardy Perennial; 2 feet......10c pkt.

LUPINUS (Lupine)

277—Annual Mixed. Free-flowering, easily grown annuals, with long, graceful spikes of rich and various colored peashaped flowers; 2 feet. Hardy Annual. Oz., 25c; 5c pkt.

278—Polyphyllus Roseus. A fine variety of the perennial Lupine, with showy spikes of rose-colored flowers. Hardy Perennial. Oz., 50c; 10c pkt. Perennial......Oz., 50c; 10c pkt.

-Perennial Mixed. Hardy Perennial varieties, in pink, blue and white mixed.....Oz., 30c; 5c pkt.

MARIGOLD (See also Calendula)

THE African and French Marigolds are free-flowering annuals of easy culture; the former have uniformly large, yellow or orange colored flowers. (See cut.) The latter are dwarfer in growth, with beautifully striped flowers. They succeed best in a light soil, with full exposure to the sun. Half-hardy Annual.

French Varieties

283—Legion of Honor. Single Dwarf Marigold, forming compact bushes. Flowers golden yellow and brown; blossoms in great profusion... ½ oz., 25c; 5c pkt.
284—French Gold Striped. Very double; 1 foot. ½ oz., 15c; 5c pkt.

MARVEL OF PERU, or Four O'Clocks (Mirabilis Jalapa)

285—A well-known free-flowering garden favorite; does well everywhere; give each plant 12 to 18 inches of room. Half-hardy Perennial. Finest Mixed. Oz., 25c; 5c pkt.

MATRICARIA

All 5c Packets of Flower Seeds are 6 Packets for 25c.

MAURANDIA

Beautiful, rapid, slender growing climbers, blooming profusely until late in the autumn; also fine for the conservatory or greenhouse. A Half-hardy Perennial, flowering the first season if sown early.

237—Barclayana. Deep violet; fine...........10c pkt. 288—Finest Mixed. All colors......10c pkt.

MIGNONETTE (Reseda)

291—Sweet-scented. The old variety; but very sweetly scented.Oz., 15c; 5c pkt.

MIMOSA (Sensitive, or Humble Plant)

292—Pudica. Curious and interesting annuals, with pinkish-white flowers; the leaves close and droop when touched or shaken. Half-hardy Annual.

5c pkt.

MIMULUS

Fine for shady situations; blooming the first year from seed if sown early; 1 foot. Half-hardy Perennial. 293-Tigrinus. (Monkey Flower.) Fine mixed spotted

MOON FLOWER (Ipomoea Noctiflora)

Climbers of rapid growth, with beautiful and varied flowers; for covering walls, trellises, arbors or stumps of

295—Cross Bred or Hybrid Moon Flower. At night and during dull days the plants are covered with an abundance of large, pure-white, fragrant flowers. 5 to 6 inches in diameter. It is a rapid grower, and within a few months will grow as much as 40 feet. To insure germination, take a sharp knife and cut a small nick in shell of each seed, and soak in warm water for about 4 hours before planting. Tender Perennial. 4 oz., 20c; oz., 75c; 5c pkt.

-Giant Pink Hybrids. Similar to the above in habit of growth and bloom with pink flowers.

4 oz., 20c; oz., 75c; 5c pkt.

Moon Flower Plants.
Each, 20c; per doz., \$2.00; by mail, each 25c.

All 10c Packets are 3 Packets for 25c.

MORNING GLORIES or Convolvulus

MYOSOTIS (Forget-Me-Not)

The Forget-Me-Nots succeed best in shady, moist situations; Half-hardy Perennial.

301—Alpestris Victoria. Early flowering, of bushy habit bearing large, bright, azure-blue flowers......10c pkt.

302—Dissitifiora. Of dwarf compact habit, flowers rich blue. .10c pkt.

NASTURTIUMS

FOR ease of culture, duration of bloom, brilliance of coloring and general excellence, nothing excels Nasturtiums. All they need is a moderately good soil in a well-drained sunny position. The varieties offered below were selected from a very large number of sorts as being the best and most distinct Half-hardy Annual.

Tall, or Climbing Varieties

Elegant and luxurious climbers for verandas, trellises, etc. May be used to cover unsightly railings and to trail over rough ground with fine effect. The seedpods can be gathered while green and tender for pickling; 6 to 10 feet.

305-Chameleon. Different richly-colored flowers on the

same plant.

306—Crimson. Rich and velvety.

307—Fulgens. Dazzling crimson flowers, dark foliage.

308—Gold Garnet. Orange yellow, garnet blotches.

309—King Theodore. Deep crimson maroon. dark foliage.

313—Collection. 12 varieties......40c.

Contains all the new Giant Flowering Mixture of Tall Nasturtiums many other grand new hybrids, embracing every shade and tint of yellow, rose, scarlet, orange, carmine, violet, purple, lemon, bronze, maroon, ruby, cream and pink, both in solid colors and mottled and striped.

Oz. 20c; ¼ lb., 60c; lb., \$2.00; 5c pkt.

320—Mixed Tall Nasturtiums. For the low price this

320—Mixed Tall Nasturtiums. For the low price, this mixture is very choice but will not give as fine flowers as our "Premier" listed above.

Oz., 15c; ¼ lb., 40c; lb., \$1.25; 5c pkt.

Lobb's Nasturtiums

Miscellaneous Varieties

MISCEIIANEOUS VARIETIES

322—Hybrids of Madame Gunter. For richness and variety of colors these have no equal among Nasturtiums. The foliage is mostly dark. Oz., 20c; 5c pkt.

323—Tall Ivy Leaved. Thick, green, lobed leaves, resembling those of the English Ivy. The flowers are of a delicate fringed formation. Oz., 20c; 5c pkt.

324—Tall Variegated Leaved. The foliage is variegated, rendering the plants very ornamental even when not in flower. Oz., 20c; 5c pkt.

TROPAEOLUM CANARIENSE. (See Canary Bird Flower.)

Dwarf, or Bedding Varieties

THEY are suitable for hanging baskets, vases, window boxes, bedding and edging; grow quickly, thrive in the poorest soil and furnish the greatest abundance of long lasting, sweet-scented cut flowers.

325—Beauty. Yellow-striped red.

326—Chameleon. This interesting variety produces flowers of different colors on the same plant.

327—Crystal Palace Gem. Sulphur, spotted maroon.

328—Empress of India. Crimson flowers, dark foliage.

329—Golden King. Brilliant yellow.

330—King of Tom Thumbs. Intense deep scarlet flowers, dark foliage.

331—King Theodore. Dark Maroon, bluish-green foliage,
332—Pearl, or Moonlight. Creamy white.
333—Prince Henry. Golden yellow, marbled and spotted with brilliant scarlet.

NEMESIA

342—Strumosa Grandiflora. Flowers range in color from crimson to golden yellow and are large and brilliant. Half-hardy Annual. 3 pkts., 25c; 10c pkt.
343—Blue Gem Compacta. The flowers are a soft azure blue. Fine for borders, edgings or small beds; 6 to 8 inches. Half-hardy Annual. . . 3 pkts., 25c; 10c pkt.

NICOTIANA

(Sweet Scented Tobacco Plant)

One of the easiest annuals to raise and one of the most effective. The blossoms in shape are not unlike a Petunia blossom, but with a longer tube. The flowers open toward evening and emit a powerful perfume. Hardy Annual.

344—Affinis. Large, pure white flowers of delicious fragrance. If taken up in the Fall, cut back and potted, they will bloom all winter. 5c pkt.

-Sanderae Hybrids. A showy and profuse flowering, half-hardy annual, giving a continuous display of brilliant flowers through Summer and Autumn. The plant is of branching, bushy habit, 2 to 3 feet high, and carries the flowers in clusters. The flowers measure from 1½ to 2 inches across and remain open all day. Many colors, mixed. 5c pkt.

NIGELLA

(Love in a Mist, or Devil in the Bush)
346—Miss Jekyll. Lovely variety giving an abundance of long-stemmed flowers which are of a clear cornflower-blue, prettily set in slender elegant foliage. One of our most attractive annuals. The plants are extremely hardy, and an Autumn sowing produces the best specimens for flowering in the following Summer. Height, 18 inches. Hardy Annual. . . . 10c pkt.

PANSY

PANSY seed has always been a leading specialty with us. Seed germinates best while soil is still cool and moist. Would advise sowing in shallow drills in seed-bed early in Spring when the trees are starting out in leaf, and again in September when the weather becomes cool. As above stated, plants from the Spring-sown seed flower with great freedom throughout Spring, Summer and Fall, while the stocky young plants grown in Fall and Winter produce the largest and finest flowers early the following Spring. Take care of the weakest looking seedlings, as they usually give the finest flowers. Half-hardy Perennial.

Mastodon Pansies

A new strain of American Grown Mammoth Flowering Varieties.

—Adonis. Light blue flowers, marked with a yenowish-white face and large dark blotches.

2 pkts., 25c; 15c pkt.

—Blue Perfection. The best dark blue flowers of immense size. 2 pkts., 25c; 15c pkt.

—Candidissima. The finest and largest pure white flowers. 2 pkts., 25c; 15c pkt.

—King of the Blacks. Flowers of immense size, nearly all jet black and velvety in substance.

2 pkts., 25c; 15c pkt.

352—Madame Perrett. Colors are dark wine, pink and red, with edges of petals frilled and bordered white.

2 pkts., 25c; 15c pkt.

Parisian venow.

2 pkts, 25c; 15c pkt.

Vulcano. Flowers a rich, velvety burgundy-red, of immense size; finest red pansy grown.

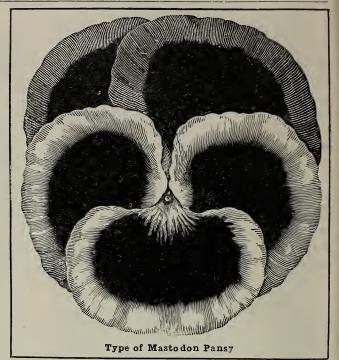

2 pkts., 25c; 15c pkt.

The cream of American and European Specialists. In this magnificent mixture of mammoth-flowering Pansies the blossoms are borne on long stems well above the foliage and are distinguished for their gorgeous and varied colorings and beautiful markings; of fine substance, velvety texture, perfect form, and giant size, frequently measuring 3 inches in diameter. The colorings are wonderfully rich and varied; every shade and tint of rose, canary-yellow, black, white, cream, lavender, garnet, sky-blue and orange are produced in endless variation. . . . ½ oz., \$1.00; ¼ oz., \$1.75; 25c pkt.

A superior mixture selected from choice, large flowering strains of English and French growers. This strain is one of great excellence, the individual flowers being superb and include many fine shades in a number of colorings, and is intended to supply the want of a first-class mixture at a moderate price.

| A | Superior mixture selected from choice, large flowering strains of English and French growers. This strain is one of great excellence, the individual flowers being superb and include many fine shades in a number of colorings, and is intended to supply the want of a first-class mixture at a moderate price.

— McCullough's Choice Mixed

Great diversity of colors, free flowering, blossoms are slightly smaller than the Giant sorts. 1/2 oz., 15c; 1/4 oz., 25c; 5c pkt.

Violas, or Tufted Pansies

(Also known as Pansy Violets, Johnny-Jump-Ups, etc.) OUR improved strain produces beautiful Pansy-like blossoms, of most brilliant colors and markings. The plants are more hardy than Pansies, and of vigorous growth, forming deep-rooting, compact, tufted clumps. Planted in masses or lines they form perfect mats covered with myriads of flowers from Spring until cold weather.

360—McCullough's Special Mixture

of Improved Tufted Pansies. 1/8 oz., 35c; 1/4 oz., 60c; 10c pkt.

PETUNIA

For outdoor decoration or house culture few plants equal the Petunia in effectiveness. Easily cultivated, only requiring a good soil and sunny position. Hardy Annual.

Double Large-Flowering

IT IS well known that seed saved from the most carefully hybridized flowers produces but a small percentage of double flowers, the balance being singles of unusually fine quality. The weaker seedlings should be carefully saved, as these invariably produce the finest double flowers.

ine quality. The weaker seven in the quality produce the finest double now saved, as these invariably produce the finest double now in the finest of the finest strains in existence. The double flowers are beautifully formed, having the edges of the petals elegantly fringed.

Strand Choice strains of fine colors of the petals elegantly fringed.

Single Large-Flowering

THE weaker seedlings produce the finest flowers of best colorings. It is best to sow Petunias indoors and transplant to the open in May. The Single Bedding kinds can be sown right out of doors in May.

self-colors. 15c pkt.

McCULLOUGH'S ANNUAL PHLOX

FEW flowers are so easy to grow from seed, so pretty and compact in habit, so quick to bloom, or give such a brilliant display of color for so little cost and care. The first sowing should be made as soon as the frost is out of the ground in Spring, later ones in May, either where the plants are to bloom or in a seed-bed, as the Phlox transplants readily. (See cut.)

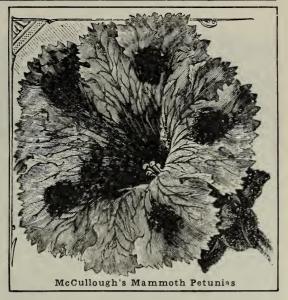

McCullough's Giant Phlox

so large as the Grandmora type difference flowering and effective.

1/4 oz., 30c; oz., \$1.00; 5c pkt.

Large-Flowering Dwarf
A type combining the size of the individual flower and head of the Grandifloras, but of dwarf, compact growth, 376—Finest Mixed Colors (Dwarf Varieties)...10c pkt,

Star Phlox

Hardy Perennial Phlox (P. Decussata)

Hardy Herbaceous Perennial and quite distinct from the varieties of Phlox Drummondi, which are annuals. For best results should be sown as soon as frost is out of the ground in Spring or as soon as gathered in the Autumn. 378-Mixed. All varieties. 1/4 oz., 60c; 10c pkt.

POPPIES

Double Annual Poppies

THEY make a gorgeous show during their flowering period, and are largely used for beds and borders. Should be sown as early in the spring as possible where they are to remain, as they do not stand transplanting. Sow very thinly. Hardy Annual. thinly.

379—American Flag. Beautiful variety; flowers and double, snow white, bordered with scarlet. Beautiful variety; flowers very large

Oz., 30c; 5c pkt.

382-White Swan. Immense double flowers, fringed and of purest white. Oz., 25c; 5c pkt.

383-Carnation Flowered. Splendid double fringed flowers, mixed colors.....5c pkt.

All 5c Packets of Flower Seeds are 6 Packets for 25c. All 10c Packets are 3 Packets for 25c.

POPPIES—Continued

Single Annual Poppies

ANNUAL Poppies should be sown as early in the spring as possible where they are to remain, as they do not stand transplanting. Sow very thinly. If they come up too thickly they must be thinned out to stand 3 to 4 inches or more apart if you wish best results. Hardy Annual.

They are single and occasionally semi-double, and range in color from the purest white through the delicate shades of pale pink, rose and carmine of the deepest crimson and blood-red, while many are daintily edged and striped. In fact, so varied are they that scarcely any two flowers are exactly alike. (See cut.)

(See cut.)
1/4 oz., 15c; oz., 40c; 5c pkt. -Admiral. A single paeony-flowered variety of surpassing beauty, having large, smooth-edged flowers of glistening white, with a broad band of brilliant scarlet around the top. These two colors form a very striking contrast, and when planted in groups produce a magnificent effect.

Oz., 40c; 5c pkt. 388—Danebrog, or Danish Cross. Very showy variety, producing large flowers of brilliant scarlet, with a silvery-white spot on each petal, forming a white cross.

Oz., 40c; 5c pkt.

389—Fire Dragon. Very showy flowers of brilliant deep scarlet, with black spots, margined white; 2 to 2½ feet.
½ oz., 25c; 5c pkt.

392—McCullough's Special Mixture includes all the above choice poppies many other kinds not listed. It is really extra choice.

½ oz., 15c; oz., 25c; 5c pkt.

(For Double Flowering Poppies, see preceding page.)

Hardy Perennial Poppies

ORIENTAL and Bracteatum Poppies should be sown in early Spring in the open ground as soon as it is fit to work. The plants disappear during July and August, appearing again as soon as the weather gets cool. When this fall growth starts is the time they should be transplanted to their permanent flowering quarters. It is well to mark the places they are planted with a stake to insure the roots against disturbance during their annual resting period.

-Bracteatum. Immense orange-scarlet flowers, similar to the Oriental Poppy ½ oz., 25c; 5c pkt.

Orientale. (The large Oriental Poppy.) A charming summer-flowering hardy plant, producing numerous leafy stems about 2½ feet high, with large, deep crimson flowers, having a conspicuous black blotch on each petal; exceedingly showy.....½ oz., 25c; 5c pkt.

395—McCullough's Special Mixture of Orientale Hybrids

many novel colors.

Iceland Poppies (Papaver Nudicaule)

WHILE these are hardy perennials, they flower the first year from seed, blooming almost as qu'ckly as the annual sorts. They are of graceful, neat habit, with bright green, fern-like foliage, formed in tufts, from which issue slender stalks about 12 inches high, bearing their brilliant flowers in endless profusion; most useful for cutting, for which purpose pick when in bud, for if the seed pods are picked off, they continue in flower the entire season. They remain evergreen throughout the Winter, coming into bloom early the following Springs. Hardy Perennial.

396-Finest Mixed. All colors.... 1/4 oz., 25c; 5c pkt.

PORTULACA (Sun Plant or Rose Moss)

NE of our finest *Hardy Annual* plants, of easy culture, thriving best in a light loam or sandy soil, and luxuriating in an exposed, sunny situation; the flowers are of the richest colors, and produced throughout the Summer in great profusion; fine for massing in beds, edgings of rockwork; 6 inches. (See cut.)

397-Single Mixed Colors......Oz., 60c; 5c pkt.

NOTE: Our list of flower seeds will be found to contain all varieties of real merit. Many times varieties are listed which are of little value in the garden, and others are so difficult to grow that unless one has every facility for propagation, disappointment is sure to follow the purchase of seed. We want our seeds to give satisfaction and our selection of varieties for this catalogue has been made with the greatest care. Cultural directions will be found on most of our seed packets.

PRIMULA

THE beautiful Chinese Fringed Primroses and Obconica and Forbesi varieties are indispensable for winter or spring decorations in the home or conservatory. They are one of the most important winter blooming pot plants. The seed we offer has been saved from the best strains of English and Continental growth. Sow in March, April or May. The hardy varieties are also deserving of wide cultivation

Primula Chinensis Fimbriata FRINGED CHINESE PRIMROSES

The seed should be sown in light soil, but for final potting a richer soil is necessary, consisting of two parts loam to one each of well decayed manure and leafmold. Greenhouse Perennial decayed 1

-Chiswick Red. Large brilliant scarlet, finely fringed................20c pkt.

401—Coerulea. Fine blue; excellent.
20c pkt.

402—Delicata. Delicate rose; finely fringed. 20c pkt.

403-McCullough's Choicest Mixed

This mixture contains nothing but the finest sorts of Chinese Primroses. 20c pkt.

Primula Obconica

THESE are of the easiest culture in greenhouses or light window of dwelling house, flowering abundantly and continuously with little care, and should be sown during the Spring in good, porous loam. They will not germinate well in any compost containing peat or leafmold. To develop the colors to the highest degree, grow in heavy soil, and at a temperature as near 60 degrees as possible. The Grandiflora varieties are the freest flowering, but lack the very large individual blooms of the newer Gigantea type.

Various Sorts

Forbesi. (Baby Primrose.) This is the freest-flowering primula we know of. The little plants throw up tiny rosy-lilac flowers when only a few weeks old.

10c pkt.

Hardy Primroses

These are among the best of the early spring-blooming plants. Half-hardy Perennial.

10c pkt.

PYRETHRUM

NE of the most valuable of our summer flowers. They flower in May and June, and frequently in August and September the second time. Hardy Perennial.

—Hybridum Grandiflorum. This large flowering single strain is saved from a fine collection. Bear large Daisy or Cosmos-like flowers, ranging in color from light pink to deep red, with bright yellow centers; blooms in May and June and again in the Fall. One of the most graceful and long-lasting cut flowers.

4 oz., 50c; 10c pkt.

RHODANTHE (Swan River Everlasting)

If wanted for bouquets the flowers should be gathered before they fully expand. If allowed to grow too long they open too much, and lose their beautiful bell form. Flowers everlasting. Half-hardy Annual.

414—Maculata. Mixed, all colors...........5c pkt.

RICINUS (Castor Bean)

K NOWN as "Castor Oil Plant" and "Palma Christi." Highly ornamental and stately growing plants of tropical origin, with luxuriant foliage of varied colors and brilliant colored fruit. Sow as soon as the ground is warm. Half-hardy Annual.

415—Cambodgiensis. The main stem and leaf stalks are of shining ebony black; the leaves are very large and richly colored, changing to different shades; 6 feet.

Oz., 30c; 5c pkt.

417—Zanzibariensis. A distant class, which surpasses in size and beauty all varieties. The plants attain great dimensions, presenting a splendid aspect with their gigantic leaves. The different varieties included in our mixture have light and dark green leaves and some of coppery-bronze, changing to dark green, with reddish ribs. The seeds are quite distinct in color and beautifully marked. 8 to 12 feet. . . . Oz., 30c; 5c pkt.

418-Mixed. All sorts......Oz., 25c; 5c pkt.

RUDBECKIA (Cone Flower)

419—Bicolor Superba. Fine free-flowering annual variety, growing about 2 feet high, forming a dense bush and producing its bright flowers in great abundance on long stems. The disc is brown, the florets golden-yellow, with large velvety-brown spots at the base; very effective and useful for cutting. Half-hardy Annual. 10c pkt.

420—Newmani. One of the finest of autumn-flowering perennials, bearing large flowers. Bright orange-yellow petals, surrounding a large black cone; a showy flower. Hardy Perennial. 10c pkt.

Purpurea. (Giant Purple Cone-Flower.) An interesting flowering plant, producing all summer, large, showy, reddish-purple flowers; about 4 inches across, with a remarkably large cone-shaped center of brown; thickly set with golden tips in spiral lines. Hardy Perennial. 10c pkt. 421—Purpurea.

See McCullough's Collection of

"Easy to Grow" Flower Seed. They may save you money

Illustrated on 4th page of cover

SALPIGLOSSIS (Painted Trumpet)

THE blossoms are tube shaped much like a Petunia but rivaling the latter in the beautiful colors displayed. Seed should be sown early in spring in a hotbed or window and transplanted when weather is settled or directly out-of-doors after danger of frost. Half-hardy Annual.

422—McCullough's Special Mixture

This mixture is put up by ourselves of separate varieties and is without doubt the best mixture

Emperor. This variety forms only one leading stem, and bears on its summit a veritable bouquet of the most beautiful flowers, each one richly veined with gold.

10c pkt.

424—Finest Mixed. All colors.... ¼ oz., 30c; 5c pkt.

SALVIA (Flowering Sage)

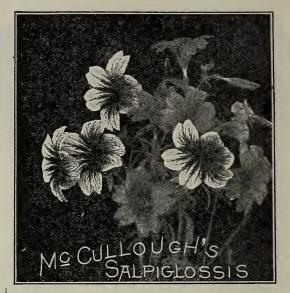

SCABIOSA
(Mourning Bride, Sweet Scabious, Pincushion Flower)

435—Mixed. Ail colors of the Improved Large-flowering. ½ oz., 15c; oz., 50c; 5c pkt.

Hardy Perennial Scabiosa

Bonnre

SCARLET RUNNER BEANS

438—A great favorite in Europe, not only as an ornamental climber, but for the delicious, edible pods which succeed the bright scarlet, pea-shaped blossoms. Tender Annual... Large pkt., 10c; small pkt., 5c. SENSITIVE PLANT. (See Mimosa.)

SHASTA DAISY. (See Hardy Chrysanthemum.)

SCHIZANTHUS

Poor Man's Orchid, or Butterfly Flower)

THIS is one of the daintiest flowers, especially adapted to bordering beds of taller flowers and those of a heavier growth. The seeds germinate quickly and come into bloom in a few weeks from sowing. The florescence is such as to completely obscure the foliage, making the plants a veritable pyramid of the most delicate and charming blooms. Half-hardy Annual.

440-Mixed.

SMILAX (Myrsiphyllum Asparagoides)

441—Smilax is the most useful climber which adorns the greenhouse or conservatory. Tender Perennial.

1/4 0z., 25c; 10c pkt.

SOLANUM

-Capsicastrum. (Jerusalem Cherry.) This is a very useful pot plant for Winter decoration. It is of dwarf, branching habit, leaves small and oval-shaped, bearing in the greatest profusion bright scarlet globular berries. Very ornamental; 1 foot. Tender Perennial...10c pkt.

STOCKS (Gilliflower)

STOCK seed may be sown in the open ground, or in the hotbed or cold frame, but if transplanted, let this be done when the plants are small, just out of the seed-leaf, or the plants become slender and never make good plants nor flower well.

443—McCullough's Cincinnati Market

A fine perpetual blooming stock, producing one long, sturdy spike, closely set with enormous double flowers. A grand variety.

10c pkt.

All 5c Packets of Flower Seeds are 6 Packets for 25c. All 10c Packets are 3 Packets for 25c.

STOCKS—Continued

Giant Perfection Ten Week Stock

This magnificent strain is without a rival for open-ground planting, attaining a height of 2½ feet. The spikes of bloom are long and the individual flowers are enormous in size and very double. Half-

448—Purple......10c pkt. 449—White.....10c pkt.

Mammoth-Flowering Beauty Stock

A magnificent recently developed strain of early flowering Winter Stocks, forming much-branched plants about 2 feet high and having numerous spikes of very large, double, delightfully fragrant flowers. If sown in March will produce plants that will bloom out of doors. Half-hardu Biennial.

bloom out of doors. Haij-hardy Biennial,

Single Annual Sunflowers

(Dwarf-Branching "Cut-and-Come-Again")

the hardy t value.

10c pkt.

467—Rainbow Hybrids are the results of bringing together three distinct types of Hybrids and combining the good with brilliant reds and bronzes, and some solid red plants; grow 5 to 8 feet high; flowers 5 to 8 inches in diameter.... ¼ oz., 40c; 10c pkt.

SWEET WILLIAM (Dianthus Barbatus)

WE are pleased to see that the merits of this sturdy, old-fashioned flower are being more generally recognized and its cultivation greatly extended. Beautiful, fragrant and easily grown, it is worthy of a place in every garden. The best varieties of Sweet William are of exceedingly beautiful colors, and the large fragrant flowers are borne in trusses of great size. They make a splendid show in the garden or hardy border and last well as cut flowers. Seed may be sown at any time from Spring to Midsummer. Seed planted early will bloom in the Fall. It is better to sow seed every year to have young plants, as they flower more freely. Hardy Perennial. Height, 1½ to 2 feet.

468 — Holborn Glory. This strain is a large-flowered selection of the Auricula-Eyed section, the most beautiful and admired of all Sweet Williams. The individual flowers and trusses are of extraordinary size, and the range of color, all showing a clear, white eye, is superb. 5c pkt.

A very choice assortment of all the best single-flowering varieties. 469-McCullough's Selected Single Mixed 1/4 oz., 20c; 5c pkt.

469 ½-Double Red. Very effective, rich deep red variety......5c pkt. 470-Double White. Excellent for cut flowers5c pkt.

This mixture you will find of very superior quality;

SWEET SULTANS. (See Centaurea.)

SNOW-ON-THE-MOUNTAIN. (See Euphorbia.)

SNAPDRAGON. (See Antirrhinum.)

McCULLOUGH'S SELECT

It Would be an Easy Matter for Us to Greatly Extend Our List; but We Think it Best to Confine Our Offers to Such Sorts as are Really First-Class.

How to grow sweet peas.—The principal essential for the best success is a cool, deep, moist soil, and a sunny situation. The ground should be prepared deep and rich. Fall preparation, where possible, is preferable, but if done in the spring, use no green manure. Bone meal is good if old rotted manure can not be obtained. Sow early, as Sweet Peas need the cold, moist spring ground to make the root growth. In the latitude of Cincinnati, February is not too early. In the South, sow in the fall. Sow the seed in deep furrows, the bottom of which must be at least 6 inches below the level of the soil; this is to guard against a summer drought. Cover the seeds only one inch, after which the furrow is still five inches deep. When the plants are 2 or 3 inches high, thin out to 2 inches apart and fill in another inch or so of soil around the plants, always leaving a portion of the plant above the surface; do this at intervals until the furrow is nearly full; it should always remain a little hollow to hold the rains, and to allow water to be applied by the bucketful when necessary.

During dry weather they should be watered thoroughly and frequently and given an application of liquid manure once a week. A mulch of hay or rakings from the lawn will be found beneficial during hot weather. The flowers should be picked as often as possible, and all withered blooms should be removed, to prevent the plants from running to seed. which would stop them from blooming.

would stop them from blooming.

New Early Flowering Spencers

NOTHING within recent years can approach in importance the introduction of the "Spencer" Sweet Peas. They are distinguished from the standard sorts by the enormous flowers with crinkled and wavy petals, and also from the fact that they usually bear four blossoms on a long stout stem.

In presenting the following varieties of Spencer Sweet Peas we wish to emphasize the fact that these are the "Early Flowering Spencers" and are separate and distinct from the late or standard Spencer types, as they continue blooming two to three weeks longer than the standard Spencer varieties.

and are separate and distinct from the face of sta as they continue blooming two to three weeks long Spencer varieties.

471—Early Meadow Lark. Flowers are cream colored, duplexed, well waved and borne in fours and threes very floriferously on strong vines. . ½ oz., 60c; oz., \$1.00; 10c pkt.

472—Early Warbler. The flowers are a rich mauve purple color; large and beautiful in form. . . ½ oz., 60c; oz., \$1.00; 10c pkt.

473—Early Liberty. A rich, deep, sunproof crimson. The flowers are large, well waved and borne in fours and threes. The vines are vigorous. ½ oz., 60c; oz., \$1.00; 10c pkt.

474—Early Songster. The vines are floriferous and the Lavender colored flowers very large and nicely waved.

½ oz., 60c; oz., \$1.00; 10c pkt.

475—Early Blanche Ferry. The standard is bright rose, the wings being pinkish or blushwhite. Vines are strong and vigorous, bearing large, well waved flowers in threes and fours. ½ oz., 40c; oz., 75c; 10c pkt.

476—Heather Bell. The color is a rich, but pleasing mauve, but after standing in water the color becomes a beautiful mauve lavender.

½ oz., 40c; oz., 75c; 10c pkt.

477—Morning Star. The color is a deep orange scarlet or flame color in standard with rich orange-pink wings.

½ oz., 40c; oz., 75c; 10c pkt.

478—Snow Flake. This is the best Early Flowering White Seeded Spencer. The blossoms are very large and of the best waved Spencer form. . . . ½ oz., 40c; oz., 75c; 10c pkt.

479—Song Bird. Standard richly flushed with a beautiful distinct shade of pink on a white ground, wings soft light pink.

½ oz., 40c; oz., 75c; 10c pkt.

480—Yarrawa. The color on opening is rose, changing as the flower develops to a light pink standard, tinted buff, blush wings.

½ oz., 40c; oz., 75c; 10c pkt.

New Spencers

481—Blue Picotee. Large, bold white flowers, with blue edge, nicely waved, and borne in threes and fours on long stems.

½ 0z., 20c; 0z., 35c; 10c pkt.

482—Dobbies Cream. Deep cream or primrose colored, nicely waved, with an abundance of four-bloom Sprays.

½ 0z., 20c; 0z., 35c; 10c pkt.

483—Dobbies Sunproof Crimson. This beautiful crimson flowering variety does not scorch or burn under intense sunshine. Flowers are freely borne on long stems in threes and fours.... 1/2 oz., 20c; oz., 35c; 10c pkt.

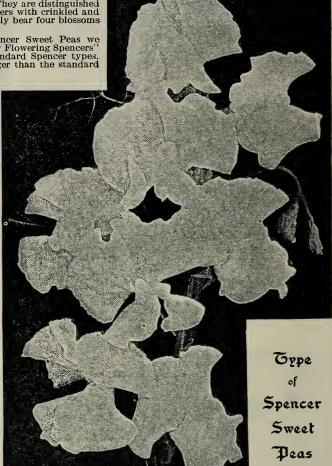

Fiery Cross. Color a scorching fire-red, or scarlet. It does not scorch or burn and the beautifully waved and fluted flowers are borne freely in threes and fours, on long stems.............½ oz., 40c; oz., 75c; 10c pkt.

Hercules. A magnificent soft rose-pink. The broad and beautifully waved standards frequently measure two and one-half inches in diameter.

1/2 oz., 20c; oz., 35c; 10c pkt.

Hilary Christie. Flowers salmon orange, edged with flery orange scarlet, wings rosy salmon.
½ oz., 40c; oz., 75c; 10c pkt.

487—Jean Ireland. Flowers creamy buff, standards margined carmine rose. ½ oz., 40c; oz., 75c; 10c pkt.

489—King White. The grandest of all White Sweet Peas and of the most up-to-date Spencer form. It is the largest of White Spencers and the buds are of unusual size before opening. The stems are long and stout and bear practically always four blossoms. 1/2 oz., 20c; oz., 35c; 10c pkt.

490—Margaret Atlee. The flowers are a rich glowing pink on cream ground, suffused with salmon in the standard, while the wings are pinkish-rose and salmon. The flowers are exquisitely waved, and freely produced in "fours" on long stout stems. 1/2 oz., 20c; oz., 35c; 10c pkt.

(Sweet Peas continued on next page.)

All 5c Packets of Flower Seeds are 6 Packets for 25c. All 10c Packets are 3 Packets for 25c.

NEW SPENCERS—Continued

NEW SPENCERS—Continued

491—Margaret Madison. The flowers are azure blue, slightly tinted with mauve, of good size, both standard and wings being delightfully waved and frilled.

½ oz., 20c; oz., 35c; 10c pkt.

492—Miriam Beaver. Light apricot and buff.

½ oz., 20c; oz., 35c; 10c pkt.

493—Mrs. Cuthbertson. The standard is a clear, rosepink in color, wings white, slightly flushed light rose, ½ oz., 20c; oz., 35c; 10c pkt.

494—R. F. Felton. The color is a soft, pleasing shade of lavender suffused rose; wings French gray. Flowers large and waved. ... ½ oz., 20c; oz., 35c; 10c pkt.

495—Rosabelle. A fine large rose-colored flower, and a strong grower. ... ½ oz., 20c; oz., 35c; 10c pkt.

496—Royal Purple. A rich royal purple, a distinct color and large size. ... ½ oz., 20c; oz., 35c; 10c pkt.

497—The President. Flowers are scarlet, of largest size, carried on strong, stiff stems, usually in fours, always beautifully waved.

½ oz., 20c; oz., 35c; 10c pkt.

½ oz., 20c; oz., 35c; 10c pkt.

or 6 packets for 25c; customer's selection, postpaid.

McCullough's "PREMIER" Mixed Sweet Peas

THE FINEST AND MOST COMPLETE MIXTURE EVER OFFERED

EVER OFFERED

512—This mixture contains all the best-named large-flowering varieties and novelties and is undoubtedly a truly superb mixture blended by us with extraordinary care from named varieties of the most approved large-flowering type including recent American and European varieties, as well as a great many Spencer and Unwin sorts and other hybrids insuring a gorgeous color effect.

513—Fine Mixed. A very good mixture of over 30 large flowering varieties.

Oz., 10c; ½ lb., 25c; per lb., \$0c; 5c pkt.

(See also McCullough's "Premier" Mixture.)

THUNBERGIA (Black-Eyed Susan)

Beautiful, rapid-growing annual climbers, preferring a warm, sunny situation; used extensively in hanging baskets, vases, low fences, etc.; very pretty flowers in buff, white, orange, etc.; with dark eyes; mixed colors. Half-hardy Annual. 4 feet...... 1/4 oz., 25c; 5c pkt.

TORENIA

VIOLET (Viola Odorata)

A great favorite, suitable for groups, or borders, and much in demand on account of its profusion of bloom and delightful fragrance. Violet seeds germinate very slowly. Hardy Perennial.

516—Finest Mixed......10c pkt.

VIOLAS, or TUFTED PANSIES. (See Pansies.)

${ m VINCA}$ (Madagascar Periwinkle, or Old Maid)

Ornamental, free-blooming plants and one of the most satisfactory flowering bedding plants we have. It is best to start the seed early indoors or in a hotbed, but they begin blooming in August from seed sown out of doors in May, or as soon as the ground is warm, continuing until frost; or they may be potted and kept in bloom through the winter; a fine cut flower, every bud opening when placed in water; 2 feet. Tender Annual. (See cut.)

518-Alba Rosea. White crimson eye 10c pkt.

519—Alba Pura. Pure white......10c pkt. 520-Mixed..... ½ oz., 25c; 5c pkt.

VERBENAS. (See next page,)

10c pkt.

VERBENAS

524—Mammoth Pink. Bright shades of pink; fine.

525-Gigantea Lucifer. Flowers intense brilliant scarlet .10c pkt. with no eye.....

Mammoth Mixed Verbenas

Mammoth Verbena

Various Verbenas

528—Lemon Verbena. (Aloysia Citriodora.) Every garden should have a few plants of this fragrant favorite. Its pale green delightfully scented foliage goes well with any flower. Half-hardy Perennial.......10c pkt.

WALLFLOWER (Goldlack)

WELL-KNOWN, deliciously fragrant, half-hardy annuals and perennials, blooming early in the Spring, with spikes of beautiful flowers. They should be protected in a cold frame in the Winter and planted out in April.

529—Extra Early Market. A mixture of beautiful single annual varieties which flower through the Summer from seeds sown in Spring. Half-hardy Annual.

402., 25c; 5c pkt.

530—Single Mixed. Half-hardy Perennial. All colors.

5c pkt.

531—Double Finest Mixed. Half-hardy Perennial.

WILD CUCUMBER

(Echinocystis Lobata)

"WILD GARDEN" FLOWER SEED

EACH package contains about 100 varieties of hardy flower seeds mixed together, and wherever planted will insure something new almost every day. Is suitable for sowing in shrubbery, under trees, and in beds on which no care will be bestowed, or even for sowing in exposed situations, where wildness is preferred to order and precision. To those who can not bestow the necessary care required in a neatly laid out flower garden, the "Wild Garden" presents a substitute, which, for its unusual and varied effect, for cheapness and small amount of labor necessary for its construction has no rival.

533—Dwarf Sorts. Growing from 12 to 18 inches high. Oz., 25c; 5c pkt.

534—Climbing and Trailing Sorts. Fine for hiding fences, brush and rubbish heaps...Oz., 25c; 5c pkt.

XERANTHEMUM

(Everlasting, or Immortelle)

535—Double Mixed. Bright and pretty "Everlasting" with silvery foliage and silky flowers in pink, white and purple. Half-hardy Annual..... 14 oz., 15c; 5c pkt.

ZINNIAS (Youth and Old Age)

THESE attractive and decorative hardy annuals are most desirable plants for mixed borders or bedding purposes, and are remarkable for the profusion and duration of their flowers, which are extremely useful for bouquets. The double Zinnias are exceedingly handsome, the flowers being notable for their large size, fine form, brilliancy and diversity of color. The seed can be sown early in the hotbed or light window and transplanted, or sown later in the open ground. They come into flower early in the Summer and keep on blooming until hard frost. Half-hardy Annual.

Double Giant Picotee

—A new and distinct class originated from flesh color with each petal distinctly tipped with dark chocolate colors and producing the following colors, all tipped with various shades of dark, giving the flowers a very attractive and pleasing appearance, resembling Picotee Carnations, Orange, Flesh, Lemon, Pink and Cerise.

10c pkt.

McCullough's Superb Mammoth Zinnias

This is the finest strain obtainable. The flowers are of enormous size, thickly set with velvety petals. The plants are healthy, robust, vigorous growers, branching freely, and make excellent material for groups or cutting. McCullough's Superb Mammoth will be found very superior to ordinary Zinnias. New colors have been added, depth and size given to the blooms and a rich velvety lustre to the petals. the petals.

537-Mammoth White. 540-Mammoth Crimson.

538-Mammoth Yellow. 541-Mammoth Scarlet. 539-Mammoth Flesh Color. 542-Mammoth Violet.

Each of the above...... 3 pkts., 25c; 10c pkt. 543-Collection. One packet of each of the above 6

varieties.....

½ oz., 30c; 10c pkt.

-Black Knight. (Pompon.) This variety produces its striking dark flowers on handsome little bushes of compact form. As a border plant it is highly effective as it blooms all summer until late in the fall.

-Red Riding Hood. Of compact form and covered the entire season with little button-like, intense scarlet flowers not over an inch across; as a border plant it is highly effective. ..., 30c; 10c pkt.

McCullough's "Suburban" Lawn Grass Seed

WILL MAKE A BETTER LAWN THAN TURF OR SOD

McCullough's "Suburban" Lawn Grass Seed

Is a mixture of the finest Dwarf Evergreen Grasses that grow and flourish during different months of the year so that a rich, deep green, velvety lawn is constantly maintained. Our mixture is the result of several years experimenting, and, as we now offer it, is unequaled. The quantity required for making a new

lawn is four bushels (64 lbs.) per acre, or for renovating old lawns, two bushels (32 lbs.) per acre. For a plot 15x20, or 300 square feet, one pound is required for a new lawn, or about one-half pound for renovating.

If it is honestly made, a lawn seed mixture is very much to be preferred to any single grass, because the several

If it is honestly made, a lawn seed mixture is very much to be preferred to any single grass, because the several varieties of grasses which compose it, mature at different seasons of the year, thus keeping the green sward in good color and condition during the hot weather, not losing its color, as the single variety is liable to do.

How to Make a Lawn.—The matchless beauty of a well kept lawn instantly commands the attention of all lovers of the beautiful in Nature, because a fine lawn is an unfailing mark of intelligence and taste, to obtain which the main point is to start right. Seed will make a better lawn than turf or sod. The best soil is a good medium texture; the surface should be thoroughly pulverized and smoothed to the desired grade; remove all large stones, roots and hardened pieces of earth that can not be readily broken, ample time being allowed for the thorough settling of the soil, which is greatly aided by a few heavy showers of rain. When the soil is firm, level and suitably moist, sow "Suburban" Lawn Grass Seed at the rate of four bushels (64 lbs.) per acre. It is unwise to be too economical in the quantity of seed used, if the best results are desired. The seed should be sown broadcast and as evenly as possible, then give a thorough rolling or pat well with the back of a spade. The seed must be well firmed in the soil. When the young grass attains a height of 4 or 5 inches, carefully mow with a sharp scythe. After this, according to the season, it should be mown with a lawn mower every week or ten days.

General Surface Renovating.—When your lawn has been established, you will find it to your advantage to lightly re-seed each season. As early as possible, carefully rake off all dead leaves, etc., and give the lawn a dressing of our pulverized SHEEP MANURE, or our PURE BONE MEAL at the rate of at least 500 pounds per acre, and rake in, after which sow our "Suburban" Lawn Grass Seed at the rate of two bushels (32 lbs.) to the acre; roll thoroughly or pat with the back of a spade.

Renovating in Spots or Patches.—Everyone is aware that even in the best-kept lawns unsightly spots devoid of grass will appear, which are caused by root-destroying insects; and as these spots are not protected by a covering of turf during the winter, as a natural consequence, the chemical elements in the soil are leached out by the action of the weather, causing them to "cake" or become hard early in the spring. It is useless and a waste of seed to sow these spots unless they are carefully prepared to receive the seed. For this purpose it is our practice to cover them with either of the fertilizers mentioned above at the rate of 13 lbs. for each 300 square feet, then dig these spots up, and after raking until no trace of the fertilizers can be seen, sow our "Suburban" Lawn Grass Seed at the rate of 1 lb. to each 300 square feet. Roll thoroughly or pat with the back of a spade. When any weeding is done on the lawn immediately drop a few grains of seed wherever a weed is removed, and while the soil is disturbed press the seed into the soil.

Prices: -- 1/2 lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 1/2 bu., (8) lbs., \$2.65; per bu. of 16 lbs., \$5.00.

Postage Must Be Added if Wanted by Mail. See Postal Rates, Second Page of Cover.

Pulverized Sheep Manure and Pure Bone Meal are the Best Fertilizers for Lawns. See Fertilizers.

McCullough's "Shady-Place" Lawn Grass Seed

View of Lawn and Trees-Shady Places-"The Pines"

McCullough's "Shady Place" Lawn Grass Seed ON nearly all lawns there are more or less shady places, which result in having bare and unsightly spots on which the owners have difficulty in securing a satisfactory stand of grass. After many years of experimenting with different grasses both native and foreign, we several years ago developed our present "Shady Place" Lawn Grass Seed Mixture.

This mixture of grasses is adapted for such places, as it is composed of dwarf-growing grasses which are found naturally growing in shady locations. Should the ground have become "sour" or drainage defective, it is apt to be covered with moss. If such is the case, the moss should first be removed by the use of a sharp rake, then apply Evr Green Lawn Lime to sweeten it, and after another thorough raking, apply commercial fertilizer at the rate of not less than 600 pounds per acre, then sow the seed at the rate of four bushels (64 lbs.) per acre, or 1 lb. to each 300 square feet, after which roll thoroughly.

Prices:—½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25; 8 lbs., \$3.25; per bushel of 16 lbs., \$6.00. Postage must be added if wanted by mail. See Postal Rates, second page of cover.

McCullough's Eden Park Lawn Grass Seed

McCullough's Eden Park
Lawn Grass Seed

To supply the demand for a Lawn Grass Seed that will meet general requirements, it has become necessary to place on the market our "Eden Park."

The quality of this lawn grass seed will compare favorably with a majority of the lawn grass mixtures on the market as it

EDEN PARK

LAWN
GRASS
SEED

grass mixtures on the market as it contains practically the same grasses as our "Suburban", but without recleaning.

Prices, ½ lb., 20c; 1 lb., 35c; 5 lbs., \$1.50; 8 lbs., \$2.15; per bushel of 16 lbs., \$4.00.

TERRACE MIXTURE

There is nothing more annoying than to have ground washed out. In this mixture we have put quickgrowing and deep-rooted grasses. Of course, it depends a great deal on this being well started before very heavy rains.

Prices, ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75; 8 lbs., \$2.65; per bushel of 16 lbs., \$5.00.

McCullough's

Special Mixtures for Golf Links and Putting Greens

View of one of the Putting Greens on the Golf Grounds of the Hyde Park Country Club, Cincinnati, Ohio, where our Putting Green Mixture has produced a "Green" three weeks from time of sowing the seed.

PUTTING GREEN MIXTURE

HAVING specialized for over three-quarters of a century in all varieties of Grass Seeds and having become familiar with the habits and characteristics of all cultivated grasses, we were prepared to develop the Mixture of Grasses herewith offered by us, after making a careful study of the requirements for producing the most substantial turf for Putting Greens.

The numerous testimonials we have received establishes the fact that our Mixture of Grasses will produce the results desired, because it has given thorough satisfaction wherever used, and produces a thick, tough, beautiful green turf. The varieties comprising this Mixture of Grasses are all the finest-bladed, low-growing and most hardy kinds, and will maintain their rich, velvety green color throughout the season. ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25; 8 lbs., \$3.25; per bushel of 16 lbs., \$6.00.

GOLF LINKS MIXTURE

WE have given much attention to grasses for golf links. The mixture of grasses we offer below is composed of such varieties as will thrive here, and are the result of experiments conducted on our grounds, as well as careful observation for several years of the practical results obtained on those golf links for which we have supplied the We have always on hand all the natural grasses of Europe and America and we are familiar with the habits and merits of each. We shall be glad to prescribe for whatever the requirements of the links may be; for poor lands or rich, high and dry, or low and wet.

Per lb., 35c; 5 lbs., \$1.50; 8 lbs., \$2.15; per bushel of 16 lbs., \$4.00.

Quantity of Seed to Sow. One pound of these mixtures will sow 15 x 20 feet, or 300 square feet. should be sown to the acre. For renovating use one-half of this quantity.

Pulverized Sheep Manure and Pure Bone Meal are the Best Fertilizers for Lawns. See Fertilizers.

We wish to emphasize the fact that one of the important essentials for success in building lawns, lies in the abundant use of fertilizers, which should be applied at the rate of not less than 600 pounds per acre.

McCullough's Grass Seeds

We specialize in Grass Seed of all kinds and for
every purpose

FOR many years Grass Seeds have been one of our most
important specialties, and our improved and perfected
facilities for handling same (at a minimum cost), either
in small or car lots, enables us to offer our customers the
best possible service, both as to quality and promptness
in eventing orders.

on executing orders.

We have four or five different grades of Grass Seeds, especially of the kinds most in demand, such as Clovers, Timothy, Blue Grass, Red Top, Orchard Grass, etc.

We will be pleased to quote lowest market prices

We will be pleased to quote lowest market prices on application.

For best results, we advise the use of our highest grades "XXXX" and "Buckeye."

We are the largest buyers in this section of high grade Seeds and will always pay the highest market price. Submit samples and name quantity to offer.

Our prices include delivery to freight or express depots here, purchaser paying transportation charges.

We make no charge for burlap bags for Blue Grass, Red Top in Chaff, Orchard Grass, Perennial Rye and other light Grass Seeds.

Seamless bags for Clover, Timothy, Fancy Red Top and other heavy Seeds and Seed Grain are 60c each.

extra.

The number of pounds to the bushel, in brackets, is the old way of offering grasses, and is mentioned merely for reference.

We expect to adhere closely to prices quoted in this list, but owing to market fluctuations, it is impossible to guarantee prices.
All orders will be filled at lowest market price on the day of receipt.
Postage Must Be Added if Wanted by Mail. See Postal Rates, Second Page of

KENTUCKY BLUE GRASS

(Poa Pratensis)

A LSO known as June Grass, Green Grass, etc. This is rated as the finest permanent pasture grass. Especially suited to meadows and rich lands. It is the grass of the famous and fertile lime-stone soils of Kentucky, and is no less a favorite all through the Northern States. A perfect lawn grass. Sow 30 to 40 lbs. per acre for lawn; 2 bushels (28 lbs.) to the acre for pasture (14 lbs., per bushel.) Kentucky Blue Grass Seed, Fancy Cleaned. Per lb., 35c; 7 lbs., \$2.40; per bushel of 14 lbs., \$4.50. Write for special prices on large quantities and other grades.

other grades.

NOTE:—We wish to call attention to the fact that Cincinnati is the leading market in the world for Kentucky Blue Grass Seed. We export many carloads annually, the words "McCullough" and "Kentucky Blue Grass" being very familiar to the principal Seed dealers of the world.

ORCHARD GRASS

(Dactylis Glomerata)

R OUGH Cocksfoot. Perennial. Height, 3 feet. It blossoms about the same time as Red Clover, making it, on that account a desirable mixture with that plant. It is exceedingly palatable to stock of all kinds, and its powers of enduring the cropping of cattle commend it as one of the very best pasture grasses. Sow 25 to 35 lbs. to the acre. (14 lbs. per bushel.) Market Price.

RED TOP GRASS

(Agrostis Palustris or Alba)

HERD'S Grass, Quick Grass. Perennial; height 1 to 2 feet. Valuable either for lawn mixtures, mixing in hay, or permanent pasture grasses; succeeds almost everywhere, but reaches its highest state of perfection in a moist, rich soil, in which it attains a height of 2 to 2½ feet. Sow, if alone, 40 to 50 lbs. per acre. (14 lbs. per bushel.)

Fancy Red Top Pure Seed.

Weight, about 30 lbs. per bushel. Sow 10 to 12 lbs. per acre... Per lb., 30c; 10 lbs., \$2.85; per 100 lbs., \$25.00.

Choice Red Top Seed in Chaff.

Per lb., 20c; 7 lbs., \$1.25; per bu. of 14 lbs., \$2.25.

Perennial or English Rye Grass (Lolium Perenne)

(Lolium Perenne)

IMPORTED English Blue Grass. Height, 15 to 24 inches. Considered invaluable for permanent pastures. It produces an abundance of remarkably fine foliage, tillers out close to the ground, and soon forms a compact sward. After being cut it grows up in a very short time, and remains bright and green throughout the season, consequently is well adapted for lawn mixtures. Valuable for shady places. Also a good variety for hay if cut when in blossom, as it is then most nutritious. Sow, if alone, 50 to 60 lbs. per acre. (24 lbs., per bushel.) Per lb., 25c; 12 lbs., \$2.25; per bushel of 24 lbs., \$4.00.

Impossible to quote from prices or (15) green throughout the season, consequently is for lawn mixtures. Valuable for shady places, variety for hay if cut when in blossom, as it is tritious. Sow, if alone, 50 to 60 lbs. per acre. bushel.) Per lb., 25c; 12 lbs., \$2.25; per lbs., \$4.00.

Impossible to quote firm prices on "Fancy Grass Seeds" at time of going to press.

Write for special prices on New Crop Seeds.

Pacey's Improved

Short Rye Grass

SIMILAR to Perennial
Rye Grass, but does not
grow so tall, consequently is superior for lawn purposes. (24 lbs. per bushel.)
Sow, if alone, 50 to 60 lbs. per acre.
Per lb., 30c; 12 lbs., \$2.50; per bu. of 24 lbs., \$4.50.

(Erroneously called English Blue Grass)

HIGHLY valuable for permanent grass land. Does not, however, attain its full productive power till the second or tnird year. Relished by live stock, both in hay and permanent pasture, and is one of the most desirable grasses for general culture. Sow 30 to 40 lbs. to the acre. (24 lbs. per bushel.) This is the true Evergreen Grass of the South. Price on Application.

Awnless Brome Grass (Bromus Inermis)

A HARDY perennial, standing extremes of heat, cold and drought. In the South it remains green all winter. It will grow well on all kinds of soil. The seed should be sown as early in the Spring as the ground can be worked. (10 lbs. per bushel.) Sow 25 to 30 lbs. to the acre. Market Price.

Bermuda Grass (Cynodon Dactylon)

A VALUABLE grass for the South and for tropical climates; will not endure frost. Sow 10 to 15 lbs. per acre. Write for prices.

Canadian Blue Grass (Poa Compressa)

A LSO called Flat-stemmed Poa, Flat-Stalked Meadow Grass. Grows a foot or more high. Recommended for horses, cows and sheep. Thrives well on clay. Sow 30 to 40 lbs. per acre................Per lb., 25c; 10 lbs., \$2.25.

Creeping Bent (Agrostis Canina)

VALUABLE in mixture with other grasses for lawns, etc.
Suitable also for moist localities. (12 lbs. per bushel.)
Sow 30 to 40 lbs. per acre. Market Price.

Crested Dogstail (Cynosurus Crystatus)

Fine-Leaved Sheep Fescue

61

GRASS SEEDS-Continued

Hard Fescue (Festuca Duriuscula)

PERENNIAL. Height, 12 to 24 inches. Thrives well in dry situations. The herbage is decidedly tender, but the flower heads, when ripe, become hard. Sow, if alone, 30 to 35 lbs. per acre. (12 lbs. per bu.)

Per lb., 45c; 10 lbs., \$4.00.

Italian Rve Grass (Lolium Italicum)

BIENNIAL. Height, 18 to 30 inches. As it is not perennial, it is not adapted for permanent pastures, but for one or two years hay it is unsurpassed. Sow, if alone, 45 to 50 lbs. per acre. (18 lbs. per bushel.)

Per lb., 25c; 10 lbs., \$2.00; 100 lbs., \$17.00.

Red Fescue (Festuca Rubra)

A CREEPING-ROOTED species, forming a close and lasting turf and especially adapted for dry sandy soils. It resists extreme drought and thrives on poor soils; also valuable for shady places in lawns as well as for golf-courses. 40 lbs. to the acre. (24 lbs. per bushel.)

Per lb., 45c; 10 lbs., \$4.00.

Rhode Island Bent (Agrostis Tenuis)

A fine Grass, chiefly used for pastures and lawns, for which it is one of the best. (12 lbs. per bushel.) Sow 25 to 40 lbs. per acre. Write for prices.

Sweet Vernal Grass

For a mixture with pasture Grasses it is valuable on account of its vernal growth, and also for continuing to throw up root foliage until late in the autumn. Its chief merit is its fragrant odor, which the leaves emit when partially dry, thus sweetening hay. Sow 3 to 5 lbs. per agen with other Grasses. acre with other Grasses.

True Perennial. (Anthoxanthum Odoratum.) Market Price.
Annual. (Anthoxanthum Odoratum Puelli.) Much smaller
than the perennial. Price on application.

Sheep Fescue (Festuca ovina)

Perennial. Height varies from 6 to 20 inches. Grows naturally on light, dry, sandy soils. Sheep are very fond of it. (14 lbs. per bushel.) Sow 30 to 35 lbs., per acre. Write for prices.

Tall Meadow Oat Grass (Avena Elatoir)

A perennial. Has broad, flat leaves, and grows about 3 feet high; has an abundance of long, fibrous roots, penetrating deeply in the soil, enabling it to withstand drought and cold. Sow 25 to 30 lbs. per acre.

Market Price.

Timothy (Phleum Pratense).

Herd's Grass. Cat's-tail Grass. This Grass stands at the head for meadows. Never use less than a peck to the acre, then up to one-half bushel, as to circumstances. Market Price.

Various Leaved Fescue

(Festuca Heterophylla)
A very early hardy perennial, 2 to 3 feet high, thriving best in cold, moist soils. Yields heavily and is valuable in grass mixtures for permanent meadows. It grows very well in the shade, and is highly recommended for shaded lawns and woodland parks. 40 lbs. to the acre. Cropfiled

Wood Meadow Grass (Poa Nemoralis)

No Grass is better adapted for pleasure grounds, particularly under trees, as it will not only grow in such places, but forms a fine sward where few other Grasses can exist. Sow 20 to 25 lbs. to the acre.

Per lb., 75c; 10 lbs., \$7.00.

We specialize in Grass Seed of all kinds and for every purpose. For larger quantities—write for Special Prices.

McCULLOUGH'S MIXED GRASSES For Meadows and Pastures

A FTER years of experimenting we have aided largely in establishing the fact that a thicker and more prolonged growth is produced by a mixture of several varieties than when only one or two are used. There are always certain Grasses that are especially adapted to certain kinds of soils, and these are so carefully combined in our mixtures that in our Mixture for Permanent Pastures, grasses will be found that mature at intervals during the season, thereby insuring continuous pasturage, while our Mixture for Permanent Meadow will furnish excellent hay as well as late pasturage.

We are prepared to furnish seeds adapted to all soils and all situations, and for all purposes, composed of Grasses for light, medium or heavy soils; by light soil we mean that which is more or less of a sandy or gravelly nature; the heavy, clay and heavy loams; while the medium is an intermediate between these two. A light, wet soil, with respect to the Grasses suited to it, may be considered same as to the heavy soils, and a dry, heavy soil, more as to light soils.

Our best mixture is made entirely with our choice recleaned seeds, while in our second quality we use the same seeds, but without recleaning, and will be equal to the qualities usually to be had on the market. Our mixtures will all have a uniform weight of 16 pounds to the bushel. Quantity to be used per acre, one and one-half to two bushels, and half this quantity for renovating. In ordering, always state the soil and position on which you wish to use it.

First Quality Mixtures

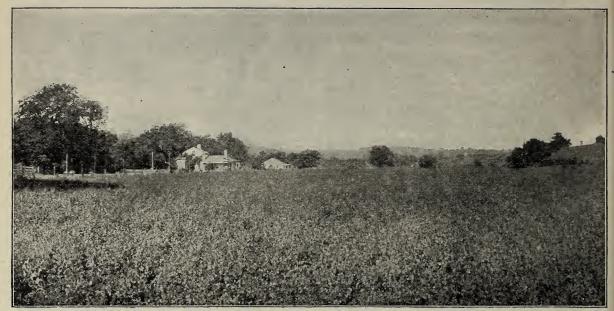

For Meadows
Per lb., 35c; 8 lbs., \$2.40; bu. of 16 lbs., \$4.50. For Permanent Pasture Per lb., 35c; 8 lbs., \$2.40; bu. of 16 lbs., \$4.50. For Pasture and Hay in Orchard and Other Shady Places Per lb., 35c; 8 lbs., \$2.40; bu. of 16 lbs., \$4.50. For Marshy Grounds Per lb., 35c; 8 lbs., \$2.40; bu. of 16 lbs., \$4.50. For Sandy and Rocky Grounds Per lb., 35c; 8 lbs., \$2.40; bu. of 16 lbs., \$4.50.

Postage must be added if wanted by mail. See Postal Rates, second page of cover.

We supply SECOND QUALITY MIXTURES of any of the above at a reduction of 25c per bushel. We specialize in Grass Seed of all kinds and for every purpose. For larger quantities-write for special prices.

McCullough's Fligh-Grade Clover Seed

Where prices are given on Field Seeds they only represent market values at time of going to press. Purchasers of large quantities should write for latest prices. Grain bags, holding two bushels, 65c each, extra. Postage must be added if wanted by mail.

View of a Field of Alfalfa Clover grown in territory contiguous to Cincinnati

Alfalfa, or Lucerne (Medicago Sativa)

ALFALFA is one of the most profitable crops the dairyman or stock farmer can raise, due to the high yield of ALFALFA is one of the most profitable crops the dairyman or stock farmer can raise, due to the high yield of palatable hay which contains a large percentage of protein. Alfalfa as grown in the United States yields more than twice the digestable nutriments that Red Clover does and more than three times the digestable protein to the acre. Alfalfa and corn make a perfectly balanced ration. Many farmers are using it in their rotation to take the place of Red Clover. This practice is satisfactory where the soil contains a large supply of lime and organic matter and the seed has been inoculated, or the land has been in Alfalfa previously.

and the seed has been inoculated, of the latter has been in-Alfalfa previously.

Alfalfa is best adapted to steep limestone hillsides and gravelly river bottoms, where the water can get away from the roots. Will grow on acid soils providing the water is drained off and sufficient lime is added to correct the acidity.

Seeding Alfalfa

The ground should be plowed in late fall and worked in spring once or twice to kill the weeds. If the land is acid it should be limed at the rate of three tons ground limestone to the acre. With a Wheat drill sow 20 to 25 lbs. of best grade non-irrigated inoculated Alfalfa seed with one bushel of 60 day Oats as a nurse crop to the acre any time between April 15th and May 10th. Apply 400 lbs. of a good high grade fertilizer, carrying a small per cent of ammonia and high per cent of phosphorus to the acre. If land is to be seeded following early potatoes, work ground up with disc and drag down. Sow seed the same as in spring, omitting the Oats as a nurse crop. Where land is being seeded to Alfalfa for the first time it will pay to inoculate the seed with Edwards' Legume Bacteria for Alfalfa. The bacteria will be present and if there is not enough available nitrogen present they will gather the nitrogen from the air and supply your young plants, thus insuring a good stand.

We offer American grown seed raised in the Northwest and West on non-irrigated land. It is free as possible from noxious weeds. (60 lbs. per bushel.)

Prices on application.

Montana Alfalfa

A hardy variety from the non-irrigated or dry lands of eastern Montana, where the climate is severe. Under ordinary conditions the seed will serve all purposes where hardiness is required and we advise giving the "Montana" a trial wherever it has been difficult to grow other varieties. Sow in spring or fall at the rate of 15 to 20 lbs. per acre. We have secured a supply of strictly high quality seed.

Per lb., 60c; 10 lbs., \$5.50; 100 lbs., \$50.00.

Grimm Alfalfa

This variety of Alfalfa is being raised all over the United States. It seems to be much hardier than common Alfalfa, which is due to the division of its root system, enabling it to withstand freezing and thawing weather, droughts and other hardships which the common alfalfa will not and ure will not endure.

will not endure.

We have this season secured a supply of Genuine Seed of this variety, grown by specialists in northern Idaho, where the soil and climatic conditions are most favorable for its development, consequently there can be no comparison between the quality of the seed offered by us and that offered from other sources of supply. When comparing prices kindly bear this fact in mind.

To secure a stand the following requirements are essential—good seed bed, limestone soil, or addition of 3 tons of fine ground limestone per acre, inoculation of seed, and plenty of available plant food. Sow in the spring or fall of year at the rate of 15 to 20 lbs. per acre

Per lb., \$1.09; 10 lbs., \$9.00.

Crimson, or Scarlet Clover (Trifolium Incarnatum)

Crimson, Scarlet or Carnation Clover

THIS Clover is grown in Italy, France, Great Britain and other European countries Was introduced into this country in 1822 and has proved especially adapted to the light sandy soils of the Eastern and Southern parts of the United Sates. Largely used as a cover crop in combards. orchards.

If seeded in August it makes an early growth in the autumn, passes the winter in a somewhat dormant but green state, makes a very early spring growth and matures its seed and dies before summer. It makes little or no growth in very hot weather.

Crimson Clover should be seeded shallow on a moist, reasonably fertile, well drained, well settled seed bed. Inoculation is essential when seeding the first time.

oculation is essential when seeding the first time.

Crimson Clover makes a good cover crop to be sowed on potato fields after the potatoes are dug. It makes a good growth in the fall and early spring and may be plowed under for potatoes the following spring.

It may be seeded alone following any farm crop which can be removed from the land by early summer, so that seed can be sown in late summer or very early fall. It may also be seeded for hay in mixture with grain, such as Wheat, Rye, Barley or Winter Oats, which are ready to cut for hay at about the same time as the Clover the following spring.

Apply seed at the rate of 12 to 14 lbs. per acre.

Per lb., 25c; 10 lbs., \$2.25.

McCULLOUGH'S HIGH-GRADE CLOVER SEEDS-Continued

Bokhara or Sweet Clover

SWEET Clover is a biennial plant, which closely resembles Alfalfa. It requires practically the same soil treatment as Alfalfa, but will grow under a wider variation of soil conditions than Alfalfa.

than Alfalfa.

Three things are essential—lime, inoculation and scarified seed. If the land has raised Alfalfa previously, then the addition of lime may not be necessary. Inoculation with Edwards' Legume Bacteria tends to insure a stand, by securing nitrogen for the young plant at a time when it needs it the most. Scarified seed is seed that has been so treated as to scratch or crack the hard coating and make it easy for moisture to penetrate and hasten germination, thus insuring a stand.

When Sweet Clover is inoculated it gathers nitrogen from the air and stores it up in the soil for the use of future crops.

low Flowered. (Melilotus Officinalis.) Is a beinnial producing seed the second year and will reseed itself if left undisturbed. It is the variety which is best adapted for hay, as it blossoms three weeks earlier than the White Sweet Clover, has a finer stem and does not grow so tall. It makes excellent pasture where 10 to 15 lbs. of seed is mixed with 6 lbs. of Timothy sowed in Wheat or Rye, then pastured in the fall. The following spring the Sweet Clover will be three weeks earlier than any other grass, thus making a fine early pasture. When sowing unhulled seed in the fall with Wheat for hay, apply 10 to 15 lbs. per acre. Do not sow unhulled seed in the spring and expect results the same year. Yellow Flowered.

Yellow Flowered, Unhulled Seed...... Per lb., 30c; 10 lbs., \$2.75. Yellow Flowered, Hulled Seed, Scarified. Per lb., 35c; 10 lbs., \$3.25.

White Flowered. (Melilotus Alba.) Is a biennial producing seed the second year and will reseed itself if left undisturbed.

The White Sweet Clover is much coarser than the yellow, and is especially well adapted for soiling purposes. Many farmers are taking advantage of this crop in the bottoms where annual flooding prevents this crop in the bottoms where annual nooting prevents the use of Red Clover in a crop rotation, corn being planted year after year with an occasional crop of wheat. Scarified seed which has been inoculated is sown at the rate of 15 lbs. per acre in the corn at the last cultivation. This makes a growth of 10 to 15 inches by the time the corn is husked off of the stalk in the fall, and is plowed under late the following spring for corn for corn.

It is being widely used where farmers wish to shorten their crop rotation and secure a crop of hay To do this sow scarified seed which has been inoculated with Edwards' Legume Bacteria in the Wheat, from the middle of April to the 1st of May, at the rate of 15 lbs. per acre. The following September as much as one ton of hay per acre may be cut from this land and the part May the second growth may be and the next May the second growth may be turned under for corn. The Sweet Clover, being young and tender, rots early and forms a mulch which holds the tender, rots early and forms a mulch which holds the water, thus making ideal conditions for a good corn crop. Mr. R. E. Simonds, of Miamitown, Ohio, won the Ohio State Championship in the 10 acre corn growing contest in 1917 with a yield of 102 bushels of corn per acre by practising this method. Farmers can increase their yield of corn from one-third to one-half by using Sweet Clover as a green manure crop.

White Flowered, Unhulled Seed. Perlb., 30c; 10lbs., \$2.75.

White Flowered, Hulled Seed, Scarified. Per lb., 45c; 10 lbs., \$4.00

Unhulled Seed of both varieties is very slow to germinate. Unhulled Seed (30 lbs. per bushel.) Hulled Seed (60 lbs. per bushel.)

NOTE:-We haveinstalled scarifying machinery and our Hulled Sweet Clover is all scarified, which increases the germination 40 to 50 per cent.

Alsike or Swedish Clover (Trifolium Hybridum)

This variety is perennial and on account of its fibrous root system does not winter-kill. Will grow well on poor soil, and will do better on moist land than any other variety of Clover. It is a valuable acquisition to the forage plants of this country and is highly esteemed as pasturage for bees. Sow 6 to 8 lbs. per acre. Market Price.

White or Dutch Clover (Trifolium Repens)

Red Clover—Medium

(Trifolium Pratense)

SOW 10 to 12 pounds to the acre, according to quality of seed used and condition of the soil. In ordering, always state quality desired. otherwise will send the best. Market Price.

Japan Clover (Lespedeza Striata)

THIS Clover is especially adapted for the South because it occupies the same position in pasture mixtures for the South that White Clover does in the North. Will thrive on poor land, and as it grows thickly soon furnishes abundant pasturage. Good stands have been secured by simply sowing the seed broadcast during March, April or May at the rate of 10 to 12 lbs. per acre. This Clover is a half-hardy annual without any objectionable root system. Sow 15 to 20 lbs. per acre. (25 lbs. per bushel.)

Per lb., 45c; 10 lbs., \$4.00.

Red Clover—Sapling or Mammoth (Trifolium Pratense Perenne)

Also called English Clover, Cow Grass, Perennial Clover. Sow 10 to 12 lbs. per acre. Market Price. Red Clover.

Farm, Field, Forage and Silo Seeds

We give special attention to the quality of our FARM SEEDS and can furnish best quality of recleaned stocks. fact should be borne in mind when making comparisons of prices.

Trade Marks registered,
McCullough's Seeds, XXXX, Buckeye,
Suburban Lawn Grass,
Central Park Lawn Grass.

The prices quoted are subject to market fluctuations.

When customers are in need of large quantities, we will be pleased to submit samples and quote, on application, the lowest prices that the market will justify at the time. Please specify quantities when writing for prices.

Grain Bags, holding two bushels, 65c each,

Postage Must be Added if Wanted by ail. See Postal Rates, second page of

Tennessee, or Southern Golden

TAR superior to Western grown. Will grow in any climate or soil, and make a large yield of most nutritious feed. Sow not less than 50 pounds per acre, at any time between May 1st and June 15th. Cover with a single stroke of a light harrow, or roll without harrowing, or it may be sown with a wheat drill, barely covering the seed. Cut the crop while in bloom, before the seed hardens. We have secured a full supply of Tennessee, or Southern Golden Millet (cultivated seed), which we know will give the best satisfaction. Sow one bushel per acre, (50 lbs. per bushel). Write for Special Quotations.

Does not yield so much hay nor so good hay as the Southern Golden Seed. Sow about a bushel to the acre. (50 lbs. per bushel.)
Write for Special Quotations.

Hungarian Millet (Grass)

A valuable forage plant of the Millet family, but not so coarse. Sown and cultivated same as Millet. Quite a favorite with stockmen. It is of fine growth, and makes an excellent hay. Sow 1 bushel per acre. Very scarce; write for prices. (50 lbs. per bushel.)

Hog Millet

Known also as Broom Corn Millet. The name Hog
Millet has been applied to emphasize the use to which it is
now being put as a valuable food for hogs; also good food
for birds and poultry. Sow one bushel per acre. (50 lbs.
per bushel.).... Per lb., 15c; 10 lbs., 85c; 100 lbs., \$7.00.

Pearl Millet, or "Pencillaria"
When sown broadcast or drilled in rows, 12 to 18 inches apart, 8 to 10 pounds per acre should be used.

Per lb., 40c; 10 lbs., \$3.50.

Japanese Barnyard Millet

Japanese Barnyard Millet

SOMETIMES called Billion Dollar Grass. It has proven
an enormous yielder in all sections of the United States,
producing hay and fodder of most excellent quality
and growing on any soil. It grows to a height of 6 to 8
feet and produces from 12 to 30 tons per acre. Cattle
and horses eat it greedily and fatten rapidly. It is a remarkable stooler and should not be sown very thickly—15 pounds
per acre broadcast being sufficient. In drills 3 pounds per
acre. (35 lbs. per bushel.)

Per lb., 25c; 10 lbs., \$2.25; 100 lbs., \$15.00.

Kafir-Corn

Tennessee, or Southern Golden Milet

Feterita

Broom Corn
Improved Evergreen. The best variety for general cultivation on account of the color and quality of brush. Ripens early; grows about 8 to 10 feet high; brush of good length, fine and straight, and always of green appearance when ripe. Plant 30 to 35 lbs. to the acre.

Per lb., 20c; 10 lbs., \$1.25.

Barley Barley

Barley needs a rich land, more sandy and lighter than that adapted to Wheat, and can be grown farther North than any other grain. It should be cut before fully ripe (unless intended for seed), as it is then of better quality and less liable to shell. Sow 1½ to 2 bushels if drilled; 2 to 2½ bushels broadcast. (48 lbs. per bushel.)

Spring Barley. Market price.

Beardless Barley. Market price.

Buckwheat

Buckwheat

In this locality it is sown anywhere from June 1st to July 15th; one bushel of 50 lbs., broadcast, to the acre. It makes a very fine quality of flour; is largely used for poultry food and frequently yields as much as 80 bushels to the acre. (50 lbs., per bushel.) Japanese. This superior variety is earlier, more prolific and yields double the weight per acre of other sorts. The grains are nearly twice as large as those of Silver Hull, and of fine color.

Pk., 75c; per bushel of 50 lbs., \$2.50.

Silver Hull. The grain is of light gray color.

Pk., 80c; per bushel of 50 lbs., \$2.75.

Sudan Grass (Andropogon Sorghum)

Sudan Grass (Andropogon Sorghum)

A SWEET heavy-yielding grass, foliage and seed resembles Johnson Grass, but is an annual. Root system is like Oats. Seeds from 300 to 400 pounds per acre from Florida to Montana. Absolutely drought-proof. Grows 6 to 10 feet high. Stems erect, unbranched, very leafy; and three to four cuttings, 4½ to 6½ tons per acre of dry, sweet hay that cattle prefer to Cow Pea hay. Ripe for hay cutting in 70 days, and cut every 30 days following. Plant from March to July in 18 to 30 inch rows, 5 pounds to acre, or broadcast 10 pounds. Each seed stools wonderfully—20 to 40 stools per seed.

NOTE:—On account of the similarity of this seed to Johnson Grass Seed, we have gone to a great deal of trouble and expense to procure seed that we have every reason to believe is free from this seed.

There are all kinds of Sudan Grass Seed on the market, and on this account you should be doubly careful. Buy your seed from a reputable house at a reasonable price.

Per lb., 25c; 10 lbs., \$2.00.

Sunflower (Mammoth Russian)

IMMENSE yielder—125 bushels of seed to the acre has been grown at less expense than corn. Very highly recommended for poultry. Best egg producing food known. Good feed for horses as well. May be grown to great advantage in waste ground, from early Spring to the latter part of July. Plant 10 to 12 lbs. per acre.

Per lb., 25c; 10 lbs., \$2.25.

Teosinte (Reane Luxurians)

Stalk can be cut several times during the season. Should not be planted until the soil is perfectly warm in Spring. Requires about 4 lbs. of seed per acre.

Per lb., 70c; 5 lbs., \$3.25.

Prices Subject to Market Changes.
In Ordering Farm Seeds Always Allow 65 cents for each Two-Bushel Seamless Bag. For larger quantities, write for Special Prices.

Write for Special on Farm Seeds.

FARM. FIELD, FORAGE AND SILO SEEDS--Continued

SOY, OR SOJA BEANS

The King of Summer Forage Crops

This very valuable farm plant enriches the ground in which it is planted by the free nitrogen gathered from the air and which is deposited in the ground by the roots, leaving it in ideal condition and rich in nitrogen for the next crop. Fodder is relished in either green or dry form by cattle and dairy cows.

by cattle and dairy cows.

The Soy or Soja Bean, is an annual. Its character or growth resembles ordinary field beans. During the past few years the United States Department of Agriculture and State Experiment Stations have tested many varieties of Soy Beans and pronounce it a forage and grain plant of great promise. They are grown chiefly for hay, grain, silage, soiling, pasture and as a soil renovator; are not hard to grow, not exacting to the character of soil and a valuable plant for forage; some claim they have a higher protein content than Alfalfa. These beans should not be seeded until all danger of frost is past and the ground is thoroughly warmed, and usually sown from the middle of May until July.

It is best to plant beans only about one or two inches deep, or as shallow as moisture supply will permit, for the formation of a crust may prevent the beans from growing. If grown for seed or silage, in drills 24 to 30 inches apart, sow about 3 pecks per acre. If grown for hay or soiling, the foliage will be of a finer quality and be consumed with less waste; drilled solid, or sown broadcast, using from 1½ to 2 bushels per acre. For hay, cut when pod begins to form. For grain, cut just before beans are ripe, or, when pods are beginning to take on a brownish or black appearance. For Silage, cut as near maturing as possible without dropping the leaves. the leaves.

Descriptions of the SOY or SOJA BEANS that we can furnish
Will Quote Prices on Application

Southern Grown

Barly Black. Some times known as Tar Heel or Ebony Black. Mature considerably earlier than Mammoth Yellow and considered superior. Also produces a fine crop of Hay, and believe will mature a crop of Beans in this section if sown early.

Early Brown. This is a good variety, producing a large crop of hay, but not quite as early as the Early Black.

Mammoth Yellow. One of the oldest and best known varieties, producing a large hay crop and a fine fertilizer, giving good satisfaction at all times.

Northern Grown

Ito San. Early Yellow seeded variety; being 10 to 15 days earlier than the Medium Green; will mature seed in this section, and a good hay producer.

Mongol. Early variety and of yellowish cast and produces both seed and hay in this section; recommended very

both seed and hay in this section; recommended very highly.

Medium Brown. A few days later than the Medium Green, grows a little taller with seeds of somewhat larger size and does not shatter as badly. Will give a good yield of seed, also first class hay crop.

Medium Early Green. The earliest and one of the oldest and best known sorts, which has become quite a favorite North of the Ohio River both for seed and forage crop. Grows 24 to 38 inches in height; stems medium stout—

½ to ¾ inch in diameter. The leaves are very dark green, full and large in center, while the edges are freely curled. Pods of medium size, 1 to 1½ inches long. Color of seeds, bright green. The branches are usually far enough above the ground to permit easy harvesting.

VETCHES OR TARES

HIS has been used in Europe for many years as a stock

THIS has been used in Europe for many years as a stock food and green manuring or cover crop. It fertilizes the ground without further trouble or cost, on account of the free nitrogen it gathers from the air. It produces a peculiar vine plant with very narrow foliage and elongated flowers of pinkish white in clusters. The height when supported is frequently 4 feet.

Sand, Hairy, or Winter Vetch. (Vicia Villosa.) Our stock of this is the true type, which will absolutely live throughout the winter, and buyers should beware when buying that they procure the right article, which is a small, round, black seed; this is far superior to Crimson Clover, as it never winter-kills. Sow from August 1st to October 1st, broadcast, 1 to 1½ bushels per acre, to which we suggest adding half a bushel of winter rye or wheat. In the Spring it can be plowed in as green manure, or when in flower cut for hay. All stock relish it keenly. (60 lbs. per bushel.)

Market Price.

Spring Vetch. (Vicia Sativa.) The seed of this is larger and of a brownish gray color. It is not hardy and must, therefore, be sown in the Spring during May or June, 1 to 2 bushels per acre if broadcast and 1 bushel if in drills, with either Spring wheat, Spring Rye or Oats for support. It possesses very much the same desirable features as the Winter Vetch. (60 lbs. per bushel.)

COW PEAS

The Great Soil Improvers—Makes Poor Land Rich—Makes Good Land More Productive.

The Great Soil Improvers—Makes Poor Land Rich—Makes Good Land More Productive.

COW-PEAS make one of the largest yielding and most nutritious forage crops grown. There is also no surer or cheaper means of improving and increasing the productiveness of your soils than by sowing the Cow-Peas.

There is a wide difference between Cow Peas and Canadian Peas. Bear in mind that the Southern Cow Peas belong to the Bean family, therefore, must not be sown until the ground is thoroughly warm and all danger from frost is past. The value as a fertilizing crop exceeds that of clover, for, in addition to being a larger nitrogen gatherer than the clover, they draw from the subsoil to the surface large amounts of potash and phosphoric acid, thus putting the soil in most excellent condition for following crops. The feeding value of Cow Peas is very high, being considerably above that of Red Clover. The yield of green vines per acre runs ordinarily from 5 to 15 tons.

Sow 1½ to 1¾ bushels per acre, on land thoroughly pulverized and disc or plow with a cultivator or double shovel plow. If wanted for hay, cut when peas are forming; cure as clover. If peas are for fertilizer, sow same quantity after same preparation as for hay; turn under when peas are in bloom. If farmers will first roll and disc peas they will turn under much easier and be more satisfactory. For a fertilizer, especially to be followed by wheat or corn, they are simply the best.

Will Quote Prices on Application. All orders accompanied with the money will be filled at the lowest market price, upon receipt.

Early Black. Matures quickly, best variety for the extreme northern sections of the country.

Whip-Poor-Will. An early variety, tall, upright, medium yield of vines, large yield of peas, for which they are particularly grown. Highly recommended for "hogging down."

Clay. The leading variety in the South. Large yield of

particularly grown. Highly recommended for "hogging down."

Clay. The leading variety in the South. Large yield of vines and peas, but require longer season to mature than the former-named varieties.

New Era. Seed small, dun colored; earlier than Whip-Poor-Will, but more trailing in habit. A great favorite in many places.

Mixed Cow Peas. These are splendidly adapted for those who merely wish same for feeding purposes, and being mixed, we are able to offer them at a lower price.

SOJA BEANS and COW PEAS very scarce; will quote prices on application.

CANADA FIELD PEAS

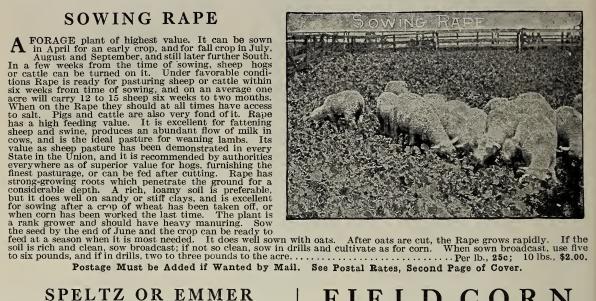

THESE are sown with oats about April 1st at the rate of 1½ bushel of Peas and 1½ bushel of Oats to the acre either drilled or broadcast. The oats are intended as a support for the peas. They are cut just after the peas flower and fed green; sheep, hogs and cattle relish them keenly. They may be sown successively up to July if one has the available land. Peas may also be sown alone at the rate of 3 bushels per acre and furnish excellent pea hay. For plowing under as green manure, they add a vast amount of nitrogen to the soil, and succeeding crops, particularly wheat, are wonderfully benefited. The dried peas are extensively fed to pigeons, while when ground as meal is an excellent addition to the regular soft food of cows, sheep and horses. (60 lbs. per bushel.)

Per lb., 15c; 10 lbs., \$1.00; 100 lbs., \$7.50.

For larger quantities-write for Special Prices.

FARM. FIELD, FORAGE AND SILO SEEDS--Continued

SOWING RAPE

SPELTZ OR EMMER

THIS grain resembles wheat but is a much larger yielder, producing frequently as high as 80 bushels of grain per acre, and that on the poorest land. The hay, if cut green is desirable for horse or cattle feed, while the straw after thrashing, is equal to the best wheat straw. The heads are somewhat similar to two-rowed barley. For fattening cattle, poultry, horses, sheep, pigs, etc., it is claimed to be ahead of any other grains. Cultivation similar to wheat or oats. Sow at the rate of 50 to 60 lbs. per acre. Per lb., 10c; 10 lbs., 65c; bushel of 40 lbs., \$2.00.

WHITE NAVY BEANS

PLANTED in June or July, these usually make a very profitable crop to grow as shelled white beans for market. Plant in rows three feet apart, dropping two or three beans together a foot apart in the rows. Cultivate early, as they grow rapidly, but do not work them while the dew is on the foliage. (60 lbs. per bushel.) Special price on application application.

HEMP SEED

We will be pleased to quote market prices upon application. Sow at rate of 3/4 to 1 bushel per acre. (44 lbs. per bushel.)

FLAX SEED

Northwestern. Sow at rate of 3/4 to 1 bushel per acre. Market price. (56 lbs. per bushel.)

VELVET BEANS

Velvet Beans make a larger growth of vines than any other known forage plant, far surpassing the Cow Pea in yield. They are usually planted in rows about five feet apart, at the rate of a peck to one and one-quarter pecks per acre. Grown mostly in the South. Write for prices.

CHOICE SEED OATS

Broadcast, 2½ to 3 bushels to the acre.

We handle enormous quantities of these and trace the demand to the excellent quality we handle; they are grown especially for us in cool regions, where they grow to perfection. (32 lbs. per bushel.)

Bed Rustproof. These are the standard oats of the Southern States, yielding large crops when all other sorts were destroyed by rust. It is a large, heavy, reddish-looking berry.

Winter Turf. Perfectly hardy in the Southern and Middle States. Yields on good land, from 50 to 70 bushels to the acre of fine, heavy grain, weighing from 35 to 50 pounds to the measured bushel.

White, Black and Mixed. Market price.

ROSEN RYE (Michigan Grown)
Grain unusually large and yield surpasses the old standard sorts. Price on Application.

SEED WHEAT Prices on Application.

FIELD CORN

Northern Grown Seed

OUR strains of Corn are not the common kinds usually found in abundance on the market; we pay special attention to the selecting of stocks in all lines of farm seeds. This is particularly true of Field Corn where reselection means the limit of crops with little or no increase in cost. It is amazing to realize that where the old unselected seed is used the average crop per acre is only half, compared to the more intelligent selection of strains. Our stock is selected for size of ear and fodder, which means a considerable increase in production. (56 lbs. per bushel.)

Plant 8 to 10 quarts per acre in hills, sow 2 ½ to 3 bushels broadcast for fodder.

Never use Feeding Corn for Seeding Purposes.

McCullough's Each stalk bears two to five ears, average length of ears 8½ inches.

Stalks range in height from 9 to 12 to 1 deal for ensilage and matures in 100 days.

The best White Dent Corn. Ears 10 to 12 inches long, well filled at tip and your country and in strong land and good season will make from 100 to 125 bushels per acre.

Boone County White Dent. Ears contain from 18 to 24 rows and are well filled from butt to tip, with deep kernels.

Peerless. (White.) Will mature in 90 days. Produces generally two large ears to the stalk.

Silver Mine. One of the best yielding White Dent Corns. 18 to 20 rows; kernels deep and cobs small.

Hickory King. The ears are rather small but as they are borne 2 to 3 on a stalk it is a fairly good yielder. Reid's Yellow Dent. Has from 18 to 24 rows; ear medium in size and of a bright yellow color.

King of the Earliest Dent. An early yellow corn, adapted for high latitudes; will mature in 80 to 85 days.

Gold Mine. Early Yellow Dent, ripening only a few days later than King of the Earliest; ears are of good size.

Leaming Yellow. Ears of good size, cob red and small, ripens quite early—frequently in 100 days from planting. Yields from 75 to 100 bushels per acre. Adapted to rich soils.

Red Cob Ensilage. A Southern type of large, white corn, with deep red cob and strong leafy stalks.

Sugar Corn for Ensilage. There is nothing better for green feed or curing for winter than sweet corn.

SEED POP CORN

McCullough's Selected Seed Potatoes

Northern Grown Stock

Selected and Grown Especially for Seed Purposes, Superior Both in Quality and Productiveness.

Prices of Potatoes are unsettled at time our catalogue is printed. We will always fill orders from customers at our lowest prevailing prices for first-class seed potatoes, or we will cheerfully quote prices at any time upon request.

at any time upon request.

Any good, well-drained, fibrous loam will produce Potatoes under right climatic conditions. For early Potatoes, which mature in 8 to 10 weeks from planting, the soil must be particularly rich. A rich clover sod, manured and broken the year before and planted to corn, beans, peas, cats, etc., is in best shape for giving a good yield of nice clean Potatoes. Stable manure had better be applied to the land the year before

before.

Potatoes are planted early and late. Cut 2 to 3 eyes to a piece. Plant in rows or hills about 3 feet apart and about 15 to 18 inches apart in the hills or rows. Cover the seed four inches, but not so deep in wet, cold land. When the sprouts appear, cultivate and hoe to keep the soil free and clear of weeds. As the vines increase, draw earth around them, forming a slight ridge. Just as soon as the bugs appear use Paris Green or Arsenate of Lead. One peck will plant about 100 feet of row, or 100 hills. Ten bushels are required to plant an acre.

Early Ohio (Red River Stock)

The Early Ohio is fully two weeks ahead of the Early Rose, and is a general favorite with potato growers and market-men alike and is the most profitable Potato they can possibly grow. The sprouts are very strong; the vines grow erect and are easy to cultivate. Maturing early, it brings the highest prices, and the land can be used for another crop after it; does well on any soil suitable for Potatoes. The tubers grow compact in the hill, are easily dug, with very few small ones—nearly every Potato is of marketable size; has few eyes, which are even with the surface. With heavy manuring, close planting and good culture, a very large and profitable crop can be expected. Cooks dry and mealy.

Early Rose

The Early Rose still continues one of the most popular varieties on our list. It is productive, of most excellent table qualities, and a most satisfactory all-around early variety. The stock which we offer is of extra quality and the best that can be obtained of this variety.

Early Six Weeks

Extra early, oblong in shape; flesh solid; cooks dry and mealy.

Early Triumph

It is from seven to ten days earlier than the Ohio, and that often means a difference of many dollars in the crop. The Potato is of good size, squared at the ends. Skin is red, flesh is very white and firm. It is productive.

Irish Cobbler

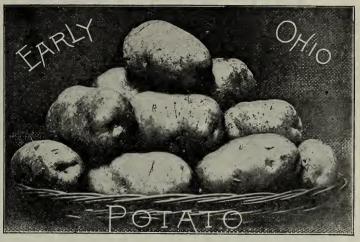

One of the first varieties of Potatoes to be ready for market, and therefore will command a good price. The skin is creamy-white, sometimes netted, which is an indication of good quality; eyes are strong, well-developed, and but slightly indented. The flesh is white and of fine flavor.

Beauty of Hebron

This is a very superior table variety. It is about a week later than the Early Rose, but claimed to be more productive. It is a white-fleshed Potato, and of most superior flavor, desirable for private growers and the home market.

Burbank

A white-skinned, medium early variety, with few eyes; flesh fine-grained and good flavor. Continues in good demand. It is of good size, of fine form and an excellent yielder. The flesh is white, very mealy and of fine flavor and quality. The best Potato for baking. This variety is well adapted to heavy soils.

Carman No. 3

Enormously prolific, averaging nearly a pound apiece; very uniform in shape, white skinned, few and shallow eyes; flesh snow-white and of exceptionally fine cooking qualities.

Chicago Market

Very popular, early, good quality and yields well.

Rural New Yorker

A valuable variety of large size; very smooth and a great cropper; in quality unexcelled. It is the best late, long keeper, and we recommend it highly.

White Star

A medium early variety of fine quality and appearance; large, oblong, uniform-sized tubers, remarkably productive.

White Elephant

Late, large, enormously productive, and of excellent

Hoosier Boy

A late variety and very productive.

Bull Moose

Large white potatoes with a small number of eyes, smooth and pares with little or no waste. It is used exclusively as a second crop potato. It yields well if planted by the first of July. Yields of 25 to 30 bushels from one bushel of seed are not uncommon.

Seed Sweet Potatoes

Yellow and Red Jersey, Red Bermuda and Southern Queen. Write for prices. Ready for shipment about April 1. For plants, see page 34.

NOTICE.

We handle the very best seed potatoes it is possible

to obtain.
All seed potatoes nowadays are more or less infected with fungous diseases. In order to secure the best results we would advise treating the seed potatoes before

results we would advise the cutting.

The potatoes should be immersed for 1½ hours in a solution of ½ oz. Corrosive Sublimate, mixed in 3¾ gallons of water, then spread them out to dry before cutting. This quantity of solution is sufficient to treat five bushels of potatoes.

NOTE:—Corrosive Sublimate should be used in wooden or earthen-ware vessels, since it corrodes metals. When occasion requires, write us for further information on fungous diseases and insect pests.

Write for Special Prices on Seed Potatoes.

INCREASE YOUR YIELD OF ALFALFA, CLOVERS, VETCH, COW PEAS, SOY BEANS

and other Legumes by inoculating your seed with

EDWARDS' LEGUME BACTERIA

THE chief value of legumes for use either as food or as green manure lies in their high content of nitrogen. With the aid of certain kinds of bacteria, the legumes can get their supply of nitrogen from the air. These bacteria live and grow in the soil, and as the new plants start to grow, the bacteria "burrow mto" the roots, grow there and produce nodules or tubercles, visible to the eye as little bunches on the smaller roots. During this process the bacteria take nitrogen from the air and give it to the plants. Unless the plants have these legume bacteria growing on their roots they will not make a successful growth.

On land where it is hard to get a good catch of legumes, or on which a new crop is to be sown, the right kind of bacteria must be supplied by inoculation. One method that has been recommended in times past is to spread over the field to be seeded, soil from a field that has grown the same crop. This method is cumbersome, expensive, and is apt to introduce into the soil seeds of bad weeds, or fungous or bacterial plant diseases, hence it is not a desirable method.

Seed Inoculation Simple

The best method of inoculation is to treat the seed before it is sown with a pure culture of the right kind of bacteria for that particular crop. By this method the inoculation can be done in a few minutes' time, and the bacteria are carried into the soil with the seed in ample numbers to insure inoculation of the roots with consequent increased growth of the crop, and with no risk of introducing seeds of bad weeds or germs of plant or animal diseases.

VALUABLE Results of Seed Inoculation

The pure culture method of seed inoculation is endorsed by the Federal Department of Agriculture and many of the State Experiment Stations. Experiments show that in practically every instance where the soil was inoculated, a more vigorous growth resulted. In many cases the difference was the difference between success and a total failure. Considering the ease and slight expense of inoculation a farmer can ill afford to risk a loss by not inoculating.

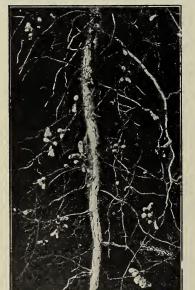

Another valuable result of inoculation is that the roots of a well-inoculated legume crop will contain much more nitrogen than those of a crop not inoculated, hence they would be of much greater benefit when such a field was ploughed for a succeeding crop. Still another point is that in case of a crop like alfalfa, well-inoculated plants being much more vigorous, do not winter-kill as easily as plants from uninoculated seed.

Alfalfa plants from inoculated and uninoculated seed. "The ruler is 12 inches long. The bunches of alfalfa are fair average samples from the treated and untreated plots.

Reliability of Edwards' Legume Bacteria

All the requirements for successful inoculation are met in the cultures of EDWARD'S LEGUME BACTERIA. These cultures are manufactured by the method originated and successfully followed for ten years at the Ontario Agricultural

Portion of root of alfalfa plant showing the tubercles or nodules formed by the nitrogen gathering legume bacteria. (Photograph natural size.)

Collège and the stock cultures were secured from the Bacteriological Laboratory of that institution. There can, therefore, be no question as to their efficiency. They are prepared under the personal supervision of S. F. Edwards, formerly instructor in Bacteriology at the Michigan Agricultural College, Instructor in Bacteriology in the College of Medicine at the University of Michigan, and for nine and one-half years Professor of Bacteriology at the Ontario Agricultural College. The cultures are made according to the best principles of the science of Bacteriology, and especial attention is given to keeping up the vigor and nitrogen-gathering power of the bacteria.

Cultures are made and kept in stock for legume crops as follows: Alfalfa, Sweet Clover, Red Clover, Alsike Clover, Crimson Clover, White Dutch Clover, Field or Garden Beans, Lima Beans, Soja Beans, Field or Garden Peas, Sweet Peas, Vetches, Cowpeas. Of this list the same culture can be used for either Alfalfa or Sweet Clover, and likewise, the same culture can be used for Red, Alsike, Crimson and Dutch Clovers. All the other crops require a different culture for each as named. The entire culture may be used on less than the amount of seed for which it is made without harm to the seed. The cultures are good for six months after leaving the laboratory. The cultures are sent by mail or express prepaid, with full directions for use.

EDWARDS' LEGUME BACTERIA cultures are made in three sizes:

 To inoculate
 30 pounds of seed
 \$0.60

 To inoculate
 60 pounds of seed
 1.20

 To inoculate
 300 pounds of seed
 5.00

Trial package for Beans, Garden Peas and Sweet Peas, 30 cents each. Directions for use on each package.

In ordering, be sure to name crop to be inoculated.

These prices mean a very low cost per acre, the exact amount depending on the amount of seed sown. The cost is less than to pay freight rates on soil from a distance, or even to haul it from a neighbor's field for soil inoculation, and the labor is much less, as seed for several acres can be inoculated in a few minutes with the pure cultures.

Summer Flowering Bulbs and Roots

AMARYLLIS

PLANT in equal parts sandy loam and leaf mould. When the leaves appear, water carefully and not in too great quantity. The Formosissima and Rosea planted in May make rich and showy border plants.

(Zephyranthus.) These flower all ner. Small, delicate pink. Each, 15c; per dozen, \$1.50.

Belladonna Major. White, turning to rose. Each, 25c; per dozen, \$2.75.

Formosissima. Crimson.
Each, 15c; per dozen, \$1.50.

Johnsonii. Large flower, crimson-scarlet, striped with white.
Each, 35c; per dozen, \$3.50.

Each, 35c; per dozen, \$3.50.

Halli, Hardy Amaryllis. (Lycoris Squamigera.) Produces in early spring attractive green foliage which grows until July, when it ripens off and disappears. About one month later the flower stalks appear and grow to a height of two to three feet, developing an umbel of large and beautiful lily-shaped flowers three to four inches across and from eight to twelve in number, of a delicate lilac-pink, shaded with clear blue. In planting, cover the crown about four inches. Fine bulbs.

Each, 25c; per dozen, \$2.50.

Vittata Hybrids. The flowers are exceedingly rich in colors and markings. Spikes are usually from two to three feet in height, bearing from three to five enormous trumpet-shaped flowers...Each, 50c; per dozen, \$5.00.

BEGONIAS TUBEROUS-ROOTED

THEY are now used extensively for outdoor planting. Give them a partially shaded position in a light soil and well drained position, and they will give more bloom than any other plant which will grow in such a place. A soil that will grow it to perfection is turfy matter scraped from the bottom of old sod—one part, and one part sand. Mix these well together, and you have a compost that is friable, porous, and well adapted to any plants having fine, fibrous roots. It is more satisfactory to apply plant-food when needed, and in such quantities as seem to be required, than to make the soil very rich from the start. Water very cautiously until active growth begins, then increase the amount. But at no time during its existence will the plant require more than enough to make—and keep—the soil moist all through. Good drainage should be provided to guard against over-watering. (See cut.)

SINGLE FLOWERING VARIETIES

Single. Crimson, orange, pink, rose, scarlet, white and yellow in separate colors.

Each, 25c; per dozen, \$2.50; per 100, \$20.00.

Single, Mixed... Each, 20c; per doz., \$2.25; per 100, \$17.50.

BEGONIAS, Hardy

Exceedingly useful plants for the garden; good for shady places. Lustrous bronze green foliage with small pink flowers. Plants only.....Each, 25c; per doz., \$2.50. (If sent by mail, each, 30c; per dozen, \$3.00.)

CALADIUM **ESCULENTUM**

(Elephant's Ear)

ONE of the most effective plants in cultivation for the flower border, or for planting out upon the lawn. It will grow in any garden soil, and is of easiest culture. It should be planted in a rich compost, where it will obtain plenty of water. Foliage light green. (See cut.)

Siz	Each	Doz.	By Mail
1.	Small bulbs10c	\$1.00	15c each
2.	Large bulbs	1.00	20c each
	Extra large bulbs25c	2.50	30c each

5.	Monster bulbs50c	5.00	60c each

CALLA, SPOTTED

Golden Yellow. (Richardia Elliottiana.) This is the best of the yellow Callas, its flowers being as large as the popular white variety, but of a rich lustrous goldenyellow of velvety texture; the foliage is dark green, with translucent creamy-white spots, which adds much to its beauty..... Each, 35c; per dozen, \$4.00.

CANNAS

Select Large Flowering

THEY do well in all sections of the country, and stand preeminently at the head of the list, succeeding in any sunny position in any kind of soil, but responding quickly to liberal treatment. Cannas should be planted in good, rich garden soil mixed with half of old rotten stable manure, by the end of May, when danger from frost is past. Water sparingly for first two weeks after planting. When growing freely, water liberally. Set the plants about 18 inches apart each way, and if more than one kind is used be careful to plant the taller growing kinds in the center and the dwarf ones along the edge. This applies to planting in beds.

Named Varieties

Dormant Roots, as listed... Each, 10c; per dozen, \$1.00; (By mail, per doz., \$1.15).

Express. Large, broad, bright scarlet-crimson flowers in immense trusses. The best dwarf red Canna; two and one-half feet.

Firebird. The best scarlet, green-leaved variety. The flowers are borne in immense trusses on strong stalks well above the leaves. They are of splendid form, round and shapely. The petals measure and sometimes exceed two and one-half inches across, a clear glistening scarlet without any streaks, spots or blotches; four feet

Cannas continued to page 70.

CANNAS-Named Varieties-Continued

Florence Vaughan. Bright, rich golden-yellow, spotted with red; of large size and perfect form; green foliage; four feet.

Italia. Orchid-flowered. Bright orange-scarlet, with broad golden-yellow border; the flowers are produced on massive stems, set well above the foliage; which is large and heavy; green foliage; four feet.

Jean Tissot. One of the brightest; color an intense, brilliant vermilion, with bright orange shadings, a color that can be seen as far as the eye will carry; massive green foliage; five feet.

King Humbert. In this grand Canna we have a combination of the highest type of flowers with the finest bronze foliage. Its flowers measure 6 inches in diameter, produced in gigantic trusses, a brilliant orange-scarlet with bright red markings; foliage broad and massive, of a rich coppery-bronze; four to five feet.

isiana. Very large, beautiful, vivid, scarlet, orchid-like flowers, often measuring five to six inches across. Foliage a glossy green, edged with a narrow purple band; six feet. Louisiana.

Meteor. The best deep red large-flowered Canna, with massive, erect trusses of deep blood-red flowers; five feet.

Richard Wallace. A good free-flowering yellow Canna of vigorous growth, we believe this variety comes nearer to the ideal than any variety yet offered. In color it is a pleasing canary-yellow with exceptionally large flowers, which are carried well above the bright green foliage; four and one-half to five feet.

Rosea Gigantea. Large flowers, borne in such abundance that the mass of color is amazing. A deep rich rose, almost a coral carmine; four feet.

Venus. One of the softest and most delicately colored varieties that has yet been introduced. The flowers are of fair size, of a soft rosy pink, with a pretty mottled border of creamy yellow. The plant always presents a clean, fresh appearance; green foliage; three and one-half

Wyoming. Massive orange flowers with purplish-bronze foliage, making a strong contrast; six feet.

Yellow Humbert. Has the same habit of growth as the King Humbert. Has green foliage and produces yellow flowers, dotted with red; four to five feet. to five feet.

Mixed Tall Varieties. ed Tall Varieties. Our selection; dormant roots. Each, 10c; per dozen, 75c; (per dozen by mail, 85c.)

Mixed Dwarf Varieties. Our selection; dormant roots. Each, 10c; per dozen, 75c; (per dozen by mail, 85c).

CANNA PLANTS

CANNA PLANTS of the following varieties. Express, Firebird, King Humbert, Meteor, Rosea Gigantea, Venus, Wyoming, Yellow Humbert.
Small Plants, each 15c; per dozen, \$1.50.
Large plants, each, 20c; per dozen, \$2.00.

Ready about May 10th. Sent by express only at purchaser's expense.

CINNAMON VINE

Beautiful Summer Climber, glossy foliage and fragrant flowers; stem dies down in Winter but the root is hardy. Large selected roots......Each, 10c; per dozen, \$1.00.

MADEIRA or Mignonette Vine

A RAPID growing vine, covering a large space in a short time.

Fleshy, heart-shaped leaves of a light green and numerous racemes of feathery flowers of delicious fragrance.

Each, 5c; per dozen, 40c.

Kriemhilde

ACTUS

DAHLIAS

THE Dahlia is one of the most important Summer and Autumn flowers. Commencing to flower in July, they are a perfect blaze of bloom until stopped by frost. Especially fine for cut flowers. One of the most important points in the cultivation of the Dahlia is to select a well-drained position where they will receive the full benefit of the sun during the greater part of the day.

As to soil, they are not at all particular, except that in the case of a stiff clay some loose material should be added, such as coarse sand, old mortar, or anything which will make the soil loose and friable. The soil must be deeply dug, if possible to a depth of two spades, and a liberal amount of suitable plant food incorporated. For this nothing is more satisfactory than well-decayed stable manure, but where this can not be conveniently procured, pure bone meal, sheep manure, or any chemical fertilizer rich in ammonia and phosphoric acid will answer as a substitute. answer as a substitute.

The planting of dormant roots in the latitude of Cincinnati may be done at any time between April 25th and June 15th, the earlier planting being preferable. Plant the bulbs three inches below the surface of the ground, laying the bulb on its side. Do not crowd your plants, but plant at a distance of not less than two and one-half or three feet, and as soon as the shoots appear, remove all but two or three of the strongest, and these, when about a foot high should be secured to stout stakes.

Keep free from grass and weeds, and water regularly in dry weather.

NOTE:—We fill all orders with strong, divided dormant roots.

Dahlias continued to page 71.

DAHLIAS—Continued

Cactus Dahlias

Named Varieties. Each, 20c; per dozen, \$2.00.

If wanted by mail, add 15c per dozen for postage.

Electric. The color is a rich, clear canary yellow, each petal heavily tipped white; flowers large with incurved petals. Floradora. Pure garnet. Splendid free bloomer.

Gabriel. Long, incurved twisted petals; color combination

of scarlet and cinnamon shades, sometimes tipped white. General Buller. Rich velvety maroon, tipped white.

Golden Gate. Large flowers of a rich, deep golden-yellow, suffused and shaded fawn.

Juliet. Rosy pink, tint-ng lighter towards the center.

Kriemhilde. rosy pink with lighter center. A distinct and valuable variety as the flowers keep a long time after cutting.

Marjorie Castleton. Rosy pink, tinted lighter toward center and tips.

Prince of Yellows.
Soft, golden yellow.
Profuse bloomer.

Queen of Hearts. A beautiful pure white with yellow at the base of petals.

Rosy Morn. Bright carmine rose, tinted lighter toward the base of the petals.

Standard Bearer. tense cardinal-red with long twisted petals; early and profuse bloomer.

Show Dahlias

Are a perfectly full, rounded, regular form, cupped or quilled petals and solid color, or tipped darker than the ground color. (See cultural directions).

Named Varieties. Each, 20c; per dozen, \$2.00.
If wanted by mail, add 15c per dozen for postage.

A. D. Livoni. A clear pink, beautifully quilled, of perfect form and very free-flowering. (See cut.)

Arabella. One of the loveliest; soft primrose, shaded and tipped rose.

Princess Victoria. A sterling variety, being the earliest and freest flowering primrose yellow. In bloom early and late. Long stiff stems, fine for cutting.

Queen Victoria. Rich golden yellow; very fine.

Red Hussar. Richest, dazzling cardinal red. Strong, vigorous grower and free bloomer on long stems.

Snowball. Alarge, pure white dahlia, of perfect ball form, on very long stems.

White Swan. Pure white, large and fine; the hardiest and easiest grown; long stems.

Yellow Duke. A splendid primrose-yellow of good form.

Collarette, Pompon, Fancy, Peony Flowered and Single **Dahlias**

Named Varieties. Each, 20c; per dozen, \$2.00. If wanted by mail, add 15c per dozen for postage. Allie Mourey. (Pompon.) Light pink, tipped deep pink.

Crimson Queen. (Pompon.) Deep crimson, shaded purple.

Klien Domitea. (Pompon.) Bright golden terra cotta.

Little Beauty. (Pompon.) Soft, silvery pink, closely quilled petals.

Snowclad. (Pompon.) A snowy white, free bloomer.

Penelope. (Fancy.) White flaked, rosy lake, beautiful

Penelope. (Far and chaste.

Harmony. (Collarette.) Primrose-yellow, marked soft purple, collar yellow.

Big Chief. (Peony.) Rich crimson, margined maroon. Queen Emma. (Peony.) Flowers of a peculiar shade of pink.

Mrs. J. C. Hance. (Single.) Large, well rounded flowers; early in the season it is white, slightly flushed and tipped with pink; later in the season the entire flower is a tender rose pink.

Rose Pink Century. (Single.) The largest and best deep pink.

Scarlet Century. (Single.) Brilliant scarlet with golden

White Century. (Single.) Pure white with large, heavy, overlapping petals of good texture.

McCULLOUGH'S MIXED DAHLIAS.

Our mixtures are made from selected varieties. Double Mixed, Cactus Mixed, Single Mixed and All Varieties Mixed, our selection.

Each, 15c; per dozen, \$1.50.

If wanted by mail, add 15c per dozen for postage.

GLOXINIA

MAGNIFICENT for house culture, producing in great profusion, beautiful flowers of rich and beautiful colors. They succeed best in sandy loam and peat, and require a moist heat.

Large Flowering Varieties. Finest Mixed. Each, 35c; per dozen, \$3.50.

A. D. Livoni

Decorative Dahlias

MANY beautiful varieties of Decorative Dahlias have been introduced in recent years, and in the following varieties some will be found with flat petals, others reflexed, while others will be curiously twisted and incurved. As cut flowers, these varieties will always maintain a leading place as their large and perfectly formed blooms are borne on long, stiff stems, continuing in good condition a long time and are of easy culture, succeeding under the most varied conditions of soil and climate. (See cultural directions for Dahlias.)

Named Varieties. Each, 20c; per dozen, \$2.00.

If wanted by mail, add 15c per dozen for postage.

Eventide. White with a faint flush of delicate rose on the edge of the flower.

Delice. The best, pure, bright rose pink; entirely distinct.

Henry Patrick. Large snow-white.

Jack Rose. Brilliant crimson red.

Jean Wood. White suffused violet mauve, petals gracefully twisted.

Le Grand Manitou. Immense size, pink, striped rich crimson. yndhurst. The best bright red for cutting.

Minnie McCullough. Very striking. Soft golden yellow, tipped bronzy red; effective.

Mrs. J. Gardner Cassatt. Flowers mauve-pink and of large size; a fine cut flower.

Mrs. Roosevelt. Very large, soft pink. Nymphaea. A very delicate shrimp pink.

Oregon Beauty. Intense oriental red, carmine suffusion; a magnificent red.

Orange King. Rich, glowing orange-scarlet. Perle de Lyon. Splendid pure white.

Princess Juliana. Pure white, fine for cutting.

Professor Mansfield. A giant of most unique coloring; a pleasing combination of yellow, red and white.

Sylvia. Deep pink, tinting to flesh pink at center; large, perfect form, on long stiff stems.

Wm. Agnew. Very large, dazzling crimson scarlet.

GLADIOLUS

WITH its great diversity of color and splendid spikes of bloom which can be had from July until frost, the Gladiolus is preeminently the people's flower. Bulbs can be planted from the middle of April to July and should be set about 3 to 4 inches deep and 8 to 10 inches apart, according to the effect to be produced. Can be planted in succession for different blooming periods.

If wanted by mail, add 5c per dozen for postage. Single bulbs mailed without additional charge.

Gladioli in quantity by Parcel Post. If to be sent by this means, estimate postage at rate of 8 lbs. per 100 bulbs.

America. Conceded to be one of the finest varieties for cutting or bedding ever sent out; color a beautiful soft flesh-pink; orchid-like in its coloring and texture; growth and habit perfect.

Each, 7c; per dozen, 60c; per 100, \$4.00.

Augusta. A lovely and useful pure white variety. Each, 7c; per dozen, 60c; per 100, \$4.00.

Baron Hulot. Color a rich, royal violet blue, with well expanded flowers, very effective.
Each, 8c; per dozen, 80c; per 100, \$6.00.

Chicago White. Pure white with faint lavender streaks in the lower petals. They are borne on tall straight stems and from 5 to 7 flowers are open at one time. It is one of the earliest to bloom, hence valuable as a cut flower sort.

Each, 8c; per dozen, 70c; per 100, \$5.00.

Kunderi "Glory." The wide open flowers all face in the same direction and are carried on straight stout stalks. The color is a delicate cream pink with a most attractive crimson stripe in the center of each lower petal. The ruffling of the petals in this new strain has attracted much attention.

Each, 10c; per dozen, 90c; per 100, \$7.50.

Mrs. Francis King. A magnificent new variety. The large blooms are of a delightful light scarlet and are well placed on the large spikes, bearing six open flowers at one time... Each, 7c; per dozen, 60c; per 100, \$4.00.

Mrs. Frank Pendleton. Color a lovely salmony pink, with brilliant deep red blotches in the throat.
Each, 10c; per dozen, 90c; per 100, \$7.50.

Niagara. In color the flowers are a delightful cream shade with two lower inside petals or segments blending to canary yellow. The throat is splashed with carmine, and the lower ends of the outside petals are also blushed with carmine. The stamens are purple and the stigmas pale carmine; this little addition in the coloring relieving the creamy effect of the petals.

Each, 10c; per dozen, 90c; per 100, \$7.50.

Panama. A new seedling of America which resembles the parent variety in every way except that it is a much deeper pink. A grand variety. Spike very long with flowers large and well arranged. Each, 10c; per dozen, 90c; per 100, \$7.50.

with a touch of carmine in the lower petals.

Each, 8c; per dozen, 80c; per 100, \$6.00.

Princeps. An especially fine variety with immense, wideopen, amaryllis-like flowers of a rich dazzling scarlet, marked with white on the lower portion, which serves to intensify the brilliancy of the scarlet. Each, 10c; per dozen, 90c; per 100, \$7.50.

Scarsdale. Tall grower, with large, lavender-colored flowers, shaded to dark rose.

Each, 8c; per dozen, 80c; per 100, \$6.00.

Striped and Variegatd shades mixed 7c	60c	4.00
Pink and Rose shades mixed7c	60c	4.00

McCullough's Superb Mixed Gladiolus

This superb mixture is composed exclusively of high-grade varieties, including many new and rare kinds. It embraces the greatest possible range of color, and contains the best large-flowering sorts..... Each, 6c; per dozen, 50c; per 100, \$3.50.

Extra Fine Mixed

This mixture contains a very complete range of splendid varieties, and while not as fine as the preceding, the size and coloring of many of the sorts will be found out of the ordinary...... Each, 5c; per dozen, 40c; per 100, \$3.00.

If Gladioli are wanted by mail, add 5c per dozen for postage. Single bulbs mailed without additional charge.

Gladioli Bulbs weigh about 8 pounds per 100 and, if wanted in quantity by mail, include enough to cover postage in your remittance.

OXALIS (Summer-Flowering)

VALUABLE for edging walks, flower beds, etc. Bulbs planted three inches apart form rounded rows of delicate foliage, about one foot high, and produce flowers in endless succession.

Dieppi Alba. Pure white, very fine.

Lasandria. Fine, rose pink, beautiful cut foliage.

Shamrock. Clover-like foliage, pink blossoms. Each variety.......Per dozen, 15c; per 100, \$1.00.

TUBEROSES

ONE of the most fragrant and beautiful of the summer flowering bulbs. For flowering in the open border, plant about the first of May.

Excelsior Pearl. Mammoth bulbs. Robust stem and long spikes of flowers, which are more double and twice as large as those of the old sort.

Each, 10c; per dozen, 75c; per 100, \$5.00.

Dwarf Pearl. Large size. Each, 6c; per dozen, 60c; per 100, \$4.00.

Everblooming Flybrid-Tea Roses

WE especially recommend this collection of Roses to those who wish a supply of extra choice flowers for cutting throughout the summer and fall months. All roses thrive best when well watered, sprayed with Hellebore and Bordeaux Mixture for insects and fungus, and fed either by applications of manure water, or bone meal at the rate of two pounds per square yard. The Hybrid Perpetuals are particularly susceptible to such treatment and respond quickly.

WINTER PROTECTION. In this latitude, we have found that the most satisfactory protection is to draw up a mound of soil from eight to ten inches high around the base of the plants, then cover the beds after the ground begins to freeze with any oose material such as strawy manure, evergreen boughs, or corn stalks, and in more severe climates, heavier covering is all that is required.

STRONG 4-INCH POT PLANTS, on own roots, of all the following varieties, ready about May 10th. Each, 75c; per doz., \$7.50. If wanted by mail, within the third zone, add 5c each, 50c per dozen for postage.

British Queen. Surpassing in beauty and elegance of form all other white varieties.

Edward Mawley. Is the finest of all dark crimson roses. A true perpetual flowering Hybrid Tea.

Etoile de France. Color a lovely shade of clear, red-crimson velvet; very fragrant and keeps well.

Etoile de Lyon. Bright sulphuryellow; fine form, large size; a fine yellow rose.

Florence Forrester. Clear snowwhite with a lemon tinge; fine rose for bedding.

Gruss An Teplitz. The finest brilliant red, everblooming garden

Helen Good. Color delicate yellow, suffused with pink; chaste and beautiful; large size and form.

Hermosa. Bright pink color, freeflowering and perfectly hardy.

Jonkheer J. L. Mock. Color deep pink, outer petals silvery rose; very fragrant.

Killarney Brilliant. Color varies from pink to crimson. Very free bloomer.

La France. Beautiful, bright silvery-pink, with pale lilac shading. Queen of all the roses.

Madame Caroline Testout. Clear, bright satiny-pink; flowers large and showy.

Maman Cochet. Light pink, shaded with salmon yellow, outer petals splashed with bright rose.

Mrs. Aaron Ward. In bud, a deep Indian yellow; when fully opened it is light yellow throughout.

My Maryland. Color glowing, intense pink which lightens up as the flower expands.

Ophelia. Salmon flesh, shaded with rose; large and of perfect shape.

President Taft. It has a shining, intense, deep pink color possessed by no other rose.

Radiance. Brilliant rosy-carmine, with beautiful, rich and opaline-pink tints in the open flower.

Red Radiance. The color is dazzling crimson-scarlet with large flowers on strong stems.

Rhea Reid. Flower large and double; rich, dark, velvety red.

Richmond. Pure, rich scarlet; very free and continuous flowering.

Sunburst. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter.

White Killarney. It is pure white in color, long in bud, of fine form.

White Maman Cochet. Creamy-white flowers, faintly tinged with blush.

William R. Smith. Petals cream with flesh tint tips. buffy-yellow base and pink center.

STRONG 4-INCH POT PLANTS, on own roots, of all varieties listed. Ready about May 10th.

Each, 75c; per doz., \$7.50.

POLYANTHA or Baby Rambler Roses

A CLASS of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders. They form shapely, compact, bushy specimens about 18 inches high, producing in great profusion from early in the season until severe frost, immense trusses of small flowers. Pruning is not necessary: simply remove the past season's flower stems.

STRONG 4-INCH POT PLANTS, on own roots, of all the following varieties. Ready about

May 10th.

Each, 75c; per dozen, \$7.50.

Anna Muller. Flowers are a shiny, brilliant pink.

Catherine Zeimet. Grows about 20 inches high and produces double, pure white flowers.

Clothilde Soupert. Color effect is ivory-white, shading to bright silvery-pink at center.

Erna Teschendorff. Flowers carmine-red. Blooms from May to end of October.

Mlle. Cecile Brunner. Color blush, shaded light salmon-pink.

Orleans. Is a huge bouquet of deep cerise or geranium pink with showy center of pure white.

Tip Top. Color brilliant goldenyellow, tipped with clear, bright cerise.

Rose Plants Travel Best by Express—But if wanted by Parcel Post within third zone, add 5c each; 50c per dozen, for postage.

HARDY HYBRID PERPETUAL ROSES

Two year field grown plants on own roots, of the following varieties. Ready for delivery from March 15th to April 20th. Each. 75c; per dozen, \$7.50.

If wanted by mail, within the third zone, add 5c each 50c per dozen for postage.

Boule de Niege or Ball of Snow. Pure white, flushed with rose, very free flowering.

Clio. Flesh color, shaded in center to rosy-peach. Large, fine globular form, free bloomer.

Coquet des Alps. Pure white, delicately tinted blush on first opening.

Druschki. An exquisite flower of the purest white.

Magna Charta. Deep pink, large, sweet scented and of fine form.

Marshall P. Wilder. A grand rose of large, full flowers of a bright carmine red.

Mrs. John Laing. Large, beautiful pink blooms, borne on long, sturdy stems.

Paul Neyron. An immense rose of a deep rose color.

Page 73

Flardy Flerbaceous Perennial Plants

THE steadily increasing demand for hardy plants has induced us to give them more attention and to increase our stock considerably. For those of our customers who are not acquainted with the different varieties, we shall be pleased to make suitable selections of the most desirable species that when once planted, with very little care, will keep the garden gay with flowers from the time frost leaves the ground until late in autumn.

Cannot accept orders for Hardy Perennial Plants totaling less than one dollar.

ACHILLEA (Sneezewort)

AGROSTEMMA (Rose Campion

AJUGA (Bugle)

Reptans Rubra. A fine plant for the rockery and for shady situations. Large spikes of purplish-blue flowers in May. Each, 25c; per dozen, \$2.50.

ALYSSUM (Madwort)

Saxatile Compactum. (Basket of Gold, Gold Tuft, Rockmadwort.) A fine plant for the rockery or border; grows 1 foot high and produces broad flat heads of yellow flowers in May.

Each, 25c; per dozen, \$2.50.

ANCHUSA ITALICA

Dropmore Variety. Remarkable for its free and continual flowering all summer and the beautiful gentianblue of its flowers; grows about five feet high.

Each, 25c; per dozen, \$2.50.

Myosotidiflora. Grows 10 to 12 inches high, producing during April and May sprays of beautiful Forget-Me-Not-like flowers of rich blue.

Each, 35c; per dozen, \$3.50.

ANEMONE JAPONICA (Japanese Wind-flower)

THEY grow two to three feet high and are in bloom from August till mid-November, furnishing abundant cut flowers and a brilliant display.

Alice. This new pink variety has silvery-rose, shell-like petals suffused with carmine. Each, 25c; per doz., \$2.50. Queen Charlotte. Very large, semi-double flowers of La France pink...... Each, 25c; per dozen, \$2.50. Whirlwind. Large, semi-double, white flowers. Each, 25c; per dozen, \$2.50.

ANTHEMIS TINCTORIA

The hardy Marguerites are among the most satisfactory summer-flowering perennials, growing about 15 inches. Large golden yellow flowers... Each, 20c; per dozen, \$2.00.

ANTIRRHINUM (Snap Dragon)

THEY are undoubtedly one of the best cut flowers which can be grown, while for beds or borders they are a constant source of pleasure, being in flower all the time. Our collection embraces several colors in mixture.

Each, 20c; per dozen, \$2.00.

AOUILEGIA (Columbine)

CHARMING hardy plants, with distinct clear-cut foliage, bearing in countless numbers through May and June exquisite clear blue, white, rose, yellow, purple and striped blossoms. They thrive well with ordinary garden culture, but do best in partially shaded nooks.

culture, but do best in partially shaded nooks.

Chrysantha. (Golden Columbine.) Golden yellow flowers with long spurs....... Each, 20c; per dozen, \$2.00.

Chrysantha Alba. A long spurred white variety.

Each, 20c; per dozen, \$2.00.

Coerulea. Flowers often three inches in diameter; the outer sepals deep lilac or blue, petals white, the deep blue spur tipped green... Each, 20c; per dozen, \$2.00.

Long Spurred Hybrids. Beautiful variations from the standard type........ Each, 35c; per dozen, \$3.50.

Canadensis. (American Columbine.) A bright red and yellow variety, very attractive.

Each, 20c; per dozen, \$2.00.

ARABIS (Rock Cress)

ASCLEPIAS (Butterfly Weed) Showy native plants about 2½ feet high, blooming during July and August.

Incarnata Rosea. (Swamp Milkweed.) Pretty rose-flesh colored flowers...... Each, 20c; per dozen, \$2.00.

Tuberosa. Brilliant orange-colored flowers.
Each, 20c; per dozen, \$2.00.

ASTERS (Michaelmas Daisies or Starworts)

BAPTISIA (False Indigo)

tralis. Grows about 2 feet high with dark green, deeply-cut foliage and spikes of dark blue flowers in June......Each, 20c; per dozen, \$2.00.

HARDY HERBACEOUS PLANTS-Continued

BEGONIAS, HARDY

EXCEEDINGLY useful plants, thriving best in a partially shaded, moist situation.
with small pink flowers.

Lustrous bronze green foliage Bloom all summer. Lustrous bronze green foliage Bloom all summer. Each, 25c; per dozen, \$2.50.

BELLIS PERENNIS (English Daisy)

Double flowering, white and pink.

Each, 10c; per dozen, \$1.00.

BOCCONIA (Plume Poppy)

data. A splendid plant, growing sometimes six feet high, bearing panicles of creamy-white flowers in July and August; makes a grand effect as a center in a hardy bed or a border background. Each, 20c; per dozen,\$2.00.

BOLTONIA (False Chamomile)

TALL growing, showy plants, with flowers resembling hardy Asters, appearing in September.

Pure white; five to six feet. Asteroides.

Each, 20c; per dozen, \$2.00.

Pink, tinted lavender, six feet.

Each, 20c; per dozen, \$2.00. Latisquama.

CERASTIUM (Snow in Summer)

nentosum. Suitable for the rockery or for covering dry, sunny spots. Low growing plant with silvery foliage and white flowers in June.

Each, 20c; per dozen, \$2.00. Tomentosum.

CAMPANULAS (Bell Flower)

BELL-SHAPED flowers, well known and easily grown, of much variety of form, some being tall and suitable for planting in borders or among shrubbery, while others are dwarf and suitable for edging, rockwork, etc.

(Carpathian Hare Bell.) Ideal for border or rockery planting, being about eight inches high; flowers from June till frost. Blue and white, each separate......Each, 20c; per dozen, \$2.00.

Glomerata Dahurica. fine for the border. Large heads of purple flowers. 2 feet.

Each, 200; per dozen, \$2.00.

Persicifolia. (Peach Bells.) Blue flowers during June and July; 2 feet......Each, 25c; per dozen, \$2.50.

(Scotch Hare Bells.) Rotundifolia. drooping blue bells, rising from compact tuft of foliage; fine for rockery. June to August. Each, 20c; per dozen, \$2.00.

CHELONE (Shell Flower)

STATELY plants growing about two feet high and bearing numerous spikes of large flower-heads during the summer and fall.

Showy, purplish-red flowers. Each, 25c; per dozen, \$2.50. Lyoni.

CHRYSANTHEMUMS (Hardy Pompon)

THESE are becoming universally popular for bedding, as well as for cut flowers. They bloom profusely at a time when so many other flowering plants are destroyed by frost. While they are perfectly hardy they should be planted in a well drained position and protected with a light mulching in winter. As the demand for these plants always exceeds the supply it is advisable to order at once, as all orders are filled in rotation. Ready for delivery about May 1st.

Large Flowering or Aster Varieties

Sulphur white; for Ashbury. Sui

Bradshaw. Silver pink; large, full flowers.

nberland. Long stems; large flowers; pure yellow. Cumberland.

Reddish Daisy Anderson. bronze; dwarf.

Elkton. Light pink, full, large flowers.

Pure white, tall Excellence. grower.

The above varieties, each. 20c; per dozen, \$2.00, By mail, each, 25c; per dozen. \$2.50.

COREOPSIS

ea. Small pink flowers, blooming in August and September. Foliage dark green, finely divided. Useful in border and rockery; 1 foot.

Each. 25c; per dozen, \$2.50.

HARDY HERBACEOUS PLANTS—Continued

DELPHINIUMS (Perennial Larkspur)

THESE are deservedly one of the most popular subjects in the hardy border, bold, attractive, and highly prepossessing plants of easiest culture; perfectly hardy. They will establish themselves in almost any garden soil, but respond quickly to liberal treatment. Will begin blooming about the middle of June. If stalks are cut off as soon as flowers fade, they will continue blooming all summer. (See cut).

Belladonna Hybrids. The freest and most continuous blooming of all.

The clear turquoise-blue flowers are not surpassed by any; 3 feet.

Each, 25c; per dozen, \$2.50.

Belladonna Semi-Plena. Clear blue flowers, overlaid with pink. 3 feet. Each, 35c; per dozen, \$3.50.

Formosum. Dark blu and free blooming. Moerheimi.

Giant Hybrids. Unquestionably the finest strain of mixed hybrids ever offered. The original stock came from Europe, and consisted of the best-named varieties. The plants are of strong, vigorous habit, with large flowers on spikes two feet and over long, the majority running in the lighter shades of blue...... Each, 20c; per dozen, \$2.00.

nensis. A pretty dwarf species, with fine feathery foliage and intense gentian-blue flowers in open panicles......Each, 25c; per dozen, \$2.50.

Chinensis Alba. A pure white form of the above. Each, 25c; per dozen, \$2.50.

DIELYTRA OR DICENTRA

Formosum. (Plumy Bleeding Heart.) Grows about fifteen inches high, with finely cut, ornamental foliage and produces its fine pink flowers from April to August......Each, 25c; per dozen, \$2.50.

Spectabilis. (Bleeding Heart, or Seal Flower.) An old-fashioned favorite; its long racemes of graceful, heart-shaped pink flowers are always attractive; is perfectly at home in any part of the hardy border, and especially valuable for planting in the shade. Each, 35c; per dozen, \$3.50.

DIGITALIS (Foxglove)

THE strong flowerstalks—frequently four to six feet high—rising from rich and luxuriant masses of leaves, always give an appearance of strength to the hardy border.

Gloxiniaeflora. Finely-spotted varieties.

White, purple, rose or mixed Each, 20c; per dozen, \$2.00,

EUPATORIUM

ratoides. (Thorough Wort.) A border plant of strong, free growth. 3 to 3 ½ feet high, with small white flowers in dense heads; splendid for cutting. August and September........Each, 25c; per dozen, \$2.50. Ageratoides. Coelestinum. August until frost.

EUPHORBIA (Milk Wort)

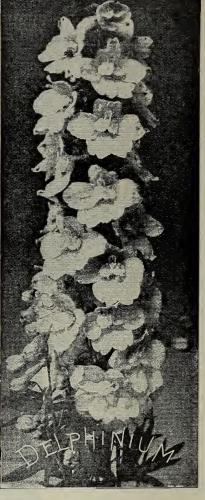

Corollata. (Flowering Spurge.) Grows about 18 inches high, bearing from June to August umbels of pure white flowers with a small green eye; desirable for cutting. Each, 25c; per dozen, \$2.50.
Cyparissias. Grows 10 to 12 inches high with Cypress-like foliage and bears showy trusses of bright yellow flower-like bracts during May; very effective even when out of bloom.......Each, 25c; per dozen, \$2.50.

FUNKIA (Plantain Lily)

THE Plantain Lilies are among the easiest plants to manage; their broad, massive foliage makes them attractive subjects for the border, even when not in dower. They succeed equally well in sun or shade. flower.

GAILLARDIA (Blanket Flower)

ndiflora. Beginning to flower in June, they continue one mass of bloom the entire summer. Flowers three inches in diameter; center dark reddish-brown; petals orange to crimson......Each, 20c; per dozen, \$2.00.

GYPSOPHILA (Baby's Breath)

DURING August and September the plant is a mass of delicate feathery blooms. These may be used as fresh cut flowers, also for a semi-everlasting effect.

Paniculata. Loose, feathery sprays of white flowers, making a mist-like effect, fine for bouquets.

Each, 20c; per dozen, \$2.00.

Repens. An elegant trailing plant for the rockery, with clouds of small white flowers in July and August.

Each, 25c; per dozen, \$2.50.

GRASSES, Ornamental. (See page 80)

IBERIS (Hardy Candytuft)

Sempervirens. Low growing, with evergreen foliage. In spring and early summer, is completely covered with dense heads of pure white flowers. Each, 25c; doz. \$2.50.

LIBERTY IRIS (Flag Iris) The "Fleur-de-Lis" of France

The "Fleur-de-Lis" of France

THE Liberty Iris is one of the most desirable May flowering plants. The flowers are of large size and of exquisite colors. For the best results plant in a well-drained sunny position, barely covering the roots. Avoid fresh manure in preparing your border.

Baron von Humboldt. Dark blue.

Canary Bird. Light yellow or buff.

Coerulea. Sky blue.

Florentina Alba. White.

Florentina Coerulea. Blue, very fine.

King of Yellows. Yellow.

L'Innocence. White, veined with orange purple.

Mme. Chereau. Pure white, border of blue.

Mont Blanc. Pure white.

Purpurascens. Dark purple.

Queen Victoria. Blue, changing to bluish white.

Thorbecke. White and deep violet.

Price of above.......Each, 20c; per dozen, \$2.00.

If by mail, add 5c each, 50c per dozen.

We can furnish large clumps of most of the above varieties from 50c to \$1.00 each.

IRIS PALLIDA DALMATICA

This variety is of strong, vigorous habit, growing in good soil 4 feet high, with exceptionally large, fragrant flowers, standards lavender, falls lavender, shaded blue; exquisite in every way and fine for massing.

Each, 25c; per dozen, \$2.50.

IRIS SIBERICA

Orientalis. (Yale Blue.) A slender, graceful, tall-growing Iris, with flowers quite similar to those of the Liberty Iris, but smaller and much more numerous. The plants form large, strong, compact clumps, and bloom so freely that the deep blue flowers give almost a solid color effect.......Each, 20c; per dozen....\$2.00

Japanese Iris

JAPANESE IRIS (Iris Kaempferi)

JAPANESE IRIS (Iris Kaempferi)

THEY are most effective when planted in groups, and thrive best in a moist soil. The flowers are of immense size, from six to eight inches in diameter, and of the most beautiful and delicate shades. They are perfectly hardy, flowering in great profusion during June and July. (See cut.) We offer the following list of named sorts:

Azuma Yuki, No. 81. Petals rosy purple with heavy white veins, standards brownish-red, striped with white, yellow star center.

Banrai Nami, No. 1. Petals pale pinkish white with white standards and yellow center.

Furomon, No. 28. Petals bright pink, shading to creamy white, with heavy purple veins, standards purple, yellow center.

Gosetsu No Mai, No. 12. Petals light blue, yellow star center, with dark bluish purple standards.

Kimino-Medmui, No. 97. Soft lilac, with dark purple vein, and purple standards.

Krishi-Ikari, No. 85. Petals brownish-red with light brown veins, center yellow, standards scarlet, striped with white.

Kyo-Dai-Yama, No. 59. Petals indigo, standards greenish blue, striped with white.

Cyino-Kamoe, No. 65. Petals recurved and creamy white, standards pure white.

Sassa No Koe, No. 34. Petals recurved and creamy white, spotted deep pink.

Shiraito-Daki, No. 100. Petals creamy white with bluish tinge, finely veined, center yellow, standards white with deep blue edges.

Yezo-Nishiki, No. 16. Petals lavender, heavily spotted with dark purple, center yellow, standards lavender, bordered with purple.

Yodo No Kuruma, No. 8. Petals bright pink, shading to dark pink at center and heavily veined, standards purple, marbled with white.

Above named varieties, each, 30c; per dozen, \$2.50.

We can furnish large clumps of most of the above varieties from \$1.00 to \$1.50 each.

LIATRIS (Blazing Star, or Gay Feather)

LIATRIS (Blazing Star, or Gay Feather)

LINUM (Flax)

Perenne. A fine plant for the border or rockery; grows 2 feet high, with light, graceful foliage and large blue flowers all summer.....Each, 25c; per dozen, \$2.50.

HARDY HERBACEOUS PLANTS—Continued

LUPINUS POLYPHYLLUS (Lupine)

EFFECTIVE plants, producing large spikes of flowers. Will thrive in any good garden soil; they grow about three feet high and bloom latter part of May and early June.

Polyphyllus. Clear blue.....Each, 20c; per dozen, \$2.00.

ELEGANT subjects for growing in an exposed, sunny position, either in the border, or on the rockery, blooming all summer.

Pilgrimi. Large clusters of bright yellow flowers. Each, 25c; per dozen, \$2.50.

PENTSTEMON (Beard Tongue)

Barbatus Torreyi.
June to August.

Spikes of brilliant scarlet flowers from Grows 3 to 4 feet high.
Each, 25c; per dozen, \$2.50.

PLATYCODON (Balloon Flower or Japanese Bell Flower)

THE Platycodons are closely allied to the Campanulas, and form neat, branched bushes of upright habit.

Grandiflorum. Deep blue, cupped, star-shaped flowers, one and one half feet.... Each, 20c; per dozen, \$2.00. Album. A white-flowered form of the above.

Each, 20c; per dozen, \$2.00.

Mariesi. Deep blue, bell-shaped flowers, nearly three inches across on one-foot-nigh plants.

Each, 20c; per dozen, \$2.00.

POLEMONIUM (Jacob's Ladder)

Reptans. Useful border plant, grows about 12 inches high, succeeds best in a partially shaded position; deep green, finely-cut foliage and spikes of showy blue flowers in May and June......Each, 25c; per dozen, \$2.50.

PHLOX DIVARICATA CANADENSIS

PHLOX SUFFRUTICOSA Miss Lingard. This early flowering variety grows about 2 feet high and blooms from May to October. Flowers white with pale pink eye, long, graceful panicles.

Each, 25c; doz., \$2.50.

HARDY PHLOX (Phlox Decussata)

PROBABLY the most satisfactory of all perennials, and a good space, in proportion to the size of the garden, should always be given to these plants. These are justly esteemed as the finest herbaceous plants. They are of dwarf habit, perfectly hardy, of very easy culture, and yield a profusion of bright showy bloom. They are hardly equaled by any other hardy plant for the decoration of the garden. (See cut.)

We offer the following collection of twelve new and extra choice varieties. Each, 25c; per dozen, \$2.50

and extra choice varieties.

Africa. Brilliant carmine-red with deeper eye.
Baron Von Dedem. Blood-red, scarlet, with salmon shadings, immense trusses.

Elizabeth Campbell. Bright, light salmon-pink, with lighter shading and dark red eye.

Europa. A white variety with decided crimson-carmine eye. The individual flowers and trusses are very large; plant of sturdy, erect habit.

Frau Anton Buchner. The finest white yet introduced. having the largest truss and largest individual flower. Mad. Bezanson. A tall growing variety with bright crimson flowers in large trusses.

Mme. Pape Carpentier. This is a dwarf variety, bearing enormous trusses of pure white flowers.

Mme. Paul Dutrie. Delicate lilac-rose, in shade like a soft pink Orchid; flowers very large, borne in immense panicles.

Rosenberg. Bright, reddish-violet flowers with blood-

Sir E. Landseer.

Large, bright crimson flowers, borne in immense trusses.

Thor. Deep salmon-pink with aniline-red eye, suffused and overlaid with a scarlet glow.
W. C. Egan. Flowers are of a delicate lilac, illuminated by a large, bright solferino eye, producing a pleasing shade of soft pink. Flowers produced in immense projects. panicles.

Any of the above varieties, Each, 25c; per dozen, \$2.50. If wanted by mail, add 5c each, 50c per dozen, for postage. General Collection of Hardy Phlox. Each, 20c; per dozen, \$2.00.

Beranger. White ground, delicately shaded with pink and distinct red eye.

Brides maid. Pure white, with crimson-carmine eye. Coquilecot. uilecot. Bright orange-scarlet with crimson eye; extra large, compact flower heads.

Eclaireur. Dark crimson, center rose surrounded with white; an excellent variety.

Etna. Deep, fiery red; dark eye.

F. G. Von Lassburg. The finest white flowers; very large;

F. G. Von Lassburg. The f strong, vigorous grower.

Independence. An early, pure white. Pantheon. Bright carmine rose; large and fine.

R. P. Struthers. Bright rosy-carmine with claret-red eye.
Richard Wallace. White, with bright crimson center;
large flowers in immense panicles.
Selma. Large trusses of very large pink flowers, with
cherry-red eye; choice.

Thebaide. Salmon, with carmine eye; dwarf.
Any of the above varieties, each, 20c; per dozen, \$2.00.
If wanted by mail, add 5c each, 50c per dozen, for postage.

HARDY HERBACEOUS PLANTS-Continued

PHLOX SUBULATA (Moss, or Mountain Pink)

An early spring-flowering type, with pretty moss-like evergreen foliage, which, during the flowering season, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground, or covering graves.

Alba. Pure white. Rosea. Bright rose.

Each, 20c; per dozen, \$2.00.

PHYSOSTEGIA (False Dragon-Head)

One of the most beautiful of our mid-summer flow-ering *Perennials*, forming dense bushes three to four feet high, bearing spikes of delicate tubular flowers not unlike a gigantic heather. Virginica. Bright, soft pink. Each, 20c; per dozen, \$2.00 Virginica Alba. Pure white. Each, 20c; per dozen, \$2.00

ORIENTAL POPPIES

(Papaver Orientale)

(Paparer Orientale)

THESE are the regal representatives of this popular genus, far surpassing in splendor of bloom all the annual and biennial kinds, and for a gorgeous display of rich and brilliant coloring, nothing equals them during their period of flowering in May and June, and whether planted singly or in masses, their large flowers and freedom of bloom render them conspicuous in any position. After flowering, the plants die back, usually re-appearing along in early September, or as soon as the weather gets cool. During this resting period, care should be taken in cultivating the beds, that the roots are not disturbed, any disturbance at this time usually resulting in failure. We offer the following distinct varieties:

Diana. Beautiful salmon flowers.

Goliath. Flowers scarlet, of enormous size.

Mahogany. Dark red, shading to crimson maroon.

Princess Victoria Louise. Soft lilac rose.

Procerpine. Dark lilac, with large black blotch.

Royal Scarlet. Scarlet flowers, with black center.

Salmon Queen. Soft salmon-scarlet; very distinct.

Wittenbergia. Large scarlet flowers.

The above varieties. ... Each, 25c; per dozen, \$2.50.

Mixed Varieties. ... Each, 20c; per dozen, \$2.50.

HARDY GARDEN PINKS

THESE old-fashioned favorites are absolutely perfect as an edging for the hardy border; as cut flowers they are indispensable.

Her Majesty. A pleasing plant growing to about one foot and bearing large, snowy white flowers.
Each, 25c; per dozen, \$2.50.

White Reserve. A pure white variety, possessing a spicy fragrance. Ever-blooming.
Each, 25c; per dozen, \$2.50.

Mixed Hardy Garden Pinks. Seedlings grown from a very select strain, which should produce a good percentage of double flowers. Each, 20c; per dozen, \$2.00.

PYRETHRUM

THE large daisy-like blooms appear as early as June and continue in abundance continuously until September. They delight in a rich soil with a natural drainage. They thrive best in the full sunlight. As the flowers die, the old stems should be cut off to encourage new blooms.

Hybridum Fl. Pl. Double flowering, mixed.

Each, 35c; per dozen, \$3.50.

Hybridum, Single Flowering. In choicest mixture.

Each, 25c; per dozen, \$2.50.

Uliginosum. (Giant Daisy.) Grows four to five feet high, and is covered with large, white, daisy-like flowers three inches in diameter from July to September.

Each, 20c; per dozen, \$2.00.

PEONIA OFFICINALIS

THIS type is the real old-fashioned "Peony," and comes into bloom from ten days to two weeks ahead of the named sorts. All are strong growers, with large, full, into bloom from the named sorts. All are strong growers, when all are strong growers, when double, fragrant flowers.

Alba, blush-white; Rosea, rose; Rubra, crimson.

Each, 25c; per dozen, \$2.50.

Peonies—Japanese Single

Mixed Colors.....

DOUBLE HERBACEOUS PEONIES

MAGNIFICENT, hardy plants, almost rivaling the rose in perfume, brilliancy, color and perfection of bloom. They are perfectly hardy, require little or no care, and produce larger or finer blooms when well established. (See cut.)

Dorchester. A most beautiful, soft pink of fine form;

Beautiful, large, rose colored Peony. Each, 40c.

Mccullough's Peony collection—one each of the above twenty named varieties for \$9.00, purchaser paying express charges.

We can supply large clumps of many varieties of Peonies from \$1.00 to \$1.50 each.

If to be sent by mail, add 5c each, 50c per dozen.

Peonies in Mixture

THEY are from our named varieties. We keep the colors separate and offer them to color as follows: White, red and pink in mixture. Each, 25c; per dozen, \$2.50.

HARDY HERBACEOUS PLANTS

(Continued)

RUDBECKIA (Cone Flower)

SALVIA AZUREA

Azurea. G sky-blue

SCABIOSA

SEDUM (Stone Crop)

Acre. (Golden Moss.) Much used for covering graves; foliage green, flowers bright yellow.

Each, 20c; per dozen, \$2.00.

Album. Green foliage, white flowers.

Each, 20c; per dozen, \$2.00.

Sexangulare. Dark green foliage, yellow flowers.

Each, 20c; per dozen, \$2.00.

Spectabilis. Erect growing; height 18 inches with broad, light-green foliage and immense heads of handsome, showy, rose colored flowers. Each 20c; per doz., \$2.00.

Spectabilis Brilliant. Similar in growth to the above with bright, amaranth-red flowers. Each, 20c; per doz., \$2.00.

Spurium. Grows 6 inches high with attractive pink flowers.

Each, 20c; per dozen, \$2.00.

SHASTA DAISY

SPIREA (Goat's Beard, Meadow Sweet)

Filipendula, fl. pl. (Double Flowered Drop-wort.) Pretty fern-like foliage, with double white flowers on stems 15 inches high during June and July.

Each, 25c; per dozen, \$2.50.

Palmata Elegans. Pure white flowers with protruding pink anthers during June and July; 3 feet.

Each, 25c; per dozen, \$2.50.

STATICE (Great Sea Lavender)

Latifolia. Immense heads, 2 to 3 feet across; small, blue flowers from June to September, which last for months if cut and dried.......Each, 25c; per dozen, \$2.50.

STOKESIA (Cornflower Aster)

Cyanea. Produces showy, aster-like, deep blue flowers which measure from 4 to 5 inches across. 18 to 24 inches high, blooming freely from July until frost.

Each, 25c; per dozen, \$2.50.

Alba. White flowers and green foliage.

Each, 25c; per dozen, \$2.50.

SWEET WILLIAM (Dianthus Barbatus)

Well known hardy plant. We offer a superb strain of mixed single and double-flowering sorts.

Each, 20c; per dozen, \$2.00.

Newport Pink. Salmon or watermelon-pink flowers.

Each, 25c; per dozen, \$2.50.

VALERIANA

Coccinea. Showy heads of reddish flowers, blooming from June to October. Height, 2 feet. Each, 25c; per dozen, \$2.50.

Officinalis. (Hardy Garden Heliotrope.) Produces showy heads of rose-tinted white flowers during June and July, with strong heliotrope odor; 3 to 4 feet.

Each, 20c; per dozen, \$2.00.

VINCA MINOR

VIIVA MATTER WITTEN

(Periwinkle or Trailing Myrtle)

Dwarf evergreen trailing plant, is used for carpeting the ground where it is too shady for other plants to thrive.

Each, 20c; per dozen, \$2.00.

VERONICA (Speedwell)

VIOLAS, or TUFTED PANSIES (Viola Cornuta)

They flower continuously for nearly eight months in the year and while their flowers are not so large as those of the Pansy, their bright colors make them welcome additions to

any garden.

Admiration. Soft purple, with dark blotch.

Lutea Splendens. Rich golden yellow.

Papilio. Violet, with dark eye; the most effective for Papillo. Voice, massing.

White Perfection. A fine white.

Each of the above, 15c; per dozen, \$1.50.

YUCCA FILAMENTOSA

(Adams's Needle)

A hardy ornamental foliage and evergreen plant with long, narrow leaves that are bright green the whole year round. The flowers are white, produced on long spikes.

Each, 25c; per dozen, \$2.50.

ORNAMENTAL GRASSES

Erianthus Ravennae. (Plume Grass.) Grows six to eight feet high, and produces plumes in fall.

Eulaha Gracillima. (Japan Rush.) The most beautiful of all the Eulalias, with narrow, graceful foliage, entirely green without variegation, except that the mid-rib is of a silver sheen.

Eulalia Japonica Variegata. Leaves striped white and green longitudinally.

Eulalia Zebrina. (Zebra Grass.) A peculiar variegated grass, growing six feet high. The variegation is unlike that of any other plant, being across the leaf in regular bands, dark green and light.

Above, each, 25c; per doz., \$2.50; by mail, 35c each.

Cannot accept orders for Hardy Perennial plants totaling less than One Dollar.

Ornamental Flowering Shrubs

SHRUBS are as much a part of the garden as the lawn or flower borders, and a well arranged planting presents an attractive appearance throughout the entire year.

Shrubs have many uses—as a background to a flower border, for hiding an unsightly building, fence or foundation. or they may be planted in a mixed shrubbery border, in which case those of short, dense growth should be planted along the front of the border, graduating to the tall-growing kinds at

Thorough preparation of the soil by spading, and the addition of a liberal quantity of sheep or stable manure or bone meal will be well repaid by strong, vigorous, healthy growth. In planting, care should be taken not to overcrowd, allowing sufficient room for future development, unless an immediate effect is wanted-in which case they may be planted closer and some of them moved when necessary. The majority of the dwarf-growing kinds may be set about three feet apart, the tall, strong growers about five feet apart.

Our Shrubs are transplanted every two or three years and are furnished with plenty of fibrous roots and should not be compared to stock that is never moved from the cutting beds

Stocks of ORNAMENTAL FLOWERING SHRUBS have become greatly depleted in the last two years, consequently it is no longer possible to offer two or more sizes, except in a few instances. Our prices contemplate furnishing the largest sizes now available.

We give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

We do not guarantee or replace plants, shrubs or trees at prices quoted.

ALMOND, DOUBLE FLOWERING. A desirable class of early flowering shrubs; erect, slender branches, covered with small double pink flowers.

Each, 50c; per dozen, \$5.00.

(Rose of Sharon.) The Altheas are among the most valuable of our hardy shrubs on account of their late season of blooming, which is from August to October. Are also extensively used as hedge plants.

Boule-De-Feu. Double red. Each, 60c; per doz. \$6.00.

Grandiflora Superba. Double blush white, shaded carmine......Each, 60c; per dozen, \$6.00.

Jeanne D'Arc. Double white.

Each, 60c; per dozen, \$6.00.

Meehani. Beautiful variegated foliage with satiny, layender colored, single flowers, open and free blooming.......Each, 60c; per dozen, \$6 00.

Purpurea. Single purple. Each, 60c; per dozen, \$6.00.

Rosea. Single white, red center.

Each, 60c; per dozen, \$6.00.

Totus Albus. Single, pure white.

Each, 60c; per dozen, \$6.00.

Single Rose, White and Purple Each, 50c; per dozen, \$5.00.

Double Rose, White and Purple. Each, 50c; per dozen, \$5.00.

Thunbergii. (Japanese Barberry.) of the most beautiful shrubs either for hedging or general purposes. It is of a neat, compact growth and the foliage is beautiful at all times, and in the fall turns to a most brilliant crimson color. The plant is covered to a most brilliant crimson color. The plant is co with bright scarlet berries all the fall and winter.

10 to 18 inches, per dozen, \$2.25; per 100, \$16.00.
18 to 24 inches, per dozen, \$2.25; per 100, \$2.00.
24 to 36 inches, per dozen, 3.60; per 100, 24.00.

DDLEYA. (Butterfly Shrub or Summer Lilac.) Variabilis Magnifica. Flowers continuously all season. The flower racemes are composed of many little blossoms in the shape and color of lilacs. BUDDLE YA.

Each, 25c; per dozen, \$2.50; clumps, each, 50c.

FINT-PHAN

Clethra Alnifolia

CALYCANTHUS FLORIDUS. (Sweet-Scented Shrub.) Flowers fragrant, double_and of a chocolate color. Each, 50c; per dozen, \$5.00.

Autumn blooming shrubby plant, producing clusters CARYOPTERIS MASTACANTHUS. of fragrant blue flowers from September until frost. Dies to the ground in winter. Each, 50c; per dozen, \$5.00.

CERCIS CANADENSIS. (Judas Tree or Red Bud.) Very showy and beautiful when in bloom. All the branches and twigs are covered with a mass of small pink flowers early in the spring, before the leaves appear. Each, \$1.00; per dozen, \$10.00.

Large shrub or small tree with large, heavy leaves almost hidden in spring by a thick mist of fragrant, drooping white flowers. Each, 75c; per dozen, \$7.50. CHIONANTHUS VIRGINICA.

CHERRY. Double Rose Flowering. tree for the lawn. Five to six feet.

Each, \$2.00; per dozen, \$20.00. A very ornamental

ESTNUT. Dwarf Horse Chestnut. Grows in bush form, with deep green foliage and spikes of white flowers in midsummer. Each, \$2.50; per dozen, \$25.00.

CLETHRA ALNIFOLIA. (Sweet Pepper Bush.)
green foliage and upright spikes of creamy white, fragrant flowers in August. (See cut.)
Each, 50c; per dozen, \$5.00.

CORCHORUS. (Kerria.) Globe Flower or Japanese Rose.

Japonica. A shrub four to six feet tall. Native of
Japan. Leaves bright green, fading in autumn to
tones of yellow. Flowers numerous, bright yellow,
large and showy. A charming old-fashioned plant.

Each, 50c; per dozen, \$5.00.

Japonica Flore Pleno. Double flowered. This fine old shrub should be in all collections. It is of spreading habit. Its double yellow blossoms, which are about one inch in diameter, appear early in May, one from each leaf axil. It is excellent for massing.

Each, 50c; per dozen, \$5.00.

Argentea Variegata. A dwarf variety with small green foliage, edged with white. One of the prettiest and most valuable dwarf shrubs; two to three feet.

Each, 50c; per dozen, \$5.00.

ORNAMENTAL FLOWERING SHRUBS-Continued

- GORNUS FLORIDA. (White Flowering Dogwood.) The flowers, produced in spring before the leaves appear, are from three to three and one-half inches in diameter, white and very showy. They begin to appear as the Magnolia flowers are fading, and are invaluable for maintaining a succession of bloom. Foliago grayish green, glossy and handsome, and in the autumn turns to a deep red; one of the most showy flowering trees. (See cut.)...........Each, \$1.25; per dozen, \$12.50.
- CORNUS FLORIDA RUBRA. (Red Flowering Dogwood.)
 A rare variety, similar to the common type, except in color of the flowers, which are rich rosy-red. The two varieties make a fine contrast.

 Each, 50c; per dozen, \$15.00.
- CORNUS MASCULA. (Cornelian Cherry.) A small treelike shrub, producing early in spring, before the leaves appear, clusters of bright yellow flowers, which are followed by red berries...Each, 50c; per dozen, \$5.00.
- cornus sanguinea. (Red Twigged Dogwood.) A strong growing bush, with crimson-colored branches, especially attractive in winter...Each, 50c; doz., \$5.00.
- CORYLUS PURPUREA. (Purple Leaved Filbert.) Large dark leaves; distinct and fine.

 Two to three feet. Each, 60c; per dozen, \$6.00.
- CRAB. (Bechtel's Double Flowering.) Most beautiful of all the flowering Crabs; hardy. Trees are covered in early spring with large, beautiful, double, fragrant flowers, resembling small roses of a delicate pink. Each, \$1.50; per dozen, \$15.00.
- **DESMODIUM PENDULIFLORUM.** A shrub-like plant that dies to the ground in winter, but comes up vigorously in spring. Bears during September sprays of rose-colored flowers.....Each, 50c; per dozen, \$5.00.
- DEUTZIA CRENATA FLORA PLENA. Flowers double white, tinged with pink...Fach, 50c; per dozen, \$5.00.
- of pure white flowers in early summer.

 Each, 50c; per dozen, \$5.00.
- DEUTZIA LEMOINEII. Habit dwarf, flowers white. One and one-half to two feet. Each, 50c; per dozen, \$5.00.
- DEUTZIA PRIDE OF ROCHESTER. Large double white flowers, slightly tinted with rose.

 Each, 50c; per dozen, \$5.00.
- ELDER, GOLDEN. (Sambucas.) Golden yellow foliage. Each, 50c; per dozen, \$5.00.
- ELEAGNUS LONGIPES. Nearly evergreen; foliage silvered on the under surface. The orange-scarlet berries are attractive during summer.

Each, 50c; per dozen, \$5.00.

EUONYMUS EUROPAEUS. (Burning Bush.) Conspicuous in autumn and winter, when loaded with scarlet seed pods, from which orange-colored berries hang on slender threads...Each, 50c; per dozen, \$5.00.

EXOCHORDA GRANDIFLORA. (Pearl Bush.) Bears white flowers in racemes in early spring.

Each, 50c; per dozen, \$5.00.

FORSYTHIA FORTUNEI. (Golden Bell.) Upright growth and bright yellow flowers in April.

Each, 50c; per dozen, \$5.00.

FORSYTHIA SUSPENSA. (Weeping Golden Bell.)
Willowy growth and yellow flowers.
Each, 50c; per dozen, \$5.00.

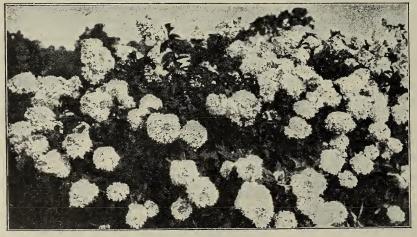

FORSYTHIA VIRIDISSIMA. (Golden Bell.) Erect growth and spreading branches; flowers bright yellow. Each, 50c; per dozen, \$5.00.

HALESIA TETRAPTERA. (Silver Bell.) White, bell shaped flowers in May. Bears four winged fruit from one to two inches long....Each, 50c; per dozen, \$5.00.

HYDRANGEA ARBORESCENS STERILIS. (Snowball-Hydrangea.) Snowy white blooms: will flower for fully three months...... Each, 60c; per dozen, \$6.00.

HYDRANGEA PANICULATA GRANDIFLORA.
The flowers which are borne in dense pyramidal panicles in the greatest profusion, are white when they first open, but gradually change to rose and remain in good condition for weeks (see cut.) Two to three feet, each, 40c; per dozen, \$4.00. Three to four feet, each, 60c; per dozen, \$6.00.

HYDRANGEA PANICU-LATA GRANDIFLORA. Standard or Tree-Shaped Plants. These are four and five years old, trained to tree-shape with about three feet of straight stem and nicely shaped heads. Four to five feet, each, \$1.50; per dozen, \$15.00.

Hydrangea Paniculata Grandiflora

ORNAMENTAL FLOWERING SHRUBS-Continued

(True Syringa.) (See cut.) Purple. (Syringa Vulgaris.) LILACS. The common purple species, and one of the best.

Each, 50c; per dozen, \$5.00.

White. (Syringa Vulgaris Alba.) Flowers pure white, very fragrant. Each, 50c; per dozen, \$5.00.

Price of any of the following named Lilacs.

Fine plants each, \$1.00; extra strong each, \$1.50.

Charles X. Rapid grower, reddish purple flower.

Josikaea. Blooms in June, flowers lilac purple.

Ludwig Spaeth. Long panicles of purplish-red flowers.

Madame Lemoine. Double white flowers.

Marie Legrave. Flowers pure white; extra.

Michael Buchner. Double pale lilac.

LONICERA. (Bush. or Uprignt House shrubs. They thrive in almost any soil. (Bush, or Upright Honeysuckle.) Handsome upright

Ledebouri. Very distinct, producing red flowers in May.... Each, 50c.

Morrowi. A handsome Japanese variety with white flowers during May, but especially valuable for its bright red fruit during the summer and autumn months..,......... Each, 50c; per dozen, \$5.00.

tarica. (Tartarian Honeysuckle.) A large shrub with numerous upright or spreading branches. Flowers borne in great profusion in late spring. Fruit red or orange, ripening in summer. Red, white and pink..... Each, 50c; per dozen, \$5.00.

MAHONIA AQUAFOLIA. (Holly-leaved Mahonia.) A native species of medium size, with purplish, shining leaves, and showy, bright yellow flowers succeeded by bluish berries. . 18 to 24 inches, each, 60c; per dozen, \$6.00.

PHILADELPHUS OR SYRINGA. (Mock Orange or Orange Blossoms.) A shrub that can always be depended upon to give splendid satisfaction. No insects bother it, and in May and June the bushes are literally covered with flowers.

Coronarius. (Garland Mock Orange.) This is the popular tall variety; very sweet and one of the first to flower. Each, 50c; per dozen, \$5.00.

Coronarius Aurea. (Golden-leaved Mock Orange.) Fine golden-yellow foliage, contrasting beautifully with the dark leaves of other shrubs.

Each, 50c; per dozen, \$5.00.

Grandiflorus. (Large-flowered Mock Orange.) Without a doubt one of the most popular shrubs grown, and ought to be in every garden. Flowers are pure white and very large..... Each, 50c; per dozen, \$5.00.

RHODOTYPOS. (White Kerria.) Kerrioides. some foliage and large single white flowers in the latter part of May, succeeded by numerous black berries.

Each, 50c; per dozen, \$5.00.

RHUS COTINUS. (Purple Fringe, or Smoke Tree.) low, shrubby tree, covered in midsummer with large clusters of feathery flowers, giving the appearance of a cloud of smoke or mist. Each, 50c; per dozen, \$5.00.

RHUS TYPHINA LACINIATA. (Cut-leaved Staghorn A large growing, bold and effective shrub, Sumac.) with delicate fern-like foliage and brilliant scarlet fruit in the autumn. ... Each, 50c; per dozen, \$5.00.

RIBES AUREUM. (Golden Carrant.) Bright green foliage, beautifully tinted in the autumn; fragrant yellow flowers in May, followed by dark brown fruit. Each, 50c; per dozen, \$5.00.

ROBINIA HISPIDA. (Rose Acacia.) A very handsome shrub. The leaves are similar to those of the Locust. In June and July long panicles of rose-colored flowers hang from the branches. Each, 50c; per dozen, \$5.00.

Aurea. (Golden Elder.) Attractive golden foliage and desirable to mix with other shrubs.

Lilac A large group of showy, free-flowering, hardy SPIREA. shrubs.

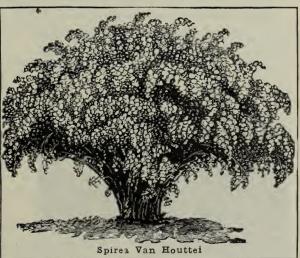

Anthony Waterer. Makes nice, round bushes, three feet high and wide; beginning to bloom in summer, con-tinuing until fall. Rose red flowers in large, round clusters all over the bush.

18 to 24 inches, each, 50c; per dozen, \$5.00.

ardii. Pink flowers; bloom nearly all summer. It is grand for planting in masses. Each, 50c; dozen, \$5.00. Billardii.

osa Alba. A white flowering variety of dwarf, bushy, symmetrical form. Flowers all summer.

18 to 24 inches, each, 50c; per dozen, \$5.00. Callosa Alba.

Van Houttei. (Improved Bridal Wreath.) This is without a doubt the most beautiful and useful of shrubs. Always effective if planted singly or in groups on the lawn, in front of the porch, in shrub borders or in a hedge. Handsome throughout the entire season, but when in flower it is a complete fountain of white bloom. Clusters of white florets are set close along the drooping (See cut.

Two to three feet, each, 40c; per dozen, \$4.00. Three to four feet, each, 60c; per dozen, \$6.00.

Spireas continued on next page. We do not guarantee or replace plants, shrubs or trees, at prices quoted.

Each, 50c; per dozen, \$5.00.

ORNAMENTAL FLOWERING SHRUBS—Continued

SPIREA-Continued.

Opulifolia Aurea. (Virginian Guelder Rose.) Golden-tinted foliage and large white flowers in June; two to three feet..... .. Each, 50c; per dozen, \$5.00.

Prunifolia Fl. Pl. (Old Bridal Wreath.) Blooms in May, with pure white, double flowers.

Each, 50c; per dozen, \$5.00.

Reevesii F1. P1. Tall, with dark, bluish green foliage, and large, double, pure white flowers, in May and June. Each, 50c; per dozen, \$5.00.

Thunbergii. Of dwarf, graceful form. Branches slender and somewhat drooping; foliage narrow and yellowish green; flowers small, white, appearing early in spring. Each, 50c; per dozen, \$5.00.

SYMPHORICAR-PUS. Snowberry and Indian Currant .-Small native shrubs much used in shaded places and in open masses. Grow in almost any soil; quite hardy.

Racemosus. (Snowberry.) A graceful shrub, three to five feet tall, with slender branches. Flowers white or pinkish, in loose racemes, in summer. Berries white, produced in showy, profuse clusters, the branches bending under their weight.

Each, 30c; per dozen, \$3.00.

Vulgaris. (Coral-Berry or Indian Currant.) shrub, producing a wealth of red or purplish berries, which remain on the branches all winter. Flowers greenish red in summer. Berries coloring in early autumn, very showy. Does well in shade.

Catalpa Bungei

MARIX. Africana. (Tamarisk.) Strong, slender, tall growing, irregular shrubs, with feathery foliage and small, delicate pink flowers. TAMARIX.

Each, 50c; per dozen, \$5.00.

URNUM. (Snowballs and High Bush Cranberry.) The Viburnums are one of the most useful shrubs, being very hardy and of good habit. They all have white flowers mostly on flat heads and with a few exceptions are noted for their handsome clusters of VIBURNUM. berries. (See cut.)

Opulus. (High Bush Cranberry.) The white flowers in June are followed in autumn by bright scarlet berries, which are very attractive until late in winter.

Each, 50c; per dozen, \$5.00.

Opulus Sterilis. (Guilder Rose or Snowball.) Of spreading habit, bearing flat clusters of single white flowers, which afterwards produce brilliant red berries which hang to the plant all winter; very decorative. Each, 50c; per dozen, \$5.00.

Plicatum. (Japan Snowball.) One of the choicest hardy shrubs, with healthy dark foliage; the perfect balls of pure white flowers are borne in great profusion in May..... Each, 50c; per dozen, \$5.00.

VITEX. EX. Agnus Castus. (Chaste Tree.) A graceful shrub, growing from five to six feet high, with dense spikes six to eight inches long, of lilac-colored flowers late in summer...... Each, 50c; per dozen, \$5.00.

WEIGELIA. (Diervilla.) These shrubs bloom after the lilacs, in June and July. Their large flowers are of wide trumpet-shape, colors from white to red, and borne in clusters thickly along the branches.

Candida. White flowering Weigelia, flowering throughout the summer..... Each, 50c; per dozen, \$5.00.

Eva Rathke. The finest Weigelia in cultivation. Flowers continuously throughout the summer and autumn; of an entirely distinct color, being a rich, ruby carmine. Should be in every garden.

Each, 50c; per dozen, \$5.00.

A beautiful shrub, with rose-colored flowers in May and June..... Each, 50c; per dozen, \$5.00.

Rosea Nana Variegata. A neat dwarf shrub, valuable for the clearly defined variegation of green, yellow and pink in its leaves; flowers delicate rose and pink; one of the finest variegated-leaved shrubs.

Each, 50c; per dozen, \$5.00.

ORNAMENTAL TREES

CATALPA BUNGEI. (Umbrella Catalpa.) Grafted on stems 6 to 9 feet high, it makes an umbrella shaped top without pruning. Perfectly hardy. Leaves large, glossy, heart-shaped, deep green, lay like shingles on a roof, always making a symmetrical head. One of the most unique trees; desirable for lawns, park and cemetery planting. 6 to 7 feet, each, \$2.25; selected two-year-old, each, \$3.00; extra heavy specimens, 3 year heads, 7 to 8 feet, each, \$3.50.

MAPLES, JAPANESE. These are exceedingly beautiful, especially in spring, when they burst into leaf.

Polymorphum Atropurpureum. Leaves deep blood-red. Each......\$3.50

Polymorphum Atropurpureum Dissectum. Dark maroon. deeply serrated, thread-like leaves..........Each, \$3.50.

MULBERRY, TEAS' WEEPING. The most graceful hardy weeping tree in existence. Forms a perfect-shaped head and the slender brances grow downward parallel with the stem, forming an umbrella-like shape. It takes the foremost place among weeping trees; has beautiful foliage and luscious fruit, is hardy, enduring the cold of the North and the heat of the South; safe and easy to transplant. Admirably adapted for ornamenting small or large grounds, or for cemetery planting. 2 to 3 year heads, each.....\$3.00.

CHESTNUT. (Horse Chestnut.) Dwarf......Each, \$2.50.

Evergreen Grees

ON account of the large demand for Evergreens we have made arrangements with one of the best Evergreen specialists in the country, whereby we are able to offer the following list of Evergreens. These are largely American stock and the quality will be the best that can now be supplied. We have tried to make prices as reasonable as possible and if you contemplate further plantings, would advise placing your order at once while stocks are still fairly complete.

All of our Evergreens are dug with a ball of earth around the roots and burlapped. This protects them in transit and this fact should be borne in mind by purchasers when comparing prices.

paring prices.

KOSTER'S BLUE SPRUCE

(Picea Pungens Glauca Kosteriana)
The finest ornamental Evergreen grown. The foliage is the purest blue. Our stock of this variety is probably the largest and finest in America. 2 to 3 feet, each, \$7.00; per dozen, \$70.00; 4 to 5 feet, each, \$15.00; per dozen, \$150.00; 6 to 7 feet, each, \$18.00: per dozen, \$180.00.

NORWAY SPRUCE (Picea Excelsa)

A vigorous, rapid growing tree, with dark-green foliage. One of the most popular Evergreen trees. 1½ to 2 feet, each, \$1.00; per dozen, \$10.00; 2 to 3 feet, each, \$1.50; per dozen, \$15.00; 3 to 4 feet, each, \$2.25; per dozen, \$22.50.

WHITE SPRUCE (Picea Alba)

One of the best for cold climates. Compact. upright growing and varies in color from light green to glaucous blue. 3 to 4 feet, each, \$2.75; per dozen, \$27.50.

ARBORVITAE AMERICAN (Thuya Occidentalis)

Well known screen and hedge plant. 1½ to 2 feet, each, 75c; per dozen, \$7.50; 2 to 3 feet. each, \$1.25; per dozen. \$12.50; 3 to 4 feet, each, \$2.00; per dozen. \$20.00.

ARBORVITAE PYRAMIDALIS

(Thuya Occidentalis Pyramidalis)
Suitable for tubs and possesses foliage of finer texture and more dense habit than the American Arborvitae.
2 to 3 feet, each, \$2.50; per dozen, \$25.00; 3 to 4 feet, each, \$3.50; per dozen, \$35.00; 4 to 5 feet, each, \$4.50; per dozen, \$45.00.

ARBORVITAE GLOBE (Thuya Occidentalis Globosa)

Very dwarf and compact; grows naturally into a rounded, almost ball-like form. 1 to 1½ feet, each, \$2.50; per dozen, \$25.00.

ARBORVITAE SIBERIAN (Var. Wareana)

Of dwarf habit and conical outline. Rich, dark green foliage. Will withstand colder exposure than other sorts. 1 to 1½ feet, each, \$2.25; per dozen, \$22.50.

ARBORVITAE BIOTA (Chinese Arborvitae)

Deep green, soft, feathery foliage. Habit of growth pyramidal and upright. 1½ to 2 feet, each, \$2.00; per dozen, \$20.00; 2 to 3 feet, each, \$3.00; per dozen, \$30.00.

ARBORVITAE GOLDEN

Golden-green foliage: highly ornamental. 3 to 4 feet, each, \$4.00; per dozen, \$40.00; 4 to 5 feet, each, \$5.00; per dozen, \$50.00.

ARBORVITAE TOM THUMB

Smaller and more compact than the variety Ericoides. Suitable for low hedges. 1 to 1½ ft., each, \$2.00; doz., \$20.00.

ARBORVITAE ERICOIDES

Dwarf and pyramidal, with heath-like leaves of grayish $1 \text{ to } 1\frac{1}{2}\text{ ft.}$, each, \$2.00; per dozen, \$20.00. green.

WHITE PINE (Pinus Strobus)

A beautiful ornamental tree, also used for shade and er belts. 3 to 4 feet, each, \$3.00; per dozen, \$30.00. shelter belts.

AUSTRIAN PINE (Pinus Austriaca)

A tall tree with spreading branches, heavily plumed with long, stiff needles. 3 to 4 feet, each, \$3.00; per dozen, \$30.00.

SCOTCH PINE (Pinus Sylvestris)

A strong grower with spreading branches and short, stiff needles. 2 to 3 feet, each, \$2.50; per dozen, \$25.00.

DWARF MUGHO PINE (Mughus)

Usually broader than its height and sometimes almost prostrate. Forms a dark, dome-shaped bush. 1 to 1½ feet, each, \$2.50; per dozen, \$25.00.

Koster's Blue Spruce

IRISH JUNIPER (Juniperus Hibernica) Grows erect in a dense column of dark green. 2 to 3 feet, each. \$1.75; per dozen, \$17.50.

BLUE VIRGINIA CEDAR (Juniperus Glauca)

Leaves are a rich, silvery blue. 2 to 3 feet, each, \$4.00; per dozen \$40.00; 3 to 4 feet, each, \$5.00; per dozen, \$50.00

RETINOSPORA PLUMOSA (Plume Cypress)

Light green, feathery foliage. It stands shearing well. 1 ½ to 2 feet, each, \$3.00; per dozen, \$30.00.

RETINOSPORA PISIFERA AUREA

Golden evergreen, light airy foliage. 12 to 15 inches, each, \$2.25; per dozen, \$22.50; 15 to 18 inches, each, \$4.00; per dozen, \$40.00.

IRISH YEW (Taxus Hibernica)
Of pyramidal growth, with dark, shining leaves and red berries. 2 to 3 feet, each, \$3.75; per dozen, \$37.50.

JAPANESE YEW (Taxus Cuspidata)

A dwarf, compact variety, with shorter leaves than the rs. 2 to 3 feet, each, \$4.00; per dozen, \$40.00.

GOLDEN ENGLISH YEW (Taxus Aurea) 2 to 3 feet, each, \$4.00; per dozen, \$40.00.

ledge 7

CALIFORNIA PRIVET. (Ligustrum Ovalifolium.) Its foliage is a rich dark-green, and is nearly evergreen. remaining on the plant until mid-winter. It is of free growth and succeeds under the most adverse conditions, such as under dense shade of trees. The most advantageous manner of planting is in double rows, the two rows being about 8 inches apart. The plants should be set 12 to 15 inches apart in the row, alternating the plants. In order to secure a dense hedge from the base up, the plants should be severely pruned the first two seasons.

18 to 24 inches. 75c per dozen: \$4.00 per 100:

18 to 24 inches, **75c** per dozen; **\$4.00** per 100; **\$35.00** per 1000.

24 to 36 inches \$1.00 per dozen; \$6.00 per 100: \$50.00 per 1000.

Extra Large Bushy Plants, \$1.50 per doz; \$10.00

Shade and Ornamental Grees

FOR LAWN, STREET AND FOREST PLANTING

- **ASH.** American White. A handsome, hardy, broad-headed, quick growing shade tree. Valuable for park and street planting. 6 to 8 feet.....Each, \$1.75; per dozen, \$17.50.
- ASH. European. Smaller in its habit of growth and more spreading than the American. 6 to 8 feet.

Each, \$1.75; per dozen, \$17.50.

- BIRCH. European White. This is a valuable species with white bark. Very effective in landscape work. 8 to 10 feet.

 Each, \$2.25; per dozen, \$22.50.
- CATALPA SPECIOSA. A handsome, rapid growing tree, with large, bright green foliage. Valuable for lawn and street planting. 8 to 10 feet.....Each, \$1.75; per dozen, \$17.50.
- CATALPA BUNGEI. (Umbrella Catalpa.) See "Ornamental Trees," page 84, for description. 6 to 7 feet, each, \$2.25; selected two year old, ea., \$3.00; specimen three year heads, ea., \$3.50.
- **ELM.** American. A valuable tree for park, avenue and lawn planting. A hardy, rapid grower; resists drought well and is long lived. 8 to 10 feet......Each, \$1.75; per dozen, \$17.50.
- LINDEN. American. A rapid growing tree with large leaves and fragrant flowers. Extensively used as a lawn tree, also for park and street planting. 8 to 10 feet.

Each, \$2.75; per dozen, \$27.50.

- LINDEN. European. This is the broad-leaved linden of European plantations and probably the largest. 6 to 8 feet.

 Each, \$1.75; per dozen, \$17.50.
- LIQUIDAMBER. (Sweet Gum.) A very ornamental tree and beautiful at every stage. Splendidly adapted for street and park planting. 5 to 6 feet.

Each, \$2.75; per dozen, \$27.50.

- MAPLE. Norway. A large, handsome tree with a compact, rounded head of spreading branches. One of the best trees for lawn, park, street or cemetery planting. 8 to 10 feet...........Each, \$2.50; per dozen, \$25.00.
- MAPLE. Rock or Sugar. An excellent shade tree of upright, dense growth. Grows to a large size and is long lived. 6 to 8 feet. Each, \$2.50; per dozen, \$25.00.
- MAPLE. Silver or Soft. This is an ornamental tree with wide, slender, spreading branches and thrives almost anywhere. 8 to 10 feet.

Each, \$1.75; per dozen, \$17.50.

- MAPLE. Japanese. See "Ornamental Trees" page 84.
- OAK. Red. A beautiful tree of rapid growth, growing into a large, majestic tree, with broad, round head, the foliage turning dark red in fall. 6 to 8 feet.

Each, \$4.00; per dozen, \$40.00.

OAK. Scarlet. A noble tree with gradually spreading branches, which form a rather open head. Leaves turn scarlet in fall. 4 to 5 feet.

Each, \$3.50; per dozen, \$35.00.

- OAK. Pin. A handsome tree, especially when young.

 Tree is fibrous rooted, transplants well and grows rapidly. Foliage turns bright red in fall. 6 to 8 feet......Each, \$4.00; per dozen, \$40.00.
- POPLAR. Carolina. Onr of the surest and most rapid growing trees. The leaves are glossy and fresh looking.Valuable for quick effects. 10 to 12 feet.

Each, \$1.25; per dozen, \$12.50.

- POPLAR. Bolleana. Its habit of growth is broader than the Lombardy. Tall growing with cottony leaves. 8 to 10 feet.........Each, \$1.25; per dozen, \$12.50.
- POPLAR. Lombardy. This is an excellent tree for landscapes because with age it becomes striking and picturesque. 6 to 8 feet.

Each, \$1.00; per dozen, \$10.00.

Sugar Maple

- SALISBURIA. (Maiden Hair or Ginkgo.) A tall, sparsely branched, usually slender tree, with leaves similar in shape to the Maiden Hair Fern. Especially valuable for solitary planting to secure picturesque effects. 6 to 8 feet............Each, \$2.75; per dozen, \$27.50.
- SALIX DISCOLOR. (Pussy Willow.) A shrub or short trunked tree. Foliage smooth, bright green above and white beneath. The catkins of this species are one of the earliest harbingers of spring. 6 to 7 feet.

Each, \$1.00; per dozen, \$10.00.

- SYCAMORE. Platanus Orientalis. (Oriental Plane.)
 This is among our largest and tallest growing trees.
 Very hardy and does well in moist places. Excellent
 for street, park and lawn planting. Thrives well in
 smoky cities, making it a good tree for city planting.
 6 to 8 feet...........Each, \$1.50; per dozen, \$15.00.

WEEPING TREES

EIRCH. (Cut-leaf Weeping.) A tree of wonderful grace and beauty. Tall, slender, drooping branches and delicately cut leaves. It colors brilliantly in the fall. Its bare white trunk and branches make a beautiful winter picture. 6 to 8 feet.

Each, \$2.50; per dozen, \$25.00.

- MULBERRY. Teas Weeping. See "Ornamental Trees" page 84.
- WILLOW. Elegantissima. The strongest and most vigorous grower of all the weeping willows. Used for planting in low places or on the banks of streams or ponds; making a beautiful effect. 6 to 8 feet.

Each, \$1.25; per dozen, \$12.50.

Flardy Climbing Plants

AMPELOPSIS VEITCHII. (Japan Creeper or Boston Ivy.) The best climbing plant for covering brick or stone walls.

Each, 50c; per dozen, \$5.00; by mail, each, 55c.

AMPELOPSIS QUINQUEFOLIA. (Virginia Creeper.) For covering walls, verandas and trunks of trees. Each, 50c; per doz., \$5.00; by mail, each, 55c.

ARISTOLOCHIA SIPHO. (Dutchman's

Large, heart-shaped leaves.

Each, 50c; per doz., \$5.00; by mail, each, 60c.

BIGNONIA RADICANS. (Trumpet Vine.) Flowers trumpet-shaped, bright scarlet.

Each, 25c; per doz., \$2.50; by mail, each, 30c.

Henryii. Creamy white flowers. Jackmanii. Intense violet purple flowers. Ville de Lyon. Brilliant crimson flowers.

The above named Clematis, each, 75c; per dozen. \$7.50; by mail, each, 80c;

We send out strong, healthy roots of Clematis and cannot entertain any claims for non-success with these

CLEMATIS [Small Flowering)

(Japanese Clematis.) Paniculata. Pure white, very fragrant flowers, borne in large clusters.

Each, 50c; per dozen, \$5.00; by mail, each, 55c.

HONEYSUCKLES

Each, 35c; per dozen, \$3.50; except where noted; by mail, each, 40c.

Aurea Reticulata. Foliage variegated yellow and green with yellowish white, fragrant flowers.

Monthly Fragrant or Dutch. Blooms all summer.

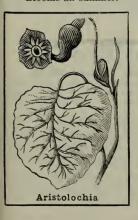

, English. Beautiful, evergreen vine. Each, 50c; per doz., \$5.00; by mail, each, 55c.

DZU VINE. (Or Jack-and-the-Bean-stalk.) A rapid growing vine. Each, 50c; per doz., \$5.00. By mail, each, 55c.

MATRIMONY VINE. The branches may be trained over fences or trellises. Each, 50c; per doz., \$5.00. By mail, each, 55c.

WISTARIA, CHINESE. Delicate, violet blue blossoms. Each, 60c; per doz., \$6.00. By mail, each,

WISTARIA, CHINESE WHITE.
Pure white flowers. Each, 60c;
per doz., \$6.00. By mail, each, 65c.

Common Woodbine. A strong, rapid grower; flowers red outside, buff within.

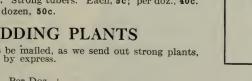

Hallcana. Nearly evergreen; flowers pure white. Scarlet Trumpet. Scarlet inodor

TENDER CLIMBIN

CARDINAL CLIMBER. Each, COBAEA SCANDENS. Each, 28 MOON FLOWER PLANTS. Eac If wanted by mail, add 5c each, MADEIRA VINE. Strong tubers. By mail, per dozen, 50c.

Fruit Grees

SELECT thrifty young trees in preference to old or very large ones; the roots are more tender and fibrous and they bear transplanting better and are more apt to live; they can also be more easily trimmed and shaped to any desired form, and in the course of a few years will usually outstrip the older ones in growth. If not prepared to plant when your stock arrives, "heel in" by digging a trench deep enough to admit all the roots, and setting the trees therein, carefully pack the earth about the roots.

By Express or Freight at Expense of Purchaser.

We do not guarantee or replace Trees or Shrubs at prices quoted.

While we make no charge for packing or delivery to freight or express offices here, still on account of increased cost of operation we cannot accept orders for Fruit Trees in smaller quantities than six, either straight or assorted, at prices quoted. In smaller quantities, add 15c per tree or make up a Club Order among your friends that can be shipped to one address.

APPLES, STANDARD

5 to 7 feet high. Each, \$1.00; per dozen, \$10.00. SUMMER VARIETIES

Early Harvest. (Early June, Yellow Harvest). Fruit is medium size to large, the skin tender, very smooth, clear, pale, waxen yellow; flesh is white, rather fine, crisp, tender, juicy, at first briskly sub-acid, but eventually becoming milder and more agreeable for dessert. Ripens in July and August.

Red Astrachan. Fruit of good medium size; yellow, largely covered with red, presenting a striped appearance; flesh white, often strongly tinged with red, crisp, tender, juicy, sub-acid and of good quality. One of the most beautiful early market apples. Ripens in August.

August.

Now Transparent. (White Transparent. Grand Sultan). The tree is an upright grower and usually bears fruit the next year after planting. Fruit of medium size, pale, waxen yellow, pleasantly acid, tender and good, splendid for home and market. Ripens in July and August, before Early Harvest. Yellow

APPLES, STANDARD

5 to 7 feet high. Each, \$1.00; per dozen, \$10.00. **AUTUMN VARIETIES**

Delicious. This is probably the best of the newer varieties, having been satisfactorily tested in many parts of the country. Fruit is brilliant dard red, shading to yellow at the blossom end. Flesh is crisp, fine grained and quite juicy; flavor slightly acid but very pleasing.

Duchess of Oldenburg or Duchess. A variety of great hardiness, yielding abundantly in all sections. Fruits are large, rounded, yellow, striped red, tender, juicy and of the best quality for cooking.

Fall Rambo. Fruit mottled and striped red and yellow, of medium size and good flavor; widely cultivated and highly esteemed for eating. Tree is a strong grower and heavy bearer.

and heavy bearer.

Maiden's Blush. Fruit of uniformly good size, smooth, round, beautifully flushed with brilliant red on a yellow ground. Good for table use. One of the most beautiful and productive Fall varieties. Ripens in August and September.

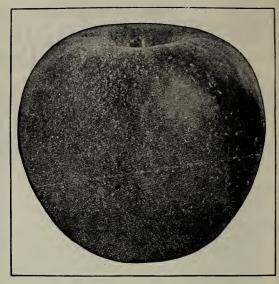

APPLES, STANDARD

5 to 7 feet high. Each, \$1.00; per dozen, \$10.00. WINTER VARIETIES

Baldwin. A great market apple, very productive; fruit large, deep red, crisp, juicy and rich. December to

March.

lana. The fruit is large, clear, pale yellow with pinkishred blush; flesh is tender and aromatic with a suggestion
of banana flavor. November to February. Banana.

WINTER VARIETIES—Continued

Davis. (New York Pippin.) A remarkable-keeper and profitable market apple in many sections. Large, handsome, brightly striped with red, variable in flavor. Remarkably vigorous and fruitful. January to April. Ben Davis.

Gano. Similar but superior to the Ben Davis, bearing a handsome and better quality of fruit that is large and dark red. Flesh is pale yellow, sub-acid, of good flavor and good keeping qualities. Very productive. December to March.

Grimes Golden. Fruit medium to large of transparent golden yellow and of best quality. Flesh tender, juicy, spicy and rich. November to February.

Jonathan. Fruit is medium sized, pale yellow, heavily flushed with red; the flesh is white, juicy, tender and mild sub-acid. Excellent quality. November to mild s March.

Northern Spy. Fruit large, striped crimson in the sun; juicy, rich and aromatic, retaining these qualities until late Spring or Summer. Valuable as an Aphis-resisting sort. January to June.

Rome Beauty. (Royal Red, Rome, Phoenix). The fruit is large and handsome, yellow with crimson cheek, tender, juicy, with yellow flesh; uniform in size, fine in appearance and of good quality. November to Febru-

Stayman's Winesap. Fruit medium size, mostly covered with red on a yellow ground; flesh fine, crisp, julcy, very tender and highly flavored. November to April, but will keep until May. A favorite apple for cider.

Winesap. Fruit medium large, skin almost entirely covered with dark red; flesh yellow, crisp, with a rich flavor. December to March.

York Imperial. (Johnson's Fine Winter, Shepp). Fruit medium size, attractive, smooth, clear, waxen yellow, flushed with carmine. The flesh is crisp, firm, sub-acid and retains its flavor to the last. December to Febru

CRAB APPLES

5 to 7 feet. Each, \$1.00; per dozen, \$10.00.

RAB Apples do well on almost all soils. Trees are hardy and vigorous; come into bearing early and bear almost every year. Excellent for cider, vinegar and

Transcendent. Largest and best of the Siberian Crabs.

Tree is extremely hardy, good grower and usually very productive. Fruit is bright yellow, striped with red and one and one-half to two inches in diameter. Flesh is crisp, juicy and sub-acid. August and September.

Whitney. Tree is a hardy, thrifty, upright grower; comes into bearing young and is very productive. Fruit is green, spotted with carmine. Flesh yellowish, crisp, juicy, splendid for eating and cider. August and September.

Yellow Siberian.

Yellow Siberian. Color of fruit is amber with red blush and of medium size. September.

SUITABLE DISTANCES FOR PLANTING FRUIT TREES.

Apples, standard, 30 to 40 feet. Pears, standard, 18 to 20 feet. Peaches, 16 to 18 feet. 18 to 20 feet. Cherries, sour, 15 to 18 feet. Plums, 16 to 20 feet. Quinces, 10 to 12 feet. Cherries, sweet,

FRUIT TREES—Continued

CHERRIES

HEART AND BIGARREAU (Sweet) 5 to 7 feet, first-class, each \$2.00; per doz.. \$20.00.

No home orchard is complete without some cherry trees. They are easily grown wherever the apple succeeds and they bear good crops yearly.

Black Tartarian. A beautiful purplish cherry of large size and superb quality, rich and juicy. Late June and July.

Governor Wood. One of the finest sweet cherries. Fruit is large, light red, juicy and delicious. Tree is healthy and productive. June.

oleon. Fruit of large size, white with red cheeks, firm and juicy. One of the best. Early July.

Rockport Bigarreau. Fruit large, round, light red, flesh firm and of fine flavor. Late June.

Yellow Spanish. A large handsome sweet cherry; yellow with light red cheek, firm and delicious. Late June.

DUKE AND MORELLO (Sour)

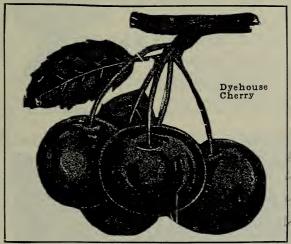

4 to 6 feet, first-class, each, \$1.20; per doz., \$12.00

Dyehouse. One of the earliest cherries. Similar to the Early Richmond but ripens about a week earlier and is much sweeter. The fruit is medium sized, soft, red and juicy. Tree is hardy and very productive. June.

Early Rich mond or May. Unsurpassed for cooking. The tree is a free grower and reliable producer. The fruit is medium size, dark red, juicy and has an acid flavor. June.

English Morello. Fruit is large, dark red, nearly black, rich, juicy, with acid flavor. Tree is of dwarf growth. Late July.

large, delicious cherry; reddish-brown or red. Valuable for late market or home use. Windsor. dsor. A larg July.

PEACHES

4 to 6 feet, each, \$1.00; per dozen. \$10.00.

IF living on a farm, plant a small peach orchard for home use or a larger one for commercial purposes. If living on a city lot plant a peach tree in the back

Champion. One of the finest freestone peaches. Large, creamy-white with slight blush. Flesh white, rich, sweet, juicy and of excellent flavor. August.

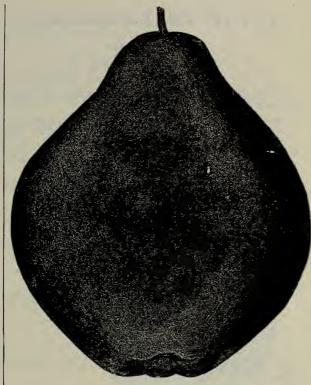

wford's Early. A very large, rich, yellow freestone of the finest quality. Late August. Crawford's Early.

Crawford's Late. This peach is similar to Crawford's Early, but ripens two or three weeks later. Freestone. Late September.

erta. The fruit is large with golden-yellow skin covered largely with crimson; flesh is yellow, firm, juicy and of high quality, very prolific. Freestone. September.

Heath Cling. Fruit very large, creamy white with faint blush. Flesh white to the stone, juicy and sweet with a good aroma. October.

Old Mixon Free. The standard late white peach. A large tender freestone with tender, excellent white flesh. September.

PEARS

STANDARD AND DWARF
6 to 7 feet, first-class, each, \$1.20; per doz., \$12.00.
Pears should be included in all home orchards, as they will adapt themselves to as great a variety of soils as any fruit.

other fruit.

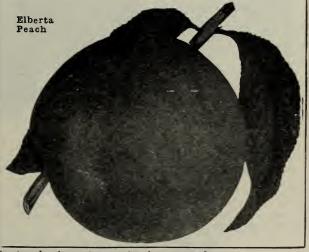

Bartlett. One of the most popular sorts, both for home and market. It is large, handsome, waxy yellow with red blush, flesh buttery, rich, juicy and highly flavored. August and September.

Duchess D'Angouleme. The skin is a dull greenish-yellow; flesh white, melting, juicy and well flavored. Tree is a vigorous grower. October and November:

Flemish Beauty. The fruit is large, the skin pale yellow; the flavor is sweet and melting. September and October.

Kieffer's Hybrid. Large, rich color and good quality. Fine for canning and preserving. October and November.

Seckel. Small, yellowish brown, of rich, delicious flavor, very popular for dessert. August and September.
 Sheldon. Of the finest quality, rich and aromatic. Fruit is greenish russet with a red cheek, large size and somewhat flattened shape. September.

FRUIT TREES—Continued

PLUMS

STANDARD ON PLUM STOCKS

5 to 7 feet, each, \$2.00; per dozen, \$20.00.

Plum trees require but little room to grow and are prolific bearers. For dessert, cooking and canning the demand is almost unlimited.

Abundance. Large, beautiful yellow, heavily over-spread with purple-carmine. Flesh yellow, juicy, sweet, firm, with purple-carmine. I tough skin. July.

Very large, dark violet red; flesh yellow, juicy od. Tree an erect, vigorous grower. Middle of Bradshaw. Vo August.

Burbank. Fruit very large, color cherry red, mottled; flesh yellow, sweet and firm. Hardy and vigorous grower. August.

abard. A favorite for canning. Fruit is medium size, oval and violet red. Flesh is yellow, juicy, pleasant and good. Late August.

June. An early ripening plum of good quality. Fruit medium to large, purplish-red; flesh yellow, solid, juicy and of good quality. Early August.

Shippers Pride. Large, showy, dark purple fruit. The flesh is sweet and firm. September.

Yellow Egg. A beautiful yellow, egg-shaped plum of large size; flesh yellow. Excellent for canning. Late August.

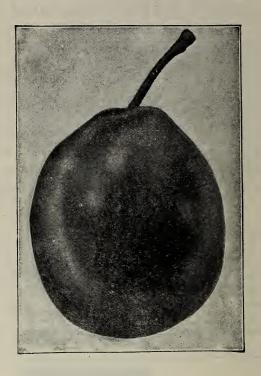

QUINCES

4 to 5 feet, each, \$1.00; per dozen, \$10.00.

The Quince is a reliable cropper and requires but little care. While they will thrive in almost any soil, they prefer a heavy, moist, clay loam.

Apple or Orange. Large, round, bright golden yellow, cooks quite tender and has an excellent flavor. Valuable for preserving and for market. An abundant

empion. The fruit is large, oval, of a rich color and excellent quality. Ripens late and keeps well until January.

MULBERRIES

5 to 6 feet, each, \$1.00; per dozen, \$10.00.

Downing's Everbearing. One of the most prolific varieties, bearing an abundance of large, black, sub-acid ties, bearing fruits; hardy.

A small number of trees, properly planted and tended, will bring better results and bring more satisfaction to the grower, than twice the number half cared for.

BLACKBERRIES

Per dozen, \$1.00; per 100, \$7.50. THE Blackberry is one of the most profitable fruits to grow when properly managed as it thrives well in almost any soil, but reaches perfection in a strong loam tending towards clay.

Ancient Briton. Large berries of

fine quality. Blower. Large berries. Very productive.

Early Harvest. Fruit, m size. The first to ripen. medium

Eldorado. Large fruit, fine quality. Good keeper.

Mersereau. Berries large; good keeper and shippe.

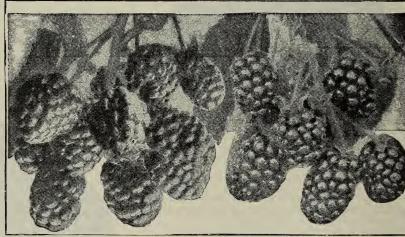

Rathbun. hbun. Fruit, was sweet and luscious. very large,

Medium size; sweet and Snyder.

Snyder. Medium size; sweet and juicy.

Taylor. Medium size fruit of fine flavor; ripens late.

Ward. Fine, large fruit of excellent quality, hardy.

DEWBERRY

The Dewberry is a trailing or vine form of the Blackberry. May be trained to run over stone piles, over rough embankments or rocky hillsides and sometimes produces a very large crop of fruit annually on land where no other crop could be grown. The fruit is very large and always at a premium with the commission men or on the open market.

We are only offering one variety which is considered the best of all Dewberries now in cultivation.

Fruit of high quality and very large, often one to two inches long and one inch in diameter. Perfectly hardy and a great bearer. Per doz., 75c; per 100, \$4.50.

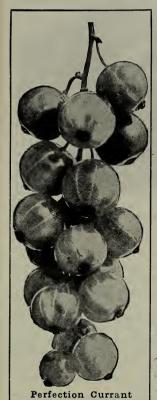

By Express or Freight at Expense of Purchaser.

Impossible to Accept Orders for Small Fruits Totaling Less than One Dollar. We do not guarantee or replace plants, shrubs or trees, at prices quoted.

CURRANTS, GOOSEBERRIES AND RASPBERRIES

By Express or Freight at Expense of Purchaser.

Impossible to Accept Orders for Small Fruits Totaling Less Than One Dollar.

CIIRRANTS Two-Year-Old Plants

A cool, moist soil is best adapted to the growth of Currants. Strong, moist loams with a considerable mixture of clay, are good. Even, well-drained, stiff clay will give good results.

The pruning is simple but very important. The younger the wood, the finer the fruit. It is absolutely necessary, however, that a fair supply of the old wood be left in order to insure productiveness. No wood over three years old should be allowed to remain.

to remain.

Cherry. Large, bright red berries with a thin skin and fine flavor.

Each, 45c; per dozen, \$4.50. Perfection. sub-acid flavor....

White Grape.

GOOSEBERRIES

Two-Year-Old Plants

One of the hardiest of the bush fruits. The best results are obtained by planting in moist, but not soggy, clay loam, but they will do reasonably well in any well drained soil if they are well fertilized once each year. The Gooseberries bear most freely on two and three year old wood. Therefore, the aim should be to keep a continuous supply of vigorous shoots. Prune freely to encourage upright growth.

Downing. Large, pale green and of splendid quality for both cooking and table use.
Each, 50c; per dozen, \$5.00.

The best English variety yet introduced. Industry. T Berries large, dark red color Each, 50c; per dozen, \$5.00.

RASPBERRIES

Once the Raspberry patch is established, it requires very little cultivation. They will do well in any good soil, but thrive best in deep, moist (not over wet) soil. The lighter loams are preferable for the red varieties, while the heavier loams suit the black varieties best.

Pinch back the black varieties early when the young canes are about three feet high, in order to keep the bushes snug and compact. Mulching will prove beneficial to both varieties, both in summer and winter. Black c ps should be planted in the spring.

St. Regis. It is wonderfully prolific, the first or main crop being far greater than that of any other red variety known. It fruits on the old cones in generous quantities until late in August. By that date, berries begin to ripen upon the young canes, which continue to produce berries in increasing numbers until severe frost. The berries are a bright crimson, of large size and surpassing quality—rich, sugary with full raspberry flavor. They are of exceedingly meaty, firm texture and keep in good condition longer after being gathered than any other red raspberry...Per dozen, \$1.00; per 100, \$7.50. Kansas. The hardiest black cap; strong, vigorous.

Cardinal. Considered one of the very best purple berries, as they produce a fine quality of dark red or almost purple berries through a long season.

Per dozen, \$1.00; per 100, \$7.50. The following varieties are all, per dozen, 75c; per 100, \$5.00.

Cumberland. The largest black cap.

Cuthbert. Large, firm, deep rich crimson.

Gregg. A large black cap variety, fruit firm.

STRAWBERRIES AND GRAPE VINES

By Express or Freight at Expense of Purchaser.

Impossible to Accept Orders for Small Fruits Totaling Less than One Dollar.

STRAWBERRIES

STRAWBERRIES will do well in any soil that will grow good corn.
Soil should be made fine and loose. A generous supply of well
rotted manure incorporated in the soil is a great benefit.

Strawberries are naturally shallow-rooted plants and must be encouraged continually to send their roots deep, in order to be sure of a supply of moisture and to feed in a soil of even temperature.

Plant in spring—always the best time—and see that no soil is allowed to remain in the crown of the plant.

Mulching strawberries is done to keep the soil moist and cool in summer, to protect the berries from mud and dirt when ripe and to protect the plants in winter. The winter protection should not be put on until the ground freezes.

Strawberries for garden culture should be planted in rows three feet apart and one foot apart in rows. For field culture plant in rows four feet apart and eighteen to twenty-four inches apart in row.

Dip the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out.

The following varieties are all, per dozen, 50c; per 100, \$1.50.

Aroma. One of the finest for long-distance shipping. The large berries are bright red to the center, of conical shape with prominent and attractive yellow seeds.

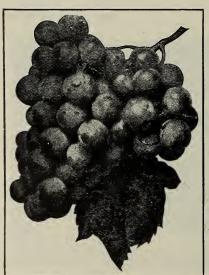

Gandy. One of the best late varieties. Berries large, of fine form and excellent quality.

Glen Mary. Large to very large, sometimes flattened; sweet and rich.

Nick Ohmer. A fine, fancy market berry and always superb for the table. A giant in size.

Senator Dunlap. Exceedingly vigorous. Fruit large, regular and attractive in form, deep red to the center.

Wm. Belt. Berries very large, conical, bright red; of good flavor. The plant is strong, healthy and fruitful.

GRAPES ALL TWO-YEAR OLD SELECTED STOCK

This is one of the most satisfactory crops that can be grown, because it can be depended upon practically every year.

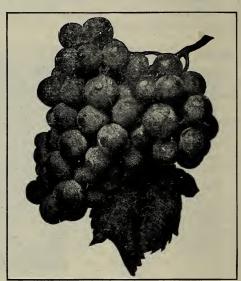

Grape vines will grow almost anywhere, but they should be carefully cultivated and pruned.

BLACK OR PURPLE GRAPES

*Concord. Large, black grape, hardy and productive; juicy and sweet. Each, 40c; per dozen, \$4.00.

Ives' Seedling. Dark purple, sweet. Each, 35c; per dozen, \$3.50.

Moore's Early. Ripens ten days earlier than Concord; bunch and berry round and large. Each, 45c; per dozen, \$4.50.

RED GRAPES

*Catawba. Berries large, round: when ripe a dark copper color; sweet, rich......Each, 45c; per dozen, \$4.50.

Delaware. Small, light red, thin skin; very juicy, sweet, sprightly.......Each, 60c; per dozen, \$6.00.

WHITE OR YELLOW GRAPES

when ripe a dark copper 45c; per dozen, \$4.50. skin; very juicy, sweet, 60c; per dozen, \$6.00. Varieties marked with a (*) are best for arbors.

Niagara. Bunch and berries large, light greenish white, slightly ambered......Each, 45c; per dozen, \$4.50. Pocklington. Bunch and berry very large; attractive, golden yellow color.....Each, 45c; per dozen, \$4.50.

HUBBARD THE NEW BLACK GRAPE

Quality sweet and delicious, having that fine and pleasant flavor approaching the European or Vinifera Grapes. Berries and bunch large and uniform; ripens ten days earlier than Concord. Supply limited. Each, \$1.50. Per doz., \$15.00.

SUITABLE DISTANCES FOR PLANTING SMALL FRUITS AND GRAPE VINES.

Blackberries, 5 to 7 feet.

Currants, 3 to 4 feet.

Currants, 4 to 5 feet.

Currants, 5 to 7 feet.

Currants, 6 to 7 feet.

Currants, 7 to 4 feet.

Currants, 8 to 10 feet.

Currants, 9 to 4 feet.

Currants,

McCullough's Fligh Grade Fertilizers

All Fertilizers Delivered Free on Board Cincinnati. Prices Subject to Change Without Notice.

THE benefits arising from the use of Commercial Fertilizers are too well known, and their value too well established, to require any argument or explanation. Soils that have been almost entirely exhausted by successive croppings have, by their use, been restored to their former utility; in fact, bring larger crops than when the soil is new. The elments of fertility in commercial fertilizers may be briefly stated as follows:

Nitrogen (of which Ammonia is the equivalent term), produces leaves and stalks and gives vigor to the plant.

Phosphoric Acid developes root system, hastens maturity and gives strength and productive power to the

Potash stiffens straw and stalk, promotes cellular growth and aids in starch formation.

It is impossible to produce large yields or good quality, if any of these elements of fertility are lacking.

HOW TO APPLY COMMERCIAL FERTILIZERS

For Cereals: Apply 200 to 500 lbs. per acre.

For Vegetables and Fruits: Apply 500 to 1,000 lbs. ner acre.

For Meadows and Alfalfa: Apply 300 to 500 lbs. per acre at seeding time or as a top dressing.

For Corn: Drill 200 to 400 lbs. per acre all over the field before planting. Then apply 100 to 125 lbs. per acre along the row. (not in the hill) at planting.

If your land is sour, we recommend sweetening with lime some weeks before applying fertilizers.

SHEEP MANURE—Pulverized

THIS is a natural manure; excellent for mixing with the soil. Strewn over and dug into the vegetable garden or placed directly in drills or hills, it promotes a rapid, steady growth. Especially valuable for lawns, contains all the constituents for promoting a quick, luxuriant growth and a rich green color. Use at the rate of from 500 to 600 pounds per acre. For pot plants, mix one part of sheep manure to six parts of soil. For use in the vegetable garden spread over the surface and dig in. Being soluble, it readily makes a safe liquid manure—one pound to five gallons of water can be used. 1 lb. carton, 10c; 5 lbs., 25c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.50; 100 lbs., \$2.50.

THE GRASS AND GARDEN TONIC

THIS lime is especially prepared for use on soil, as it is essentially a plant food, useful for correcting acid soils, also for binding sandy soils and loosening clay soils. Should be applied at the rate of 1,000 to 2,000 lbs. per acre for sandy soils and 2,000 to 3,000 lbs. per acre for clay soils, a few weeks before applying Commercial Fertilizers.

Evr Green will renovate old lawns and cure the acidity

of the soil.

If the ground is covered with moss and the grass seems sour and unsightly, sprinkle **Evr Green** freely over the surface and watch the satisfying results.

It is a well-known fact that 90% of the lawns need Evr Green, which can be applied at any time with good results.

For renewing old lawns it is unequaled; rake the lawn thoroughly, sow your grass seed, then sprinkle thoroughly with Evr Green at the rate of 100 lbs. for each four hundred square feet.

To make a new lawn; after all grading is done and every stone and stick removed, cover with a generous coating of Evr Green as indicated above, which should be raked into the soil, then sow the seed and rake in well, after which it should receive a good rolling to bring the seed into close contact with the soil and conserve the

Evr Green is 99% pure, and contains 96% lime, some phosphorus and is guaranteed not to burn the sod.

E7r Green is packed in 50 lb. sacks, just the proper size for an ordinary sized Garden and should be used by all Amateurs, as it has for some time been used by professional Market Gardeners and Planters.

Per bag of 50 lbs., \$1.00; 2 bags (100 lbs.), \$1.75; 5 bags (250 lbs.), \$4.25; 10 bags (500 lbs.), \$8.00.

AGRICULTURAL LIMESTONE

DESTROYS SOIL ACIDITY-LOOSENS UP CLAY SOILS-TIGHTENS UP SANDY SOILS

PUTS soils in better mechanical condition and therefore aids in the development of beneficial Soil Bacteria, which acts as a plant food for Leguminous Crops, such as Alfalfa, Sweet Clover, Red and Crimson Clovers, Soy Beans, Garden Beans and Peas, Cow Peas, Vetches, etc.

Apply at the rate of 2,000 to 4,000 lbs. per acre, and may be applied at any season of the year.

Contains 87.97% Calcium Carbonate and 7.65% Mag-

nesium Carbonate.

Packed in 100 lb. bags.

Per bag of 100 lbs., \$1.25; 5 bags, \$5.00; 10 bags (1,000 lbs.), \$8.00.

PURE BONE MEAL

THIS pulverized ground bone is excellent for rose culture and lawns. It decomposes rapidly and is quickly effective. Should be applied at the rate of 400 to 500 kms. per acre. Analysis: Ammonia 2%; total phos. acid,

1 lb., 10c; 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.25; 50 lbs., \$2.00; per bag of 125 lbs., \$4.00.

HALF AND HALF

Is especially valuable for Field Crops, Potatoes and Grain. Should be applied at the rate of 400 to 500 lbs. per acre. Analysis: Ammonia, 2%; total phos. acid, 16%; potash K2O, 1%.

5 lbs., 30c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.90; per bag of 125 lbs., \$3.50.

ACID PHOSPHATE 16%

SOME soils contain a large percentage of Nitrogen and some Potash, but still are deficient in Phosphoric Acid. This must be supplied for the purpose of producing a balanced combination of fertilizer elements, by the application of 16% Acid Phosphate which produces a beneficial effect by supplying the proper proportion of Phosphoric Acid. Apply from 200 to 400 lbs. per acre. Analysis: Available phos. acid, 16%; insoluble, 1%.

5 lbs., 30c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.50; per bag of 125 lbs., \$2.75.

MURIATE OF POTASH

APPLY 100 to 150 lbs. per acre, usually with other fertilizers. This must be used with great care as it is very powerful. Excellent for potatoes, corn, grain, etc. Lb., 20c; 2 lbs., 35c; 25 lbs., \$2.65; 100 lbs., \$9.00.

HYDRATED LIME

THIS lime is used for sweetening acid or sour soils. 3 lb. package, 10c; bag of 50 lbs., \$1.00; 5 bags (250 lbs.), \$4.00; 10 bags (500 lbs.), \$7.50.

DRIED BLOOD MEAL

THIS is a splendid fertilizer for roses, carnations, chrysanthemums, etc., as well as for pot plants. Can be mixed with the soil or applied in liquid form. 1 lb., 15c; 25 lbs., \$2.65; 50 lbs., \$5.00; 100 lbs., \$9.50.

LAND PLASTER

If applied as a top dressing for grass or clover crops in the spring, it greatly increases the growth and yield of same; sprinkled in stables, poultry houses and on manure piles it will prevent ammonia from vaporizing, thereby greatly increasing the value of farm manure. 200 lb. bag, \$2.75.

EXCELSIOR PLANT FOOD

For Ferns and Other House Plants

AN odorless preparation, combining in a concentrated and soluble form every element required in plants and flowers to produce vigorous growth and a profusion of flowers. It is immediately soluble in water, and available to plant life from the moment of application. Small package, 10c; medium size package, 20c; large package, 35c.

(Fertilizers continued to next page.)

FERTILIZERS—Continued

NITRATE OF SODA

ARRIES approximately 20% of ammonia and comes in crystals which vary in size. It is sometimes lumpy and the lumps should be crushed to a powder before the

Owing to the fact that Nitrate of material is applied. Soda is a highly concentrated form of plant food, care should be used in applying the material to plants on the leaf surface.

Use a top dressing at the rate of 100 lbs. per acre between the rows when the plants are well established, on the following vegetables. Cabbage, Cauliflower, Egg Plant, Lettuce, Spinach, Beets, Celery, Onions. For Asparagus, a top dressing of 250 lbs. per acre when the young shoots are starting in the spring. For Strawberries apply between the rows at the rate of 100 lbs. per acre at the time of blossoming. For the home garden apply a solution of one ounce to two gallons of water.

Fruit:-The old idea that fruit does not require any fertilizer has been entirely dispelled in the last five years. most up-to-date fruit growers are now applying 5 lbs. of Nitrate of Soda to apple and pear trees 20 to 25 years old, in a circle on the ground 3 ft. wide underneath the tips of 1 lb., 15c; 2 lbs., 25c; 10 lbs., \$1.15; the branches. 25 lbs., \$2.00; 50 lbs., \$3.50; 100 lbs., \$6.50.

SULPHATE OF AMMONIA

CONTAINS approximately 25% of ammonia and comes in fine crystals which is very nice to apply broadcast. Owing to its firmness and keeping qualities it is preferred by some gardeners and fruit growers to Nitrate of Soda. Owing to the fact that it carries 5% more ammonia to the weight than Nitrate of Soda, the user should apply four pounds of Sulphate of Ammonia where he uses 5 lbs. of Nitrate of Soda. 1 lb., 15c; 2 lbs., 25c; 10 lbs., \$1.15; 25 lbs., \$2.65; 100 lbs., \$9.00.

ZENKE'S NEW PLANT LIFE

(Liquid)

It is a Plant Food containing in proper percentage All Elements essential to Plant Growth.

Mix one quart with 50 gallons of water and water plants sufficiently to saturate soil. Use about one quart to one square foot of soil.

It is immediately available to absorption by plants and saves time and labor. 8 oz. can, 25c; gallon, \$3.00. (One gallon is sufficient to make 200 gallons of solution.)

Moss, Peat, Etc.

Moss, Green Sheet. For hanging baskets, etc. Per bale, 40c; bundle of five bales, \$1.50.

Moss, Sphagnum. For packing plants and growing orchids, etc. 1 lb., 10c; 3 lbs., 25c; 7 lbs., 50c.

Peat, Jersey. Per bushel, \$1.25; per bag of two measured bushels, \$2.00.

Potting Soil. Peck, 30c; per bushel, \$1.00

Insecticides and Fungicides Liquid Insecticides and Poisons cannot be sent by mail.

Proper Use of Insecticides and Fungicides

Insecticides and Fungicides

The annual loss of fruit and vegetables from ravages of insects and fungous diseases is not due to poor material, but is primarily caused by lack of properly indentifying the insect or fungous disease affecting the crop and applying the wrong material, or applying the material after it is too late to control the insect or disease.

To control insects with biting mouth parts which chew the surface or eat part or all of the leaf, like potato bugs, apply some form of Arsenate poison to be taken inwardly.

To control insects with sucking mouth parts, such as aphis and thrip, which are small green or black insects usually found on the underside of the leaves or tender portions of the stems of the plant, apply a contact poison such as Nicotine Sulphate, using soap as a spreader, with a sprayer which furnishes sufficient pressure to bring the material in contact with the body of the insect.

To control rose, oyster shell, scurfy and San Jose scale, apply a contact spray which destroys the carcass of the insect, such as Lime-Sulphur or Scalecide.

Fungous diseases affecting the leaves, stems and fruit, can be effectively controlled by frequent applications of fungicides, which should be applied before the disease starts and will tend to hold it in check even after the disease has made its appearance.

Fungous or bacterial diseases affecting the roots or underground parts cannot be controlled by application of fungicides. The only control for these diseases is soil sterilization by steam or drench method with Formaldehyde.

In general, the following list of insecticides and fungicides are made for the purpose of controlling certain insects and fungous diseases and if the users will follow directions they will obtain good results.

Ant Eradicator

Useful against ants in lawns, gardens, etc. 8 oz. can, 25c.

Arsenate of Lead (Dry Powdered)

Arsenate of Lead (Dry Powdered)

Nu-Rex Form

I't cannot dry out or deteriorate in any way, even if carried over indefinitely, does not contain 50 per cent of water on which freight must be paid, and in short, represents the ideal Arsenate of Lead.

For Potatoes use 2 to 3 pounds to 50 gallons of water; applying 50 gallons or more per acre. For all other purposes use 1 to 1½ pounds to 50 gallons of water, or one teaspoonful to 1 gallon of water. It is best to reduce to a thin paste by mixing with a small amount of water, before putting into spray tank. On tender foliaged Trees and Plants add about two pounds of lime to each 50 gallons spray liquid.

½ lb., pkg., 35c; 1 lb., pkg., 60c; 5 lb. pkg., \$2.50; 12½ lb. pkg., \$5.65; 25 lb. pkg., \$10.00.

Arsenate of Lead (Paste)

THE most effective poisonous Insecticide for leaf-eating insects. It will not scorch, burn nor injure the most delicate foliage, but at the same time kills all kinds of leaf and fruit-eating insects.

For Potatoes use 4 to 6 pounds to 50 gallons of water, applying 50 gallons or more per acre. For all other purposes use 2 to 3 pounds to 50 gallons of water. Mix with the required amount, enough water to make a thin paste before putting into the spray tank. On tender foliaged Trees and Plants add about two pounds of lime to each 50 gallons of spray liquid. 1 lb. can, 40c; 5 lbs., \$1.70; 10 lbs., \$2.75; 20 lbs., \$4.50; 50 lbs., \$11.00; 100 lbs., \$20.00.

"Black Leaf 40"

IT is a concentrated solution of nicotine sulphate, guaranteed to contain not less than 40 per cent of nicotine by weight. Soft-bodied sucking insects may be effectively controlled 'by spraying with "Black Leaf 40".

For Aphis indoors use ¾ pint "BLACK LEAF 40" to 100 gallons of water or 1 teaspoonful to 1 gallon of water, with sufficient soap in water to make good suds. For outside use apply solution double strength. Several formulas for destroying other sucking insects on each package. This is also a contact remedy. 1 oz. bottle, 25c; ½ lb. tin, \$1.00; 2 lb. tin, \$3.25; 10 lb. tin, \$13.75.

Bordo Lead Mixture (Paste)

A N Insecticide and Fungicide combined in one very effective product. Sticks well to the foliage. Use in the proportion of 5 to 10 lbs. to 50 gallons of water. Weigh the exact amount, place in a pail with water and mix; pour into the sprayer tank and add the necessary water. Agitate thoroughly. 1 lb. can, 35c; 5 lbs., \$1.50; 10 lbs., \$2.75; 25 lbs., \$6.25.

Bordo Lead Powder

COMBINED Insecticide and Fungicide. Kills Bugs and prevents Blight, Rot, Mildew and Fungus, in one spraying operation. Can be used for wet spraying or dry dusting. Can be used for fruits, vegetables or flowers.

1 lb. makes about 7 gallons—ready to apply.

½ lb., 35c; 10 lbs., \$5.00 1 lb., 65c; 5 lbs., \$3.00;

INSECTICIDES AND FUNGICIDES—Continued

Bordo Mixture (Paste)

A FUNGICIDE for curing and preventing black rot, mildew, blight, leaf curl, scab, or other fungoid diseases on fruits and plants, ready for use by simply adding motor

Use in the proportion of 8 to 10 lbs. to 50 gallons of water. Do not use on Peach, Japanese Plum or other tender foliaged plants unless diluted to one-half strength. 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$2.75; 20 lbs., \$4.50; 50 lbs., \$9.00; 100 lbs., \$16.00.

Bordo Mixture (Dry Powdered)

MANUFACTURED by a new process and will not dry out or deteriorate. Quantity to be used not over one-third the amount used in Bordo Paste Mixture.

Mix with the required amount enough water to make a thin paste before putting into the spray tank.

Do not use on Peach, Japanese Plum or other tender foliaged plants, unless diluted to one-half strength. ½ lb. pkg., 30c; 1 lb. pkg., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00.

Bug Death

E SPECIALLY valuable for Cucumbers, Egg Plants, Melons, Rose Bushes, Currants and Potatoes. It drives ants from lawns, and won't injure the grass.

Apply with powder bellows and dust Apply with powder bellows and dust Bug Death evenly over the plant. The best time for applying dry is early in the morning while the plant is wet with dew, as the powder will adhere more readily. Bug Death will not injure any Plant, Tree or Vine. 1 5 lbs., 70c; 12 ½ lbs., \$1.40.

1 lb., 20c; 3 lbs., 45c;

Cutworm Food

THE worm seeks the Food in preference to the plant. For plants transplanted from indoors, apply an even teaspoonful around each plant as soon as set out. Do not mix food with the soil.

For out-door grown stock, sprinkle the food one-fourth inch thick around the plants as soon as they are well through the ground.

One pound will protect 75 to 100 plants. 1 lb., 35c; 5 lbs., \$1.40.

Fish Oil Soap

FOR destroying scale insects on Plants, Trees, Vines, etc., for washing down the bark of Trees, Grape Vines, etc. Dissolve one pound in one gallon of hot water, then add 9 to 10 gallons of cold water; for trunks and branches of trees use a thicker solution and apply with a brush. This is also a contact remedy. ½ lb., 20c; 1 lb., 30c; 5 lbs., \$1.25; in bulk, 25 lbs., \$5.50.

Zenke's Liquid Fungicide

A POWERFUL, reliable remedy for Leaf Spot. Leaf Rust, Scab, Mildew, Black and Brown Rot and most other Fungoid troubles. Per gallon, \$3.00. (Sufficient to make 50 gallons of solution).

Grape Dust

A NON-POISONOUS powder for the remedy and control of mildew and rot on Grapes, Goose-berries, Roses, etc.

Apply with powder bellows and dust evenly over plants. 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75.

Hellebore Powder

FOR destruction of Slugs, Worms, Caterpillars, etc.
Apply with powder bellows and dust evenly over plants, early in the morning while plants are wet with dew. 1/2 lb., 20c; 1/2 lb., 35c; 1 lb., 60c; 5 lbs., \$2.75.

Insect Powder

FOR Worms, Flies, Aphis, and almost all kinds of insects. 1 lb., 30c; 1 lb., \$1.00.

Zenke's Compound Plant Insecticide

S a contact remedy (Liquid). Very effective against Plant Lice, Black and White Fly, Mealy Bugs, Scale Insects, Eggs and Larva.

A very effective wash for Palms and Rubber Plants. S oz. can, 25c: per gallon, \$1.50. (One gallon is sufficient to make 20 to 35 gallons of solution).

Rex Lime-Sulphur Solution

FOR fall, winter and early spring spray. Destroys Sa. Jose Scale, Peach Leaf Curl, Bud Moth. Apple Aphis, Blister Mite, any Scale Insects or Bark Lice. 1 gallon will make 8 gallons spraying liquid. 1 qt., 40c; ½ gal., 65c; 1 gal., \$1.00; 5 gal., \$3.50; ½ bbl. (25 gals.), \$8.00. 1 bbl., (50 gals.), \$14.00.

S. W. Dry Lime-Sulphur

Is a combination of Lime and Sulphur which can be used not only as a dormant spray, but also as a summer spray in combination with Arsenate of Lead. The so-called soluble compounds are unstable and when combined with Arsenate of Lead, in a summer spray, burning invariably results.

From 10 to 12 pounds of S. W. Dry Powdered Lime-Sulphur should be used with 50 gallons of water, for a dormant spray.

From 2 to 3 pounds to 50 gallons of water in combination with 1½ pounds of Dry Powdered Arsenate of Lead or Paste Arsenate of Lead should be used for summer spraying on all seed fruits such as Apples. Pears and Quinces, and half this strength on all stone fruits. 1 lb. can 40c; 5 lb. can \$1.75; 10 lb. can, \$3.00; 25 lb. can, \$6.00.

Nico-Fume Liquid

FOR destroying Aphis, Thrip and Red Spider. Contains 40 per cent nicotine.

Use one to two teaspoonsful of Liquid to each gallon of water. This is a contact remedy. 1/4 lb., 65c; 1 lb., \$2.00; 4 lbs., \$7.50; 8 lbs., \$14.50.

Nico-Fume Paper

STRIPS of paper strongly saturated with Nicotine. These, when suspended and lighted, make one of the best and simplest methods of fumigating greenhouses. Use 4 to 6 sheets for ordinary house 100 feet long by 20 feet wide. Price, air-tight cans, 24 sheets, \$1.25; 144 sheets. \$5.00; 288 sheets. \$9.50.

Paris Green

A POISONOUS Insecticide in powder form for insects which chew. Largely used on Potatoes and Tobacco. Can be used as a spray or dry and applied with Dry Powder Dusters.

When used as a spray, dilute one pound Paris Green in 150 to 300 gallons of water. When used on Fruit Trees add two pounds lime. 14 lb., 20c; 1 lb., 65c; 5 lbs., \$3.00.

Scalecide

SCALECIDE is an asphaltum base petroleum oil from which the light inflammable and heavy lubricating oils have been removed, but leaving the natural sulphur in the oil, combined with sulphonated vegetable oils and naphthaline, and chemically treated to make it soluble or water-miscible. It mixes instantly with water and stays mixed.

Add one gallon of "Scalecide" to 15 gallons of water, stir, and you are ready to spray any kind of tree when the leaves are of, provided it is not too cold to be comfortable.

Use a fine spray nozzle and thoroughly wet the tree from the topmost twig down to the ground and around the base of the tree and you can rest assured that you will have accomplished everything you could with any other dormant spray or combination of sprays, and in addition, some things they cannot do.

If used according to directions, will kill every San Jose Scale that comes in contact with it.

1 qt., 65c; 1 gallon, \$1.60; 5 gallons, \$6.80; 10 gallons, \$11.70; 30 gallons, \$23.85; 50 gallons, \$43.00.

(Insecticides continued to next page.)

INSECTICIDES AND FUNGICIDES—Continued

Scale Destroyer, Target Brand

THIS preparation is a soluble, mineral oil, designed especially for destroying and preventing San Jose Scale. It is absolutely harmless to the most tender growth, and is instantly soluble in cold water.

One gallon Target Brand, Scale Destroyer makes twenty gallons dilution, ready to apply. 1 qt.,60c; 1 gal.,\$1.40; 5 gal.,\$5.50.

Slug Shot

ANON-POISONOUS powder and a popular Insecticide—
applied, and not injurious or dangerous to animals, the person applying it, or fruits and vegetables treated. Very effectual in destroying Caterpillars, Currant, Goose-berry and Cabbage Worms, Potato, Melon, Squash and Cucumber Bugs, Rose Slugs, etc.
When used on Melon, Squash and Cucumber Vines should be put on lightly. 1 lb., carton, 20c; 5 lbs., 60c; 10 lbs., \$1.15.

Sulphur, Powdered
USED principally to prevent and cure mildew on Roses and Plants in greenhouses. 1 lb., 15c; 2 lbs., 25c; 5 lbs., 50c; 10 lbs., 90c.

Sulpho-Tobacco Soap

DESTROYS Black and Green Aphis, Mealy Bug, Red Spider etc., on Plants, Shrubs and Trees; and for Lice, Fleas and other parasites on domestic animals. For plants, shrubs and trees, dissolve two ounces in one gallon of hot water. Apply when cool. This is a contact

For use on animals, dissolve two ounces in from one to two gallons of hot water, and apply while warm, with a stiff brush. 3 oz. cake, 10c; (by mail 15c); 8 oz. cake, 20c;

Tobacco Dust

A SURE remedy for Green Fly, Aphis, Fleas, Beetles, etc. 1 lb.,10c; 4 lbs.,25c; 10 lbs.,50c; 100 lbs.,\$3.00 TOBACCO DUST FOR FUMIGATING. 1 lb., 10c; 3 lbs., 25c; 10 lbs., 60c; 25 lbs., \$1.25; 100 lbs., \$4.00.

Tobacco Stems

I SED for fumigating plants to kill insects, and as a mulch for Roses, Asters, Lettuce, etc. 1 lb., 5c; bale of about 125 lbs., \$2.00.

Weed Killer, Key Brand

A HIGHLY concentrated solution which dilutes one part to 50 parts of water. It is effective within 12 hours after application and one application will keep paths and roadways free from weeds for an entire season. 1 qt., 65c; 1 gal., \$1.75; 5 gals., \$7.00.

Tree Tanglefoot

FOR protecting trees against climbing insect pests in a simple, economical and effective way; put a band of Tree Tanglefoot, from 3 to 5 inches wide completely around the tree. A perfect safeguard against Gypsy, Brown-tail and Tussock Moth, Canker Worms and Ants, and other creeping insects.

1 lb., 50c; 3 lbs., \$1.45; 10 lbs., \$4.50; 20 lbs., \$8.75.

HOW AND WHEN TO SPRAY

PLANT	1st Spray	2nd Spray	3rd Spray	4th Spray	5th Spray
Apple	Apply in fall after leaves fall or in spring before buds open. Apply Lime Sulphur or Scalecide. Con- trols San Jose scale, scurfy scale, aphis eggs and mite eggs.	Spray). When pink shows in cluster buds, before buds open. Apply Bordeaux with Arsenate of Lead (add Black Leaf Forty if aphis are present. Controls apple scab, curculio, canker worm and aphis.	Spray). Spraying Pumps and Appliances

PRAYING is of such importance that the Experiment Stations all over this country have given much of their attention to it, and their findings have been of incalculable value. Diseases and insects can no longer exist if the proper Insecticide is applied through the medium of an up-to-date spray apparatus.

SPRAYERS PARAGON

THESE Sprayers are strongly constructed and can be easily operated by one main. They can be brought in close proximity to the work, thereby eliminating the use of a long, expensive hose. Our patented, self-cleaning strainer prevents the necessity of first straining the liquid to be sprayed. The agitator also keeps the liquid HESE Sprayers are strongly constructed and can be easily operated by one man. thoroughly stirred.

The spray nozzle has only $\frac{1}{3}$ -inch outlet and spreads the liquid well, thereby covering a large surface with a small amount of liquid, making it a very economical sprayer.

All parts of the machine are made of the best material obtainable.

The reservoir is made of heavy galvanized iron. All essential fittings and valves are made of brass, making it strong and durable. The body of pump is cast iron, well ribbed to prevent breakage. The screen is of heavy perforated brass and will last many years. The pump frame can easily be removed from tank when it needs cleaning and by running water through machine after using, the entire machinery can be easily and thoroughly cleaned.

Suitable for spraying Insecticides and Fungicides on trees, shrubs and vines, as well as the application of Whitewash and Cold Water Paints.

White Wash Formula

Take good, fresh, unslacked lime, cover well with water and leave it slack over night. Next day add water to thin. Also add five cents worth of ultra marine blue, (buy in paint store) and five cents worth of common salt to every twelve gallons. Add one-fourth pound dissolved ground glue to every two gallons. Dissolve glue in warm water. Mix and stir thoroughly.

When used with a Paragon Sprayer will save time, trouble and expense.

Bean Power Spraying Outfits

HE accompanying illustration presents a view of the Bean Power Sprayer. These sprayers are made in several sizes to meet all the requirements of orchardists, whether orchards are large or small. They have proved to be economical, labor-saving and more thorough in applying insecticides than any other device

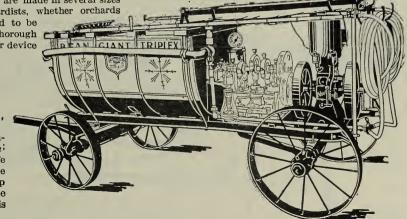

"WHY the

on the market.

BEAN

is the BEST"

FIRST-The Bean Pressure Regulator maintains a uniform pressure; saves fuel and wear of engine; is safe and dependable; makes possible the removal of any valve in the pump while full pressure is maintained on the air chamber, and while engine is operating

SECOND—The Bean Threadless Ball Valves (Reversible and Interchangeable Seats) may be removed without stopping engine; no threads; saves time; valves easily cleaned.

THIRD-Porcelain lined Cylinders, guaranteed to last the life of the pump.

FOURTH-Underneath suction; tanks easily emptied; engine throws more liquid with less power.

FIFTH—Only pump without stuffing box—This saves labor and trouble.

SIXTH—Bean Eccentrics increase the life of the pump and the durability of the outfit.

SEVENTH-One piece steel bedplate-makes outfit rigid, durable and light.

EIGHTH—The Bean Rocking Bolster; special truck reduces weight of outfit; adjustable on all kinds of ground.

NINTH-Novo Engine; simple to operate; runs under all conditions; may be removed from outfit and used for other purposes.

TENTH—Bean Refiller; saves time and labor; simple to operate; one man can fill the spray tank in 5 minutes. these features the Bean equipment has many other strong points which the fruit growers should consider before purchasing an outfit.

SPECIFICATIONS

The Bean Giant Triplex Sprayer Outfit No. 626, with giant three cylinder pump, which has 2 ¾-inch cylinders, porcelain lined, 2 ½-inch stroke, 48 R. P. M., 9 ½ gallons per minute capacity, 250 lbs, pressure. This outfit complete with one Novo Engine, 4 H. P.; 200 gallon tank; complete rotary agitator; special steel platform; hinged wood covers; special low down steel truck, 4-inch grooved tires; 50 feet Bean ¾-inch high pressure spray hose; also one Bean Spray Gun. Everything put together in good working shape and tested out before leaving the plant.

This outfit is made for the big orchard man who wants an outfit that will deliver the goods without any trouble when he starts his spraying. It is simple to operate and will last a lifetime if properly cared for.

The Bean Power Sprayers are made in different sizes to meet the demands of the fruit growers. The same quality of equipment is used in each outfit.

As prices vary according to size and specifications of equipment, write us for firm prices on outfits to meet your requirements, before placing your order.

SPRAY PUMPS AND SPRAYERS—Continued

MYER'S SPRAY PUMPS

MYER'S LEVER BUCKET BRASS SPRAY PUMP. It has all the advantages of the ordinary barrel pump and bucket pump combined. Is made of brass with ball valves; handle and foot rest are malleable iron. With agitator; complete with hose and graduating Vermorel fine, coarse spray and solid stream nozzle...\$6.00

MYER'S DEFIANCE BRASS SPRAY PUMP. With agitator; complete with hose and graduating Vermorel fine, coarse spray and solid stream nozzle.....\$5.50.

MYER'S LITTLE GIANT BRASS SPRAY PUMP. Is improved with a large air chamber. With agitator; complete with hose and Imperial combination, fine, coarse spray and solid stream nozzle, with malleable foot rest......\$4.25.

Eight-foot Pipe Extension 75c. Bordeaux Nozzle.....\$1.00. Graduating Vermorel Nozzle......90c.

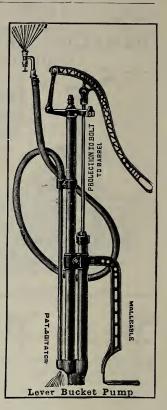

AUTO COMPRESSED AIR SPRAY

CAN be suspended from the shoulder, allowing the free use of the arms. A few strokes of plunger in air chamber will compress enough air to discharge the entire contents. A practical machine for potatoes, tobacco, small fruits, vineyards, poultry houses, greenhouses, etc. Extension pipes for spraying trees.

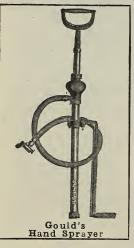

Auto Spray No. 1-B. Brass tank, with Auto-Pop Nozzle.....\$10.00

Auto Spray No. 1-D. Galvanized tank, with Auto-Brass Extension. Two feet, per length.... .60,

BRANDT EASY SPRAYER

A COMPRESSED air sprayer made of galvanized steel. Holds one gallon. equipped with automatic shut-off nozzle and is found a very satisfactory sprayer where gardens are not too large. Each......\$2.50.

AUTO SPRAY

No. 5

THE pump of Auto Spray No. 5 is made entirely of brass. It has two ball valves so arranged that they may be instantly cleaned. The threads are all cut, not rolled, so that there is no chance for leakage. Pump is double acting and will generate a pressure of 180 lbs. We furnish with this pump 3½ ft. of ¾ in. suction hose and a heavy strainer that keeps the hose from working out of a bucket or tank.

The extension is extra and is very useful for spraying field crops. The extension is curved so that the operator can direct the spray up or down while using the pump in a horizontal position. Extension can be used on any of the Auto-Sprayers.

GOULD'S "BORDEAUX" HAND SPRAYER

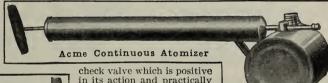

discharge hose and "Seneca" nozzle, price.....

THE ROBERTSON COMPRESSED AIR SPRAYER

THIS Sprayer is easy to operate and does not require one-half the labor that it takes to work an ordinary Sprayer. A woman or child can use them as well as a man. They give a continuous spray, reduce the liquid to a fine mist-like vapor and throw it with great force so that it is driven into the smallest cracks and crevices. By means of the universal nozzle the spray can be thrown on the under side of the leaves of plants and shrubs, the under side of beds and other furniture, into corners, behind doors, on tcp of mouldings, window casings, behind steam pipes, and other difficult places inaccessible with the ordinary sprayers. Capacity one quart. Tin pump and reservoir, each, 75c. Brass pump and reservoir.

ATOMIZERS. POWDER DUSTERS. Etc.—Continued

Ring Lawn Sprinkler, Allen's

The simplest lawn The simplest lawn sprinkler made. No revolving parts to wear and get out of order or leak. Easily moved about the lawn. Made of polished brass. Light, durable and economical. Each....\$1.00

LAWN REQUISITES—Continued

The Dayton Rotary and Oscillating Sprinkler

THE most practical, durable, efficient machine ever devised for sprinkling lawns, parks, or irrigating truck gardens. It must be seen in action to be appreciated. Saves time, labor, hose wear. It is nearest approach to natural rain. All the parts of this irrigating machine are made of brass and aluminum (non-rusting or corroding metals).

A tiny jet of water against an aluminum water-wheel revolves the wheel at high velocity, and through a worm gear (which runs in oil) and a pinion traveling over a toothed plate, carries the irrigating nozzle in a complete circle or oscillates like an electric fan making a half circle.

The nozzle used is adjustable for distance of spray and enables an equal distribution of water over any desired area.

Its Durability—The Dayton is closely and substantially made. They are made to gain and maintain a place on every well-kept lawn.

Its Simplicity—It is by far the cheapest, simplest of all overhead irrigating systems. It is simplicity itself.

Appearance—The Dayton is neat and pleasing of appearance, and besides being the best method of sprinkling and cooling off the hot summer evenings, it adds much to the beauty and attractiveness of the lawn.

Every Dayton is guaranteed to give perfect satisfaction. All machines are thoroughly tested and closely inspected before leaving factory.

A FEW FACTS REGARDING TRUCK GARDEN INSTALLATION OF

DAYTON ROTARY SPRINKLERS:

Fourteen machines may be operated from a 1 ½-inch main, with water at 40 lbs, pressure. A 2-inch pipe will carry 20 machines at 40 pounds pressure. Machines should be placed 50 feet apart, 17 machines being required to the acre. It is desirable to lay the pipe mains under the ground, just below plow depth, with ½-inch riser pipes. With such an installation the entire tract can be farmed. Each riser should have a shut-off valve, and a valve should be provided for each line. In this way any part or portion of a tract can be irrigated independently of the whole.

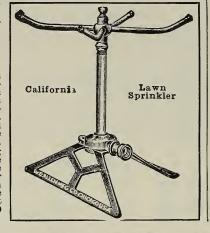

The water consumption of a Dayton Sprinkler, normally adjusted and operating at 40 pounds pressure, approximates 146 gallons per minute.

1½ gallons per minute.

Dayton Lawn Sprinklers are fitted with ¾-inch or ½-inch hose connections. as may be desired. Price..........\$6.00.

California Lawn Sprinkler

FOUR Arm
Lawn Sprinkler which can
be operated with a moderate pressure, covers a wide area and distributes the water evenly. The revolving The revolving arm throws the water in a fine spray into the air and the motion produces a fine mist. Height about 1 ft..\$2.00

Market Gardener's Sprinkler

Lawn Mowers Hand Power

Coldwell's Improved Horse Lawn Mower

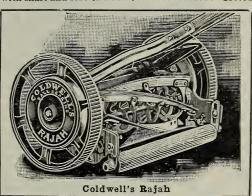

THIS well known standard Mower has side draft attachments, to enable the horse to walk on the cut grass only, and caster rollers, which will not mark the lawn. Evenness of cut is assured by an adjustment which raises or lowers the two sides at the same time by means of a simple lever movement; the same lever serves the purpose of raising the knives from the ground when driving over gravel walks or roads. The mowers are fitted up with steel shafting and composition split bushings, and great care is taken to have the workmanship perfect.

These Mowers are made regularly with four blades in the revolving cutter, but when exceptionally fine cutting is desired, such as on golf links and very fine lawns, we can furnish them with six blades.

Coldwell's "Rajah" Ball Bearing Lawn Mower

Is STRICTLY high grade ball bearing, and made of first-grade material throughout. It has large drive wheels (10 ½ inches high), thus insuring lightness of draft. The large diameter five-blade revolving cutter makes it an exceptionally good high-class lawn mower, with a very fine cut. It is provided with flat sliding pawl ratchets. The adjustment of the bearings is accomplished with one screw conveniently located at the end of the revolving cutter, by means of which all wear can be taken up, and a locking screw holds them securely in place. This mower is furnished with our patent terrace mowing arrangement, reversible channel-shaped bottom knife. It is fully guaranteed in every respect.

14-inch, \$15.00; 16-inch, \$16.00; 18-inch, \$17.75; 20-inch, \$18.50.

Geared Roller or Golf Mower

Geared Roller or Golf Mower

THIS Mower is made to meet the demand for a machine that will more perfectly cut borders, edges, etc., and yet retain all the other features necessary in a mower for general work. Coldwell's Roller Mower has brass bushings and triple pawl ratchets. The roller tends to make a smooth and even soil, and rolls down upheavals caused by dampness and worms. Furnished with 6 blades in revolving cutter 16-inch, including grass box. . . . \$27.00 18-inch including grass box \$29.00

Coldwell's Imperial High Wheel

THE workmanship upon it is superior to that of any other make. The joints are closely fitted, insuring a noiseless, light-working and durable machine. It is nicely balanced, enabling the operator to handle it with ease. Furnished with five blades in revolving cutter.

"Planet Ir" Jarm & Garden Tools

PLANET Jr. means on a farm or garden tool, the world over, that it is the latest improved, lightest, strongest, most useful and economical tool of its kind. With Planet Jrs. come less work, bigger crops, more money. The Planet Jr. Catalogue is an instructive handbook of short cuts to best results for farmers and gardeners. It illustrates fifty-five latest improved Planet Jr. tools, showing many in use. Seventy-two helpful pages. Write for it at once!

The Planet Jr. Seed Drills

No. 4 D. Planet Jr. as a Hill and Drill Seeder only. \$15.00

THIS is a new combined tool of great value to thousands of gardeners who have never felt able to own either a seed drill or a wheel hoe. It is thoroughly well made and offered at a price that makes it pay the smallest gardener.

The Planet Jr. Double Wheel Hoes

ARE the greatest cultivating tools for the onion, and for every grower of garden crops from drilled seed. They do more and do it better and easier than can possibly be done in any other way. Works both sides of plants thoroughly and rapidly at one passage until crops are 20 inches high. Indestructible steel frame and steel leaf lifters.

No. 11. Double Wheel Hoe. Has one pair of 6-inch hoes, one pair 4½-inch hoes, two pairs hollow steel cultivator teeth, one pair plows, two 3-tooth rakes, two 5-tooth rakes and two leaf lifters. Price... \$15.50

Equipment: One pair of 6-inch hoes; four steel cultivator teeth; one pair of plows; two leaf lifters.

A NEW TOOL, especially pleasing to all who work peat lands. There are three adjustable discs on each side, oil tempered, which may all be used at once or one or two on a side, as preferred.

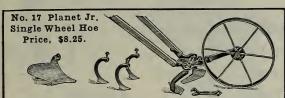

The set of Prong Cultivator Teeth will be found invaluable in general cultivation. The tooth next to the row is narrow and is arranged to run shallow, the middle tooth is wider and runs one-half inch deeper, while the outside tooth is still wider and runs another half-inch deeper, so that the work is finer and shallower next to the row, to avoid injury to the plants, and deeper in the center. The teeth are also set out of line from front to back, which makes them work with greater freedom.

The disc and cultivator teeth attachments will fit the other single and double wheel hoes (except No 19), and are sold separately.

Discs, per pair	\$3.50
3-prong cultivator teeth, per pair	2.00
Double Mouldboard Plow for Double Wheel Hoe each	2.00
Plows for Double Wheel Hoes, per pair	1.50
Wheel Hoe Sweep, per set of four, with two standards for Double Wheel Hoe, per set	2.75

PLANET JR. SINGLE WHEEL HOES AND ATTACHMENTS

WE offer these Single Wheel Hoes as the highest type of their class. They have a great variety of tools which adapt the implements to a large variety of work, and there is scarcely any garden culture of which they are not capable.

You can do more and better hoeing with it in one day than you can do in three days with a hand hoe.

The Hoes exchange sides to work to or from the row, and change of wheel regulates the depth.

The Cultivating Teeth are oil tempered and work admirably, are changeable for pitch and are useful for marking out rows.

The Plow is large and capable of heavy work.

It is light, handy and adapted to almost every garden use. The Steel Wheels are particularly well made, with heavy steel spokes, and they run easily and are

made up true.

The Frame is steel and practically indestructible.

The wheel arm and leaf guard are steel also. The handles are adjustable in height.

The Plow is of superior design, complete with landside; is large and capable of heavy work. It is generally the first attachment to be used in the spring.

No. 33 is the Single Wheel Hoe portion of No. 31 Combined Seeder and Wheel Hoe. This tool has one large garden plow, one 5-inch sweep, one 10-inch sweep, one 2-inch cultivator tooth, one 5-tooth prong hoe.

This new member of the "Planet Jr." family will appeal to all those who prefer a high wheel for their garden work. Where the soil has not been so thoroughly and carefully prepared, the high wheel undoubtedly makes an easy running tool. The handles are strong and are provided with "plow handle" grip. They are adjustable for height to suit adult or child \$5.00.

Planet Jr. Grass Edger. With this edger you can cut the turf at the speed of a walk. It can be set to allow the wheel to run either on the walk or on the grass. \$8.50

STUCCO BIRD HOUSES

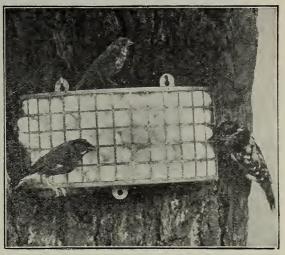

THE birds which nest and harbor in cavities and hollows are in most instances the most valuable of our native birds, which love the vicinity of man, seemingly not only to delight him with chirp and song, but are the most diligent to keep plant life free from parasites and devouring insects.

Our model hutlets and cabins which we provide for these charming entertainers are appreciated by all bird lovers.

The Dodson Improved Sparrow Trap

The Dodson Sparrow Trap is made of tinned wire, electrically welded, strong and durable-will last for years. It has sharp, adjustable needle points projecting from the mouth of each of the two funnels, which effectively prevent any sparrows from getting out of either the front or second enclosure. Size 36 x 18 x 12 inches.

Poultry Appliances and Supplies

PRAIRIE STATE SAND TRAY INCUBATORS

If you are in search of the best Incubator manufactured, the one that will hatch the largest number of strong, vigorous chicks, the Prairie State is the machine to buy.

THE Prairie State Incubator was first marketed in 1889, incorporating three essential principles in design which have been continued to the present day—top-radiant heat, down-draft ventilation, and applied moisture. They have been improved from time to time as experience has warranted, but in points of efficiency, economy, safety and service they have held unchanged the title through these years of national standard in incubator construction.

They are built of cypress—the wood everlasting—highly finished for attractive appearance, double-cased, positively insulated with high grade cotton and fitted with the best grade hardware on the market. Temperature regulation is automatic and sensitive, accomplished by zinc and steel toggle-joint thermostat. The heating and ventilating currents are in one, so that when heat is supplied ventilation is assured. These currents are furnished by an exclusive design heater, examined and approved under direction of Underwriters' Laboratories, Inc.

Every Prairie State is insurable. Moisture is constantly supplied by the famous patented Prairie State Sand Tray, insuring uniform evaporation at all times and uniform, relative humidity in the egg chamber.

Built in four sizes, ranging from 100 to 390 eggs. Egg Trays of light basswood and galvanized wire cloth. Nursery mats are provided for the four machines. All Prairie States are equipped with thermometers, egg testers, lamps and everything complete, ready to operate. Air distribution in all models is effected by the patented eddy-current distribution sheet at top of machine. The four diffusion machines have double bottoms with nursery; ventilation accomplished by the air diffusion method.

The Newtown Oil-Burning Colony Brooder

FOR several years the coal-burning colony brooder has been generally recognized as the acme of brooding efficiency, but as a result of the inability to procure the proper grade of chestnut anthracite coal, probably the greatest problem of poultrymen was to find a substitute for the coal heated brooder.

Drooder.

One of the big faults of oil-burning brooders has been their inability to produce and properly distribute over a large floor space sufficient quantity of heat to make possible the successful brooding of large flooks of chicks in cold weather.

The construction of the Newtown Oil-burning Colony Brooder is simplicity itself. It consists of the heater and deflector. The heater includes the blue flame wickless burner, automatic oil feeder, and oil fount all securely mounted on a heavy match base and the heat radiator which is buffed within heavy metal base, and the heat radiator which is bolted within the deflector.

Each brooder is shipped with everything complete in one crate, ready to operate. A thermometer and full instructions for operating are furnished with each brooder.

MALTOID MILK-BONE

DOGS cannot and do not properly digest the same foods as human beings. Maltoid Milk-Bone is scientifically compounded and a perfectly balanced ration, composed of all the good things which a dog enjoys and can be fed exclusively, making happy and contended dogs and puppies.

Put up in sanitary and economical packages, insuring freshness.

Made in sizes for dogs and puppies. 20c pkg., mailing weight 1 lb; 35c pkg., mailing weight, 3 lbs.; postage extra, see postal rates—2nd page of cover.

SPRATT'S PATENT DOG AND PUPPY CAKES

REQUIRE no preparation, no trouble, no cooking, and are adapted for all breeds of dogs. They are invaluable as a change of food during the warm weather, and are used by the leading kennel owners and breeders throughout the world. Kennel owners look upon these cakes as a necessity, especially during the summer months.
